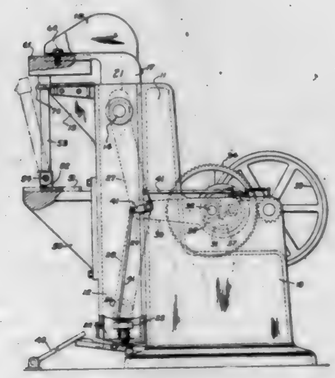
28. In a machine of the character described, the combination of a power unit having laterally arranged traction wheels, a frame arranged forwardly of the traction unit to be pushed thereby, primary earth working tools connected with said frame to engage the ground area spanned by said traction wheels, secondary earth working tools arranged to engage the earth traversed by the respective traction wheels, and means for simultaneously raising and lowering the primary and secondary earth working tools.

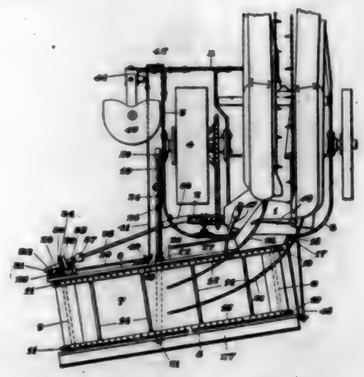
34. A power propelled tillage implement having in combination a front frame, one or more dirigible wheels supporting said frame, a plurality of gangs of cultivating devices connected with the said frame and adapted to be swung laterally, a second frame adjustably connected to the rear of the cultivator frame, means for angularly adjusting said frame for steering the implement, power driven frame-pushing devices mounted on the second frame and engaging with the ground at a transverse line in the rear of the said dirigible wheels and of the cultivating devices, and means connecting the dirigible wheels and the gangs, whereby, when the gangs are being pushed from the rear and are being shifted laterally the dirigible wheels are simultaneously steered.



38. In a cultivating mechanism of the class described, the combination of a frame, dirigible wheels connected to and supporting the frame, tool gangs connected to the frame and adapted to swing laterally in relation thereto around vertical hinges, power devices for propelling said frame, gangs and wheels, and means connecting the tool gangs and the wheels for swinging the gangs laterally and simultaneously swinging the wheels and means for steering said mechanism independently of said gangs.

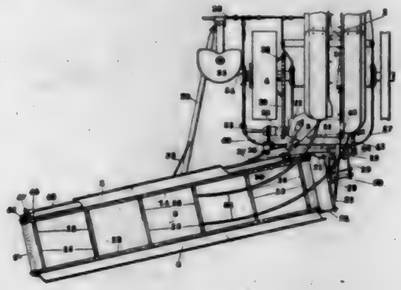
1,535,440. FEED-WATER SYSTEM. CHARLES ULYSSE SAVOYE, Hackensack, N. J., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Feb. 26, 1923. Serial No. 621,492. 9 Claims. (Cl. 103—1.)

1. In a feed water system, a steam boiler, a closed tank arranged to receive the condensate from exhaust steam, connections between said tank and the boiler, a clear water reservoir, a normally closed connection between the reservoir and the tank, and means, controlled by the pressure in said closed tank, to open the connection between the tank and the reservoir when the pressure in this tank exceeds a predetermined amount.



1,535,441. BOX-FORMING MACHINE. DAVID WILKIE, Chattanooga, Tenn., assignor to The Guardian Savings and Trust Company, Cleveland, Ohio, a Corporation of Ohio. Filed June 16, 1924. Serial No. 720,162. 4 Claims. (Cl. 93—36.)

1. In a paper box making machine, the combination of a support, a fixed jaw carried thereby, means forming a jaw guideway, a movable jaw slidably mounted in said guideway, means for reciprocating the movable jaw, a bracket carried by said support, and a pivoted arm carried by said bracket and engaging the movable jaw independently of said fixed jaw.

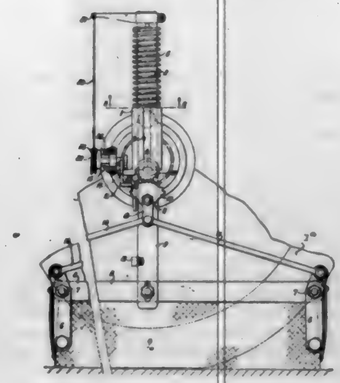


1,535,442. BUNDLE CARRIER. FREDERICK D. WILSON, Moline, Ill., assignor to Deere and Company, Moline, Ill., a Corporation of Illinois. Filed Sept. 7, 1915. Serial No. 149,347. Renewed Feb. 28, 1922. Serial No. 539,907. 15 Claims. (Cl. 56—121.)

1. The combination with a corn harvester and binder, of a bundle carrier mounted thereon at an oblique angle to the line of draft of the harvester, means to guide bundles to fall lengthwise of the carrier as they are

received from the harvester, and means for moving the bundles longitudinally of the carrier in substantial parallelism with the longitudinal axis thereof.

1,535,443. ELEVATOR FOR CORN HARVESTERS. FREDERICK D. WILSON, Moline, Ill., assignor to Deere and Company, Moline, Ill., a Corporation of Illinois. Filed Dec. 5, 1916. Serial No. 135,184. Renewed May 28, 1921. Serial No. 473,315. 11 Claims. (Cl. 56—120.)

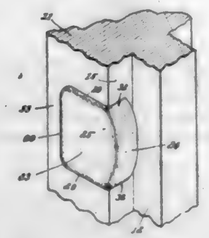


1. A harvester, a conveyer adapted to receive corn therefrom and convey it stubbleward, a truck pivotally connected to the harvester and supporting the conveyor whereby the weight of the conveyor is carried by the truck, and means on the rear of the harvester to which the receiving end of the conveyor is pivotally connected and about which it may raise or lower in a vertical plane, said means including a pivot having its axis substantially in line with the longitudinal axis of the conveyor and about which said conveyor is adapted to rock.

1,535,444. SPLASH-PREVENTING ATTACHMENT FOR MOTOR VEHICLES. CHARLES ANDERSON, Astoria, N. Y. Filed May 23, 1924. Serial No. 715,295. 2 Claims. (Cl. 280—153.)

2. A splash-preventing attachment for motor road vehicles comprising a socket member disposed laterally of a road wheel, said member having a slot extending diametrically of said wheel, a spring-urged rod accommodated in said socket member, an elongated oscillatory

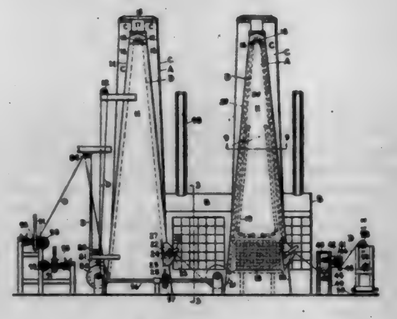
member engageable with the slot in said socket member and journaled on said rod normally in position to close the lower end of the slot and adapted, when oscillated, to enter the slot and permit endwise movement of said rod in said socket member, a splash guard carried by said rod, a train of mechanism for imparting oscillatory movement to said elongated member to permit elevation of said guard, said train including levers engageable with obstacles on the roadway, and connections between said levers and said elongated member, means for restoring said guard to operative position including a friction wheel, rotatable means presenting a friction surface, and a shifting device adapted to shift the friction wheel into and out of contact with said



surface, said shifting device including a striker on said rod and a lever in the path of said striker, and serving, when rocked by said striker on upward movement of said rod, to establish driving relation between said friction wheel and said surface, a drum fitted on said friction wheel, a flexible wire wrapping around said drum and connected to said rod, whereby, when said friction wheel is rotated, said flexible wire is wound on to said drum and said rod is restored to operative position, and a supplementary striker on said rod engageable with said lever and adapted on the descent of said rod to rock said lever and thereby to bring said friction wheel out of contact with said surface.

1,535,445. METHOD OF PREPARING A CEMENTITIOUS COMPOSITION. JOSEPH HAY AMIES, Philadelphia, Pa. Filed Jan. 29, 1921. Serial No. 441,087. 7 Claims. (Cl. 106—24.)

3. The method of preparing a cementitious composition which consists in preparing an alkaline mixture by the admixture of water and an alkaline salt adding thereto and mixing therewith earthy material to cause disintegration thereof the said alkaline mixture serving to aid in neutralizing the acids contained in said earthy material, then adding thereto and mixing therewith hydroxide of calcium and finally adding to the mass and mixing therewith Portland cement which cement associates with hydroxide of calcium to produce a full alkaline reaction.

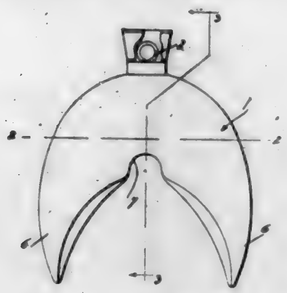


1,535,446. DOOR BUFFER. JAMES T. ATWOOD, Rockford, Ill. Filed Nov. 19, 1924. Serial No. 750,730. 1 Claim. (Cl. 16—86.)

In combination a door or a door casing having a socket the opposed sides of which have inwardly turned retaining members, a door buffer made of resilient material and adapted for edgewise insertion into said socket and having in its sides recesses for the reception of said retaining members, the inserted end of the buffer being shaped so as to be compressed by contact with said

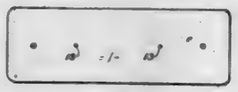
retaining members when inserted and being adapted to return to a normal position in contact with said members to yieldingly hold the buffer from withdrawal.

1,535,447. MACHINE FOR FORMING ARTIFICIAL LEATHER OR THE LIKE. CLARENCE W. AVERY, Detroit, Mich., assignor to Ford Motor Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 16, 1922. Serial No. 529,797. 6 Claims. (Cl. 34—48.)



6. In an oven and machine for forming artificial leather, a chamber having upwardly converging end walls, an apron disposed in position spaced from and parallel with the inner surfaces of said walls, the edges of said apron being bent back upon themselves to form channel members spaced from said walls, heating units disposed in the bottom of said chamber, and means for causing a strip of flexible material to travel between the apron and said walls with its edges within said channels whereby the major portion of the heated air currents from said heating units may be caused to strike the central portion of one surface of the strip of pliable material.

1,535,448. WATER BOTTLE. WILLA BOORD, Houston, Tex. Filed Apr. 4, 1923. Serial No. 629,850. 1 Claim. (Cl. 128—252.)

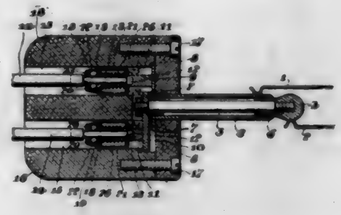


A water bottle concaved upon its rear surface to fit the human face and of greater length than breadth, the bottle being supplied on its rear surface with projections so located as to fit upon the eyes of the wearer, the bottle being provided in its lower edge with an opening having converging inner edges which extend upwardly in the direction of the length of the bottle, the bottle having a narrow and pronounced nose-seat distinct from

said edges of the opening and located at the upper end of said edges, the seat being extended upwardly to a point closely adjacent to the projections, the opening

forming side arms of greater length than the distance between the upper end of the seat and the upper edge of the bottle, and of such length as to extend downwardly upon the cheeks of the wearer.

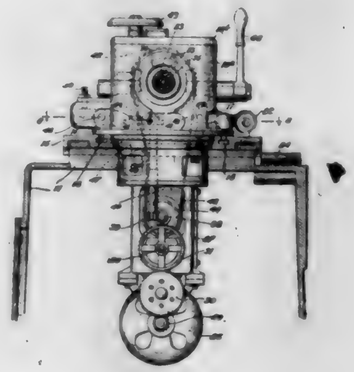
1,535,449. HOUSING FOR TAPPET AND ROCKER ARMS FOR INTERNAL-COMBUSTION ENGINES. THOMAS P. CAIN, Wichita, Kans. Filed May 2, 1923. Serial No. 636,123. 1 Claim. (Cl. 123—90.)



In a housing for tappets and rocker arms for internal combustion engines, a housing having its edges fitting closely to the outside walls of the engine, said housing comprising two parts namely a cap and side wall, said cap having apertures functioning as oil holes, apertures in alignment with rocker bearings, bolts connected to said bearings and extending through last said apertures and having nuts screwed thereon as binding means, the edges of said cap adapted to rest on the engine and on the side wall, a fabric sheet interposed within said cap and fitting closely to the side walls thereof, said fabric sheet being saturated with oil, said oil being poured through first said aperture, said oil saturated fabric sheet functions as dust proof means for the rocker arms of said engine, a side wall engaging and covering that side of the engine on which the rocker arm connecting rods are positioned, bosses on said side walls engaging with the walls of the cylinders as spacing means, an opening in said side wall to receive the exhaust pipe connection, an opening through which will pass the distributor adjusting rod, an anchor bolt and plate to bind said side wall firmly to the walls of the engine, said adapted to close the space between the two intermediate cylinders of the engine completing the housing.

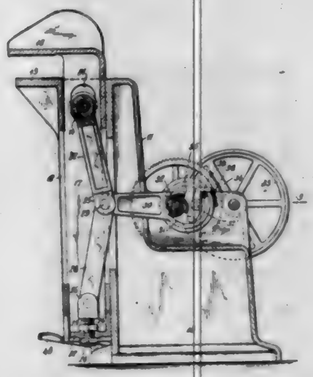
1,535,450. IODINE AND PROCESS OF MAKING THE SAME. WALLACE L. CHANDLER, East Lansing, Mich. Filed Mar. 16, 1923. Serial No. 625,670. 6 Claims. (Cl. 23—216.)

1. The process of producing iodine crystals consisting in the treatment of fairly concentrated acidified solutions of alkali-metaliodides with fairly concentrated solutions of chlorinated lime, bringing about a vigorous oxidation of these acidified strong solutions resulting in the formation of crystalline iodine, as described.



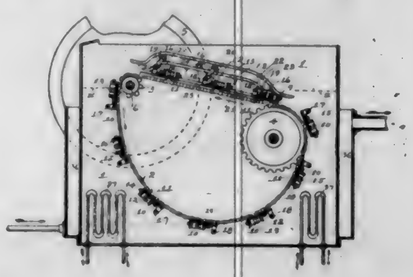
4. Iodine crystals, as specified, readily soluble in water, castor oil, etc., and vigorously active as a medicament and disinfectant.

1,535,451. ELECTRICAL CONNECTER. SAMUEL COHEN, Brooklyn, N. Y. Filed July 1, 1921. Serial No. 481,867. 2 Claims. (Cl. 173—259.)



1. A plug structure having a base portion and an open end, a hollow conducting member immovably connected to said base portion and having an elongated passage opening towards said open end, movable gripping means carried by said conducting member and free to move laterally with respect to said passage, means adapted to restrain said gripping means from any substantial longitudinal movement in a direction towards said base portion, an outer sleeve slidably mounted on said conducting member and adapted to actuate said gripping means, the movement of said sleeve towards said open end being adapted to permit said gripping means to move freely in a direction away from said passage, and the movement of said sleeve towards said base portion being adapted to force said gripping means in a direction towards the axis of said passage, and a spring adapted to urge said sleeve in a direction towards said base portion.

1,535,452. GRINDING MACHINE. PRENTICE CONRADSON, Evansville, Wis., assignor to Giddings & Lewis Machine Tool Company, Fond du Lac, Wis., a Corporation of Wisconsin. Filed Feb. 15, 1923. Serial No. 619,123. 15 Claims. (Cl. 51—237.)

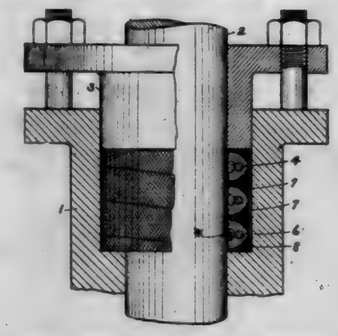


1. A machine of the character described having, in combination, a base, a carriage mounted thereon and comprising a base section mounted to slide on ways on said base and a body section mounted on said base section for rotary adjustment about a vertical axis, a spindle mounted in the upper part of said body section, a motor mounted on the underside of said body section, and a driving connection between said motor and said spindle.

1,535,453. BOX-FORMING MACHINE. SIMON COOPER, New York, N. Y., assignor, by mesne assignments, to The Guardian Savings and Trust Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 2, 1920. Serial No. 400,709. Renewed Sept. 15, 1924. 19 Claims. (Cl. 93—36.)

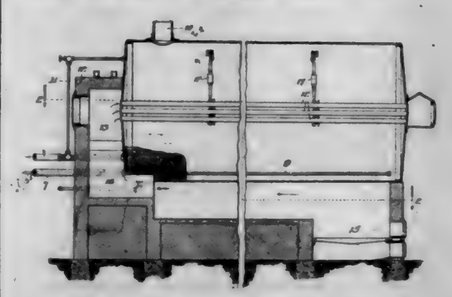
1. In a paper box making machine, the combination of a heavy base, an anvil demountably secured to the front side of the base and constituting the lower jaw of a clamp, said anvil provided with a vertically extending guideway, a jaw post slidably mounted in said guideway, having a long bearing therein and provided with a movable jaw coacting with the anvil to form the clamp, rotary power means carried by said base adjacent the rear side thereof and means carried by the base between said power means and said jaw post for translating the rotary movement of said power means into relatively short but powerful reciprocatory movements of the movable jaw.

1,535,454. APPARATUS FOR FORMING AND COOLING LEAF SPRINGS AND THE LIKE. ALBERT P. CRELL, Grand Rapids, Mich., assignor of one-half to William Smalley Daniels, Grand Rapids, Mich. Filed Apr. 24, 1919. Serial No. 292,370. 6 Claims. (Cl. 266—6.)



1. In a structure of the character described; a vessel adapted to contain a cooling liquid; a conveyor movable in the vessel and carrying co-operating interrelatively-movable clamp members adapted to clamp the work between them; an arm swingably carried by the conveyor and adapted to interrelatively move said members into and out of clamping position; a guide for the arm mounted extraneously of the conveyor and adapted to swing the arm to interrelatively move said members as aforesaid.

1,535,455. AIR-BRAKE EQUIPMENT. JOSEPH M. DAPRON, St. Louis, Mo. Filed June 4, 1923. Serial No. 643,418. 3 Claims. (Cl. 303—6.)

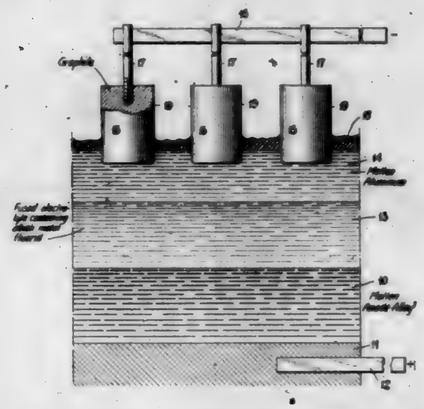


1. The improvement in air brake equipment comprising a series of air-brake equipped vehicles; one or more doors on each of said vehicles; and means arranged to apply the brakes by the opening of either door of either car, and to disengage said brakes by the closing of said door.

1,535,456. PACKING. THOMAS BLAKE DUPREE and HAMPTON P. RHODES, Houston, Tex.; said Rhodes assignor to said Dupree. Filed Dec. 5, 1922. Serial No. 604,994. 5 Claims. (Cl. 154—45.5.)

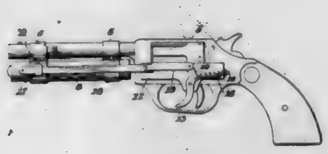
1. A packing constructed with a core formed of asbestos surrounded by soft metal, an outside cover for said core formed of resilient material arranged in two lengthwise sections, said core and metal being saturated with a lubricant, and an inside asbestos wearing surface on said core.

1,535,457. ART OF DISTILLING PETROLEUM OILS. GEORGE H. FIFIELD, Whiting, Ind. Filed Apr. 26, 1920. Serial No. 376,630. 7 Claims. (Cl. 196—85.)



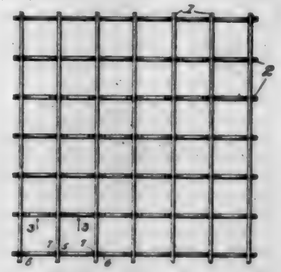
1. A shell still, means for supplying steam at the bottom of the still; means for heating the lower portion of the still surface; a plurality of tubes passing thru the still near the center line of the still providing a heating area greater than the heated area of the still surface and means for heating the surface of said tubes to a lower temperture than the temperature of the heated still surface.

6. The process of fire and steam distillation of hydrocarbon oils which consists in maintaining a body of oil in a confined space, applying heat at an average tempera-



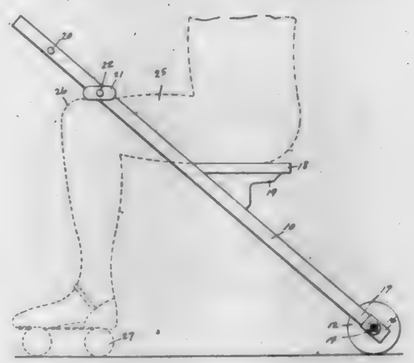
ture above 1000–1100° F. at the bottom of the confined body of oil, injecting steam thereinto near its bottom and applying heat to an area in excess of that of the bottom of the oil body to which heat is applied, said area being arranged in distributed zones within the oil intermediate its surface and its heated bottom at an average temperature more than 300° less than that applied at its bottom, and withdrawing the evolved vapors.

1,535,458. METHOD OF AND APPARATUS FOR ELECTROLYTIC REFINING. FRANCIS C. FRARY, Oakmont, Pa., assignor to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Nov. 5, 1923. Serial No. 672,867. 6 Claims. (Cl. 204—20.)



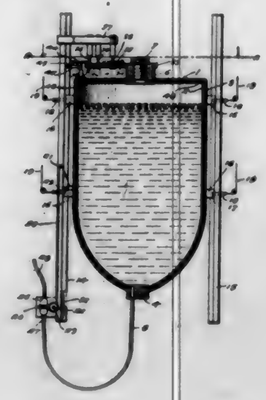
1. In a process of electrolyzing a fused electrolyte containing a fluorid of an alkali metal, in which a layer of molten metal floating on the electrolyte acts as cathode, conveying electrolyzing current between the cathode and the external circuit through a connector the lower end of which is composed essentially of graphite in contact with said layer of molten metal.

1,535,459. ATTACHMENT FOR REVOLVERS. ERICK A. FREDRICKSON, Drayton, N. Dak. Filed Oct. 30, 1922. Serial No. 597,891. 1 Claim. (Cl. 240—8.4.)



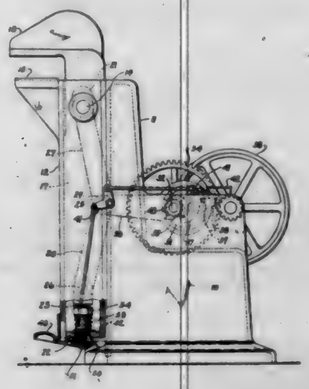
In a device of the class described the combination with a fire arm including a barrel; of a flash light removably secured to and suspended below said barrel, said flash light being provided with a circuit closing operating member and means for manually actuating said member comprising a plate secured to the body of said fire arm, said plate being provided with a depending central portion and a rearwardly projecting lug, a trigger fulcrumed intermediate of its ends on the depending central portion of said plate, a longitudinally slidable bar supported immediately adjacent said flash light having connection with said circuit closing operating member, a link pivotally connecting the inner end of said bar with the inner end of said trigger, and a coil spring having one end engaged with said trigger intermediate its fulcrumed and inner end and having its opposite end engaged with the rearwardly projecting lug on said plate.

1,535,460. FILLER DEVICE FOR EGG CASES OR CRATES. WILLIAM FREERICKS, Steamboat Rock, Iowa. Filed Mar. 25, 1924. Serial No. 701,777. 2 Claims. (Cl. 217—31.)



1. A filler of the character described comprising strips extending parallel to each other and provided with transversely extending slots substantially rectangular in shape and having V-shaped notches at the ends of the slots providing inwardly converging faces, and a second set of strips extending transversely to the first strips and through the slots formed therein, the strips of the second set being each provided with V-shaped notches leading from opposite side edges in opposed relation to each other and providing reduced portions adapted to be positioned in the slots of the first mentioned strips, the second mentioned strips being bevelled along the edges of the V-shaped notches to provide converging faces fitting into the V-shaped notches of the first mentioned strips and contacting with the converging faces thereof.

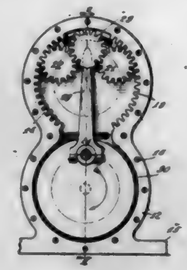
1,535,461. COASTING TOY. HOWARD R. FREVERT, Portland, Oreg. Filed Sept. 24, 1924. Serial No. 739,614. 2 Claims. (Cl. 208—182.)



1. In a coasting device, the combination of a longitudinal frame having a fork formed at one end with a wheel mounted in said fork; a seat rigidly mounted on said frame near its middle; and a pair of rotatable flat arms projecting from the side of said frame adapted to rest upon the legs of a rider while sitting on said seat astride said pole.

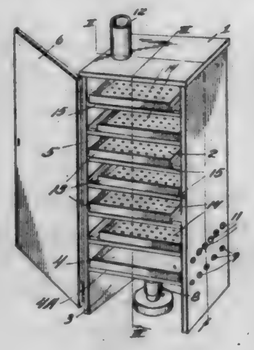
1,535,462. FUEL TANK FOR AEROPLANES AND THE LIKE. MARIO GARAGNANI, Paris, France, assignor of one-half to Henry A. De Mailly, New York, N. Y. Filed Mar. 14, 1924. Serial No. 699,339. 11 Claims. (Cl. 244—1.)

11. A fuel tank comprising inner and outer sections contacting throughout their surfaces and having relative movement.



1,535,463. BOX-FORMING MACHINE. DON GAULT, East Lake, Tenn., assignor to The Guardian Savings and Trust Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 14, 1923. Serial No. 651,504. 5 Claims. (Cl. 93—36.)

1. In a box-forming machine, the combination of a movable jaw, a toggle for reciprocating the same, driving mechanism for actuating the toggle, and resilient cushion means for cushioning the blow of the movable jaw to limit the pressure applied thereby.

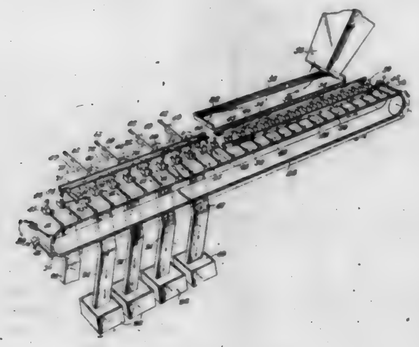


1,535,464. FLUID PUMP OR MOTOR. JOHN W. GURLEY, Indianapolis, Ind. Filed Oct. 24, 1924. Serial No. 745,549. 6 Claims. (Cl. 103—116.)

1. In combination, a casing having internally two opposite flat walls and two curved walls, said curved walls being provided with internal gear teeth constituting parts of the same internal gear, two hypocycloidal gears meshing with the teeth of said two curved walls, a third gear meshing with said two hypocycloidal gears, and a crank-shaft having a crank connected to said third

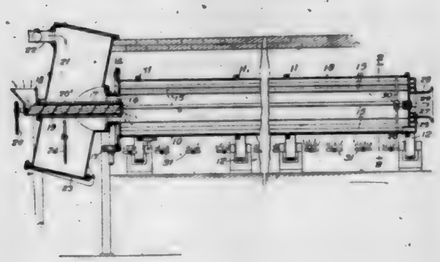
gear by a connecting rod rigid with said gear, said casing being provided with inlet and exhaust passages, and said three gears fitting between said parallel flat walls.

1,535,465. GRAIN SPROUTER. WILLIAM H. HACKMAN, Chapman, Kans. Filed Mar. 31, 1924. Serial No. 703,278. 5 Claims. (Cl. 47—16.)



2. A grain sprouter provided with a cabinet, having an air inlet, an air outlet, a plurality of grain trays interposed between said air inlet and said air outlet and extending alternately from opposite sides of said cabinet to within a distance from the other wall thereof, to form a zigzag passage from said air inlet to said air outlet, a water pan below said air inlet and means for heating said water pan.

1,535,466. MACHINE FOR PRODUCING DISKS FROM CORK OR CORK COMPOSITION. OSCAR J. HARMS, Baltimore, Md., assignor to The Crown Cork and Seal Company of Baltimore City, Baltimore, Md., a Corporation of Maryland. Filed Mar. 19, 1921. Serial No. 453,776. 12 Claims. (Cl. 144—2.)

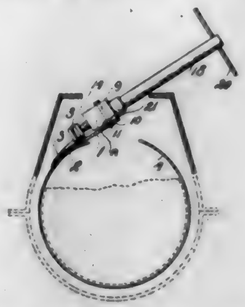


1. In a machine for cutting sealing-disks from cork plugs the combination with an endless series of clamp devices, of two spaced-apart upper horizontal supports, two spaced-apart lower horizontal supports said upper and lower horizontal supports sustaining some of said clamp devices, a circular device at each end of said upper and lower supports to direct the clamp devices while the latter travel between said two sets of supports, a flexible device traveling around said two cir-

cular devices and between the two upper and two lower horizontal supports said flexible device being connected to each of the clamp-devices to cause them to travel

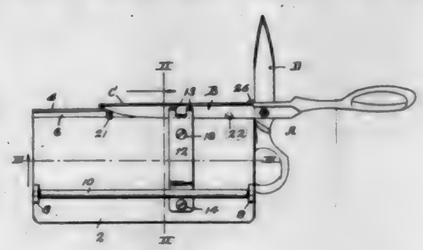
along said supports, a series of cutters along the path of the clamp-devices and means for actuating the clamps between successive cutters to feed the cork plug forward.

1,535,467. PROCESS OF EXTRACTING MERCURY FROM CINNABAR. EDWARD E. HEDGES, New York, N. Y., assignor to The Hedges New Education Process Corporation, Newark, N. J. Filed Nov. 29, 1922. Serial No. 604,041. 6 Claims. (Cl. 75—22.)



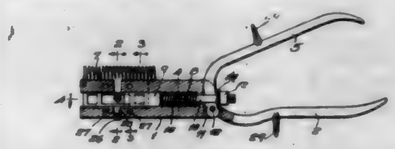
1. The process of extracting mercury from cinnabar consisting in subjecting cinnabar to steam superheated above the vaporization point of mercury and excluding the air.

1,535,468. PROCESS OF EXTRACTING SULPHUR FROM ITS ORES. EDWARD E. HEDGES, New York, N. Y., assignor to The Hedges New Eduction Process Corporation, Newark, N. J. Filed Nov. 29, 1922. Serial No. 604,042. 7 Claims. (Cl. 23—10.)



1. The process of extracting sulphur from its ores consisting in charging the sulphur-bearing material into one end of an elongated retort, cascading the material progressively to the opposite end to discharge, introducing a fluid heated to sulphur-vaporizing temperature at the end opposite the charging end and causing a continuous flow of said fluid throughout the length of said retort and the cascading material to liberate and take up the sulphur vapors, taking off the vapor laden fluid at the charging end and condensing the vapors.

1,535,469. LUG-REMOVING DEVICE. MICHAEL HOFFMAN, Los Angeles, Calif. Filed Oct. 13, 1924. Serial No. 743,261. 4 Claims. (Cl. 81—3.)

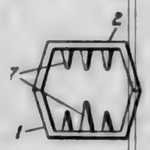


1. A device for removing lugs from transmission bands, comprising a shank having means for engaging a lug, a member operable on said shank, an elongated wedge loosely connected to said member, and means for operating said member on said shank to force said wedge between the lug and band.

1,535,470. SCISSORS SHARPENER. THOMAS O. HOPKINS and SIDNEY H. EASTERDAY, Kansas City, Mo.; said Easterday assignor to said Hopkins. Filed Feb. 18, 1924. Serial No. 693,550. 2 Claims. (Cl. 76—82.)

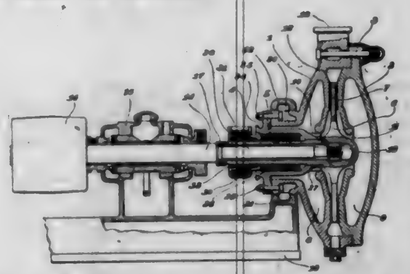
2. In a scissors sharpener, a bed-plate, means for securing either blade of a pair of scissors in position upon said bed-plate, a sharpener guide mounted on the bed-plate, and two elements spaced apart and threaded in said bed-plate to adjust the secured end of either blade up or down to bring the same in parallel relation with said guide.

1,535,471. HAIR CLIPPER. ESHUE K. HOWELL, Chicago, Ill. Filed Aug. 30, 1923. Serial No. 660,198. 4 Claims. (Cl. 30—1.)



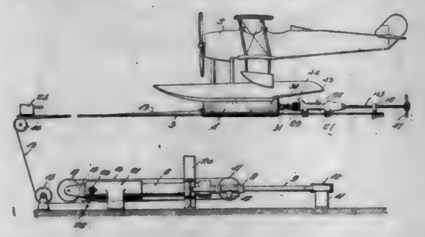
1. In combination, an elongated body member having a handle portion thereon, clipper blades adapted to be reversibly arranged on said body member at one end thereof so as to present their cutting edges at either side, and operating means connected to said handle to actuate said blades.

1,535,472. RADIATING ELEMENT FOR GAS HEATERS. ALFRED H. HUMPHREY, New York, N. Y. Filed June 12, 1920. Serial No. 388,612. 2 Claims. (Cl. 126—92.)



1. As an article of manufacture a foraminated tubular radiating element for gas stoves consisting of front and back portions formed of earthy material, the back portion being of uncolored material and the front portion having colored portions of the same material incorporated as a homogeneous part thereof.

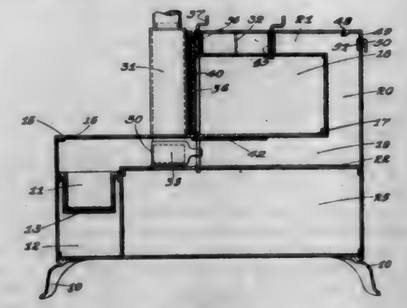
1,535,473. METHOD OF MANUFACTURING RADIATING ELEMENTS FOR GAS HEATERS. ALFRED H. HUMPHREY, New York, N. Y., assignor to General Gas Light Company, Kalamazoo, Mich. Filed Feb. 15, 1921. Serial No. 445,182. 1 Claim. (Cl. 18—60.)



The method of manufacturing tubular foraminated radiating elements for gas heaters consisting of molding complementary front and back portions from uncolored plastic material and embedding in the surface of the front portions granules of colored earthen material, said front and back portions being otherwise uncolored providing uncolored rear and inner surfaces, joining the front and back portions while plastic, and firing.

1,535,474. PUMP. OYSTEIN JACOBSEN, Dayton, Ohio, assignor to The Duriron Company, Inc., a Corporation of New York. Filed Jan. 18, 1924. Serial No. 687,107. 4 Claims. (Cl. 103—114.)

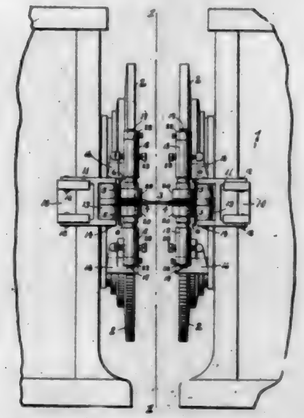
1. In combination in a centrifugal pump, a casing provided with an opening through its side, a composite drive shaft, comprising an inner rod of strong, tough metal and a surrounding sleeve of corrosion resisting composition extending through such opening, an impeller or runner carried by the inner end of said sleeve, a stuffing box member carried by the casing extending into said opening to a point adjacent the impeller, and constituting a bearing for said sleeve at such point, and packing lying in said member and engaging said sleeve.



1,535,475. AIRPLANE CATAPULT. CARL F. JEANSEN and ELMER F. STONE, Washington, D. C. Filed Feb. 8, 1924. Serial No. 691,441. 25 Claims. (Cl. 244—2.)

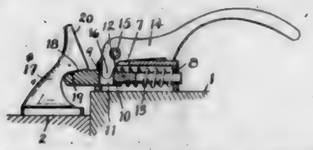
2. In an airplane catapult, the combination of a track, a launching carriage adapted to travel on the track, an explosion device for producing expansive gases from an explosive, means for controlling the expansion of the gases, and motion transmitting mechanism for utilizing and transmitting the force of the controlled gases for propelling the carriage.

20. In an airplane catapult, a carriage locking and releasing mechanism comprising a support, a spring-controlled sliding draw-bar on the support, a pivoted latch hook carried by the draw-bar, an independently pivoted dog for holding said latch hook in engaging position, and an adjustable trip device normally fixed from movement relative to the draw-bar for retracting the dog upon a predetermined forward movement of the carriage and draw-bar.



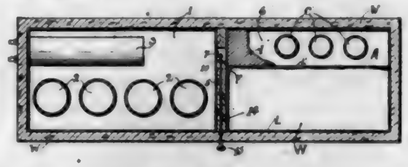
1,535,476. STOVE. BERTRAND B. KAHN, Cincinnati, Ohio, assignor to The Estate Stove Company, Hamilton, Ohio, a Corporation of Ohio. Filed July 16, 1923. Serial No. 651,782. 6 Claims. (Cl. 126—1.)

1. A range of the character described, for utilizing coal, wood, or the like, as fuel, comprising a fire box; an oven having a bottom flue communicating with the fire box, a single end flue located at one side of the oven, a top flue above the oven; the bottom flue having an opening therein connected directly with the flue connection, the top flue having an opening therein connected with the [illegible] flue connection; a damper associated with the first named flue opening and adapted for positioning to connect or disconnect the said bottom flue from the flue connection, the said bottom flue



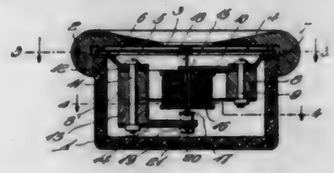
opening being so positioned that when the damper is positioned to connect the bottom flue to the flue connection, the products of combustion from the fire box will escape through the flue connection without heating the interior of the oven.

1,535,477. WELDING-MACHINE GUIDE. THOMAS H. KANE, Youngstown, Ohio, assignor to Truscon Steel Company, Youngstown, Ohio, a Corporation of Michigan. Filed Aug. 15, 1923. Serial No. 657,478. 4 Claims. (Cl. 219—4.)



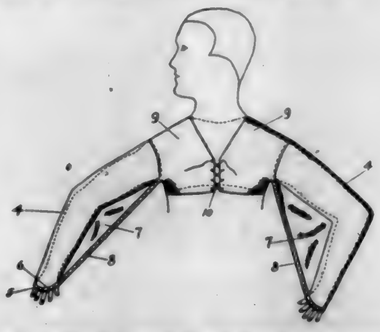
1. A guide mechanism for joist-welding machines comprising a pair of rollers to contact with the edges of the plates constituting the webs of the joists and with the outer sides of the lateral flanges of the angle bars to be attached thereto, and two pairs of rolls to contact with the opposite sides of said flanges.

1,535,478. LATCH. ISAAC S. KEELER, Grand Rapids, Mich., assignor to Keeler Brass Company, Grand Rapids, Mich. Filed June 9, 1923. Serial No. 644,300. 4 Claims. (Cl. 292—173.)



1. In a latch, the combination of a housing having spaced pivot ears on the top thereof and an opening between said ears, the end walls of the housing being provided with opposed bolt openings, a bolt mounted to reciprocate in said openings and provided with an opening aligned with said opening in said housing top, and with a shoulder, a spring disposed on said bolt to engage said shoulder, the opposite end of the spring being supported by the housing whereby the bolt is normally projected, a bolt retracting lever pivotally mounted on said ears and provided with a finger projecting through said opening in said housing to engage said hole in said bolt, said finger constituting a stop limiting the projecting movement of said bolt, and a strike having a beveled keeper coacting with said bolt, the outer side of the bolt being beveled to engage with the edge of the keeper as the bolt is projected into engagement therewith, the keeper engaging the bolt beyond the beveled portion thereof when the bolt is fully projected, said strike having an inclined face with which said bolt coacts as it moves to keeper engaging position.

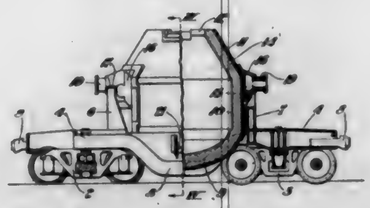
1,535,479. REFRIGERATING APPARATUS FOR SODA FOUNTAINS. HERBERT C. KELLOGG, Detroit, Mich. Filed May 17, 1924. Serial No. 713,942. 12 Claims. (Cl. 257—1.)



1. In combination with a tank having cooling means, a compartment heat insulated from the tank, and metallic heat conductive means between the compartment and the tank adapted to selectively establish heat exchange between the tank and the compartment.

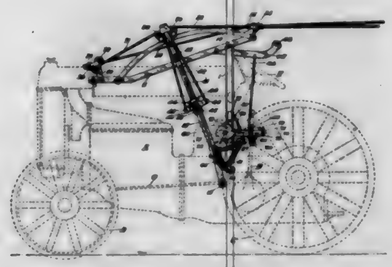
1,535,480. RECEIVER. JOSEPH M. S. KING, East Mill Creek, Utah. Filed Oct. 29, 1923. Serial No. 671,499. 1 Claim. (Cl. 179—119.)

A receiver comprising a shell, a diaphragm at one side thereof, a substantially semi-circular magnet mounted in said shell in a plane parallel with said diaphragm, a pair of pole pieces extending toward the axial line of the diaphragm from the ends of said magnet and spaced apart along said line, a magnetic tubular core coaxial with the diaphragm and disposed between the two pole pieces, said core being secured to one of said pole pieces and spaced from the other, an armature in the space between said core and said other pole piece, a connection between said armature and said diaphragm extending through said tubular core, a coil around said core, and an elongated spring secured at its center to the side of said other pole piece remote from said core, said spring having its ends extended beyond the side edges of this pole piece and bowed, said bowed spring ends being secured to said armature.



1,535,481. SWIMMING APPARATUS. GREGERS G. B. KJELGAARD, Hoosick Falls, N. Y. Filed May 17, 1924. Serial No. 714,065. 6 Claims. (Cl. 9—21.)

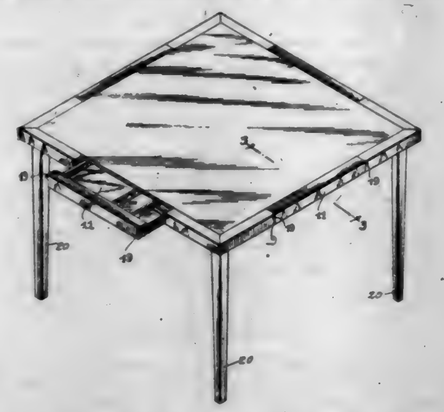
6. A swimming apparatus comprising sheet members adapted to hold fore-arm in a position to form an angle with upper arm, a reinforced edge of said sheets, arm



engaging supports connected with said sheets, finger receiving openings at outer end of arm supports, a body support connected with arm supports and sheets, means for imparting buoyancy to body support, and means for securing said apparatus upon the body.

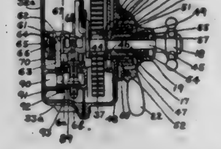
1,535,482. LADLE. FRED E. KLING, Youngstown, Ohio. Filed Oct. 4, 1923. Serial No. 666,454. 5 Claims. (Cl. 22—82.)

1. A ladle for hot metal cars having an approximately hemispherical bottom portion, a cylindrical central portion, and a frusto-conical top or nose portion having its uper end open to form a contracted opening.



1,535,483. ATTACHMENT FOR TRACTORS AND MOTOR VEHICLES. ALFRED W. KNUTSON, Galesburg, Ill., assignor to Alvin V. Rowe, Galesburg, Ill. Filed Nov. 19, 1920. Serial No. 425,261. 8 Claims. (Cl. 180—77.)

1. An attachment for a standard tractor to convert the gear shifting and clutch control to rein control, including means to operate the usual clutch lever, means to operate the usual gear shifting lever, and rein means common to and adapted for actuating both said operating means, said operating means having a predetermined movement relative to each other whereby the clutch is released in advance of the movement of the gear shifting lever.



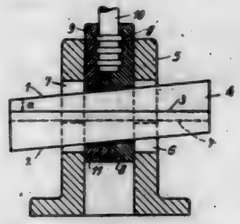
1,535,484. GAME TABLE. ELISABETH GODEY KOHL, Burlingame, Calif. Filed Aug. 6, 1923. Serial No. 655,879. 7 Claims. (Cl. 273—136.)

1. In a game table, a table having drawers, the front of each drawer comprising a rib and a removable section constituting a rack for game pieces, means for producing interlocking connection between the sectional front

of each drawer and the table to retain the sections of the drawer front assembled when the drawer is closed, and means for holding each drawer closed.

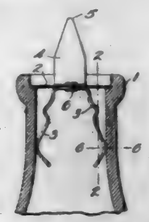
1,535,485. THERMOSTATIC VALVE. FREDERICK CHARLES LEONARD, Providence, R. I., assignor to Leonard-Rooke Company, Providence, R. I., a Corporation. Original application filed Feb. 10, 1921, Serial No. 443,796. Divided and this application filed Nov. 27, 1923. Serial No. 677,318. 4 Claims. (Cl. 277—18.)

4. In a thermostatic valve, a casing having inlets for hot and for cold water and an outlet, mechanism housed within said casing for controlling the flow of water from said inlets comprising moving valves and fixed seats, said casing being composed of two main parts, the one a base part and the other a cover part, and means for supporting said moving valves and fixed seats from said cover part.



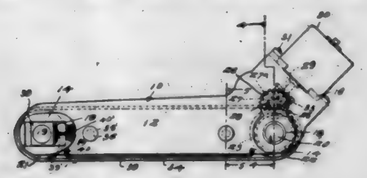
1,535,486. ELECTRIC-LAMP BULB. JAMES W. LUNDY, San Francisco, Calif. Filed Aug. 28, 1922. Serial No. 584,839. 1 Claim. (Cl. 219—45.)

A device such as described, comprising an electric lamp bulb; an illuminating filament arranged horizontally within said bulb; an attaching plug on said bulb supporting said filament; and a depression formed inte-



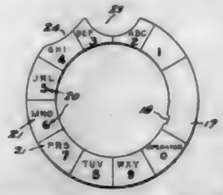
grally with said bulb of substantially the same diameter as said filament and arranged in spaced relation relative to said filament so that the heat of illumination is concentrated on said depression.

1,535,487. WEDGE GEAR. ALEXANDER LUSCHNOWSKY, Vienna, Austria. Filed June 25, 1923. Serial No. 647,709. 4 Claims. (Cl. 25—104.)



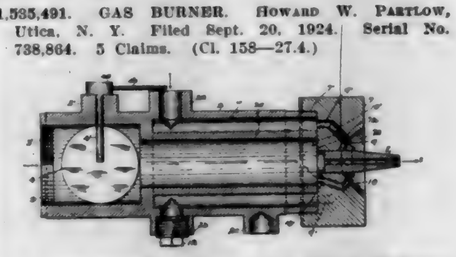
2. A wedge gear comprising a wedge, a casing and a driven part, two oppositely directed parallel guiding faces on said wedge, fitting into suitable slots of said casing, and two further oppositely directed parallel faces, which are oblique to said guiding faces and fit into a slot of said driven part.

1,535,488. CONTAINER CLOSURE AND CAP REMOVER. GUSTAVUS A. MADDOX, Baltimore, Md., assignor of one-half to Robert F. Leach, Jr., Baltimore, Md. Filed Apr. 17, 1924. Serial No. 707,030. 3 Claims. (Cl. 215—51.)



1. A container closure, comprising a disc and a plurality of members, one of which is resilient, secured to said disc to project within and engage the interior wall of a container to be closed, the engagement between one of said members and the interior wall being a two point engagement whereby friction is produced between at least one of said two points and the interior wall of the container when said disc is moved in a direction at right angles to a plane passing through two of said members.

1,535,489. SANDER OR SURFACING MACHINE. CECIL A. MAYS, East Akron, Ohio. Filed Feb. 19, 1923. Serial No. 619,977. 5 Claims. (Cl. 51—170.)

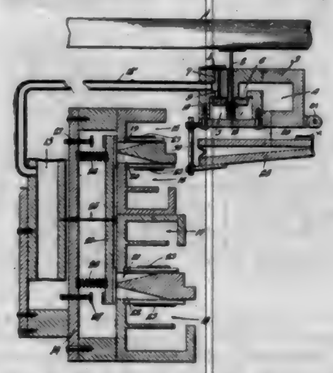


1. A machine of the class described having a frame, polishing means mounted on said frame, said polishing means including a gear wheel, a relatively short stub shaft, means to drive said gear wheel from said stub shaft, a gear wheel on the stub shaft overlapping the inner surface of said gear wheel to prevent displacement thereof and of the stub shaft, a gear wheel disposed at an angle to and in mesh with the latter gear wheel, and means on the frame to drive the last mentioned gear wheel.

1,535,490. GUIDE CHART FOR AUTOMATIC TELEPHONE INSTRUMENTS. MURRAY L. ONG, Seattle, Wash., assignor of forty-five per cent to Charles S. Hines, Seattle, Wash. Filed May 3, 1924. Serial No. 710,795. 3 Claims. (Cl. 179—90.)

1. The combination with a telephone instrument provided with a circular casing having a series of index characters on the upper surface thereof, a dial wheel disposed above said casing and mounted to rotate about the axis of the casing, said wheel being provided with sight apertures for the respective index characters, and a finger stop secured to the casing and extending over said wheel, of an annular device comprising a substantially circular plate element and a flange element extending downwardly from the inner periphery of said plate element for engaging the device to said casing, and means to secure the device to the casing against rotary movement, said plate element being provided upon its upper surface with a series of circumferentially disposed index marks.

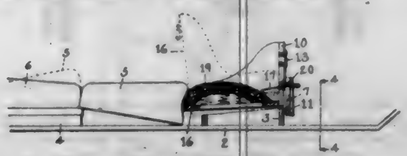
1,535,491. GAS BURNER. HOWARD W. PARTLOW, Utica, N. Y. Filed Sept. 20, 1924. Serial No. 738,864. 5 Claims. (Cl. 158—27.4.)



5. A gas burner comprising a cylindrical body having a central longitudinal air chamber extending therethrough, a throttle in one end of said chamber, said body being formed with an annular gas chamber surrounding the air chamber beyond the throttle and having a gas inlet, a cap for closing the opposite end of the body and for preventing the mingling of the air and gas within the body, the outer face of said cap having a cavity, and said cap having passages for conducting the air and gas from the respective chambers into the cavity to be mixed and consumed outside the body and cap, the discharge orifices of said passages being arranged in alternate order, and an elongated hollow deflector extending outwardly from the center of said cavity adapted for directing the flame away from the cap and for discharging a jet of air into the flame beyond said cavity.

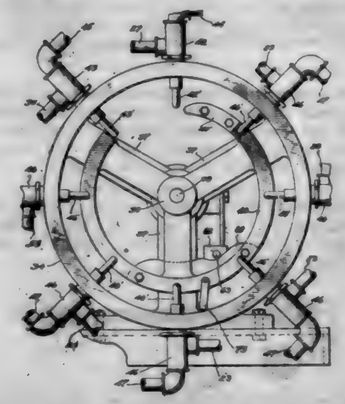
1,535,492. PROCESS FOR FACING SHEETS OR OBJECTS OF ALUMINUM AND THE LIKE WITH SHEETS OF HEAVY METAL. AUGUSTO PASSALACQUA, Paris, France. Filed Dec. 21, 1923. Serial No. 682,114. 8 Claims. (Cl. 148—11.)

1. The process for lining objects of light metal with a heavy metal adapted to form a protective layer, which



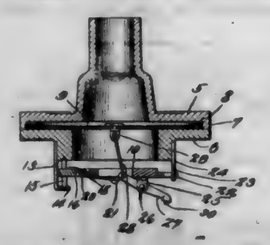
comprises heating the light metal object and the covering sheet of heavy metal, carefully cleaning the surfaces of said pieces to be joined together, continuing heating of the light metal, until it attains a temperature of between 300° C. and 550° C., spreading a metal of a low melting point over the surface of said light metal, superimposing the heated heavy metal sheet upon said spread surface and pressing the two juxtaposed pieces strongely together.

1,535,493. PNEUMATIC ACTION FOR REED ORGANS. PERCY PRESTON, Ardmore, Okla. Filed Jan. 10, 1922. Serial No. 528,179. 5 Claims. (Cl. 84—172.)



2. The combination with a key of a piano keyboard, of a structure movably mounted thereunder and having an air passage, a pneumatic connected to said structure and in communication with the passage, said pneumatic being collapsible by the creation of a partial vacuum in the air passage thereby to shift the structure relative to the key, a reed pipe, a valve therefor, a pneumatic for controlling the operation of the valve, a connection between the pneumatic and the air passage in the movable structure, a valve for controlling the flow of air to said passage, and a tracker connected to the valve and movable with the structure into and out of operative relation with the key of the keyboard.

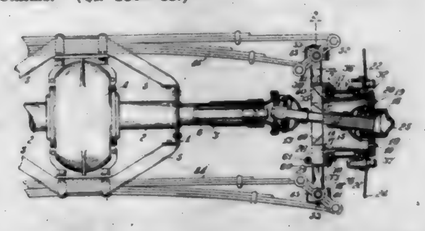
1,535,494. CONVERTIBLE VEHICLE BODY. ERIC J. PUSCHEL, Allegan, Mich. Filed Oct. 13, 1924. Serial No. 743,329. 9 Claims. (Cl. 155—7.)



1. In a structure of the class described comprising a seat base adapted as a receptacle, a frame-like seat bottom hinged to the front of said base to be swung forwardly to open the receptacle, said seat bottom comprising front and rear members having complementary end sections of an unequal length, those of the rear member being the longer, hinge plates rigidly secured to the under sides of the front member end sections and pivotally connected to the under side of the rear member end sections, the pivots being substantially spaced from the meeting ends of said sections so that the front bottom member may be swung on said bottom hinge and the rear bottom member swung on said hinge connection between said members, locking plates secured to the upper sides of the rear member end sections to overlap the front member end sections when the members are extended, means for securing said locking plates to said hinge plates whereby the bottom members are locked in extended relation, a back carried by the rear bottom member and provided with a cushion, a removable seat cushion, a flexible extension secured at one edge to said back cushion, a ball-like support for said extension pivotally mounted on the rear bottom member to collapse rearwardly thereon below said back cushion or to be swung forwardly between said end sections for supporting said extension in erected position, and rests for said support when in erected position.

1,535,495. BOILER CLEANING. GRANT I. RAWSON, Detroit, Mich., assignor, by mesne assignments, to Diamond Power Specialty Corporation, Detroit, Mich., a Corporation of Michigan. Filed Mar. 7, 1921, Serial No. 450,412. Renewed Aug. 8, 1924. 15 Claims. (Cl. 122—392.)

1. In a boiler cleaning system comprising a plurality of blower units, a header for delivering cleaning fluid to said units; a distributor for controlling the delivery of said fluid to said header; means operable by the stoker of the boiler for controlling the delivery of fluid to said header and a drain valve in said header operable through the pressure of the cleaning fluid in said header.

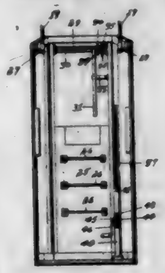


1,535,496. REPRODUCER. CHARLEY REUTER and OSCAR SCHILLING, Warsaw, Ill. Filed May 31, 1921. Serial No. 473,594. 1 Claim. (Cl. 274—34.)

In a reproducer, a body portion including separable sections, a diaphragm positioned between the sections, an arm secured to the body portion and having a right angled end arranged in spaced relation therewith to provide a bearing, a vertical pin arranged between the body portion and bearing, a bearing member mounted intermediate the ends of the pin, a stylus support pivotally connected to the last mentioned bearing member and adapted to move in a vertical plane, a spring member having connection with the stylus support to normally hold the stylus support downwardly, said stylus support having a central opening, a rod having connection

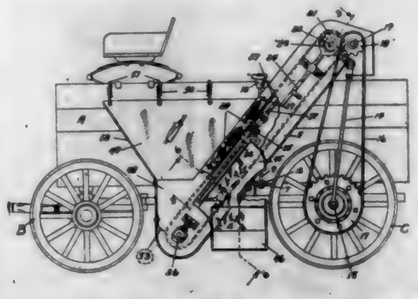
with the diaphragm and extending through the central opening, a stylus arm pivotally mounted on the stylus support, said rod having connection with the stylus arm, and a support for the outer end of the stylus support to permit the stylus support to move vertically and laterally.

1,535,497. VEHICLE WHEEL. CLIFTON ROCHE, Chicago, Ill. Filed Dec. 6, 1922. Serial No. 605,257. 5 Claims. (Cl. 180—43.)



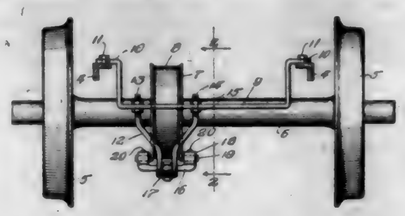
1. In a vehicle, a frame, transverse springs, shackles at the ends of said springs, a collar to which said shackles are movably secured, a wheel structure having elements projecting into said collars, and means for turning said elements within said collars.

1,535,498. SOLDERING IRON. WILLIAM CHARLES ROE, Pittsburgh, Pa. Filed Mar. 14, 1919, Serial No. 282,557. Renewed Jan. 21, 1921. Serial No. 439,050. 11 Claims. (Cl. 219—26.)



1. An electrically heated soldering iron comprising a handle formed of interiorly recessed separable sections, a metallic tube rigidly connected to one of said sections, the other handle section being movably associated with said first mentioned section and said tube, a heating element comprising a soldering iron and a resistance coil in the electric circuit, means to convey electric current to said device, and a resilient switch secured in the handle section connected to the tube, the free end of said switch being normally out of contact with said tube and adapted to be forced into engagement therewith by the movement of the movable section of the handle when grasped by the user, whereby electric current is transmitted to said heating element only when in use.

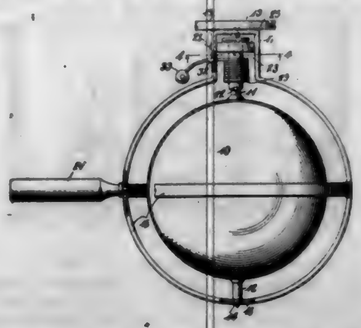
1,535,499. ELEVATOR FOR SILOS. WILLIAM O. SIBYERS, Newell, Iowa. Filed Nov. 4, 1922. Serial No. 599,048. 3 Claims. (Cl. 187—1.)



2. An elevator for silos comprising in combination stationary upright guide rails designed to be secured to a silo on opposite sides of the door opening, an elevator cage, a counter balancing weight device for the elevator cage, a gripping device carried by the cage and comprising two rotatable shafts arranged parallel with each other, a pinion on each shaft in mesh with each other, a cam gripping member on each shaft extended in opposite directions, a lever fixed to one of the shafts, a stationary gripping member carried by the cage, said stationary and cam gripping members being designed to engage a guide rail on opposite sides, for the purposes stated.

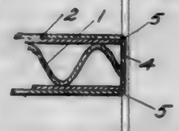
1,535,500. CORN HUSKER. OSCAR SKARPHOL, Dalton, Minn. Filed Jan. 24, 1924. Serial No. 688,203. 11 Claims. (Cl. 130—5.)

1. The combination of an open cob hopper adapted to be arranged upon the side of the wagon, a pair of husking rollers, an endless carrier adapted to carry ears of corn from the hopper, over the husking rollers, and deliver them up into the wagon, a container arranged transversely under the wagon for receiving husks, and means for delivering husks from the husking rollers into the container.



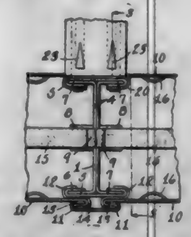
1,535,501. AXLE TRANSMISSION. EUGENE G. SMITH, Chicago, Ill. Filed Aug. 18, 1924. Serial No. 732,785. 6 Claims. (Cl. 105—102.)

1. The combination with a railway car truck having the usual wheels, of a transverse bar mounted on the truck frame and adapted to have limited longitudinal movement to compensate for the lateral movement of the wheels and axles with respect to the frame, an arm mounted on said bar and projecting below the axle, a universal pulley mounted on said axle and means on the arm for engagement with the rim of the pulley for holding it in normal position.



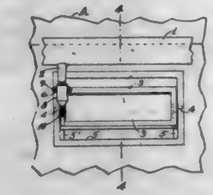
1,535,502. MECHANICAL SPINNING TOP. JOHN A. SOUTHWELL, Scranton, Pa., assignor of one-half to Charles F. Fletcher, Scranton, Pa. Filed Mar. 30, 1923. Serial No. 628,787. 2 Claims. (Cl. 46—132.)

2. A mechanical spinning top comprising a support frame, a top mounted in said frame for rotary movement therewithin, an operating cord, a rotatable sleeve to which the said cord is attached and on which it is adapted to wind and unwind, a winding spring connected to the said sleeve so as to become wound as the sleeve is rotated by the unwinding of the cord, said spring unwinding to rotate the said sleeve for rewinding the cord thereon when the latter is released, and a driving connec-



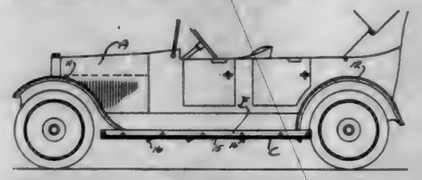
tion between the said sleeve and the said top, including clutch means operating to place the sleeve in driving relation with the top only when the sleeve is rotated by the unwinding of the said spring.

1,535,503. PAPER BOARD. LEO J. SPANDER, Erie, Pa. Filed Oct. 28, 1924. Serial No. 746,353. 4 Claims. (Cl. 273—136.)



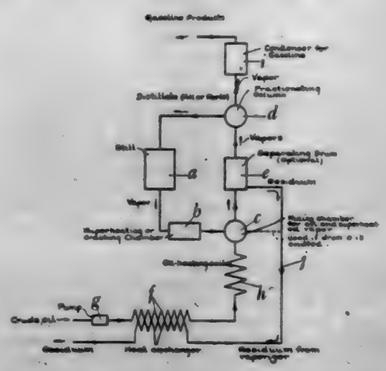
1. A flat paper board formed of corrugated paper with a corrugated core and flat sides, and a cover of paper folded around the corrugated board with square-turned corners forming a flat edge of the thickness of the corrugated board, said cover board being of a stiffness to give rigidity to the edge.

1,535,504. METAL BUILDING AND STRUCTURAL UNIT THEREFOR. JOSEPH J. STEPHENS, Lamont, Mich. Filed May 1, 1924. Serial No. 710,305. 9 Claims. (Cl. 180—1.)



1. In a wall structure, the combination of studding units comprising channel members disposed back to back and tie members having inturned flanges at the edges thereof embracing the flanges of said channel members providing units of I-cross section, wall panels having their vertical edges conformed to an S cross section providing inwardly disposed channels engaging the arms of the studding units and outwardly facing joint flanges, joint members having inturned flanges engaging the joint flanges of said wall panels, channeled partition panel holders disposed on the webs of said studding units having lugs struck therefrom and engaged within the ends of said holders, and partition panels disposed with their edges in said holders.

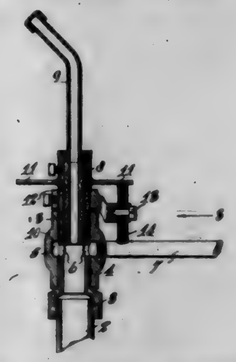
1,535,505. CLOSURE OPERATOR. JOHN LOUIS STOWERS, Habana, Cuba. Filed Mar. 25, 1924. Serial No. 701,835. 6 Claims. (Cl. 268—17.)



1. Apparatus for automatically closing transoms and the like, comprising, a pivoted closure, means normally biasing the closure to open position, and a receiver carried by the closure and adapted to be filled with fluid, the closing effect of the receiver when filled with fluid being sufficient to overcome the open position biasing means.

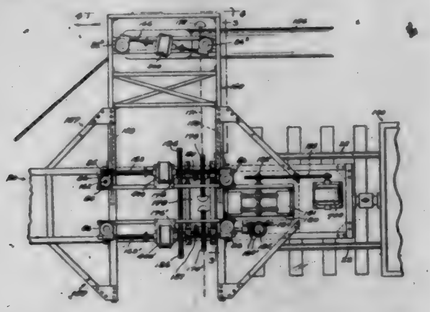
1,535,506. AUTOMOBILE FOLDING BED. DAVID R. TAGGART, Topeka, Kans. Filed Dec. 12, 1923. Serial No. 680,193. 3 Claims. (Cl. 5—119.)

1. A folding bed construction comprising an elongated board or plate member, angles adapted to be detachably connected to the running board of a vehicle below the same to extend laterally outwardly thereof, means for connecting the board or plate to the outwardly extending ends of said angles so that the same is positioned laterally of the running board and longitudinally thereof, a flexible body supporting member foldably carried by said board or plate, and collapsible supporting means for the body supporting member.



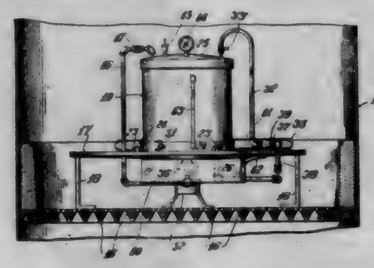
1,535,507. PRODUCTION OF PETROL. FRANK TINKER, Erdington, Birmingham, England. Filed Mar. 28, 1922. Serial No. 547,474. 2 Claims. (Cl. 196—61.)

1. In the production of low boiling point hydrocarbons from high boiling point hydrocarbons, the process comprising mixing superheated hydrocarbon vapors with a main stream of preheated crude hydrocarbon in a mixing



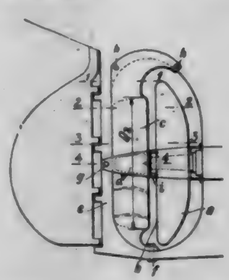
chamber, passing the mixture in a restricted stream through a pipe to an enlarged drum, drawing off a part, at least, of the condensate from said drum and passing the vapors into a fractionating column, delivering the condensate from the fractionating column into a still, generating vapors in the still and superheating the still vapors in the superheating device for subsequent mixture with the main stream of preheated crude hydrocarbon in a continuous process.

1,535,508. ROTATABLE WATER SPRINKLER. WILLIAM C. TODD and JAMES WM. POMEROY, Victoria, British Columbia, Canada. Filed May 20, 1924. Serial No. 714,679. 5 Claims. (Cl. 299—69.)



1. A rotatable water sprinkler, comprising in combination, a hollow stem, a reaction sprinkler freely rotatable on the stem through which it receives its water supply, a central jet tube independently rotatable about the axis of the stem from the upper end of which it projects, and means for intermittently rotating the central jet tube with relation to the reaction sprinkler by frictional engagement between them.

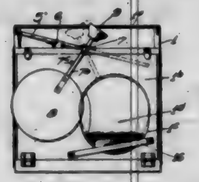
1,535,509. EXCAVATING APPARATUS. PASQUALE URSINO, Seattle, Wash. Filed May 20, 1924. Serial No. 716,562. 5 Claims. (Cl. 37—84.)



1. The combination with a wheeled vehicle, a framework rigid therewith, an elevator provided on the car, of a frame mounted upon said framework for movements laterally of the vehicle, a second frame connected to the aforesaid frame for vertical adjustments, excavating apparatus, means to operate said excavating apparatus, a conveyor to convey material excavated by said apparatus to said elevator, operative connection between said elevator and the conveyor, means to operate said elevator, and a discharge spout provided for the elevator for delivering material therefrom.

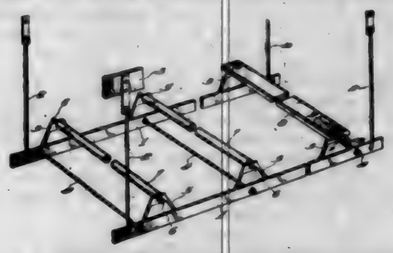
1,535,510. OIL BURNER. CHARLES F. WADSWORTH, Chicago, Ill. Filed Apr. 18, 1923. Serial No. 632,807. 11 Claims. (Cl. 158—56.)

6. In a device of the character described, a base-plate, a steam generating chamber arranged thereon, means whereby the flow of water into said chamber is automatically controlled, a burner disposed beneath said base-plate, an air receiving conduit disposed lengthwise on said base-plate and communicating with said burner, a steam pipe leading from the steam space of said chamber and terminating in a nozzle arranged concentric with the air admitting end of said conduit, an oil supply pipe terminating in a nozzle extending into said conduit at an angle to the steam-pipe nozzle and in advance thereof so the steam will discharge across the oil-pipe nozzle and force the oil into said conduit in the form of a spray, and a baffle-plate pivotally secured beneath the base-plate so as to swing toward and away from the burner and thereby control the degree of heating of said water-holding chamber.



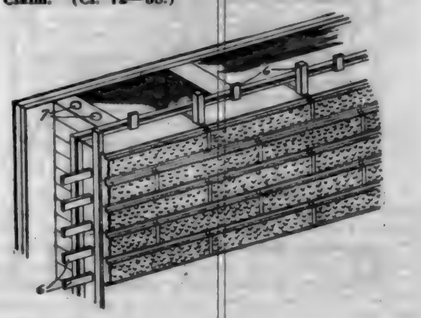
1,535,511. DOUBLE PROPELLER FOR WATER AND AIR CRAFT. RUDOLF WAGNER, Hamburg, Germany, assignor to Star Contrapropeller Ltd. A/S., Christiania, Norway. Filed Dec. 30, 1919. Serial No. 348,388. 2 Claims. (Cl. 115—34.)

1. A double-propeller for water and aircraft, comprising, a rotary main propeller fitted with blades which have a pitch increasing radially towards their axis of movement, and a counter-propeller the diameter of which is inversely dependent upon the variation of the pitch of the main propeller, the diameter of the counter-propeller being the smaller, the more the radial pitch of the main propeller in increasing.



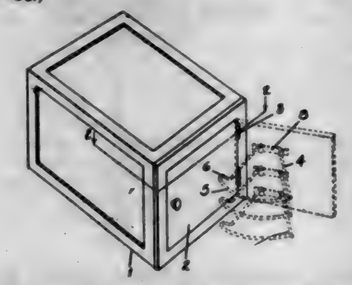
1,535,512. TRAP NEST. ISAAC N. WAGGONNER, San Diego, Calif. Filed May 9, 1922. Serial No. 559,515. 4 Claims. (Cl. 119—50.)

1. A trap nest, including a casing with an entrance opening on one side and an exit opening on the opposite side, a nest pivotally mounted in said casing, a lever connected at one end with said nest, a plunger rod pivotally connected with the other end of said lever, a fulcrum across said casing upon which said lever is pivotally mounted intermediate its ends, a plunger pivotally mounted on said plunger rod and a cylinder in which said plunger is reciprocably mounted, a crank shaft mounted across said casing transversely to said lever, the crank portion of which is adapted to engage said



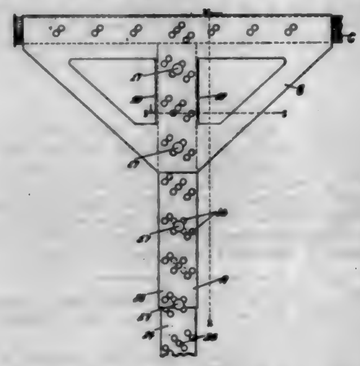
lever, a clip member spaced from said lever adapted to engage the other side of said crank portion, arms secured on the opposite ends of said crank member extending in opposite directions from said crank member, doors secured to the one ends of said arms and weights secured on the opposite ends thereof.

1,535,513. POULTRY ROOST. BERNARD WARNECKE, Breese, Ill. Filed Sept. 2, 1921. Serial No. 497,862. 5 Claims. (Cl. 119—25.)



1. In a poultry roost construction, notched side supports, and a roost having crushing surfaces resting loosely in notches capable of moving and permitting the roost to rock when pressure is applied to the roost.

1,535,514. WALL CONSTRUCTION. PAUL D. WARNER, Chicago, Ill. Filed Apr. 17, 1922. Serial No. 554,200. 1 Claim. (Cl. 72—38.)

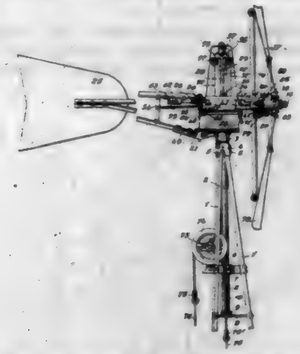


A wall construction comprising in combination a plurality of blocks laid one upon the other, each of the blocks being provided with a plurality of longitudinally disposed spaced grooves formed in its upper and lower surfaces, the end walls of each block having vertical grooves disposed between the grooves formed in the upper and lower surfaces of the block, a transverse groove being formed in one of the side walls of the block, the grooves of one block adapted to register with the grooves of the adjacent block so that tie rods when positioned in the registering grooves will be offset one from the other.

1,535,515. DISPLAY DEVICE FOR CAPS. THOMAS E. WATERS and RAY E. WATERS, Hastings, Mich. Filed Mar. 27, 1922. Serial No. 546,998. 1 Claim. (Cl. 211—14.)

A cap support comprising a horizontal portion for supporting the front and forepiece of a cap, an upwardly-projecting horizontally-curved portion conformed to the inner periphery of the cap top and adapted to project within the said cap top for supporting and distending the back and inner part of the crown of the cap, and inclined portions extending to said horizontal portion for the bottom of the cap, as specified.

1,535,516. ADJUSTABLE SUPPORTING DEVICE. OLOF P. WOLSTEAD, Minneapolis, Minn. Filed Mar. 17, 1924. Serial No. 699,888. 2 Claims. (Cl. 248—2.)

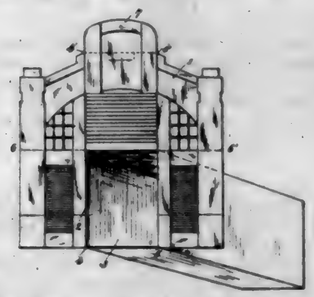


1. A column having perforations therein, a head member consisting of an integrally formed face plate slidably engaging the front and back of the column and having perforations adapted to register with the perforations in the column and be locked therewith by pins, flanges bent in from said face plate toward the sides of the column to form a channel therefor.

1,535,517. WINDMILL. CORRADO ANDREINI, Grosseto, Italy. Filed May 24, 1923. Serial No. 641,218. 4 Claims. (Cl. 170—48.)

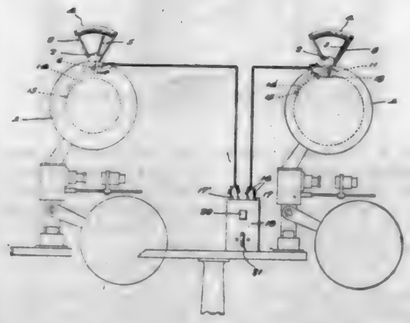
4. In a windmill, the combination of a supporting member, a head mounted on said member to rotate about a vertical axis, a wind-wheel mounted on said head to rotate about a horizontal axis, the axis of said wind-wheel being disposed on one side of the vertical axis of said head, a regulating rudder carried by said head on the opposite side of the vertical axis of the latter from

the axis of said wind-wheel, said rudder being mounted to rotate about an axis disposed at right angles to the horizontal axis of said wind-wheel, a rack slidable along the hub of said wind-wheel, a centrifugal governor car-



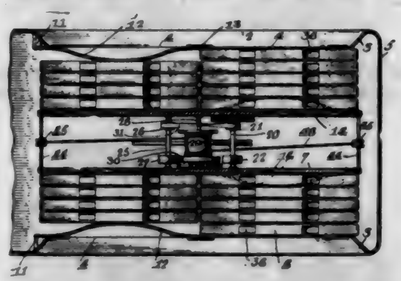
ried by said wind-wheel, a segment controlled by said governor and engaging said rack, connections between said rack and said rudder, and a steering rudder carried by said head to hold said wind-wheel and said regulating rudder into the wind.

1,535,518. METHOD OF JOINTING SHELLS OF BARRELS AND CASKS OR PARTS THEREOF. ERIK AUGUST BOLINDER, Stockholm, Sweden. Filed June 25, 1920. Serial No. 391,725. 1 Claim. (Cl. 147—25.)



A method of jointing shells of barrels having a diameter larger at its middle portion than at the ends consisting in providing parallel edges of the shell with interlocking means, forming a rail and providing the same with complemental interlocking edges then inserting the rail between said parallel edges and finally sliding the rail longitudinally of the edges to effect locking engagement of the rail to the edges of the shell.

1,535,519. BOX FOR TOYS. ETTORE CARDINI, Omegna, Italy. Filed Dec. 8, 1924. Serial No. 754,678. 2 Claims. (Cl. 46—37.)

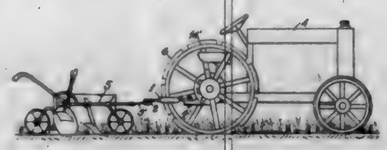


1. A box for toys, comprising a box body having an opening, and a foldable sheet secured to the box body and provided with an opening which permanently coincides with the box body opening so as to uncover the same when the sheet is unfolded; said sheet having portions which normally project laterally beyond the sides of the box body but are adapted to be folded over upon one another so as to cover both openings.

1,535,520. AUTOMATIC FILM INDICATOR AND OPERATOR'S WARNER. JOHN CVITKOVICH, Gary, Ind. Filed Feb. 21, 1922. Serial No. 538,401. 1 Claim. (Cl. 33—172.)

A device of the class described comprising a bracket, a casing supported thereby and having a curved slot therein, a shaft journaled in the bracket and having a part located in the casing, an arm connected at the outer end of the shaft, a roller on the arm for engaging a roll of film in the upper magazine of a moving picture machine, an arm connected with the end of the shaft which is located in the casing, a finger pivoted to the end of the shaft and having a slot therein, a set screw passing through the slot and engaging the arm, said finger being bent to extend through the slot in the casing and a dial carried by the bracket and associated with the finger.

1,535,521. ADVERTISING DEVICE. LÉONCE E. CUVELIER, Montreal, Quebec, Canada. Filed Nov. 7, 1924. Serial No. 748,498. 4 Claims. (Cl. 40—36.)



1. An advertising device comprising a pair of adjacent rows of plates having advertising matter depicted thereon, a pair of shafts journaled at one side of said rows, a pulley and a disc carried by each of said shafts, a twisted belt connecting said pulleys, means for driving one of said shafts, a drum shaft disposed between the first named shafts, a drum carried by said drum shaft, a collar carried by the drum and adapted for selective engagement with the discs, an arm supported adjacent the collar and eccentrically receiving one end of the drum shaft, a carrier slidably supported over said plates, a link connection between the arm and the carrier, cables extending from the ends of the carrier and wound around said drum, and means supported by the carrier for shifting said plates from one row to the other.

1,535,522. TUBULAR BOX. FRANK J. DOLAN, Brooklyn, N. Y., assignor to Joseph M. Price, New York, N. Y. Filed Apr. 5, 1922. Serial No. 549,686. 8 Claims. (Cl. 229—5.6.)

1. In a tubular box, a box member comprising an outer ring and an inner ring fitting within the outer ring, the outer ring being provided with an inturned marginal bead at one end overlying and concealing the adjacent end of the inner ring, and the other end of the ouer ring also being inturned to overlie the end of the inner ring adjacent thereto, no part of this latter inturned portion of the outer ring extending beyond the inner surface of the inner ring.

1,535,523. TRACTOR. JESUS NORIEGA ESCANDON, Pedro Betancourt, Cuba. Filed May 5, 1923. Serial No. 636,859. 3 Claims. (Cl. 280—33.44.)

1. A draft attachment, comprising, a connecting head, a draft bar fixed to the head and a plurality of series of apertures in the bar, the series being spaced a distance equal to the width of a furrow, in combination with an adjusting bar, a central offset portion on the adjusting bar, centrally positioned matching apertures in the draft and adjusting bars, and a plurality of series of apertures in the adjusting bar corresponding with said series of apertures in the draft bar.

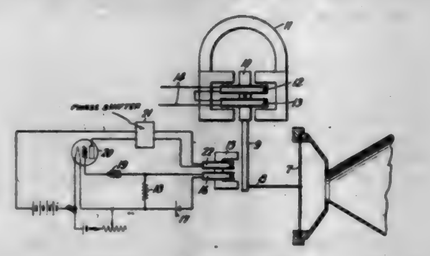
1,535,524. GEAR CASE. JOHN JAMES FAIRBAIRN, Roosevelt, N. Y. Filed July 25, 1924. Serial No. 728,086. 5 Claims. (Cl. 74—56.)

1. A gear case comprising spaced-apart metal side plates correspondingly perforated at intervals adjacent their edges, an edge plate interposed between the side plates, and a series of connecting elements extending through the respective perforations of the side plates, each element including two leg members straddling the edge plate throughout its width.

1,535,525. SPRAY MIXTURE AND PROCESS OF MAKING THE SAME. CARL F. GALLIGAN, Berkeley, Calif., assignor, by direct and mesne assignments, to F. A. Frazier Company, San Francisco, Calif., a Corporation of California. Filed Aug. 23, 1923. Serial No. 658,999. 9 Claims. (Cl. 167—6.)

1. An intimate mixture of finely divided copper sulphate and starch to preserve the pulverulent character of the copper sulphate.

3. A composition adapted to yield a spray upon contact with water comprising, hydrated lime, calcium caseinate, copper sulphate and starch.



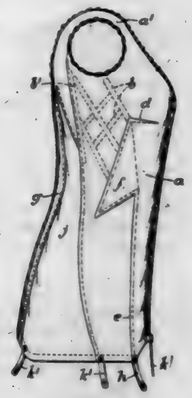
5. The process of making an ingredient of Bordeaux mixture which comprises drying copper sulphate to drive off water of crystallization, adding starch in a volume equivalent to the water evaporated, and pulverizing the mixture.

9. A composition for yielding a spray on contact with water comprising hydrated lime and calcium caseinate, and copper sulphate and starch, maintained in two separate constituents comprising respectively hydrated lime and calcium caseinate, and copper sulphate and starch.

1,535,526. AEROPLANE WING. WILLIAM L. GILMORE, Mineola, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc., Garden City, Long Island, N. Y., a Corporation of New York. Filed Aug. 30, 1924. Serial No. 735,076. 3 Claims. (Cl. 244—12.)

1. An aeroplane wing including a skeleton framework, a top covering of metal carried respectively to the leading edge and to the trailing edge of the wing, and an under covering of fabric likewise carried respectively to the leading edge and to the trailing edge.

1,535,527. VIBRATORY SYSTEM. HENRY C. HARRISON, Port Washington, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 3, 1923. Serial No. 610,528. 7 Claims. (Cl. 179—180.)



2. A vibrating system subjected to a force for causing the system to vibrate, a magnetic member subjected to flux variations when said system vibrates, a coil surrounding said member, and means responsive to said flux variations for substantially neutralizing the reactive component of the magneto motive forces of the alternating currents in said coil produced in said coil by the vibrations of said system.

1,535,528. BUST BODICE. MAUD HENDERSON-BLAND, London, England. Filed Mar. 13, 1922. Serial No. 543,427. 5 Claims. (Cl. 2—28.)

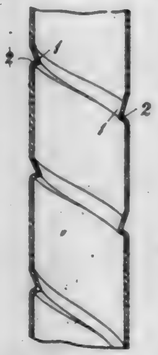
5. A garment of the character described comprising a rear section having upwardly extending shoulder strap extensions and having the shoulder portions provided with depending and downwardly tapered extensions, intermediate sections tapered upwardly and sewed to the rear section with their upper end portions extending between the main body of the rear section and the inner

edges of the depending shoulder extensions, front sections having their upper portions sewed to the outer edges of the depending shoulder extensions of the rear section from a point slightly above the waistline, the upper portions of the front sections forming the bust portion of the garment and having their upper ends

cut to form arm openings and shoulder strap portions, the front sections being sewed to the forward edges of the intermediate sections below the depending shoulder extensions of the rear section, and the front sections being cut from their lower edges to provide forward and side portions brought together to remove fullness below the bust line and about the waist portion.

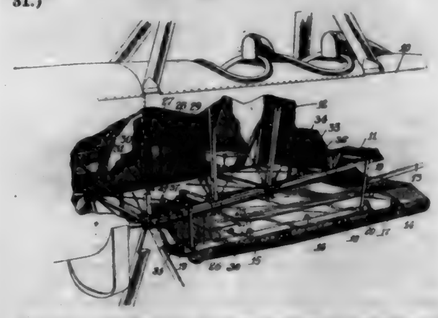
1,535,529. COLLAPSIBLE TUBE. NEVIL MONROE HOPKINS, New York, N. Y. Filed June 11, 1921. Serial No. 476,746. 11 Claims. (Cl. 221—60.)

1. A container comprising a plurality of collapsible tubes provided with integral neck portions and located one within the other, substantially as described.



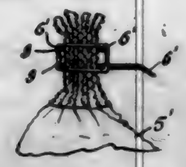
11. A container comprising a collapsible tube provided with a restricted neck, a second collapsible tube within the first mentioned tube and also having a restricted neck, the neck of the inner tube being positively secured to the neck of the first mentioned tube.

1,535,530. MANUFACTURE OF WIGS. GUSTAV HUPKA, Lausanne, Switzerland. Filed Mar. 23, 1923. Serial No. 627,229. 5 Claims. (Cl. 132—56.)



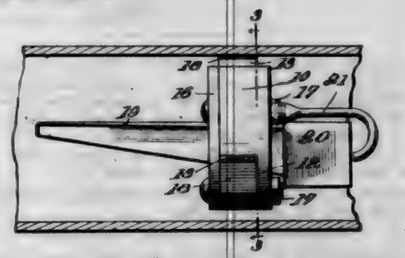
1. In a device for manufacturing wigs, a support having bristles on its upper face, means for clamping a lock of hair to the support so as to rest upon the bristles, and means for securing the carrier of a wig over the hair.

1,535,531. HEAT-TRANSMISSION TUBE. ISAK ISAACHSEN, Christiania, Norway, assignor, by mesne assignments, to A/S Krystal, Christiania, Norway. Filed Sept. 28, 1920. Serial No. 413,883. 1 Claim. (Cl. 257—262.)



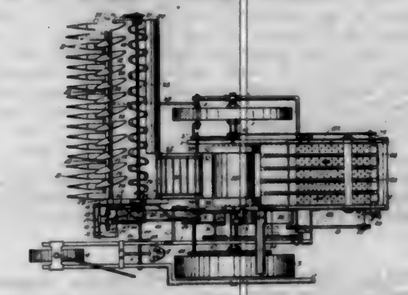
In apparatus for transmitting heat to a liquid flowdown the inside of a tube from vapor on the outside of the tube, a substantially vertical tube having in one of its surfaces a shallow helical groove forming on the opposite side a correspondingly low rib, the groove and the rib being so formed that the liquid to be heated passes down the inside surface in the form of a continuous film undergoing rotary movement and that the condensed vapor collecting on the outside surface will follow the helical path defined by the groove or rib, respectively.

1,535,532. AEROPLANE. JOHN P. LANGFELDER, Jamaica, N. Y., assignor, by mesne assignments, to Curtiss Aeroplane and Motor Company, Inc., Garden City, N. Y., a Corporation of New York. Filed May 22, 1922. Serial No. 562,618. 10 Claims. (Cl. 244—31.)



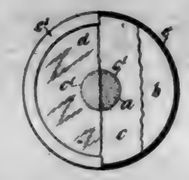
1. In an aeroplane, a movable support, mechanism operable to release the support, and a fuel tank movable with and with respect to the support upon its release.

1,535,533. INFUSION CARTRIDGE. HARRIS LEBRAK, New York, N. Y. Filed May 9, 1924. Serial No. 711,964. 1 Claim. (Cl. 53—3.)



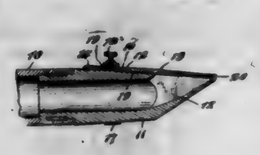
An infusion cartridge comprising a textile fabric bag, a string closing the mouth of the bag by drawing it into folds, and means piercing the folds of the fabric of the bag at the mouth and straddling the string on opposite side of the folds.

1,535,534. PIPE WRENCH. PEARL MCDONALD and EMORY O. CALL, Marion, Ohio. Filed Feb. 14, 1921, Serial No. 444,896. Renewed Mar. 9, 1925. 3 Claims. (Cl. 81—72.)



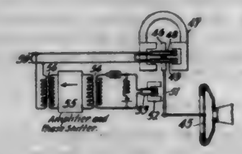
1. A wrench of the character described comprising a casing provided with a central opening and radial channels intersecting said opening, pipe-engaging members loosely mounted in said channels, means limiting movement of said members radially of the casing, and a removable expander having a tapered shank of angular cross-section provided with faces corresponding in number to the number of said pipe-engaging members, whereby said members may be forced outwardly and relative rotation prevented, said expander having an enlarged head capable of being engaged by a tool for imparting rotation thereto.

1,535,535. HEADER AND THRASHER HARVESTER. HARRY JOSEPH MCQUILLAN, Farrel's Flat, South Australia, Australia. Filed Mar. 22, 1921. Serial No. 454,411. 4 Claims. (Cl. 56—123.)



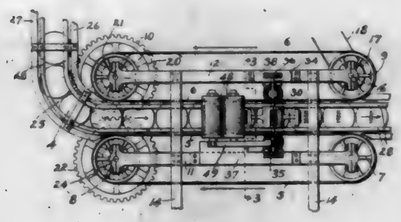
1. In an improved header and thrasher harvester, the combination with means for operating a knife bar comprising a rotating shaft, a single disc mounted on the shaft and angularly disposed with respect to its axis of rotation, a carriage embracing said disc and reciprocated thereby, a knife bar connected to said carriage, of an elevator operatively connected with said shaft and comprising a comb and apron, a hinge bar having stays and levers to support the comb and apron, and an upper drum spindle mounted in alignment with the said hinge bar and being operatively connected with the latter to enable radial elevation or depression of the apron.

1,535,536. THERMIC TELLTALE. DONALD MACDONALD, Melbourne, Victoria, Australia. Filed Jan. 29, 1924. Serial No. 689,381. 2 Claims. (Cl. 116—114.)



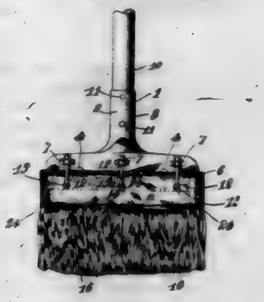
2. A heat attainment tell tale containing a chamber with surfaces of absorbent material, and a fugitive element in the chamber whereby absorption of the said element by the absorbent material will occur when a rise of temperature occurs to that which is to be detected.

1,535,537. ADJUSTABLE REED IN WIND INSTRUMENTS. WALTER MAJESKI, New York, N. Y. Filed Mar. 11, 1924. Serial No. 698,354. 2 Claims. (Cl. 84—383.)



2. As an article of manufacture, a reed for the mouthpiece of musical instruments comprising a single length of vibratory material being relatively thick at one portion and diminishing in thickness therefrom towards one end to form a vibratory tongue, the thick portion provided on the face adapted to engage the mouth-piece with a recess extending transversely and entirely across said face.

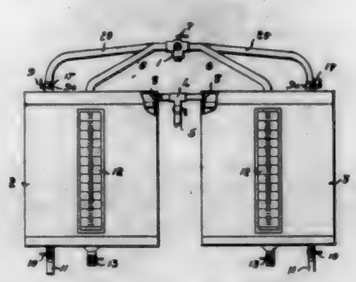
1,535,538. VIBRATORY SYSTEM. JOSEPH P. MAXFIELD, Maplewood, N. J., and HENRY C. HARRISON, Port Washington, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 3, 1923. Serial No. 610,537. 10 Claims. (Cl. 179—180.)



1. A mechanical vibratory system, subjected to a force for vibrating said system, means for producing electrically a force proportional to the velocity of said system, and phase controlling means for causing said force to control the movement of said vibratory sytem.

1,535,539. MACHINE FOR STAMPING CANS. WILLIAM E. MITTON, New London, Wis., assignor to The Borden Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 10, 1923. Serial No. 661,810. 5 Claims. (Cl. 101—35.)

1. A stamping machine for stamping a series of cylindrical objects comprising, a plurality of conveyor belts moving synchronously in the same direction for carrying forward the series of cylindrical objects which are positioned transversely across and between the belts, means for actuating the conveyor belts, and a stamping device consisting of a rotatable member mounted to turn on a vertical axis and having a plurality of radially extending arms, and star wheels operatively connected with the rotatable member and positioned in the line of the traveling objects to be engaged and moved thereby to turn the rotatable member to bring one of the arms in contact with the object engaging the star wheels.



1,535,540. MOP. WILLIAM J. MOORE, Philadelphia, Pa. Filed May 5, 1923. Serial No. 636,788. 4 Claims. (Cl. 15—147.)

1. A mop holder including a body having a socket and a flat part depending edgewise from the socket; hooks attached to the sides of the body part and adapted to receive a mop cloth, and means on the body part adapted to engage the hooks to prevent the mop cloth from being accidentally pulled from the hooks.

1,535,541. APPARATUS FOR MEASURING THE QUANTITY OF MILK GIVEN BY EACH COW MILKED BY MILKING MACHINES. ROBERT WILSON NOBLE, Tauhei, Morrinsville, New Zealand. Filed Aug. 12, 1922. Serial No. 581,351. 3 Claims. (Cl. 31—58.)

1. In combination, a pair of milk receiving receptacles, an inlet tube common thereto and capable of connection to milking apparatus, a vacuum pipe common to said receptacles, a connection between said pipe and each of said receptacles, and means joining said vacuum pipe with said connections and operable to alternately con-

nect said pipe with said receptacles to permit the milk from said inlet tube to enter only one receptacle at a time.

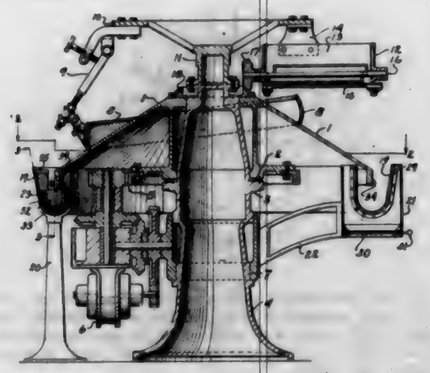
1,535,542. NONFERROUS ALLOY. WILLIAM B. PRICE, Waterbury, Conn., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Feb. 15, 1923. Serial No. 619,278. 5 Claims. (Cl. 75—1.)

1. An alloy comprised chiefly of copper, nickel and tin, and containing said copper, nickel and tin in proportions falling within the limits fixed by the formulæ, substantially as described, viz—

$$\text{Copper} = y = 92.75 - 0.9\sigma \pm (5.75 - 0.1\sigma)$$

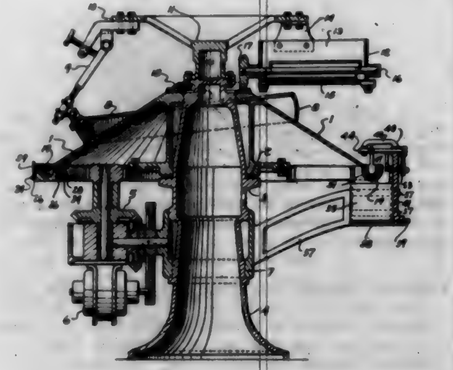
in which σ = % of nickel and can vary between 0.5% and 33.0%

$$\% \text{ Sn} = 100\% - (\% \text{ Cu} + \% \text{ Ni}).$$



1,535,543. EXTENSION-BIT HOLDER. FRED OSCAR RACE, Hillside, N. J. Filed Oct. 16, 1922. Serial No. 594,760. 2 Claims. (Cl. 279—42.)

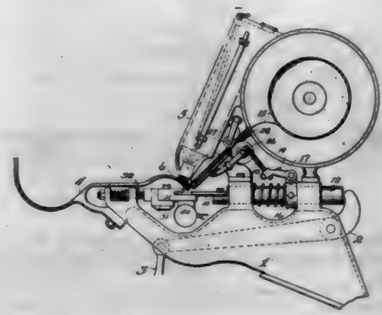
1. In an extension bit holder, a screw threaded stem adapted to be inserted in a brace, a nut on the screw threaded part thereof, a head rigidly secured to the outer end of the stem, said head having two sets of grooves therein, a sleeve having inwardly extending splines adapted to enter one set of said grooves, said sleeve having means of connection to the nut so that longitudinal movement of the latter is communicated to the former, a plurality of spring clamping fingers received and held in the second set of grooves in said head and also received between and held from turning by said splines, said spring fingers having clamping jaws adapted to clamp an extension bit with said sleeve.



1,535,544. COLLECTING DEVICE. LOUIS CHARLES REESE, Saginaw, Mich., assignor to Baker-Perkins Company, Incorporated, White Plains, N. Y. Filed Sept. 6, 1924. Serial No. 736,242. 10 Claims. (Cl. 107—9.)

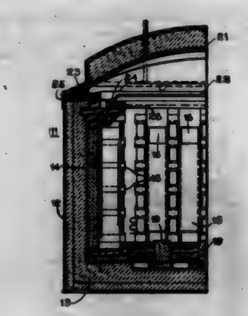
7. In combination with a rotating table, a stationary trough so positioned with respect to the table as to receive the peripheral edge thereof whereby loose material upon the table will be delivered to the trough, and means

carried by the rotatable table and travelling through said trough to collect material delivered thereto and move the same through said trough.



1,535,545. COLLECTING DEVICE. LOUIS CHARLES REESE, Saginaw, Mich., assignor to Baker-Perkins Company, Incorporated, White Plains, N. Y. Filed Sept. 6, 1924. Serial No. 736,243. 14 Claims. (Cl. 107—9.)

1. In combination, a rotatable table, a device rotatable with the table for collecting the droppings therefrom, and means for removing said droppings from said device.

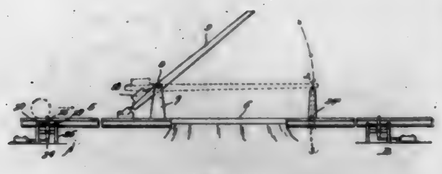


1,535,546. LACE-TIPPING MACHINE. HAROLD D. REGAN, Reading, Pa. Filed Sept. 25, 1924. Serial No. 739,797. 3 Claims. (Cl. 18—1.)

1. In a lace tipping machine, the combination of a pair of tip forming dies, a severing knife located centrally in one member of the die, spring backed means for actuating the die, means for feeding a supply of tip forming material in the form of a ribbon, feed mechanism for the ribbon comprising a pair of spring backed rollers, one of which is mounted rotatably on a ratchet device,

means for actuating said roller in unison with the die, a heating attachment for the die and a moistener for the tip forming ribbon.

1,535,547. ELECTRIC RESISTOR FURNACE. THOMAS A. REID, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 28, 1922. Serial No. 584,620. 3 Claims. (Cl. 204—64.)

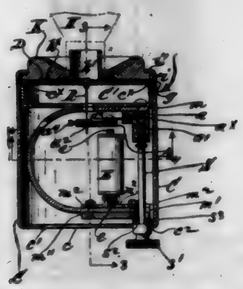


1. An electric-resistance furnace comprising a plurality of refractory walls enclosing a furnace chamber, a plurality of longitudinally spaced-apart sets of relatively narrow and laterally spaced-apart refractory supporting members supported by said refractory walls and projecting into said chamber, relatively thin and narrow resistor-supporting plates each having a plurality of laterally extending grooves in one face thereof, a relatively heavy unyielding preformed resistor member supported at spaced intervals by said grooved plates in co-operation with the refractory walls, and means for maintaining said grooved resistor-supporting members in operative engagement with said refractory supporting members.

1,535,548. RAILWAY-GRADE-CROSSING GATE. JOSEPH SCHIFTNER, La Gloria, Cuba. Filed Jan. 7, 1925. Serial No. 961. 2 Claims. (Cl. 246—301.)

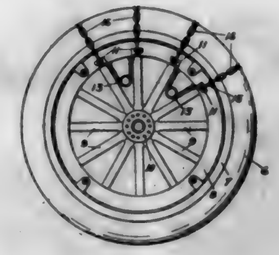
1. A grade crossing gate mechanism of the character described including a swinging gate at one side of the crossing, pivoted so as to tend to move to a closed position because of its own weight, means for maintaining the gate in an open position, a post on the other side of

the crossing against which the end of the gate is adapted to rest when closed, a rod movable longitudinally through the post for engaging the gate, and means for



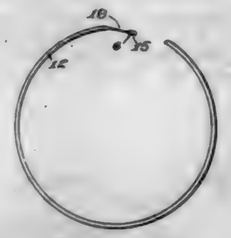
pushing upwardly on the rod for projecting the gate to an open position, said means being actuatable by a spring.

1,535,549. RUST-RESISTANT IRON. HARRY A. SCHWARTZ, Cleveland, Ohio, assignor, by mesne assignments, to National Malleable and Steel Castings Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 24, 1922. Serial No. 538,979. 3 Claims. (Cl. 75—1.)



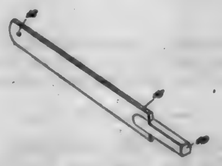
1. A highly rust resistant malleable iron casting containing approximately between .15 and .25% of copper and forming with the iron a copper-iron alloy, and having such percentages of carbon, manganese, silicon and the like as are usually present in malleable cast iron.

1,535,550. ELECTRICALLY-ACTUATED SOUND PRODUCER. BURTON SCOTT, New York, N. Y. Filed Aug. 31, 1922. Serial No. 585,564. 5 Claims. (Cl. 179—108.)



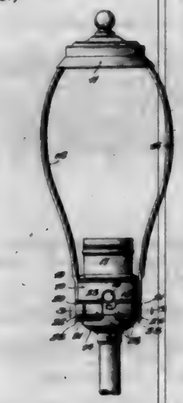
1. In an electrically actuated sound producer of the character designated, the combination of a permanent magnet formed with essentially parallel arms, one of which is fixed and the other relatively free, an electro-magnetic coil and core mounted on the free arm of said permanent magnet, an armature mounted in prescribed relation to the fixed arm of the permanent magnet and connected with a sound converting diaphragm, said diaphragm, and means for adjusting the free arm of said permanent magnet with relation to the fixed arm thereof, for the purpose of regulating the magnetic gap between the electro-magnetic core and said armature, the connection between said diaphragm and said armature consisting of a relatively thin flat tie rod arranged with its flat plane substantially at right angles to the plane of flexure of the armature in the manner and for the purpose set forth.

1,535,551. ANTISKID DEVICE. FREDRICK SIEVERS, McKeesport, Pa. Filed Aug. 13, 1924. Serial No. 731,814. 7 Claims. (Cl. 152—14.)



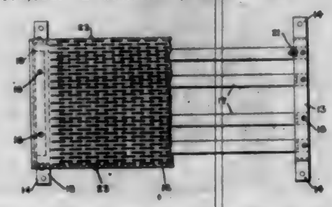
3. The combination with a vehicle wheel, of an antiskid device comprising yoke members which straddle the felly of the wheel, and adapted to lie against adjacent spokes, and a spring for holding said yoke members against said spokes.

1,535,552. PISTON PACKING RING. FRANK E. SMALL, Jamaica, N. Y., assignor to Nancy Maria Small, Jamaica, Long Island, N. Y. Filed Apr. 4, 1924. Serial No. 704,184. 6 Claims. (Cl. 74—109.)



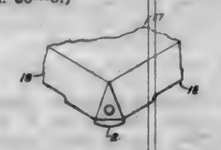
1. A piston packing ring comprising an outer split ring and an inner split ring of resilient material, said rings having co-operating faces whereby the inner ring will press the outer ring outwardly in the piston groove, said inner ring being roughened on the inner face and deflected inwardly to frictionally engage the bottom wall of the piston groove to prevent creeping of the ring in the groove.

1,535,553. METHOD OF THREADING A BLANK. ARTHUR STAMBACH, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 3, 1921. Serial No. 474,720. 5 Claims. (Cl. 78—81.)



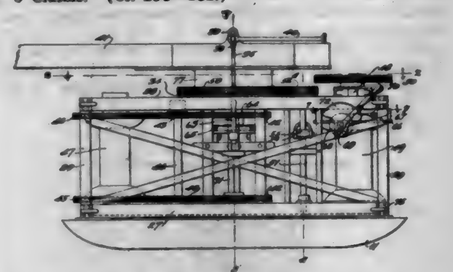
2. The method of threading a blank which consists in providing a flattened face on said blank, then displacing the material of the blank to substantially fill out the flattened portion and provide a thread thereon.

1,535,554. SHADE HOLDER. CHARLES P. SWICK, Waterbury, Conn., assignor to American Ring Company, Waterbury, Conn., a Corporation of Connecticut. Filed May 19, 1924. Serial No. 714,414. 3 Claims. (Cl. 240—148.)



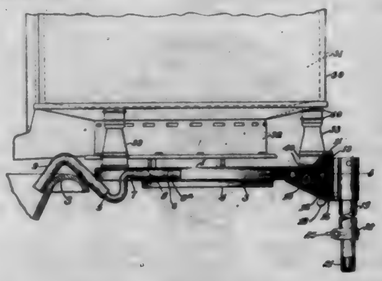
1. In combination with a lamp socket, having a body member and cap member; a one piece device of the character described in ring form, one end of which engages a shoulder upon the body member and the other end of which engages a shoulder upon the cap member and holds the members against endwise movement relatively to each other.

1,535,555. INDUSTRIAL AIR HEATER. FRANK THORNTON, Jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 27, 1922. Serial No. 609,193. 2 Claims. (Cl. 219—19.)



1. In an electric air heater, in combination, a pair of spaced metal supports, of substantially U-shape, a perforated metal cover, a sheet metal reflector back, common means for securing said cover and said reflector against said supports and a plurality of heating elements directly supported by said supports of U-shape.

1,535,556. TOASTER BASE. FRANK THORNTON, Jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 18, 1923. Serial No. 658,093. 5 Claims. (Cl. 53—5.)

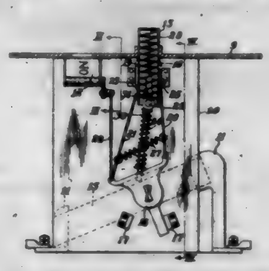


1. A base comprising a plate having integral depending flange portions, the ends of which overlap, and a heat-insulating supporting member located between said overlapping ends.

1,535,557. STUMP PULLER. ARTHUR ADAMS, Baltimore, Md. Filed July 1, 1924. Serial No. 723,460. 5 Claims. (Cl. 254—182.)

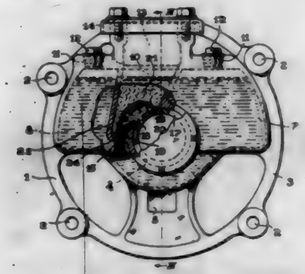
5. In a stump puller, a main frame, a main shaft disposed centrally of the length of the machine, a clutch member fixed on said shaft, a second clutch member rotatable on said shaft and slidable longitudinally thereof, clutch shifting mechanism for said second member, a winding drum supported in said frame, gearing connecting the shaft and drum, a second winding drum supported in said frame, a gear on said second clutch member sliding and rotating therewith, a gear on the second winding drum in edge alinement with the clutch supported gear upon movement of the second clutch member to unclutching position, an idler gear movable into and out of mesh with the drum gear, said idler also meshing with the clutch gear upon movement of the second clutch member to unclutched position.

1,535,558. MACHINE SUPPORT. FRANK A. ADAMS, Rochester, N. Y., assignor to George F. Merrell, Incorporated, Rochester, N. Y., a Corporation of New York. Filed May 27, 1922. Serial No. 564,233. 2 Claims. (Cl. 248—41.)



1. In a supporting stand, the combination of a top member comprising a piece of sheet metal having a central opening and a downwardly extending peripheral flange therearound, the member sloping from its outer periphery toward said flange, said member at its outer periphery having a downwardly extending flange, a pair of horizontally disposed eyes at opposite sides of said member, hook members received within said eyes for supporting said member and additional supporting means for supporting said member in a horizontal position.

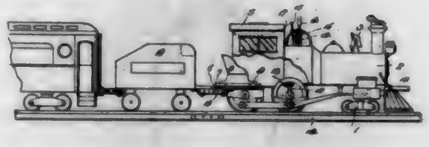
1,535,559. PUSH-BUTTON SWITCH. HAROLD G. BAXTER, Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 17, 1920. Serial No. 410,830. 5 Claims. (Cl. 200—68.)



1. The combination in an electric switch, of a perforated plate, a frame, a pair of stationary contact members, a movable contact member pivoted in the frame and adapted to engage the stationary contact

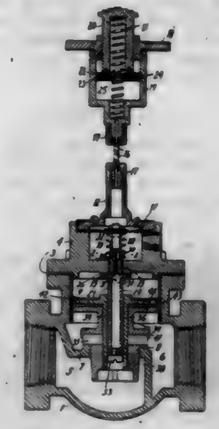
members, a bracket connected to the movable contact member, stop members limiting the movement of the bracket, a pair of struts pivoted on the bracket, a spring connecting said struts intermediate their ends, an indicator movably mounted on the cover plate adjacent to one of the perforations, a link connection between the said bracket and the indicator, a plunger extending through another of the perforations in the

cover plate, lugs on the plunger for engaging said struts alternately during successive depressions of said plunger, guides in the frame for guiding each strut out of engagement with the lugs on the plunger during the period the other strut is engaged, a compression spring in the plunger normally exerting outward pressure thereon, and a compression spring carried by the bracket and normally exerting pressure to maintain such bracket in one of its extreme positions.



1,535,560. BEARING HOUSING. CLAUDE BETHEL, Wilkinsburg, and EDWIN TIDLUND, Pittsburgh, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 28, 1923. Serial No. 665,358. 10 Claims. (Cl. 308—125.)

1. A journal bearing comprising a collar surrounding the journal and having a lubricating opening communicating therewith, a hermetically closed oil reservoir disposed mainly above the lower edge of said lubricating opening and extending around said collar, a lubricating chamber communicating with said collar opening, means for providing a communicating passage between said oil reservoir and said lubricating chamber, the upper level of said communicating passage being below the lower edge of said collar opening, and fibrous oil-lifting means disposed in said lubricating chamber and extending into said communicating passage.

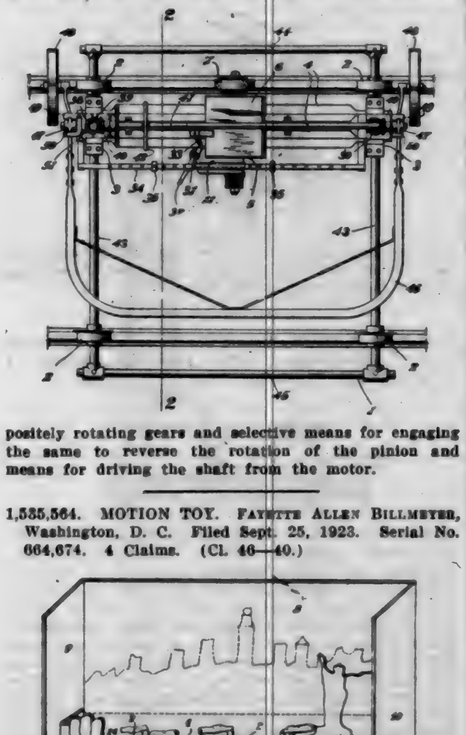


1,535,561. TOY TRAIN. THOMAS L. WOOD, Dallas, Tex. Filed Jan. 25, 1924. Serial No. 688,469. 1 Claim. (Cl. 105—92.)

A toy vehicle comprising a body simulating that of a locomotive, forward and rear sets of driving wheels mounted upon axles journaled under the rear portion of the body, pitman rods connecting the forward and rear driving wheels, the axle of the forward set of driving

wheels having pedals and cranks, and an operator's seat mounted upon the body above the axle of the rear set of driving wheels.

1,535,562. FLUSHOMETER. CHARLES H. ATKINS, Palmer, Mass. Filed Jan. 27, 1923. Serial No. 615,204. 8 Claims. (Cl. 137—03.)

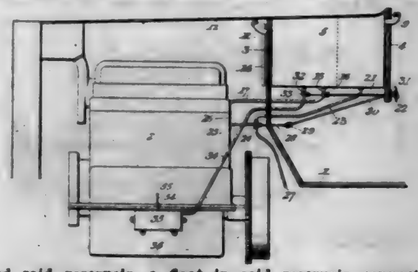


3. In a flushometer, a casing having therein communicating inlet and outlet chambers, a valve between said chambers, means, comprising a diaphragm-controlled valve, normally to cause said first named valve to be held in closed position, a remotely-located casing, a plunger provided with a piston-head in said second-named casing, whereby the air in said second-named casing is compressed when said plunger is forced inwardly, an air-tight conduit between said casings to direct the compressed air against the diaphragm of said diaphragm-controlled valve to open the latter, and means to enable said first-named valve to be opened when said diaphragm-controlled valve is opened.

1,535,563. GRINDING MACHINE. HERSHEL A. BENEDICT, East Orange, and EDVARD M. MOLLER, Jersey City, N. J. Filed Apr. 5, 1922. Serial No. 549,791. 3 Claims. (Cl. 51—178.)

1. A grinding machine including a frame, a runway mounted on the frame in association with a rack, a carriage mounted on the runway, a motor mounted on the carriage, a shaft mounted on the carriage transversely

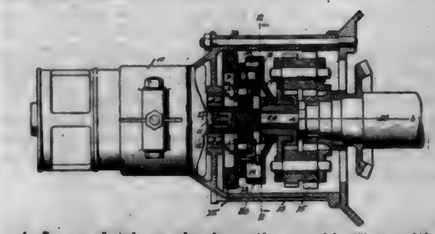
of the runway, a grinding wheel secured to the shaft, a pinion mounted on the carriage to engage the rack, gears connecting the pinion with the shaft including op-



positely rotating gears and selective means for engaging the same to reverse the rotation of the pinion and means for driving the shaft from the motor.

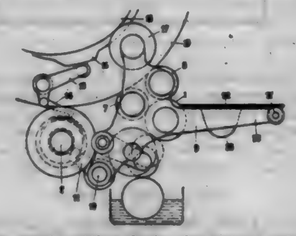
1,535,564. MOTION TOY. FAYETTE ALLEN BILLMEYER, Washington, D. C. Filed Sept. 25, 1923. Serial No. 664,674. 4 Claims. (Cl. 46—40.)

1. A motion toy of the character described comprising a suitable enclosing member, an inner supporting member having a horizontally positioned platform member or fold, spools suitably journalled adjacent the opposite ends of the platform folds, an endless belt carried by the spools and positioned whereby its upper loop is passed above and its lower loop is passed beneath the platform fold, means for rotating the spools and said inner supporting member adjacent its end portions being formed with forwardly positioned upwardly extended portions positioned to obscure the operating spools from normal vision and adapted to be decorated to produce a foreground scenic effect and said belt having miniature figures mounted thereon, substantially as described.



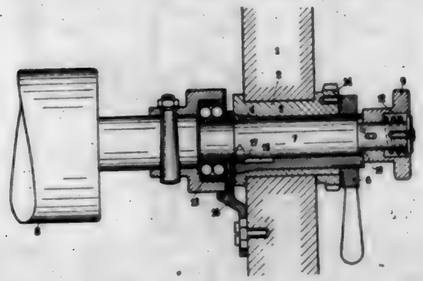
1,535,565. EMERGENCY SUPPLY TANK FOR AUTOMOBILES. JOSEPH BITMAN, Denver, Colo. Filed Mar. 28, 1924. Serial No. 702,706. 1 Claim. (Cl. 123—198.)

In a device of the character described, a water-jacketed engine having a carbureter and a crank case, said carbureter having a fuel inlet pipe; three compartments adapted to contain respectively a hydrocarbon fuel, water and oil; valved pipes connecting respectively the water compartment and water jacket, the fuel compartment and the carbureter inlet pipe; a reservoir communicating with said crank case, a pipe connecting the oil compartment and said reservoir, a valve in said pipe for opening or closing communication between the pipe



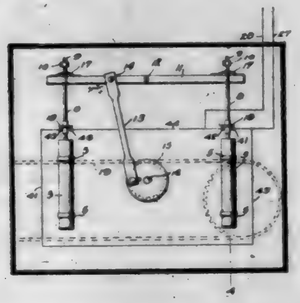
and said reservoir, a float in said reservoir connected with said valve, whereby to automatically close the valve when the oil in the reservoir reaches the normal level, and a valve for controlling the outflow of oil from the oil compartment.

1,535,566. CLUTCH TRANSMISSION. JOSEPH J. BOLAND, Rahway, N. J., assignor to Aeromarine Plane and Motor Company, a Corporation of New York. Filed June 18, 1920. Serial No. 390,050. 17 Claims. (Cl. 192—42.)



4. In a clutch mechanism, the combination with a driving member, a driven member, clutching means for effecting a driving connection therebetween and a spring acting normally on said clutching means tending to move the same positively into an inoperative position, of inertially operated means normally acting on said clutching means to maintain the same in operative position and controlled by a deceleration of the driven member for removing itself from the clutching means and thus permit the spring to function.

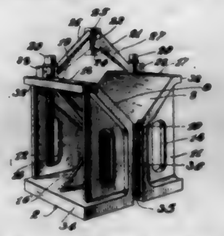
1,535,567. WETTING DEVICE FOR ROTARY RUBBER-PRINTING MACHINES. GEORG BORNSCHEIN, Bautzen, Germany, assignor to Bautzner Industriewerk A. G., Bautzen, Germany. Filed July 14, 1922. Serial No. 575,003. 4 Claims. (Cl. 101—148.)



1. An improved wetting device for rotary printing machines comprising in combination with the wetting cylinders the intermediate- or brass cylinder and the means supporting said parts, means for displacing the wetting cylinders in axial direction during the printing operation.

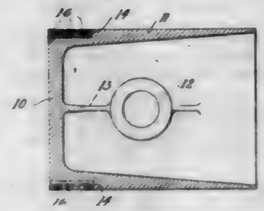
1,535,568. FEED GEAR FOR THE CYLINDERS OF PRINTING MACHINES. GEORG BORNSCHEIN, Bautzen, Germany, assignor to Bautzner Industriewerk A. G., Bautzen, Germany. Filed July 14, 1922. Serial No. 575,004. 1 Claim. (Cl. 64—53.)

A device of the character described for the cylinders of printing machines comprising in combination with the cylinder mounted on ball bearings, an outer slit bush with cylindrical outer surface and with a boring which is partly cylindrical and partly conical, an inner bush in said outer bush the outer surface of which is partly cylindrical and partly conical and which has an eccentric boring, an externally threaded outer end, and a nut in its outer end face, a nut with handle screwed upon this outer threaded end of the inner bush, a bolt in the boring of the inner bush engaging with the ball bearing of the cylinder, a spring controlled sleeve movably mounted upon the outer end of said bolt, a nose projecting from the inner end of said sleeve adapted to engage with the notch in the outer end of the inner bush and a stop upon the inner end of said bolt, engaging with said slit of the inner bush, substantially as described and shown and for the purpose set forth.



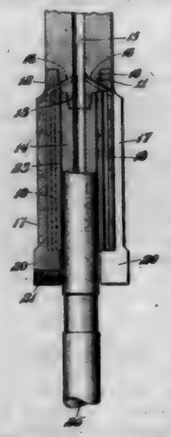
1,535,569. CONTROL MECHANISM. JAMES RAMSEY BUCHANAN, Sylva, N. C. Filed Aug. 7, 1922. Serial No. 580,338. 5 Claims. (Cl. 192—129.)

1. A control device for conveyors comprising a pair of spaced contacts, a movable contact member, a movable member normally connected to the conveyor to retain said contacts in open position, and means for shutting off the power from the conveyor when said movable contact member engages said spaced contacts.



1,535,570. CLAMP BLOCK. ELMER J. BRYANT, Woonsocket, R. I., assignor to The Taft-Peirce Manufacturing Company, Woonsocket, R. I., a Corporation of Rhode Island. Filed May 29, 1920. Serial No. 385,144. 5 Claims. (Cl. 77—63.)

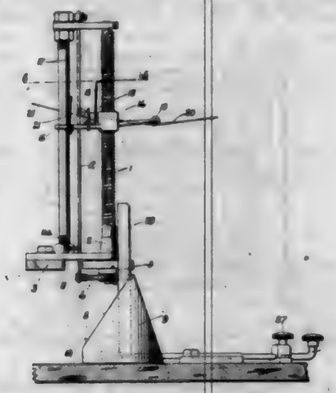
1. As an article of manufacture; a V-block comprising a base portion; a substantially Y-shaped portion supported by said base portion, the upper surfaces of said Y-shaped portion forming a work supporting trough and its edges cooperating with those of the base to



form locating planes; and webs extending between said base portion and said trough at each end thereof and adapted to receive clamping means.

1,535,571. PISTON. RALPH M. BURDICK, Los Angeles, Calif. Filed May 9, 1922. Serial No. 559,508. 4 Claims. (Cl. 74—108.)

1. A piston for a cylinder, the piston including a piston body of a material having a coefficient of expansion greater than the material of the cylinder, and a ring carrying band surrounding the piston and composed of a material having a coefficient of expansion slightly less than the coefficient of expansion of the cylinder material so that the expansive forces of the encircled piston body causes the band to expand substantially at the same rate as the cylinder.



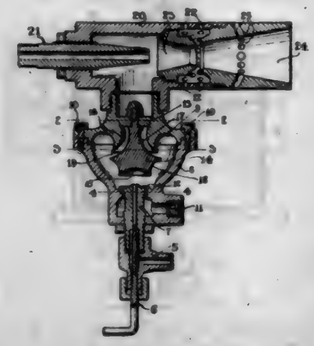
1,535,572. ROTARY WELL DRILL. NELSON S. BURTON, Ardmore, Okla. Filed May 8, 1924. Serial No. 711,874. 5 Claims. (Cl. 255—73.)

1. In well drilling apparatus and in combination, a tool joint having a double pin at its lower end, a drill joint engaging the smaller pin of the tool joint, a sleeve

engaging the larger pin of the tool joint, a bit engaged with the lower end of the drill joint, and reamer blades formed on the outer surface of the sleeve.

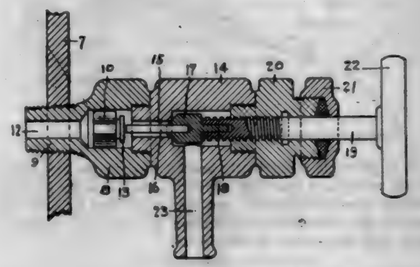
1,535,573. YARN-WINDING MACHINE. JOHN JAMES CANNON, Leicester, England. Filed Mar. 10, 1922. Serial No. 542,611. 3 Claims. (Cl. 242—29.)

1. In a yarn winding machine of the vertical spindle type, in combination, a rising and falling carrier bar, a screwed rod rotatable thereon, a nut device moved up on said rod when the latter is rotated, a yarn guide carried by said nut device, a ratchet wheel fast on the screwed rod, a lever mounted to oscillate on the screwed rod, a pawl on said lever engaging the ratchet wheel, a fixed cam to oscillate the lever during movement of the carrier bar, a pawl to prevent backward rotation of the ratchet wheel, a pivoted arm on the nut device said arm being controlled by the yarn, and a connection between said arm and last mentioned pawl, whereby, upon release of the arm by the yarn the said pawl is disengaged from the ratchet wheel to stop rotation of the screwed rod.



1,535,574. WHEEL GAUGE. VINCENT CAMPAS, Paso Robles, Calif. Filed May 27, 1924. Serial No. 716,248. 5 Claims. (Cl. 33—203.)

1. A gauge for the purpose described comprising an extensible bar having pointers and a member pivoted to each end of the bar and having a dial coacting with a pointer of the bar, said members swinging in one plane and having at the pivot points thereof extensions engageable at spaced points with the king bolts of an axle and by their engagement therewith determining the position of the dial with respect to the pointer.

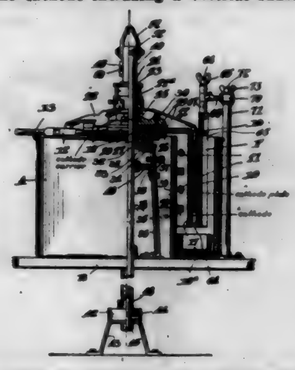


1,535,575. OIL BURNER. ALLEN E. CHISHOLM and SAMUEL MURRAY, Portland, Oreg.; said Murray assignor to said Chisholm. Filed Dec. 29, 1922. Serial No. 609,660. 11 Claims. (Cl. 158—74.)

11. In an oil burner the combination of a casing, an oil inlet to said casing, an abutment within the casing to intercept the flow of oil and spread the same, an annular steam inlet to said casing arranged concentric to said oil inlet for directing the steam toward and into the oil subsequent to its contact with said abutment, a Venturi tube provided with openings adjacent the throat thereof, and means communicating with said casing for

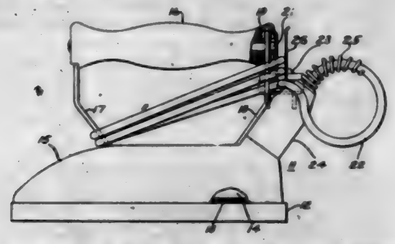
drawing the atomized mixture from said casing and mixing said atomized mixture with suitable quantities of air from the openings adjacent the throat to produce a highly combustible mixture.

1,535,576. GAUGE COCK. GEORGE B. CLARK, Pittsburgh, Pa. Filed Sept. 15, 1924. Serial No. 737,835. 1 Claim. (Cl. 277—27.)



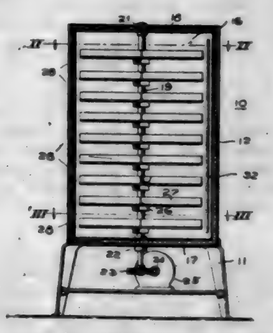
Valve structure comprising an auxiliary valve chamber adapted to communicate at its forward end with a source of pressure, a main valve block disposed to the rear of said chamber and whose forward end extends into said chamber, a valve movable longitudinally of said chamber and having radially extending projections that engage the wall of the chamber, a main valve in said valve block, and a spacing member between said valves whereby when the main valve is moved forwardly the auxiliary valve will be moved forwardly, the said radial projections serving as the sole bearing members for said auxiliary valve and providing spaces for the passage of fluid, and the rear end of said auxiliary valve and the forward end of said main valve block having substantially flat co-operating surfaces.

1,535,577. APPARATUS FOR THE ELECTROLYTIC DEPOSITION OF METALS. ARTHUR HAROLD WILD CLEAVE, Ottawa, Ontario, Canada. Filed Jan. 4, 1923. Serial No. 610,648. 23 Claims. (Cl. 204—5.)



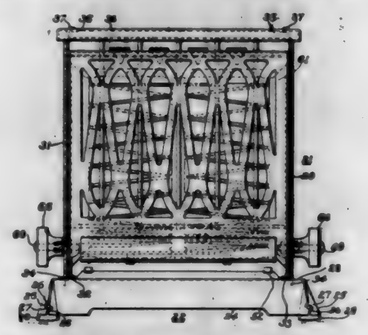
1. Improved apparatus for the electrolytic disposition of metals comprising in combination, a jar, a plurality of fixed anodes suspended in the jar, a rotary cathode,

a cathode carrier adapted to rotate in a horizontal plane, means for supplying current to the anodes, means for rotating the cathode including a vertical shaft, a cotter



and slot connection between the vertical shaft and the cathode carrier, and an automatic scraper operating on the cathode as and for the purpose specified.

1,535,578. CORD SUPPORT. ORA A. COLBY, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 13, 1922. Serial No. 552,180. 5 Claims. (Cl. 219—25.)

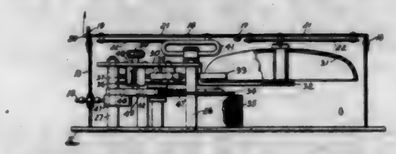


1. A portable electrically-heated apparatus comprising a body portion, a heating element, a permanently attached electric circuit conductor, and means carried by said body portion for releasably supporting all of said conductor when said apparatus is not in use.

1,535,579. VERTICAL OVEN. ORA A. COLBY, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 1, 1923. Serial No. 622,057. 8 Claims. (Cl. 219—35.)

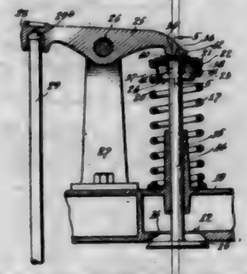
1. In an oven, in combination, a plurality of heat-insulating walls enclosing an oven chamber, one of said walls of said oven chamber being of arcuate contour and the remaining walls of non-arcuate contour in cross-section, a shaft in said chamber, a plurality of circular trays secured to said shaft, and electric heating elements located only adjacent those walls that are of non-arcuate contour.

1,535,580. TOASTER. ORA A. COLBY, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 6, 1923. Serial No. 630,271. 19 Claims. (Cl. 219—19.)



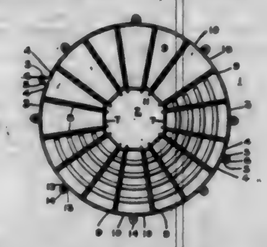
1. In a toaster, in combination, a base provided with depending, integral, flange portions, said flange portions having extensions thereon, angularly disposed relatively to said flange portions, and means co-operating with said extensions to interlock the same.

1,535,581. SPRING-BAR BUMPER AND SUPPORT. ERNEST G. DANN, Chicago, Ill. Filed Dec. 14, 1922. Serial No. 606,794. 5 Claims. (Cl. 293—55.)



1. In an article of the character described, the combination of a pair of impact bars disposed in spaced parallel relation to each other and adapted to be positioned transversely of the end of a motor vehicle, a pair of brackets formed of continuous bands of spring bar material of approximately T-shape in outline, means for attaching the T-head portions of said respective brackets to the impact bars at points approximately central of the respective half-sections of said impact bars, and means located adjacent a central horizontal plane through said brackets for adjustably positioning said brackets upon the frame of a motor vehicle.

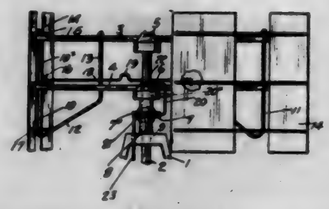
1,535,582. THEFT-INDICATING DEVICE. JOHN J. DARNELL, Oakland, Calif., assignor of one-half to Eugene M. Farnham, Oakland, Calif. Filed July 5, 1924. Serial No. 724,823. 1 Claim. (Cl. 116—99.)



In an alarm device of the class described, a bell, a clapper for the bell, a spring driven gear wheel train for actuating the clapper, a master wheel in said train, a tripping device for arresting rotation of the master wheel comprising a disk-like member pivoted to rock back and forth, a finger on one end of said member adapted to engage the master wheel to arrest the rotation of the same, and means for releasing said arresting engagement comprising a finger at the opposite end of the disk-like member, a cam having a wiping contact with said last-named finger, said cam adapted to rock said disk-like member to move the first-named finger away from its engagement with the master wheel to release the same, a spring-pressed post adapted to engage a hole provided in said disk-like member to hold the first-named finger out of engagement with the master wheel, a spring for returning the disk-like member to a position where the said first-named finger will reengage the master wheel when said spring-pressed post is raised out of said hole, and means for turning said cam comprising a pivoted block to which the cam is mounted and a pull chain connecting the block substantially as and for the purpose described.

1,535,583. VALVE-STEM SILENCER. GAIL BORDEN DONSON, Los Angeles, Calif. Filed Feb. 23, 1921. Serial No. 447,015. 11 Claims. (Cl. 123—90.)

2. In a device of the character described, the combination of a member interposed between the valve stem and its opening means to deaden the sound of contact therebetween, and means axially slidably mounted on the valve stem to prevent displacement of said member.

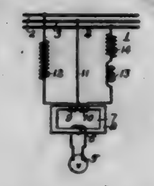


1,535,584. MOLD FOR REACTANCE-COIL SUPPORTS. LEO DORFMAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 16, 1922. Serial No. 568,729. 9 Claims. (Cl. 25—121.)

6. A mold comprising a base portion consisting of a plurality of sections detachably secured together, a vertically extending collapsible core member, a plurality of superposed separate divided molds arranged radially about said core member, and means for securing said dividend molds in operative position and in alignment with each other.

1,535,585. WINDMILL HEAD. CLARENCE JOHN LAWRENCE DYER, Kisbey, Saskatchewan, Canada. Filed Dec. 22, 1923. Serial No. 682,209. 4 Claims. (Cl. 170—24.)

4. In a windmill head, the combination with the main shaft and journal support therefor, of an upper and lower cross arm set diametrically and mounted upon the windmill shaft, a rod bent into U shape having its base inclined upward and having its arms extending through the cross arms at each end at points adjacent their extremities and centre so that the long arm of the U depends below the lower cross arm, a rectangular vane pivotally mounted upon the long arm of the U at points adjacent to the extremities of the cross arms and the

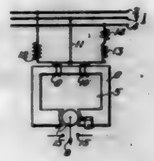


lower extremity of the long arm of the U, and in such a position as to provide a short vane arm extending in one direction and a long vane arm extending in the opposite direction, the vanes being also set oppositely in direction one to the other, a link connecting the long arms of the vanes together, and manually controlled means for adjusting the vanes into and out of the wind.

1,535,586. ARC WELDING. OTTO H. ESCHHOLZ, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 30, 1921. Serial No. 481,620. 9 Claims. (Cl. 219—8.)

1. A method of welding which comprises depositing metal by means of an electric arc and then forging the same.

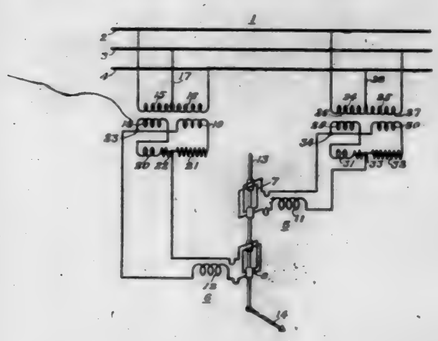
1,535,587. ELECTRICAL MEASURING INSTRUMENT. ROBERT D. EVANS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 13, 1920. Serial No. 358,440. 10 Claims. (Cl. 172—245.)



6. A measuring device for a polyphase circuit comprising an indicating instrument, a plurality of resistors and reactors connected to the circuit, and a transformer connected between the resistors and reactors and the indicating instrument to cause the instrument to be responsive to one phase-sequence component of the quantities of the circuit.

8. In a polyphase circuit, the combination with an electro-responsive device, of impedances having such characteristics and disposed to so connect the device to the circuit that the device will be actuated in accordance with one symmetrical component of an unbalanced polyphase electrical quantity traversing the circuit.

1,535,588. ELECTRICAL MEASURING INSTRUMENT. ROBERT D. EVANS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 30, 1920, Serial No. 400,162. Renewed Feb. 12, 1925. 8 Claims. (Cl. 172—245.)

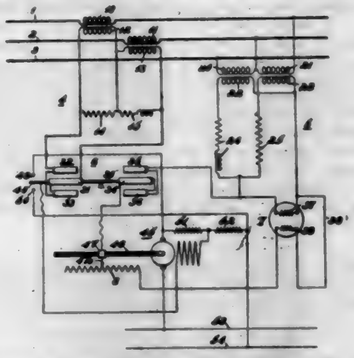


1. A measuring device for a polyphase circuit comprising an armature, a field-magnet core member therefor, a plurality of windings for the core member and means

connected between the windings and the circuit whereby the armature is actuated in accordance with the positive or negative component of a set of symmetrical quantities into which the unbalanced quantities of the circuit may be resolved.

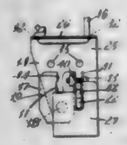
3. An electro-responsive device for a polyphase circuit comprising an armature member, a plurality of windings for actuating the armature member, and resistors and reactive impedance devices connected between the circuit and the windings whereby the armature member is actuated in accordance with one phase-sequence component of an electrical quantity of the circuit.

1,535,589. ELECTRICAL MEASURING INSTRUMENT. ROBERT D. EVANS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 30, 1920. Serial No. 400,163. 10 Claims. (Cl. 172—245.)



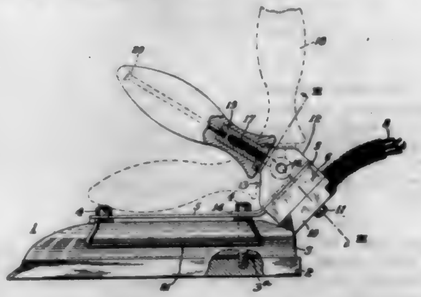
2. An unbalance-factor meter for a polyphase electric circuit comprising a movable member, and oppositely acting means for actuating the movable member, said means being actuated in accordance with two phase-sequence components of an electrical quantity of the circuit.

9. The combination of a polyphase circuit, differentially-connected electro-responsive elements associated therewith and means whereby said elements are energized in accordance with the positive and negative phase-sequence components of an electrical quantity of the circuit.



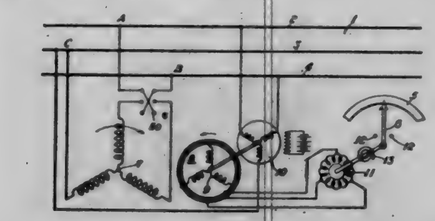
1,535,590. VOLT-AMPERE METER. ROBERT D. EVANS, Pittsburgh, and RAYMOND T. PIERCE, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 20, 1921. Serial No. 509,020. 10 Claims. (Cl. 172—245.)

1. A measuring device for a polyphase circuit comprising an indicating element embodying two windings, means energized from the circuit to energize one winding in accordance with one symmetrical component of an unbalanced quantity, control means for deriving a force from said energized means to energize the second winding,



and means for controlling said control means in accordance with another symmetrical component of a quantity of the circuit.

1,535,591. WINDOW-SHADE ROLL AND HOLDER THEREFOR. FRANCESCO FERRARA, Somerville, Mass. Filed Nov. 20, 1923. Serial No. 675,825. 8 Claims. (Cl. 156—27.)

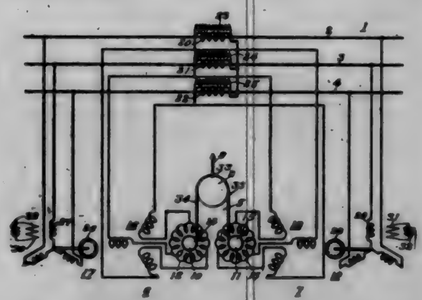


1. In combination, a spring actuated window shade roll, a spindle projecting from one end of said roll, said spindle being provided with a flattened outer end, a holder embodying therein a flange at one end thereof whereby said holder may be rigidly secured to a stationary support, and a U-shaped portion at the other end thereof and having a slot formed therein through which said spindle projects, a clamping member pivotally mounted upon said holder within said U-shaped portion and means to grip said flattened end of said spindle in said member.

1,535,592. SADIRON. FRANK F. FORSHEE, Flint, Mich., assignor to Westinghouse Electric Products Company, a Corporation of Michigan. Filed Nov. 12, 1920. Serial No. 423,562. 4 Claims. (Cl. 68—26.)

4. An electric iron comprising a heating element, a terminal block therefor, a handle, a mounting means for supporting said handle, and a single supporting means for said handle-mounting means and said terminal block.

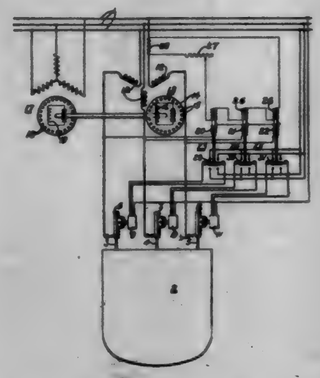
1,535,593. ELECTRICAL MEASURING DEVICE. CHARLES LE G. FORTESCUE, Pittsburgh, and LEWIS WARRINGTON CHUBB, Edgewood, Pa., and JOSEPH SLEPIAN, Boston, Mass., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 13, 1920. Serial No. 358,373. 28 Claims. (Cl. 172—245.)



19. The method of determining one of three symmetrical currents into which the unbalanced current of a three-phase system may be resolved which consists in measuring a double-frequency voltage which is the result of cutting, at a fixed rate, the field set up by a phase-sequence component of the current traversing the system.

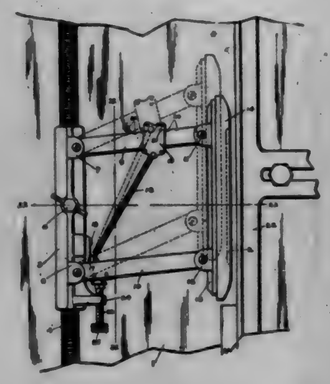
22. In a polyphase circuit, the combination with an electro-responsive device, of means for so modifying the energization of the device from the circuit that it is actuated in accordance with one symmetrical component of a polyphase electrical quantity.

25. The combination with a polyphase circuit, of a dynamo-electric machine embodying rotor and stator windings, the stator windings being connected to the circuit means connected to the circuit for synchronously actuating the rotor windings of the machine, and an electro-responsive device connected to the rotor windings.



1,535,594. ELECTRICAL MEASURING INSTRUMENT. CHARLES LE G. FORTESCUE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 9, 1920. Serial No. 402,294. Renewed Sept. 23, 1924. 10 Claims. (Cl. 172—240.)

1. A measuring instrument for an electric circuit comprising two motor meters, a movable member operatively connected to both motor meters, and means for supplying one motor meter with current in accordance with one phase-sequence component and the other in accordance with another phase-sequence component of an electrical quantity of the circuit.

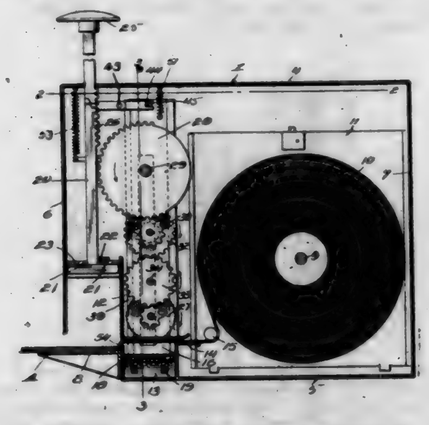


10. The combination of a polyphase circuit, a movable member, and means for actuating said member in accordance with the relative values of the positive and the negative phase-sequence components of current flowing in said circuit.

1,535,595. NEGATIVE-PHASE-SEQUENCE BALANCER FOR POLYPHASE FURNACES. CHARLES LE G. FORTESCUE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 13, 1922. Serial No. 552,244. 47 Claims. (Cl. 204—64.)

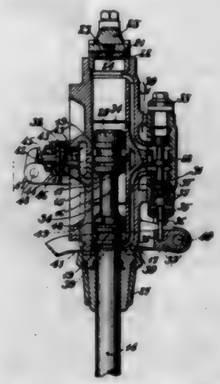
1. The combination with a polyphase electric-arc furnace, of a series balancer machine in series therewith, whereby arcs are supplied with equal currents at voltages which vary with the respective resistances.

1,535,596. GUARD AND GUIDE FOR CIRCULAR RABBETING SAWS. SILAS FRENCH, Rochester, N. Y. Filed July 18, 1923. Serial No. 652,445. 4 Claims. (Cl. 143—159.)



2. In a guard and guide for circular rabbeting saws having a saw table, the combination of a supporting rail, means for adjustably anchoring said supporting rail in the saw table, a pair of parallel arms pivoted to one side of said supporting rail, a pressure bar pivoted to the end of said parallel arms, a nonmetallic guard member carried on the outside of said pressure bar, a ledge formed on said guard member, said ledge overhanging the circular saw when in its normal inoperative position, an adjustable lug carried by said supporting rail, an adjustable member carried by one of said parallel arms, a tension spring stretched between said adjustable lug and said adjustable member on said arm to normally swing said parallel arm away from said supporting rail.

1,535,597. CONDIMENT HOLDER. JACOB FUNDA, Winnipeg, Manitoba, Canada. Filed Mar. 4, 1924. Serial No. 696,803. 1 Claim. (Cl. 65—57.)

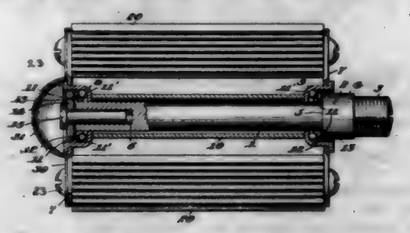


In a condiment holder, a closing cap provided with intersecting rows of discharge openings, a ring disposed within said cap and carrying intersecting spider arms disposed in alignment beneath said rows of openings, a plurality of projections carried on the upper faces of said spider arms and projecting through said openings, an eccentric operating member carried by said ring and passing through an opening in the cap to the exterior to render it accessible, and springs carried by the cap and engaging said ring for normally forcing said projections through the openings, said spring means permitting said ring to be pressed inwardly to remove the projection from said openings.

1,535,598. STAMP-AFFIXING DEVICE. RAYMOND J. GENGLER, Akron, Ohio. Filed June 4, 1924. Serial No. 717,859. 6 Claims. (Cl. 216—27.)

1. A stamp affixing device comprising a casing, an envelope receiving table, a vertically disposed spring controlled plunger arranged over said table, stamp feeding means, a train of gearing connected to the stamp feeding means and operable by said plunger, a fountain below said feeding means and adjacent said table, a moistener normally within said fountain, and means for raising the moistener into engagement with a stamp over the fountain upon the downward movement of the plunger, said means comprising a substantially U-shaped frame adapted to support said moistener in the base portion thereof, a lever pivotally supported in said casing and connected at one end to the upper portion of the frame, and a trip carried by said plunger for actuating the opposite end of the lever whereby the frame and moistener are simultaneously raised upon the down stroke of the plunger.

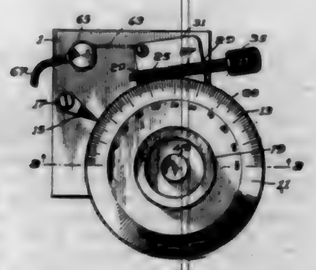
1,535,599. PNEUMATIC HAMMER. GEORGE H. GILMAN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Sept. 30, 1918. Serial No. 256,830. 24 Claims. (Cl. 121—30.)



1. In a drill sharpener, the combination with a swaging die, a piston for actuating said die, and fluid distribution means for causing reciprocation of said piston including means for alternately supplying fluid pressure to the opposite sides thereof and for exhausting the fluid including a normally open exhaust means, of means for holding said piston inoperative including means for subjecting it to unequal pressures on opposite sides, and means distinct from said first mentioned exhaust means for preventing equalization of the pressures on the opposite sides of said piston.

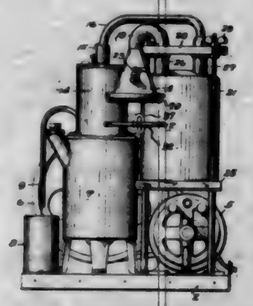
1,535,600. CANDY SCOOP. OVILA GODDU, Ponteix, Saskatchewan, Canada. Filed June 27, 1924. Serial No. 722,845. 5 Claims. (Cl. 294—106.)

1. A candy scoop comprising pivotally mounted gripping jaws, a handle, a lever arm pivotally mounted in said handle and operatively connected to the gripping jaws, and spring means carried by the handle adapted to exert upward pressure on the lever arm to automatically retain the gripping jaws in an open position.



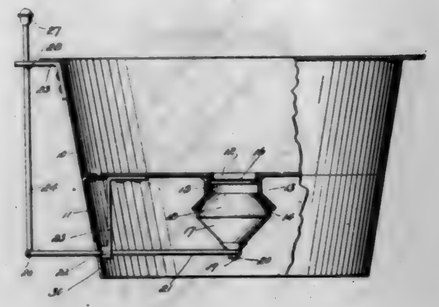
1,535,601. PEDAL FOR BICYCLES. JAMES H. GRAHAM, Torrington, Conn. Filed June 9, 1924. Serial No. 718,883. 6 Claims. (Cl. 208—70.)

1. A pedal for bicycles and the like, comprising a spindle having a longitudinal bore in its outer end, a pedal frame mounted on the spindle, and a headed pin



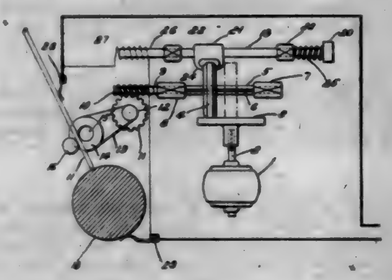
for holding the frame on the axle and of greater diameter than said bore to be held in place by frictional contact when driven into position.

1,535,602. RADIO TUNING DEVICE. ARTHUR C. HAYDEN, Brockton, Mass. Filed May 24, 1922. Serial No. 563,221. 3 Claims. (Cl. 74—7.)



1. In a radio tuning device, the combination of a panel having a hole therein, a shaft projecting through the hole in the panel with provision for connection with a radio tuning instrumentality, a worm gear on said shaft, a member carried by said shaft and having a part projecting beyond the periphery of the gear, a worm shaft carried by said projecting part and having a worm meshing with said gear, said member serving to hold the worm and gear in intermeshing relation, means to connect the member with the panel and prevent rotation of the member about the shaft, and means detachably to secure the gear to its shaft, said shaft being manually rotative to effect preliminary tuning adjustment of the shaft and said worm being manually rotative to effect fine tuning adjustment of the shaft.

1,535,603. PORTABLE ICE MACHINE. HERMAN S. HELLER, San Francisco, Calif., assignor to Heller Products Company, Inc., Los Angeles, Calif., a Corporation of California. Filed July 11, 1922. Serial No. 574,258. 8 Claims. (Cl. 62—153.)

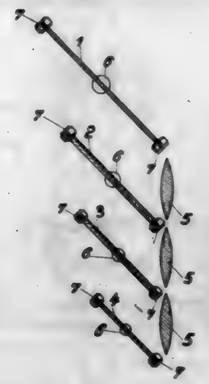


1. In a refrigerating apparatus, means for producing a vacuum, a container for liquid to be cooled, means whereby the liquid may be subjected to the vacuum, so that rapid evaporation may result, a container for holding hygroscopic material for absorbing the evaporated liquid, and means whereby the liquid container may be agitated while maintaining the other container stationary.

1,535,604. PAN OR THE LIKE. WILLIAM H. HENDRICKS, New Haven, Conn. Filed May 21, 1921. Serial No. 471,879. 2 Claims. (Cl. 137—21.)

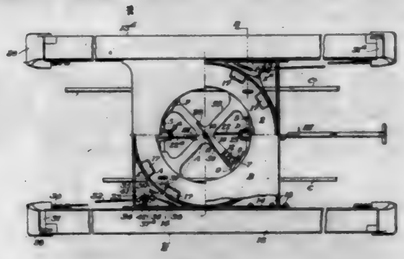
1. In combination with a portable pan having a circular depending supporting skirt, and having a downwardly and outwardly flared valve seat below the pan bottom, an upwardly tapered valve adapted to be engaged in the seat and disposed wholly below the pan bottom and within the skirt so as to be housed by the latter, a horizontal lever disposed beneath the pan bottom and connected to the valve and projecting at its outer end beyond the skirt so as to be partially housed by the skirt, means also housed by the skirt to pivotally support the lever, a guide member on the pan, a vertically movable rod carried by the guide member and disposed exteriorly of the pan and means to connect the outer end of the lever to said rod.

1,535,605. AUTOMATIC WELDING MACHINE. WALTER H. HIMES, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 26, 1921. Serial No. 439,914. 1 Claim. (Cl. 219—80.)



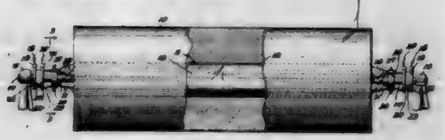
In an automatic electric welding machine, means for feeding an electrode controlled by the potential across the welding arc, said means comprising a constant-speed source of power, a variable-speed-electrode-feed drive, and an automatic device for regulating the speed of the feeding means.

1,535,606. PHOTOGRAPHIC DEVICE. LUDWIG HORST, Berlin-Wilmersdorf, Germany. Filed June 21, 1922. Serial No. 569,925. 5 Claims. (Cl. 88—1.)



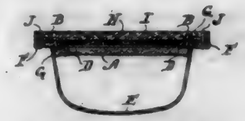
2. In a short focus photographic device of the class described, a relatively large collecting mirror and a

plurality of universally movable objective mirrors, partially reflecting and partially transparent, the objective



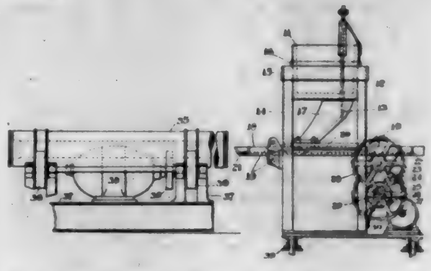
mirrors being on a line from the collecting mirror and graduated downwardly in size both as to length and width.

1,535,607. AUTOMOBILE TURNTABLE. RICHARD B. ISERMAN, Clarion, Pa., assignor, by mesne assignments, to Auto Turn Company, Clarion, Pa., a Corporation of Pennsylvania. Original application filed Aug. 31, 1923, Serial No. 660,376. Divided and this application filed July 26, 1924. Serial No. 728,507. 11 Claims. (Cl. 188—1.)



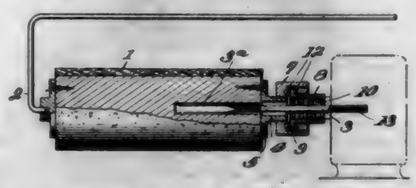
1. An automobile turntable comprising a truck, a turret revolubly mounted on said truck, and means controlled by an automobile rolling onto and off from said turret for locking the turret with respect to the truck.

1,535,608. HEATER FOR SCHREINER ROLLS. WILLIAM W. JOHNSON, Jr., Eddystone, Pa., assignor to Eddystone Manufacturing Co., Inc., Eddystone, Pa., a Corporation of Pennsylvania. Filed Aug. 3, 1922. Serial No. 579,450. 13 Claims. (Cl. 219—37.)



1. A cylindrical roll of the class described having electric heating units therein fixed to rotate therewith and extending longitudinally thereof from each to a point near but spaced a short distance from the longitudinal center of the roll.

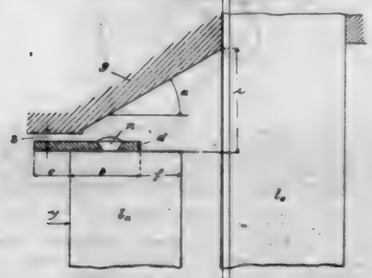
1,535,609. PROCESS OF MAKING SHOES. WILLIAM J. KELLY, Brooklyn, N. Y., assignor of one-third to Harry I. Bernhard, Brooklyn, N. Y. Filed June 18, 1920. Serial No. 389,824. 8 Claims. (Cl. 12—142.)



8. In the art of making shoes, the improvement which consists in providing an insole with a lip having a free portion which extends beyond the margin of said insole and which free portion of the lip is separated from the body portion of the insole by a channel extending inwardly from the edge of said insole body portion, lasting an upper for the margin thereof to ultimately lie within the channel of said insole and for the upper to contact with the face of the insole along the edge thereof, attaching the marginal portion of the upper and the inner edge portion of a welt to the lip of said insole concurrently with the lasting of the upper, imposing an outsole on the welt to encase the free portion of the lip between the outsole and the welt, and attaching the outsole to the welt independently of the attachment of the welt and upper to the lip.

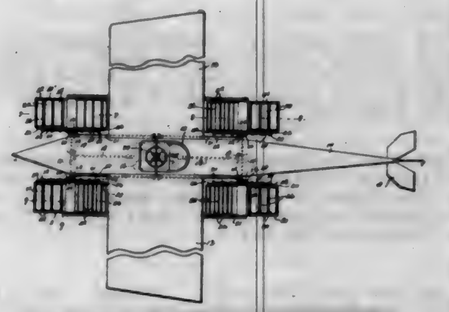
1,535,610. CENTRIFUGAL CASTING MACHINE. WALTER J. LANGSTON, Three Rivers, Quebec, Canada. Filed Sept. 16, 1922. Serial No. 588,629. 1 Claim. (Cl. 22—65.)

In a rotary casting machine, the combination of a rotary mould, a pouring trough, means for inserting the trough in said mould and then gradually withdrawing the mould, said trough having a canal open at both ends and a cooling chamber situated below the canal and being equipped with a pouring end bevelled and thereby adapted to feed the metal to the lowest part of the mould.



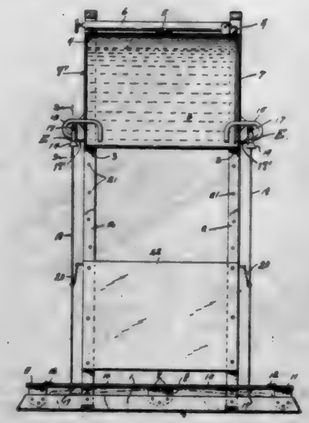
1,535,611. RAZOR SHARPENER. ALEXANDER A. LE ROUX, Lake Placid, N. Y. Filed Oct. 1, 1921, Serial No. 504,793. Renewed Mar. 10, 1925. 2 Claims. (Cl. 51—72.)

1. In a blade sharpening device, a drum, a rotary spindle having a forked flexible extremity to frictionally engage the drum whereby the drum and spindle normally



rotate at the same speed but allowing rotation of the drum to be retarded relative to that of the spindle upon undue pressure on the drum.

1,535,612. BLADING OF AXIAL TURBINES. FRANZ LÖSEL, Brunn, Czechoslovakia. Filed Apr. 21, 1924. Serial No. 708,083. 7 Claims. (Cl. 253—69.)

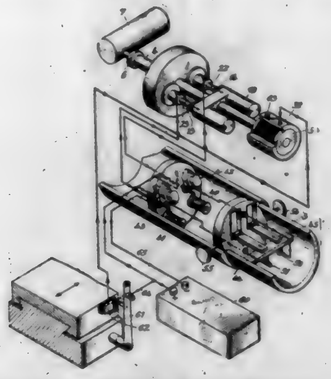


1. In an axial fluid pressure turbine in combination with a casing and alternating rotor and stator elements, headrings secured to the free ends of the rotor blades and extending over only part of the axial width of the same, said headrings forming on the entrance side of the rotor blades with the stationary part clearance or tightening spaces, the interior of the stationary part of the casing being extended with gradually increasing diameter from substantially the rear end of said clearances of the rotor blades towards the front end of the next following ring of stator blades so that the elastic fluid is issued from the rotor blades partly through the uncovered part of their periphery and through said gradually increasing interior of the stationary part into the next following guide blades.

1,535,613. PROPELLER FOR FLYING MACHINES OR THE LIKE. JESSE A. MCFARLANE, Milwaukee, Wis. Filed Aug. 26, 1924. Serial No. 734,253. 9 Claims. (Cl. 244—16.)

1. A propeller of the character described comprising a cruciform frame divided to form a plurality of compartments on each arm, each compartment being open on those opposite sides of the compartment extending at right angles to the axis of movement of the propeller, blades rotatably mounted in each compartment for rotation on an axis extending lengthwise of the compartment and at right angles to the plane of movement of the frame, power operated means for constantly rotating the cruciform frame, and means for causing the constant rotation of the blades, each upon its own axis, and for adjusting the relative angle of the blades to each other.

1,535,614. HOG SPRAYER. ANDREW MCPHERSON, Ward, S. Dak. Filed Jan. 16, 1924. Serial No. 686,594. 5 Claims. (Cl. 119—159.)



2. A spraying mechanism comprising, in combination, a pair of sills arranged substantially in parallelism, a tank supported by and above said sills, transversely disposed steps carried by the opposite end portions of the sills, platforms extending transversely of the sills and positioned between the steps, means for pivotally supporting the inner marginal portions of the platforms to permit said platforms to have swinging movement in a vertical direction, said platforms and steps being normally substantially coplanar, said steps being provided with means with which the platforms contact from below to limit the upward swinging movement of the platforms, spraying elements arranged at opposite ends of the tank and in communication therewith, a valve for controlling the flow through each of the elements, a rock shaft operatively engaged with a valve for moving the valve into open position upon rotation of the rock shaft in one direction, a rod operatively engaged with the rock shaft and with a platform, depression of said platform rocking the shaft in a direction to move the valve into open position, a retractible member engageable with the rod to constantly urge said platform in the opposite direction and to maintain the same in its normal position and upstanding guard plates arranged above and at opposite sides of the platforms and below the tank.

1,535,615. PRECISION FEELER APPARATUS FOR GRINDING MACHINES. MAX MAAG, Zurich, Switzerland, assignor of one-half to the Firm Maag-Zahnräder & Maschinen A.-G., Zurich, Switzerland. Filed Jan. 21, 1921. Serial No. 439,011. 10 Claims. (Cl. 177—311.)

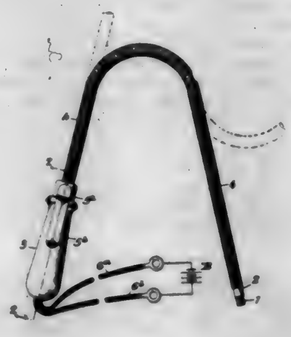
10. A precision feeler apparatus, in combination, a feeler displaceably arranged in its axial direction, means adapted to bring said feeler into touch with the blank for a short time at certain intervals, including a solenoid adapted to effect the movement of said feeler towards the blank, a spring operatively connected to said feeler and adapted to effect the movement of the latter away from the blank, an adjustable final contact device operated by said feeler, an adjustable pre-contact device operated by said feeler, said two contact devices being so adjusted relatively to each other, that the pre-contact device is actuated at the beginning of the last step of machining the blank and the final contact device at the finish of said step, a relay, means connecting said relay electrically to the final contact device, a second relay,

means connecting said relay electrically to the pre-contact device, a first signalling device operated by the first mentioned relay, and indicating the finish of the

machining of the blank, a second signalling device operated by the second relay and indicating the last step of machining the blank.

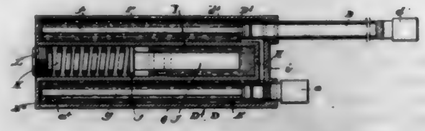
1,535,616. CASING STRUCTURE. PAUL MACGAHAN, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 30, 1923. Serial No. 615,865. 10 Claims. (Cl. 220—82.)

1. In combination, a casing having a window opening and a flange or seat portion around the opening, a window-member seated behind said flange and held in position thereby, a perimetral member adapted for insertion in the casing from the rear of said window to hold said window member in position and means for positively interlocking said perimetral member in position in the casing.



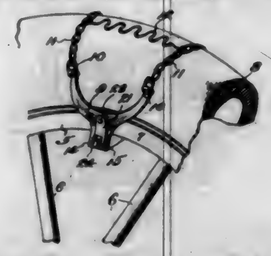
1,535,617. GARTER. ABRAHAM M. MALOUF, New York, N. Y. Filed June 9, 1924. Serial No. 718,875. 3 Claims. (Cl. 241—6.)

1. In a garter, a pad, a connector comprising side bars, end bars and an intermediate bar provided along one edge with teeth and equipped along its opposite edge with a bendable flange, a loop carried by the pad and receiving one side bar of the connector, and a band looped about the intermediate bar, the flange being bent to overhang the intermediate bar, one end of the band extending between the flange and the intermediate bar and being held by the flange on the teeth, the intermedi-



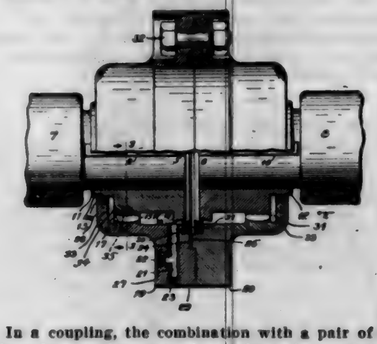
ate bar being spaced far enough from said one side bar to leave an opening of appreciable size between the looped portion of the band and the loop, thereby facilitating the looping of the band about the intermediate bar.

1,535,618. FLEXIBLE ELECTROMAGNET. EDWARD C. MAYER, Butte, Mont. Filed Aug. 19, 1922. Serial No. 583,056. 1 Claim. (Cl. 175—367.)



A portable electro-magnet comprising a slender pliable core formed of a number of parallel strands of soft flexible magnetic wire, and a conductor coil wrapped around said core, said core being adapted to be readily bent to any desired form.

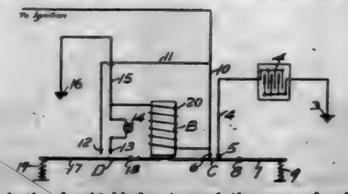
1,535,619. MULTIBARREL GUN. NICOLAS EMILIEN METHLIN, Paris, France, assignor to Schneider & Cie., Paris, France, a Limited Joint Stock Company of France. Filed July 8, 1924. Serial No. 724,871. 4 Claims. (Cl. 89—43.)



1. In a device of the character described, the combination of a plurality of brake cylinders, a conduit connecting the rear ends of said cylinders, a reservoir in open communication with said conduit, and a shock-absorbing plunger in said reservoir.

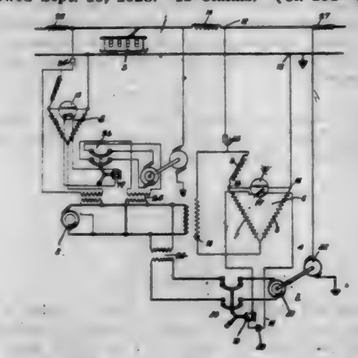
1,535,620. ANTISKID DEVICE. CHESTER F. MORGAN, Mount Vernon, Ill. Filed Aug. 19, 1924. Serial No. 732,978. 2 Claims. (Cl. 152—14.)

1. A non-skid device comprising a pair of side plates, cross chains connected at their ends to said side plates, a circumferentially extending serpentine traction member connected at its ends to the intermediate portions of said chains, and means to secure the side plates to a wheel.



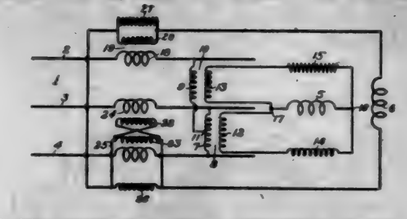
1,535,621. ROTARY-SHAFT COUPLING. MERTON W. MORGAN, Baltimore, Md., assignor to Poole Engineering and Machine Company, Woodberry, Md., a Corporation of Maryland. Filed May 29, 1923. Serial No. 642,239. 3 Claims. (Cl. 64—101.)

1. In a coupling, the combination with a pair of shaft members for attachment to the shafts to be coupled, each member comprising teeth having curved crowns, of a pair of sleeve members bolted together and having teeth engaging the teeth of said shaft members, the surfaces between the teeth on said sleeve bearing on said crowns, a frustro-conical surface on each shaft member, an outer cylindrical surface on each sleeve member and a frustro-conical surface on each of said sleeve members located to contact, when said sleeve members are unbolted and moved axially, with the frustro-conical surface on the corresponding shaft member in order to coaxially align said cylindrical surface with the corresponding shaft.



1,535,622. BATTERY INDICATOR AND CUT-OUT. WILLIAM AUNDRAE MORGAN, Los Angeles, Calif. Filed Feb. 5, 1921. Serial No. 442,883. 3 Claims. (Cl. 177—311.)

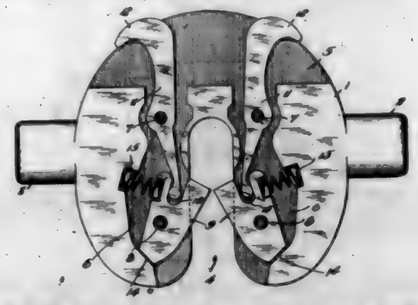
1. The combination comprising an electromagnet; a cut-out switch having a pivoted blade disposed at right angles to the axis of said electromagnet and forming an armature and a pair of contact points positioned in contacting relation to said armatured blade between the pivot and the electromagnet, spring means tending to move said blade to open said switch against the pull of said electromagnet; a tell-tale switch having a pivoted blade forming an armature for said electromagnet disposed in alignment with said cut-out switch blade, spring means tending to move said blade to close said switch against the pull of said electromagnet, and a pair of contacting points positioned in contacting relation to the last mentioned armature blade between the pivot and the spring means, and manually operable means for



moving both of said blades toward the core of said electromagnet whereby to close said cut-out switch and open said tell-tale switch.

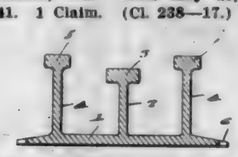
1,535,623. AUTOMATIC SUBSTATION. CHARLES MCL. MOSS, Pittsburgh, and ROY J. WENSLEY, Edgewood Park, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed July 10, 1918. Serial No. 244,238. Renewed Sept. 19, 1923. 41 Claims. (Cl. 191—2.)

36. An automatically reclosing circuit-controlling device comprising means for controlling the interchange of energy in an electrical system and means comprising a Wheatstone bridge connected to the system for controlling said controlling means.



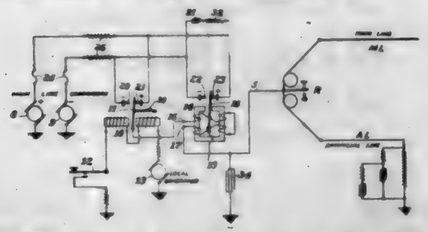
1,535,624. ELECTRICAL SYSTEM. ALEXANDER NYMAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 15, 1920, Serial No. 396,529. Renewed Feb. 16, 1925. 10 Claims. (Cl. 172—245.)

1. The combination with a three-phase electric circuit, of two transformers, a winding, and means for so connecting the transformers to the circuit and to the winding that current traverses the winding only when the three-phase circuit is unbalanced.



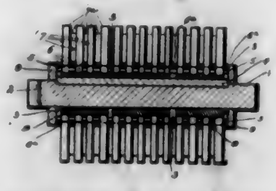
5. The combination with a three-phase circuit, of three current transformers connected to the circuit, a resistor connected across one transformer, a reactor connected across the other two transformers, and a winding connected in series-circuit relation to the resistor and reactor.

1,535,625. SUCKER-ROD ELEVATOR. WALTER O'BANNON, Tulsa, Okla. Filed Jan. 26, 1923. Serial No. 615,049. 2 Claims. (Cl. 294—91.)



1. A sucker rod elevator comprising a body, pivot elements carried by the body, and latches having openings receiving the pivot elements, whereby the latches are mounted to swing on the piot elements, the openings being of greater diameter than the pivot elements, so that the latches may move bodily, in the direction of their lengths, and transversely of the pivot elements, and engage the body, thereby reducing the strain on the pivot elements.

1,535,626. RAIL CONSTRUCTION. WILLIAM THOMAS PARKER, Mobile, Ala. Filed May 20, 1924. Serial No. 714,641. 1 Claim. (Cl. 238—17.)

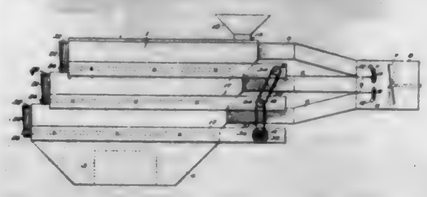


A guard rail comprising a base portion having a web and head portion disposed along its median longitudinal dimension and provided with other web and head portions extending longitudinally thereof, and located one at each side of the first mentioned web and head portions, and spaced therefrom in parallel relation, one of the said side head and web portions being cut away to provide a clearance space, and a switch tongue located in said clearance space and pivoted to the base portion of a rail, at a point in alignment with the ends of the cut away web and head portions.

1,535,627. TELEGRAPH SYSTEM. SAMUEL W. PERKINS, Jacksonville, Fla., assignor to The Western Union Telegraph Company, New York, N. Y., a Corporation of New York. Filed May 21, 1921. Serial No. 471,419. 7 Claims. (Cl. 178—58.)

1. In a telegraph system, a circuit, a source of current, a polar relay, transmitting mechanism, circuit connections between said relay and said mechanism for controlling the actuation of said relay, said mechanism and said relay operating conjointly to reverse the polarity in said circuit while maintaining the continuity thereof.

1,535,628. BRUSH. JOHN J. PETERSON, Steubenville, Ohio. Filed Mar. 7, 1924. Serial No. 697,606. 5 Claims. (Cl. 15—198.)

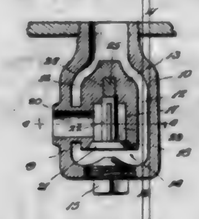


1. In a device of the character described, an elastic body, bristle members embedded in said body and each including an eye and resilient arms extending from the ends thereof, and securing rods extending through the body longitudinally thereof, said rods being inserted through the eyes of the bristle members and acting to secure them in the body.

1,535,629. METHOD OF TREATING ALLOYS. NORMAN B. PILLING, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 2, 1922. Serial No. 586,026. 8 Claims. (148—11.)

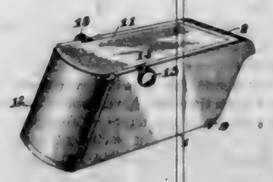
1. The method of treating alloys having a coefficient of resistance that continuously approaches zero as the material is cold-worked which comprises cold-working said material and heating to a temperature not higher than 200° C. for diminishing the resistance thereof.

1,535,630. DRY CONCENTRATOR. WILLIAM H. POWELL, Albuquerque, N. Mex. Filed May 17, 1924. Serial No. 713,975. 19 Claims. (Cl. 83—54.)



1. A dry concentrator involving a casing provided with an opening for introducing pulverized ore and having an outlet for the escape of gangue and air, a reciprocating carriage within said casing provided on opposite sides with a plurality of vanes disposed obliquely to the direction of reciprocation of said carriage, the vanes on one side of the carriage being in staggered relation to those on the other side, and means for causing a current of air to pass through said casing between said vanes.

1,535,631. AUTOMATIC CYLINDER COCK. ROBERT H. SMITH, Columbus, Ga. Filed July 25, 1922. Serial No. 577,375. 1 Claim. (Cl. 121—134.)



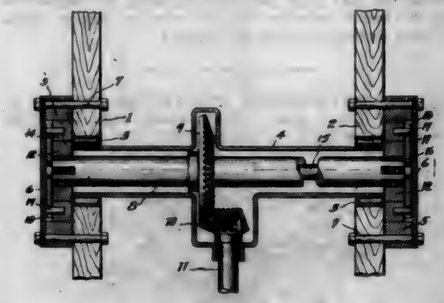
In a cylinder cock, a casing provided at its upper end with a nipple and formed with passages leading downwardly within the casing at opposite sides thereof and connected at their lower ends by a chamber common thereto, said passages defining an intervening core having an axial valve chamber opening at its lower end into the former chamber and the casing being formed with an outlet passage extending across one of said first mentioned passages as well as with a slot extending through the casing and through said core at substantially a right angle to said outlet passage, a downwardly opening valve slidable in said valve cham-

ber but normally held elevated in closed position by steam pressure, the valve being provided with a stem to project into said slot, and a bar slidably fitting

through said slot and provided with an inclined face to coact with the valve stem for depressing the valve to open position when the bar is shifted.

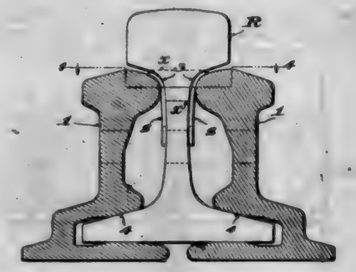
1,535,632. ICE-SCRAPING DEVICE. JOSEF SPERLICH, Orland, Calif. Filed Oct. 29, 1924. Serial No. 746,669. 7 Claims. (Cl. 83—62.)

1. An ice scraper comprising in combination with a casing having the top and one end thereof open, a cover of angular formation therefor, said cover being removable from the casing, and a flange upon one end of the cover adapted to flushly contact with the bottom of such casing, at times.



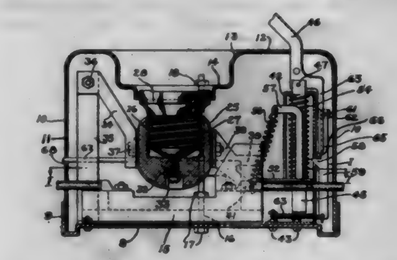
1,535,633. SUBMARINE CONTACT MINE. ELMER A. SPERRY, Brooklyn, N. Y. Filed Nov. 8, 1917. Serial No. 200,860. 26 Claims. (Cl. 102—8.)

1. A submarine mine adapted to be launched from a torpedo tube, comprising a buoyant explosive portion, an anchor portion, extensible connecting means between said portions, a fragile tube within said buoyant portion adapted to be projected therefrom, means for projecting said tube, and means brought into action as the mine is set for operating said last-named means for causing said tube to be projected therefrom.



1,535,634. DIFFERENTIAL DRIVING MECHANISM. CHARLES E. STARR, Bellingham, Wash., assignor to Perfecto Gear Differential Co., Seattle, Wash., a Corporation of Washington. Filed Oct. 18, 1920. Serial No. 417,682. 5 Claims. (Cl. 192—50.)

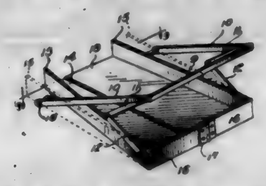
2. A differential mechanism comprising a pair of vehicle wheels, a concentrically mounted drum on each wheel, a driving shaft for said wheels, cams in each drum fixed on the shaft, clutch blocks interposed between



the cams and the associated drum surface, a spider loosely interlocked with each set of clutch blocks, and means for rigidly connecting both spiders.

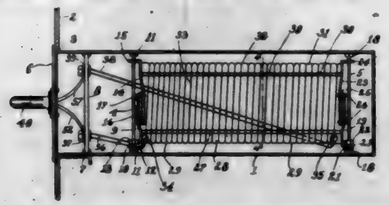
1,535,635. HEAD-FREE TYPE RAIL JOINT. McLEOD THOMSON, Philadelphia, Pa., assignor to The Rail Joint Company, New York, N. Y., a Corporation of New York. Filed June 10, 1924. Serial No. 719,151 7 Claims. (Cl. 238—188.)

1. A rail joint including rails, a joint bar having a bearing on the rail flanges and clearance throughout from the undersides of the rail heads, and offsetting members arranged to provide an engagement for the bar head at the rail head fillets to bring the bar head into solid resistance to load deflections.



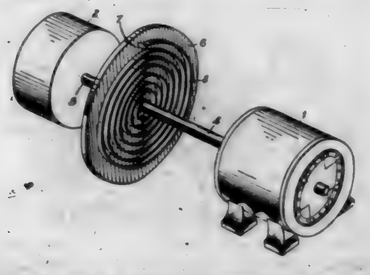
1,535,636. SAFETY INCLOSED SWITCH. EMIL H. W. ULLRICH, New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 21, 1921. Serial No. 446,645. 6 Claims. (Cl. 200—70.)

1. Switch mechanism comprising a pair of separate contact members, a switch member for connecting the said contact members, a spring for moving the switch member into engagement with the contact members with



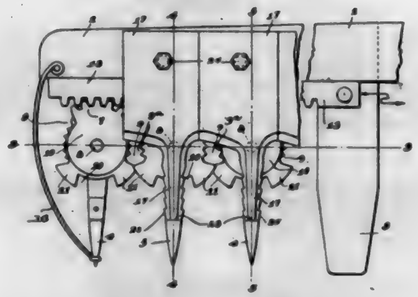
a snap-action, means for retracting the spring, a latch for restraining the spring, an operating handle for releasing the said latch and yielding means for withdrawing the switch member from the contact member when the said retracting means is actuated.

1,535,637. ATTACHMENT FOR STOVES. ANDREW A. VENETS, Great Falls, Mont. Filed Apr. 17, 1923. Serial No. 632,769. 4 Claims. (Cl. 126—242.)



1. A tray for use in removing ash pans from stoves comprising a bottom, side walls, and a rear wall, said bottom and side walls being adjustable at the front of said tray to vary the width of the front end of said tray, the front of said tray being open to permit it to be arranged in front of a stove and the ash pan placed thereon by sliding it from the stove, and a bail secured to said tray.

1,535,638. ELECTRIC HEATING UNIT. JOHANN G. WALLMANN, Oakland, Calif. Filed Apr. 10, 1922. Serial No. 550,993. 2 Claims. (Cl. 219—19.)



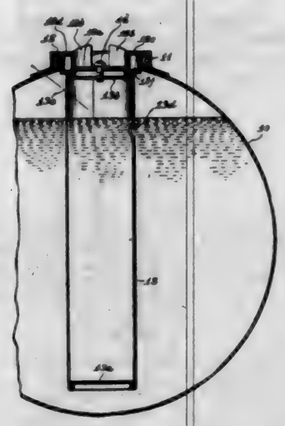
1. In a heating element relatively movable insulating saddles, supports therefor, a coil wound around said saddles and means comprising a member adapted to expand under heat to produce relative movement of said saddles, one end of said member being fixed to a support and the other end of said member being slidably mounted on said support.

1,535,639. MEANS FOR OVERCOMING LOAD INERTIA. CLIFFORD A. M. WEBER, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 16, 1918. Serial No. 254,212. 1 Claim. (Cl. 172—120.)

The combination with a rotatably mounted load possessing an appreciable inertia, of a driving means therefor, comprising a salient-pole induction motor, and elastic means interposed between said load and said motor, whereby said load is enabled to be accelerated gradually to synchronous speed of said motor although said driving motor accelerates from its induction motor speed to its salient pole speed with great rapidity.

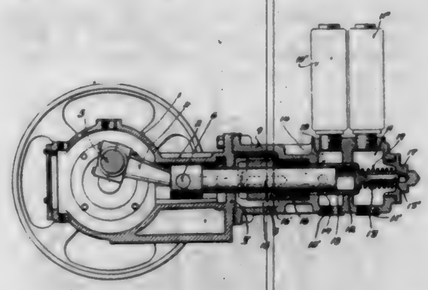
1,535,640. MOWING-MACHINE CUTTER BAR. FRANK R. WILSON, Ardley, British Columbia, Canada, assignor of one-half to John MacLeod, Vancouver, British Columbia, Canada. Filed Sept. 8, 1921. Serial No. 499,129. 6 Claims. (Cl. 56—293.)

1. A cutting means for mowing machines, said means comprising a supporting bar horizontally projecting from and carried by the mowing machine, forwardly projecting fingers carried by the bar, a series of oscillating knife members all mounted in the same horizontal plane and each carried by a projecting finger, the knife members each having projections, said projections being bevelled to provide cutting edges, the knife members being arranged so that the bevels of the projections of successive knife members are oppositely directed that they may overlap, and means for oscillating all of the knife members simultaneously.



1,535,641. GAUGE. ERIK H. ALDERBORGH, Poughkeepsie, N. Y., assignor to C. E. Johansson, Inc., Poughkeepsie, N. Y., a Corporation of Delaware. Filed Jan. 15, 1924. Serial No. 686,326. 9 Claims. (Cl. 33—178.)

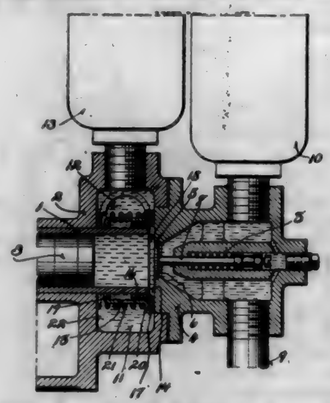
1. In a plug gauge, a handle, a gauge plug loosely fitted thereon and means for removably holding the plug in position, said means comprising a cross-pin passing through the handle and overlapping the inner end of the plug, and a screw engaging the outer end of the plug.



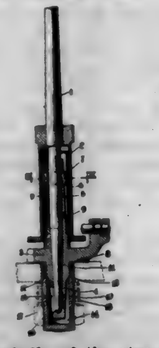
1,535,642. FUEL-RESERVE TANK. JOHN G. ARMKNECHT, Detroit, Mich. Filed Jan. 30, 1922. Serial No. 532,613. 10 Claims. (Cl. 158—46.5.)

1. A fuel reserve instrumentality for motor vehicle service and comprising a closure member for the filling opening of the fuel supply tank, and a fuel container secured to and depending from and movable with the closure, said container preventing filling of the supply tank when in normal position and having dimensions and a configuration to permit free passage through the filling opening, said container having a permanently closed bottom and having an opening in a longitudinally-extending wall thereof intermediate the opposite ends

of the container, the position of the opening being such as to approximately control the amount of the reserve charge, said opening forming the discharge port for the reserve charge.



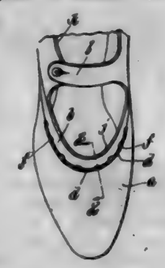
1,535,643. PUMP. JOHN ASTROM, Fort Wayne, Ind., assignor to Fort Wayne Engineering & Manufacturing Co., Fort Wayne, Ind. Filed Nov. 23, 1922. Serial No. 602,801. 1 Claim. (Cl. 103—153.)



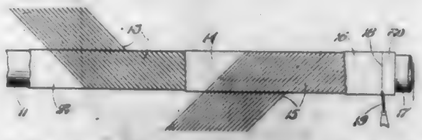
A pump comprising a housing having an intake chamber and a delivery chamber, said chambers being provided with outer walls, and said chambers being separated by a partition wall, a separate and distinct sleeve carried by said partition wall and projecting into said delivery chamber and extending completely through said intake chamber and into the outer wall of said intake chamber and forming a cylinder, said sleeve having a plurality of apertures therethrough opening into said intake chamber, a resiliently urged valve positioned within said delivery chamber and contacting with the outer end of said sleeve, and a plunger mounted for reciprocation within said sleeve and adapted to close said apertures on its delivery stroke, whereby the reciprocation of said plunger does not affect liquid in said intake chamber until the apertures in said sleeve are uncovered by said plunger.

1,535,644. PUMP VALVE. JOHN ASTROM, Fort Wayne, Ind. Filed June 16, 1924. Serial No. 720,373. 5 Claims. (Cl. 103—153.)

1. In a pump, the combination of a cylinder, a cylinder head spaced from the end of said cylinder and having a smooth face adjacent such end, a piston positioned within said cylinder, a valve having a cylindrical portion surrounding said cylinder and having a flange adapted to contact with the smooth surface of said cylinder head.



1,535,645. SPINNING AND TWISTING SPINDLE. EUGENE ATWOOD, Stonington, Conn., assignor to Atwood Machine Company, Stonington, Conn., a Corporation of New Jersey. Filed Mar. 9, 1922. Serial No. 542,349. 3 Claims. (Cl. 308—169.)

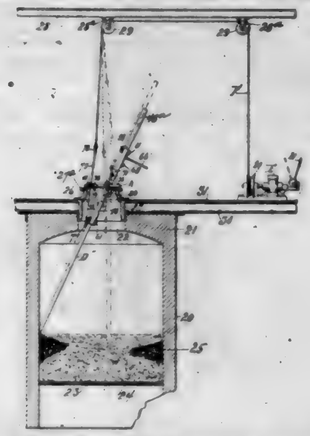


1. A self oiling spindle of the step and bolster type comprising a case having bolster and step bearing portions, a removable oil cup surrounding the step bearing portion, and a removable tube surrounding and spaced from the bolster bearing portion.

1,535,646. ORNAMENTED SHOE UPPER. WILLIAM F. BOSTOCK, South Braintree, Mass. Filed Dec. 17, 1923. Serial No. 681,138. 6 Claims. (Cl. 41—10.)

1. A shoe upper comprising a number of pieces stitched together, and a string of beads attached to, and extending along, an exposed edge of said upper.

1,535,647. CORD-TIRE STOCK AND METHOD OF MAKING SAME. JOSEPH B. BRENNAN, Orange, N. J. Filed Dec. 18, 1919. Serial No. 345,728. 5 Claims. (Cl. 154—2.)

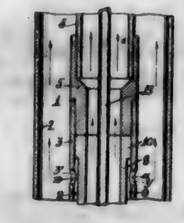


3. The method of making cord-stock for a pneumatic tire which consists in laying frictioned cords in parallel relation with each other about a cylindrical mandrel to form a layer and then cutting the layer into endless, seamless bands.

1,535,648. REMOVABLE SIDE WINDOW FOR AUTOMOBILES. JOHN FREDERICK BROMMER, New York, N. Y. Filed May 18, 1921. Serial No. 470,577. 3 Claims. (Cl. 296—85.)

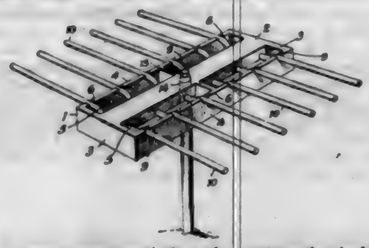
1. The combination with an automobile body frame and its folding top frame, of removable rigid side windows for the rear seat, brackets carried by the body frame, having uprising branches forming sockets for receiving the bottoms of the windows, bolts passing through the branches and window bottoms for rigidly securing the windows in the sockets, and latches hinged to the top frame having spring clips for frictionally engaging the tops of the windows to yieldingly hold the windows in position, the spring clips being adjustable on the latches.

1,535,649. POWER DECLINKERING APPARATUS FOR GAS GENERATORS. GASTON A. BRONDER, Brooklyn, N. Y.; Lucia R. Bronder, administratrix of said Gaston A. Bronder, deceased, assignor of one-half to Thomas Costigan, New York, N. Y. Filed Aug. 11, 1920. Serial No. 402,877. 8 Claims. (Cl. 48—87.)



4. In a power declinkering apparatus for gas generators, the combination of a rotatable guide ring, an oscillating saddle pivoted to the ring, a pair of bar guides hinged to the saddle, a declinkering bar slidably supported in said bar guides, and means to reciprocate the bar in the guides.

1,535,650. COMBINED CORSET ANCHOR AND HOSE SUPPORTER. ETHEL D. BURTCHBY, Tulsa, Okla. Filed Dec. 17, 1923. Serial No. 681,208. 3 Claims. (Cl. 241—1.)

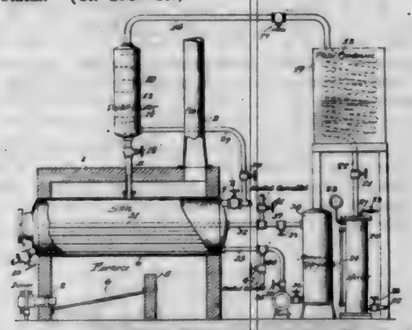


1. The combination with a corset, of a single open-ended limb-encircling band adapted to be positioned on the wearer below the knee, said band including a detachable pivotal connection between its ends, and a vertically disposed anchor strap for the corset arranged at the medial line of the side of the wearer and secured at its upper end to the corset and directly connected at its lower end to the band by a pivotal connection located at a point above said band connection.

1,535,651. AUTOMATIC OIL AND GAS SEPARATING PUMP. ALBERT M. CHRISMAN and JACK E. WELLS, Pacifico, Calif. Filed Dec. 6, 1924. Serial No. 754,347. 2 Claims. (Cl. 103—179.)

1. An oil and gas separating pump comprising a barrel adapted for suspension in a well; a liner within and spaced from said barrel, the space between the barrel and liner being closed above, and said barrel having ports through which the well communicates with the upper portion of said space; a coupling fitted to the upper end of the barrel and abutting against the upper end of the liner; a coupling fitted to the lower end of the barrel, said coupling having an inserted portion abutting against the lower end of the liner, said inserted portion having ports leading from the lower end of the space between the liner and barrel; a tail pipe having a closed foot, fitted to the lower end of the lower coupling and communicating with the ports in the inserted portion of said coupling; a tubular bottom shoe fitted interiorly to the upper portion of said lower coupling and spaced from the tail pipe; and pumping instrumentalities within the liner, intermediate the upper and lower ports, and comprising a standing valve assembly and suction pipe, carried by said bottom shoe, a plunger above said standing valve assembly and a traveling valve assembly associated with said plunger.

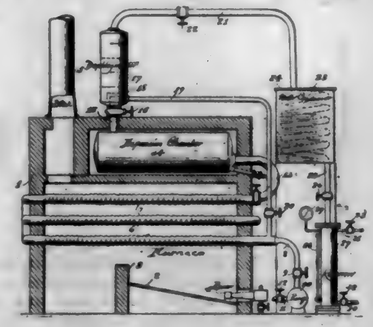
1,535,652. CAMP STOVE. CHESTER S. DEFENBAUGH, Oroville, Calif. Filed Apr. 14, 1924. Serial No. 706,862. 3 Claims. (Cl. 126—30.)



1. A camp stove consisting of a rectangular body having a longitudinal top, outer and inner flanges having registering recesses, and a series of bars having their ends bent to engage and lock in said recesses, and a supporting post engaging said longitudinal top.

1,535,653. HYDROCARBON-OIL TREATMENT. GUSTAV EGLOFF and HARRY P. BENNER, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Aug. 20, 1920. Serial No. 404,910. 3 Claims. (Cl. 196—35.)

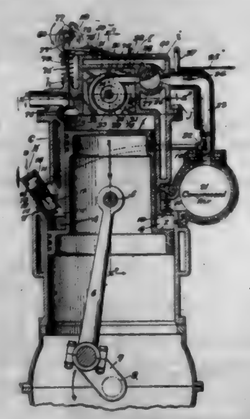
3. A step in the process of refining oils which comprises subjecting cracked petroleum oil while in the presence of hydrochloric acid and communited earthy material to a distillation temperature.



1,535,654. PROCESS FOR TREATING PETROLEUM OIL. GUSTAV EGLOFF and HARRY P. BENNER, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Sept. 18, 1920. Serial No. 411,339. 1 Claim. (Cl. 196—47.)

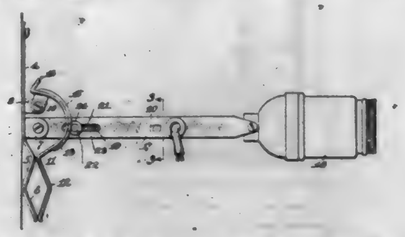
A process of dehydrating and subsequently cracking hydrocarbon oil consisting in introducing a supply of emulsified oil to a still, in subjecting the emulsified oil to a temperature in the still below the freezing point of water by passing a freezing agent through a closed coil located in the still and thereby causing the water and the oil to stratify, in withdrawing water from the oil and in applying heat to the oil by passing a heated gas through said closed coil while maintaining the oil under a superatmospheric vapor pressure to crack the oil in said still.

1,535,655. APPARATUS FOR TREATING OIL. GUSTAV EGLOFF and HARRY P. BENNER, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Oct. 8, 1920. Serial No. 415,637. 1 Claim. (Cl. 196—107.)



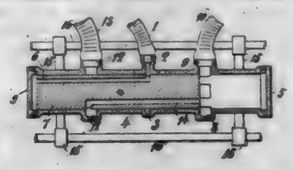
In an apparatus for cracking hydrocarbon oil, the combination with a furnace of a coil therein for the passage of oil, said coil consisting of a plurality of spirally corrugated tubes passing through the furnace and through which the oil must pass, a vapor chamber in communication with said tubes, a dephlegmator communicating with said vapor chamber, and a condenser communicating with said dephlegmator.

1,535,656. PROCESS FOR TREATING ACID-SLUDGE OILS. GUSTAV EGLOFF, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed May 16, 1921, Serial No. 470,034. Renewed Jan. 3, 1925. 3 Claims. (Cl. 23—173.)



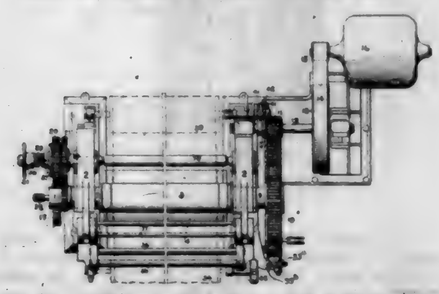
1. A process of treating acid sludge oils consisting in distilling said oil under a pressure, removing from the still as vapors the sulphuric and other acid constituents and certain light oils, condensing and then separating and collecting them.

1,535,657. METHOD OF AND MEANS FOR PRODUCING POWER FROM FUEL. ORVILLE H. ENSIGN, Pasadena, Calif. Filed May 8, 1917. Serial No. 167,847. 40 Claims. (Cl. 123—30.)



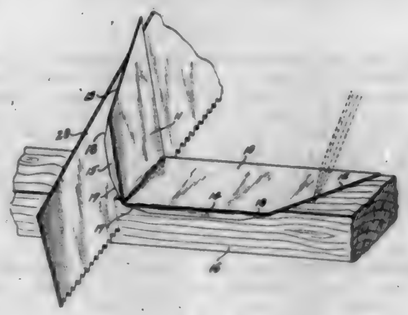
1. The method of producing power from fuel which consists in supplying separately and simultaneously to a confined space, compressed air and fuel at the same pressure, establishing a vortex in the admitted air current and utilizing the pressure drop of such vortex to establish and meter the fuel flow, combining and combusting the same in said space, and applying the product to the purpose set forth.

1,535,658. PORTABLE ELECTRIC-LIGHT FIXTURE. ELMER A. ERMOLD, Philadelphia, Pa., assignor to Wirt Company, Portland, Me., a Corporation of Maine. Filed June 27, 1923. Serial No. 647,986. 6 Claims. (Cl. 240—52.)



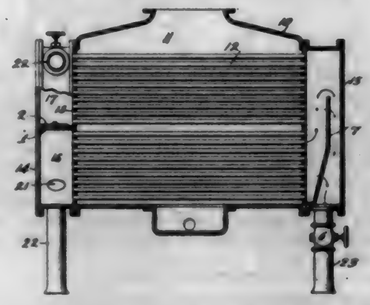
1. A device of the character described, comprising a base, a tubular arm pivoted to the base and adapted to carry a lamp, a plate carried by the base, and elastic means carried within the arm and engaging the plate for retaining the arm in approximately parallel relation relatively to the base.

1,535,659. FLUID-PRESSURE ENGINE. IVAR KÖBKE FOG, Copenhagen, Denmark. Filed Feb. 18, 1921. Serial No. 446,043. 4 Claims. (Cl. 123—2.)



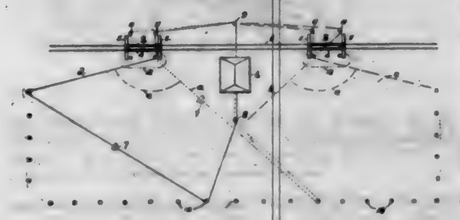
1. An engine or driving device comprising a cylinder, means for supplying driving fluid, alternately to the opposite ends of the said cylinder, means for exhausting said driving fluid when expended, a piston sliding freely in said cylinder and adapted to reciprocate therein under the influence of the driving fluid, said piston not being mechanically connected with any other part or parts of the engine and serving only as a recoil element and to compress the driving fluid alternately at opposite ends of the cylinder, and means independent of said piston for transmitting the power generated by the expansion of said fluid.

1,535,660. CALENDER FOR TEXTILE AND OTHER MATERIALS. THOMAS W. FRANCE, Providence, R. I., assignor to H. W. Butterworth & Sons Company, a Corporation of Pennsylvania. Filed Sept. 24, 1924. Serial No. 739,532. 7 Claims. (Cl. 26—89.)



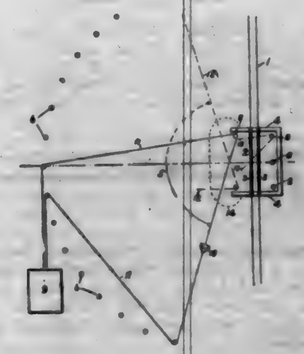
1. In a machine of the class described having a pair of calendering rolls normally rotating in contact, and means for momentarily moving the rolls out of contact for permitting of the passage of a transverse seam in the material being treated, combined with power means for positively rotating one of the rolls continuously at a predetermined surface speed, power means for rotating the other roll at a slightly different surface speed comprising a train of gearing for power transmission from and in accordance with the speed of the first mentioned roll and extending to and including the second mentioned roll and having therein automatic friction compensating means for permitting an automatic smooth change in surface speed of the second mentioned roll after pick up and under control of frictional resistance arising upon the said roll when in contact with the material and first mentioned roll.

1,535,661. SAW GUIDE AND SQUARE. JOHN J. GARRITY and JOHN F. BRADLEY, Bridgeport, Conn. Filed May 23, 1923. Serial No. 640,897. 4 Claims. (Cl. 143—86.)



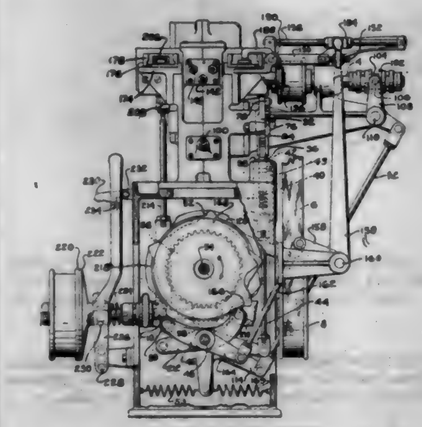
1. A tool comprising a body having two portions arranged at an angle to each other in different planes, and flanges adjacent the lateral side edges of both said portions and extending longitudinally thereof, the flanges of each portion extending in a direction away from the other portion.

1,535,662. SURFACE CONDENSER. JOHN F. GRACE, Kearny, N. J., assignor to Worthington Pump & Machinery Corporation, a Corporation of Virginia. Filed Mar. 24, 1923. Serial No. 627,265. 3 Claims. (Cl. 257—43.)



1. A surface condenser comprising a steam space traversed by cooling tubes, a combined inlet and discharge head at one end of the tubes, a return flow head at the other end of the tubes, a valved discharge connection on the discharge portion of the combined inlet and discharge head, a valved discharge connection on the return flow head, and a valved diaphragm dividing the combined inlet and discharge head.

1,535,663. DRAG-SCRAPER EQUIPMENT. WILLIAM E. HALE, Fort Washington, Pa., assignor to R. H Beaumont Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 9, 1924. Serial No. 685,141. 1 Claim. (Cl. 214—10.)



Drag scraper equipment comprising an elevated railway line, spaced dumping spans interposed in the line, a yard situated in front of the line and comprising two contiguous storage areas with space between them and the line, a powerhouse located in said space, front and back guide pulleys operatively arranged in respect to the powerhouse and respectively located front and back of the line, a front block structure bounding the yard and common to each storage area and said structure co-operating with the front guide pulley, and a back block structure disposed at the back and front and ends and under each dumping span and each said back block structure co-operating with the back guide pulley.

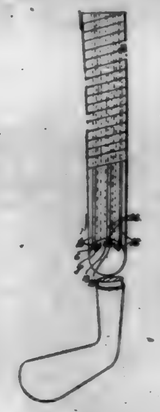
1,535,664. DRAG-SCRAPER EQUIPMENT. WILLIAM E. HALE, Fort Washington, Pa., assignor to R. H. Beaumont Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 17, 1924. Serial No. 686,721. 2 Claims. (Cl. 214—10.)

1. Drag scraper equipment for railway dumping spans and their storage yards comprising a block structure located under the span and arranged at the ends and back portion thereof to provide for taking material from under the span and to command a large storage area.

1,535,665. MACHINE FOR SHARPENING BLADES. FERDINAND G. HENRY, New York, N. Y., assignor, by mesne assignments, to Walden Knife Company, Walden, N. Y., a Corporation of New York. Filed Aug. 30, 1920. Serial No. 406,896. 18 Claims. (Cl. 51—96.)

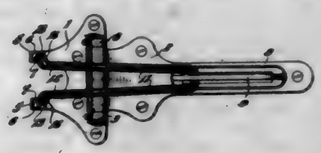
2. A machine of the class described, having in combination blade sharpening means, a blade holder having blade gripping jaws for engaging opposite lateral faces of the blades, a guideway through which the blades are delivered to the blade holder, means for moving the blade holder into position to receive the blades from said guideway, and means for opening and closing the blade gripping jaws.

1,535,666. SHOULDER STRAP FOR WEARING APPAREL. ALBERT A. HODGKINS, Bridgeport, Conn., assignor to The American Fabrics Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Sept. 13, 1922. Serial No. 587,946. 3 Claims. (Cl. 241—12.)



1. A woven shoulder strap for wearing apparel of substantially even width with its edges parallel with the warp of the cloth and longer on one side than on the other so that when attached at substantially right angles to the horizontal line of the garment as worn it will be higher on the inner side than the outer and thus lie flat on the shoulder.

1,535,667. GOLF-CLUB SHAFT OR HANDLE. ARCHIBALD B. HORNE, Springfield, Mass. Filed Dec. 19, 1922. Serial No. 607,916. 5 Claims. (Cl. 273—81.)



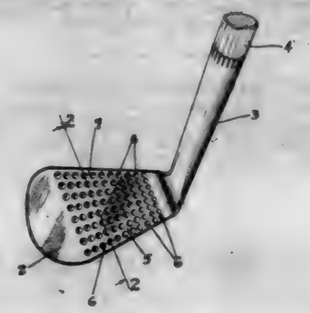
3. An article of manufacture comprising a golf club shaft of wood and formed with grooves therein, the

inner or bottom portions of which are greater in extent than the outer or top portions, fibrous inserts in the

grooves for strengthening the shaft, and conforming to the cross sectional area of the grooves, and an adhesive substance for securing the inserts in the grooves.

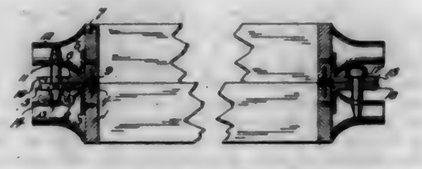
1,535,668. HINGE. THEODORE A. JOSTEDT, St. Louis, Mo., assignor to Harry L. Hussmann Refrigerator & Supply Company, St. Louis, Mo., a Corporation of Missouri. Filed Apr. 4, 1924. Serial No. 704,139. 7 Claims. (Cl. 16—138.)

1. A door hinge, comprising, a butt, a strap connected thereto by a hinge pin, and a stop yieldingly pivoted to said butt and connecting said butt and said strap adapted to limit the movement of the door in two directions.



1,535,669. NECKTIE. MICHAEL C. KELLY, Minneapolis, Minn. Filed Jan. 4, 1924. Serial No. 684,356. 8 Claims. (Cl. 2—146.)

6. A four-in-hand tie or similar article having its longitudinal center line extending at a bias of 45 degrees relatively to the goods, whereby the length of the warp thread passing through any point in said center line is the same as that of the woof thread passing through the same point and twisting of said tie is prevented.



1,535,670. GOLF CLUB. WILLIAM KIDD, Minneapolis, Minn. Filed May 24, 1923. Serial No. 641,135. 4 Claims. (Cl. 273—77.)

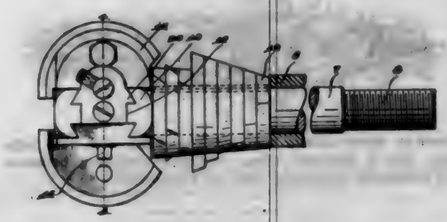
4. As a new article of manufacture, a golf club head having a metallic striking face provided with a group of depressions or recesses extending into the club head and forming a series of suction pockets and preventing slid-

ing or skidding of the ball thereon when struck and flattened by the club.

1,535,671. FLASK PIN. REINHOLD KORNER, Milwaukee, Wis. Filed Mar. 17, 1924. Serial No. 699,822. 1 Claim. (Cl. 22—110.)

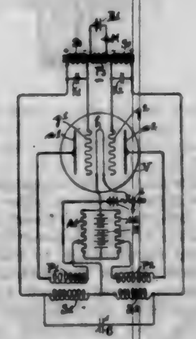
The combination of a flask composed of separable members, each of said members having brackets with the brackets of one member located opposite the brackets of the other member, dowel pins cooperating with said brackets to align the members of the flask, one of said brackets having a narrow elongated slot and the opposed bracket having a wider and shorter slot, the dowel pin associated with the slotted brackets comprising a cylindrical body portion adapted to be positioned in said wider slot and having a reduced threaded portion adapted to be positioned in the narrow slot, and a clamping nut threaded upon said reduced portion.

1,535,672. CASEMENT ADJUSTER. HENRY S. LOCKWOOD, South Norwalk, Conn., assignor to The Lockwood Manufacturing Company, South Norwalk, Conn., a Corporation of Connecticut. Filed Sept. 8, 1921. Serial No. 499,225. 6 Claims. (Cl. 292—275.)



1. A casement adjuster comprising a tube open at both ends, a rod slidable within the tube through one end thereof and having frictional sliding engagement therewith, and means accessible through the other end of the tube for varying the amount of friction between the two elements.

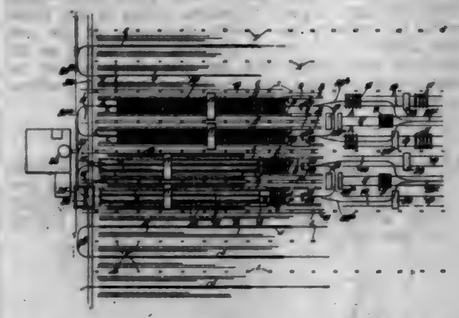
1,535,673. MACHINE FOR TURNING IRREGULAR OBJECTS. HENRY F. LOEWER, Rochester, N. Y. Filed Aug. 8, 1923. Serial No. 656,321. 7 Claims. (Cl. 144—218.)



1. A machine for turning irregular objects having a rotary cutting tool with an arc shaped cutting edge, the

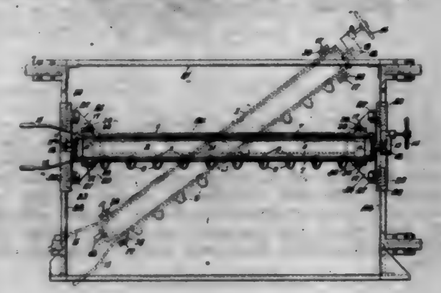
radius of which is of greater length than the distance between the center of the arc and the center of the axis

of rotation of the tool and means permitting the adjustment of the cutters on lines extending transversely of the axis of rotation of the tool.



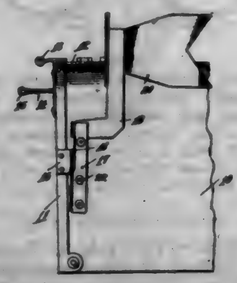
1,535,674. APPARATUS FOR PRODUCING OSCILLATIONS. DAVID G. MCCAA, Lancaster, Pa., assignor of one-half to Cornelius D. Ebret, Philadelphia, Pa. Filed Jan. 12, 1921. Serial No. 436,668. 9 Claims. (Cl. 179—171.)

1. The combination with a plurality of thermionic devices having anode and grid circuits, a pair of primary coils subjected respectively to the different anode circuits, a pair of secondary coils subjected respectively to the different grid circuits and inductively related to said primary coils, capacity shunting one of said pairs of coils and cooperating in the production of oscillations, said coils being so related that normally no oscillations are produced, and means for simultaneously varying the potentials of the grids of said devices in such senses as to cause production of oscillations.



1,535,675. PIPE-FOUNDRY PLANT. JAMES R. MCWANE, Birmingham, Ala. Filed May 12, 1923. Serial No. 638,639. 18 Claims. (Cl. 22—20.)

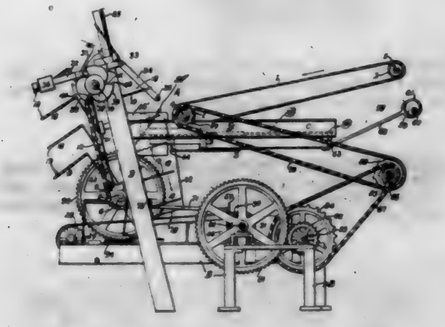
1. A foundry plant comprising a plurality of units defined by rows of upright beams, two pairs of spaced rails constituting tracks arranged longitudinally in pairs between the rows of beams and spaced from the same, rows of flasks arranged in longitudinal piles in the spaces between the beams and the pairs of tracks, supports for transversely arranged flasks arranged in the space between the pairs of tracks, a pile or piles of sand also arranged longitudinally in the space between the two pairs of tracks, and overhead means for trans-



ferring the flasks from the several rows onto said supports transversely and progressively along and between the tracks as the sand is used in filling the flasks.

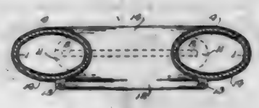
1,535,676. APPARATUS FOR CASTING PIPE OR THE LIKE HORIZONTALLY. JAMES R. MCWANE, Birmingham, Ala. Filed May 12, 1923. Serial No. 638,640. 20 Claims. (Cl. 22—82.)

1. A multiple-lipped ladle provided with trunnions at the ends, and swiveled hangers mounted on the trunnions and adapted to be connected with and disconnected from lifting means.



1,535,677. MAIL-BOX SIGNAL. JOHN B. MASSBANG, Belleville, Ill. Filed Jan. 7, 1924. Serial No. 684,846. 3 Claims. (Cl. 232—35.)

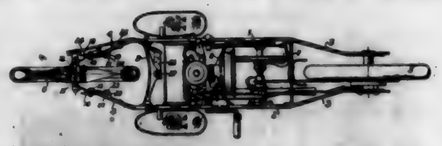
3. The combination with a mail box and its door, with means for releasably holding the door in closed position, of a signal including a bracket formed from a longitudinally folded plate secured to the side of the box and having an opening in the fold thereof, a sub-



stantially Z-shaped arm having its intermediate portion pivotally mounted within the folded plate and having one end movable through the opening, the other end of the arm carrying an angularly bent signal plate visible from two right angular directions, means in the folded plate for limiting the pivotal movement of the arm into elevated and lowered positions, and means on the door for engagement with the first-named end of the arm for maintaining the arm in its different positions until the door is opened.

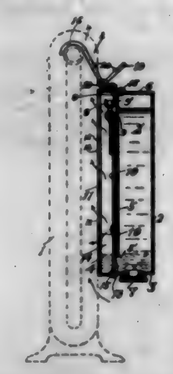
1,535,678. STACKING MACHINE. JOHN E. MILLER, Marseilles, Ill., assignor to Certain-teed Products Corporation, St. Louis, Mo., a Corporation of Maryland. Filed Oct. 8, 1923. Serial No. 667,223. 21 Claims. (Cl. 198—35.)

1. A stacking machine comprising a conveyor to which the articles to be stacked are delivered individually, continuously operated means arranged adjacent to the discharge end of said conveyor, pivoted receptacles associated with said continuously operated means to each of which a predetermined number of said articles are delivered by said conveyor, and means adapted to receive said articles from said pivoted receptacles in stacks.



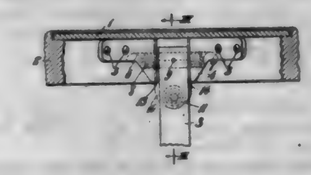
1,535,679. PNEUMATIC HORSE COLLAR. JAMES ANDREW NEELY, Waimate Township, Canterbury, and ROBERT PERCIVAL HENRY, Glenavy, near Waimate, New Zealand. Filed July 17, 1924. Serial No. 726,588. 5 Claims. (Cl. 54—19.)

4. A pneumatic horse-collar, comprising in combination, an inflatable tube, a collar-casing adapted to contain said tube, said casing being composed of strips of rubberized canvas wound in successive layers and coated externally with a layer of rubber, and a rib of hard rubber and canvas formed integral with said casing and extending around the front external surface thereof.



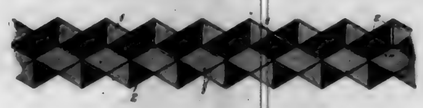
1,535,680. MOTOR CYCLE. CARL A. NERACHER, Syracuse, N. Y., assignor, by mesne assignments, to Ner-A-Car Corporation, a Corporation of New York. Filed Apr. 18, 1919. Serial No. 290,979. 2 Claims. (Cl. 208—114.)

1. A motor-cycle having a frame including a pair of substantially horizontal side bars spaced apart, a pair of levers each pivotally attached at a point intermediate its ends to one of said side bars near the forward end thereof, resilient means connected with the rear ends of the lever and with the frame tending to hold said



levers in substantially forward alignment with said side bars, and a steering wheel rotatably mounted between the forwardly extending ends of said levers.

1,535,681. DEVICE FOR SUPPLYING MOISTURE. OTTO B. OLMSTEAD, Springfield, Mass. Filed Apr. 4, 1924. Serial No. 704,201. 4 Claims. (Cl. 237—78.)

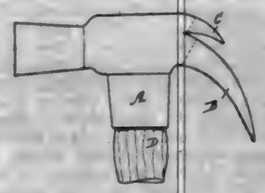


4. An air moistening device comprising a water receiving receptacle formed with an outlet in a side wall thereof, a water receiving compartment formed adjacent the opening, a fabric having its lower end suspended in the water receiving compartment, to take up the water in the compartment, means for detachably supporting the fabric comprising a rod formed withinwardly extending hook-shaped ends, brackets open at their upper ends in which the said hook-shaped ends are placed to permit their removal and the removal of the fabric, means for suspending the device on a radiator, and lattice means attached to the receptacle and spaced from the fabric to prevent the moistened fabric from coming into contact with the hot surface of a radiator.

1,535,682. FOLDING TABLE. RUTHERFORD H. PLATT, Jr., Garden City, N. Y. Filed Apr. 25, 1923. Serial No. 634,511. 9 Claims. (Cl. 45—48.)

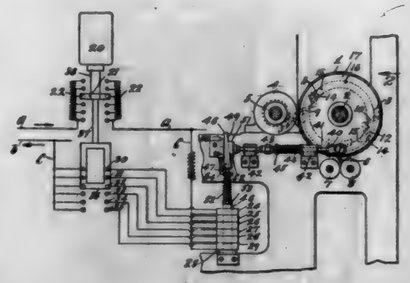
1. A folding table comprising a top, foldable legs therefor, and means for pivoting the legs to the top, operable to bring the legs bodily laterally with respect to their swinging movement into frictional engagement with the tops as the legs are unfolded.

1,535,683. BRAID FOR HATS. EDWARD M. POONS, New York, N. Y. Filed Oct. 19, 1922. Serial No. 595,688. 1 Claim. (Cl. 96—25.)



A braid comprising plaited strands of straw and bamboo leaf in their natural or undyed state.

1,535,684. AUTOMOBILE CLOCK. WILSON E. PORTER and RICHARD H. WHITEHEAD, New Haven, Conn., assignors to New Haven Clock Co., New Haven, Conn. Filed May 2, 1924. Serial No. 710,517. 4 Claims. (Cl. 58—46.)



1. In an automobile clock, the combination with the main-spring thereof, of a barrel therefor, a ratchet-wheel carried thereby and having a bearing-shoulder, a rocking winding-lever mounted at its inner end directly upon the said shoulder of the said wheel, a pawl carried by the lever and engaging with the said wheel, and a checking-pawl engaging with the wheel for preventing the reverse movement thereof.

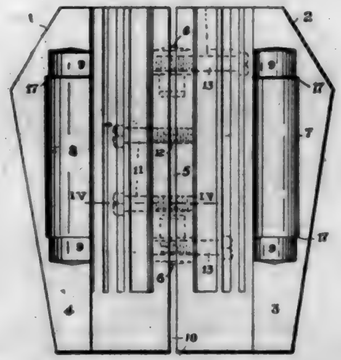
1,535,685. CLAW-HAMMER HEAD. LEON ORMOND RANDELL and REGINALD HARVEY RAPLY, Glenmore, Auckland, New Zealand. Filed June 9, 1924. Serial No. 718,933. 1 Claim. (Cl. 254—26.)

A claw hammer head provided with a main claw projecting from one end thereof, and also constructed with a smaller and auxiliary claw which projects from the same end and in the same direction as the main claw; said auxiliary claw being located at the base of the main claw but at the opposite side thereof from the handle socket, so that it forms a fulcrum whereon the head directly rocks when the main claw is engaged in extracting a large nail.

1,535,686. FOLDING MECHANISM. OSCAR C. ROSSEN, Brooklyn, N. Y., assignor to R. Hoe and Co., New York, N. Y., a Corporation of New York. Filed May 6, 1924. Serial No. 711,348. 15 Claims. (Cl. 270—11.)

1. The combination with a printing machine and means for driving it, of a folding cylinder, sheet taking devices carried thereby, means for actuating the devices to take and release a sheet, and means controlled from the driving mechanism of the machine for varying the time of operation of the actuating devices as the machine speed varies.

1,535,687. PROCESS FOR REFINING ZIRCONIUM-CONTAINING ORES AND OTHER PRODUCTS CONTAINING DIOXIDE OF ZIRCONIUM. OTTO RUFF, Breslau, Germany. Filed Feb. 2, 1923. Serial No. 616,615. 5 Claims. (Cl. 75—17.)

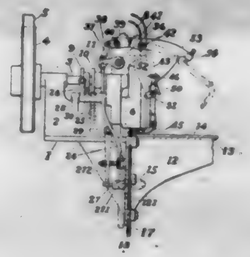


1. The process of refining zirconium containing ores or products containing dioxide of zirconium, which comprises heating the same with a haloid salt of zirconium or with materials forming such haloid salt, at a temperature sufficient to vaporize the resultant haloid salts of the contaminating elements.

1,535,688. ENGINE PRESSURE REGISTER. JOSEPH F. SAUER, Chico, Calif. Filed Dec. 19, 1921. Serial No. 523,597. 5 Claims. (Cl. 116—70.)

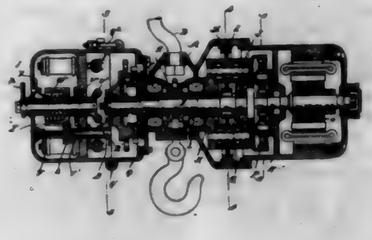
3. An engine pressure register comprising a bored base member adapted to be fitted into an engine cylinder-head, a tube closed at both ends projecting into the base and spaced from the inner walls thereof while sealed therewith at the top, incisions in said tube opening to the atmosphere and to the interior of the base respectively, and a restricted passage formed in the tube between the two incisions, the distance from one incision to the adjacent end of the tube being different from the other incision to its adjacent end of the tube.

1,535,689. DRILL-PIPE SLIP. FREDERICK J. SCHWIMMER, Toledo, Ohio, assignor to The National Supply Company, Toledo, Ohio, a Corporation of Ohio. Filed Oct. 16, 1924. Serial No. 744,018. 4 Claims. (Cl. 24—263.)



3. Two consecutive slip segments, a central hinge member connected to one segment and having holes at its ends, end hinge members having studs in the said holes, and bolts connecting the end hinge members to the remaining segment.

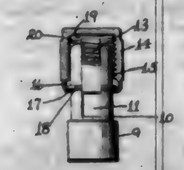
1,535,690. METHOD OF CASTING HOLLOW CONCRETE MASONRY. FREDRIK SELMER, Christiania, Norway. Filed May 7, 1923. Serial No. 637,321. 2 Claims. (Cl. 25—131.)



1. A method of casting hollow concrete masonry which consists in the successive steps of arranging in a mold reinforced concrete stay members having laterally extending end portions provided with perforations; inserting reinforcing rods through the perforations of said end portions; and casting the inner and outer walls around said end portions and said reinforcing rods, whereby the total width of the hollow masonry is determined by the lateral distance between the outer faces of the end portions.

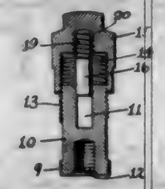
1,535,691. TAGGING MACHINE. FRANK R. SHAW, East Bridgewater, Mass., assignor, by mesne assignments, to Hayes-Fay Laboratories, Inc., Boston, Mass., a Corporation of Massachusetts. Filed June 21, 1922. Serial No. 569,918. 10 Claims. (Cl. 93—01.)

2. A machine of the kind described comprising a disk adapted to carry string about its periphery, means for imparting an intermittent semirotation to said disk, and means located to move across the plane of said disk to draw a loop of string therefrom at an angle to said plane.



1,535,692. AUTOMATIC STOP MECHANISM FOR POWER HOISTS. WILLIAM E. SIMPSON, Detroit, Mich., assignor to Palmer-Bee Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 19, 1919. Serial No. 345,976. 4 Claims. (Cl. 192—142.)

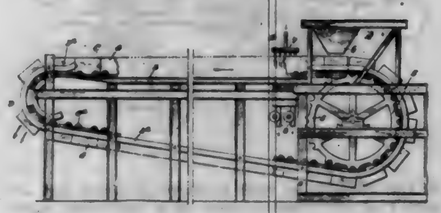
1. A stop mechanism for hoists, comprising a controlling switch, mechanism for throwing said switch including a driven gear wheel, a driving gear wheel in mesh with and having its axis parallel to that of said driven gear wheel said driving gear wheel being longitudinally slidable in mesh with said driven gear wheel, a screw threaded shaft on which said driving gear wheel is mounted for causing the longitudinal movement thereof upon the rotation of said shaft, and a stop for limiting the longitudinal movement of said driving gear wheel upon said shaft to cause the rotation of said driving gear wheel with the shaft and the rotation of said driven gear wheel and the actuation of said switch.



1,535,693. BINDING POST. OSCAR A. SMITH, East Cleveland, Ohio, assignor to The National Acme Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 2, 1922. Serial No. 558,013. 10 Claims. (Cl. 173—259.)

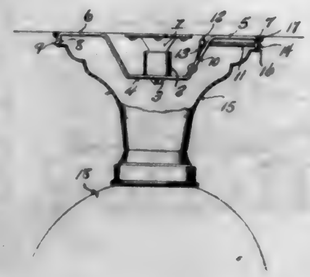
1. A binding post having a body provided with a transversely slotted portion, a slide shiftable in the slot thereof, and a rotatable sleeve on said body, said body and sleeve having cooperating means for preventing any other than slight longitudinal movement of the

sleeve during the rotation thereof and said sleeve and slide having cooperating means for reciprocating the slide on the rotation of the sleeve.



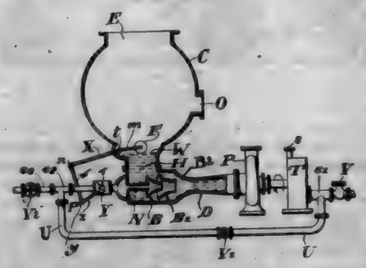
1,535,694. BINDING POST. OSCAR A. SMITH, East Cleveland, Ohio, assignor to The National Acme Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 2, 1922. Serial No. 558,014. 15 Claims. (Cl. 173—259.)

3. A binding post comprising a slotted body, a gripping slide movable in the slot of the body, and a sleeve, and means connecting the sleeve to the body and slide so that the rotation of the sleeve will cause the slide to travel a greater longitudinal distance and faster than the sleeve.



7. A binding post comprising a slotted body having exterior threads, a reciprocating slide in the slot of the body and having an exteriorly threaded portion, a rotatable cap threaded on to the body by one kind of thread and on to the slide by a different kind of thread.

1,535,695. GRATE BAR FOR SINTERING MACHINES AND THE LIKE. HUBERT L. SPENCE, Cleveland, Ohio, assignor, by mesne assignments, to National Malleable and Steel Castings Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 17, 1922. Serial No. 601,515. 6 Claims. (Cl. 266—21.)

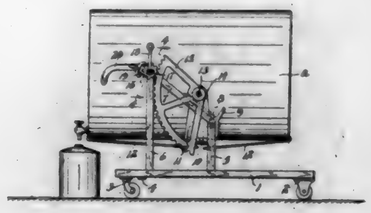


1. In grate bars for sintering machines and the like, a traveling support upon which the grate bar is mounted, means for holding the grate bar in position on the support during dumping operations, said grate bar having strips of metal running from the points of support toward the central portion of the sides of the bar so as to permit the transmission of stresses direct from the point of application to the point of support, and apertures between said strips for the passage of gases through the grate bar.

1,535,696. CEILING-COLLAR-ATTACHING MEANS. PETER W. SPERCHER, Milwaukee, Wis. Filed Dec. 13, 1923. Serial No. 680,420. 1 Claim. (Cl. 240—85.)

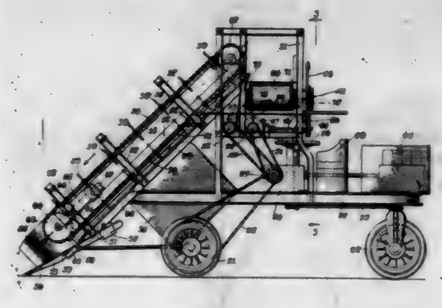
An electric fixture adapted to be supported from a fixed stem, said fixture comprising a transversely extending strap apertured for attachment to said stem, and having upwardly and outwardly extending arms on opposite sides of said stem, one of said arms having a fixed projecting tongue at its outer end, the other of said arms being apertured, a plunger slidably carried in the apertures of such arm and having an enlarged head located on the inner side of such arm, a leaf spring secured to such arm and yieldingly pressing against said head, and a canopy having apertures for the reception of said tongue and said plunger.

1,535,697. AUXILIARY APPARATUS FOR CONDENSERS. ROBERT SUCZEK, Philadelphia, Pa., assignor to C. H. Wheeler Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 26, 1922. Serial No. 556,719. 39 Claims. (Cl 230—13.)



1. The combination with a condenser, of a receptacle for the condensate therefrom, an ejector employing elastic motive fluid and comprising divergent nozzle structure and diffuser structure having their outlet and inlet, respectively, disposed within said receptacle, and guide tube structure disposed between said nozzle and diffuser structures and having its inlet and outlet submerged in the condensate.

1,535,698. BARREL-HANDLING DEVICE. FRANK H. SWANSON, Maple Plain, Minn. Filed Dec. 6, 1923. Serial No. 676,872. 5 Claims. (Cl. 248—58.)

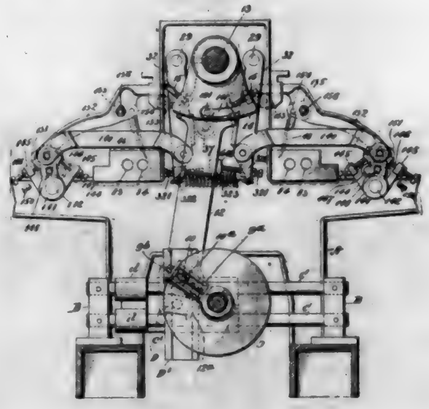


1. A barrel handling device having in combination, a yoke adapted to embrace the barrel adjacent the center thereof, means connected to said yoke clamping the ends of said barrel, said yoke having supports at each

side thereof, a frame, eccentric members carried by said frame in which said supports are carried, a gear segment secured to one of said members, a pinion journaled

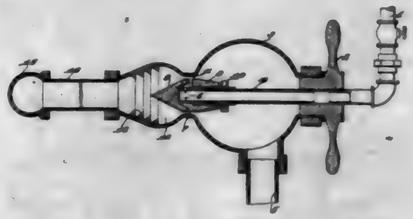
on said frame engaging said segment, and means for turning said pinion to raise and swing said yoke, clamping means and barrel.

1,535,699. LOADING APPLIANCE. CHARLES L. TALBOT, Chicago, Ill. Filed Nov. 10, 1921. Serial No. 514,125. 8 Claims. (Cl. 37—110.)



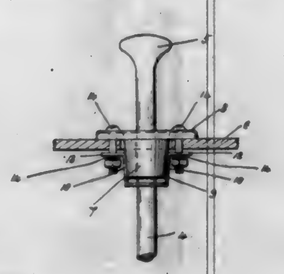
1. In a loading appliance of the character described, the combination of a motor-vehicle, a scoop at the front of said vehicle, an inclined chute associated with and adapted to receive the contents of the scoop, upper and lower sets of sprocket-wheels, sprocket-chains coacting with said sprocket-wheels, blades on said chains adapted to push the load up the chute, means to rotate said sprocket-wheels, tracks supporting the lower stretches of said sprocket-chains whereby to prevent drag of the blades on the chute, a cross conveyor receiving its load from said chute and adapted to deliver it to one side of the vehicle, and means to connect said cross conveyor and said sprocket-wheel rotating means with the driving mechanism of the motor-vehicle.

1,535,700. SELECTIVE PHOTOGRAPHIC HARDENING. LEONARD T. TROLAND, Malden, Mass., assignor to Kalmus, Comstock & Wescott Inc., Boston, Mass., a Corporation of Massachusetts. Filed Sept. 13, 1922. Serial No. 588,086. 20 Claims. (Cl. 95—88.)



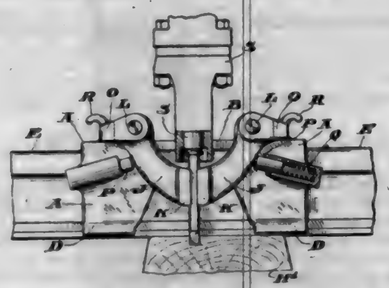
1. A composition for treating light-sensitive film having exposed and unexposed portions which is constituted essentially of a hardener for hardening one of said portions, a fixed alkali accelerator and a salt of a weak base.

1,535,701. COMBING MACHINE. HARRY TUNSTALL, Fair Haven, Mass., assignor to Alsatian Machine Works, Limited, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 14, 1923. Serial No. 674,709. 5 Claims. (Cl. 19—118.)



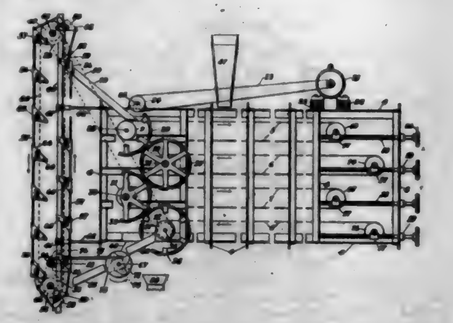
2. In a machine of the kind described having detaching rolls, a rockable shaft, a horizontally-movable top comb frame and connections between said shaft and said frame whereby said frame will be moved towards and from said detaching rolls, and means for rocking said shaft comprising a pendulum and means for swinging it and adjustable connections between said frame and said rockable shaft whereby the rocking of said shaft and the forward throw of said frame may be adjusted, and means for adjustably limiting the rearward throw of said frame.

1,535,702. LIQUID-FUEL BURNER. GEORGE W. WALSH, Boston, and BLAINE SWEATT, Everett, Mass., assignors, by mesne assignments, to said Walsh. Filed Feb. 15, 1924. Serial No. 693,100. 2 Claims. (Cl. 158—75.)



2. The combination with a source of liquid fuel and a source of low-pressure steam of a liquid-fuel burner comprising a vessel constituting a steam-expansion chamber connected to said source of low-pressure steam, a fuel conduit passing through said expansion chamber and connected to said source of liquid fuel, said expansion chamber being provided with an annular outlet co-axial with said conduit and said annular outlet having a cross-sectional area very small compared to that of said expansion chamber, a member on the outer end of said conduit, and a member adjustable longitudinally along said conduit intermediate the ends thereof and separated from the first mentioned member to form therewith a narrow disc-shaped chamber of variable width co-axial with said annular outlet and having its plane at right angles to the axis thereof, said fuel conduit being provided with an outlet communicating with said narrow disc-shaped chamber, whereby the steam flowing from said expansion chamber acquires to high velocity as it passes the periphery of the thin disc of liquid fuel formed in said disc-shaped chamber and atomizes the same.

1,535,703. ROD HOLDER. ROYAL ALTON WATERMAN, Grand Rapids, Mich. Filed June 16, 1924. Serial No. 720,471. 3 Claims. (Cl. 74—39.)



1. A rod holder, comprising a tapered block of elastic material adapted to bear on the rod, a fastening plate, a plate channel-shaped in cross-section and arranged to straddle the said block, and bolts connecting the two plates and operating to contract the said block upon the rock.

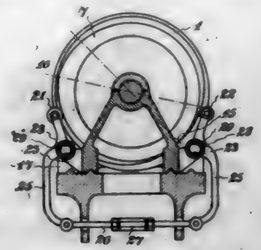
1,535,704. SPIKE-HOLDING DEVICE. RUSSELL H. WILHELM, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Dec. 24, 1924. Serial No. 757,824. 5 Claims. (Cl. 1—47.)

5. In a spike holding device, a saddle comprising a base, a depending flange to cooperate with a side of the rail and a pair of depending guide plates to cooperate with a rail-flange for supporting the device in an operative position upon the rail, a pair of arms mounted pivotally to one face of the saddle, said arms having recessed jaws at one end to receive and guide a spike and lugs at another end to limit the movement of the arms in one direction, and spring pressed plungers co-acting against the arms to return the jaws to a normally closed position.

1,535,705. PROOFER. CARL D. WILKE, Beatrice, Nebr. Filed July 23, 1923. Serial No. 653,151. 8 Claims. (Cl. 198—85.)

8. In a proofer, an endless belt conveyer having longitudinally disposed surface areas for loaves to stand on, in combination with means, including a like conveyer, for continuously transferring a procession of loaves in single file from one of these areas to another.

1,535,706. EDUCATIONAL DEVICE. JAMES B. WOOSTER, Buffalo, N. Y. Filed Feb. 7, 1924. Serial No. 691,082. 4 Claims. (Cl. 35—2.)

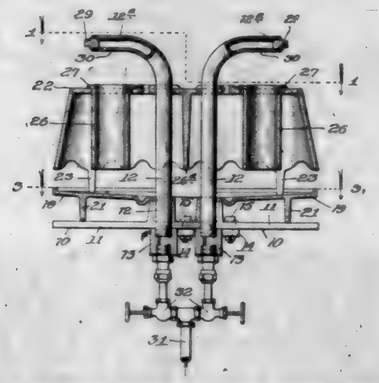


1. A device of the character described comprising a body composed of a plurality of separably assembled segments, a supporting core fitted centrally within said body and having a flange projecting from its upper end, each segment having a recess to take over said flange whereby the segment is held against lateral displacement, and releasable means co-operating with the core and the segments to hold the segments against axial displacement.

1,535,707. GOLF CLUB. HEFFRON BARNES, New York Mills, N. Y. Filed Oct. 29, 1920. Serial No. 420,514. 2 Claims. (Cl. 273—79.)

1. In a golf club, a head, a shaft, said shaft being pivotally mounted to said head, said head having formed thereon a plurality of walls with sockets therebetween, said shaft having a plurality of tongues formed thereon, said tongues adapted fit within said sockets, recesses made in said tongues and walls, a bolt adapted to fit within said recesses, and a thumb net screw mounted to said bolt, whereby to bind the tongues and walls to hold the head in given adjusted position with reference to said shaft, and a washer for holding the thumb nut away from the surface of the head.

1,535,708. COPYING LATHE. JULES AXEL RUTGER BENNET, Lund, Sweden. Filed Apr. 28, 1923. Serial No. 635,360. 3 Claims. (Cl. 82—19.)



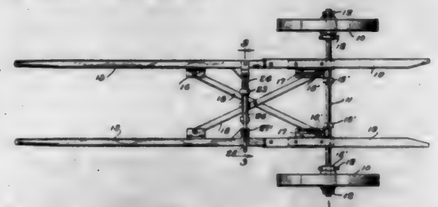
1. A copying lathe comprising a main former, a guiding member cooperating therewith, a counter-former, a second guiding member cooperating with the counter-former and connected with the first mentioned guiding member to move uniformly with the latter in the rotation of the main former and counter-former, the counter-former having a form of such a relation to that of the main former that the sum of the distances between the poins of contacts of the two guiding members upon the main former and counter-former and the axis of rotation is always constant, a head stock for the lathe, a cross slide for the lathe, double arm levers pivotally mounted on the fast head stock of the lathe for supporting the guiding members, an adjustable member connecting said levers, and means fixed to the levers for transmitting movement to the cross slide of the lathe.

1,535,709. COAGULANT FOR PURIFYING WATER AND PROCESS OF PURIFYING WATER, THEREWITH. LEVIS MILLER BOOTH, Plainfield, N. J. Filed Oct. 29, 1918. Serial No. 260,171. 11 Claims. (Cl. 210—23.)

1. A dry coagulant for purifying water composed of a mixture of dry mono-carbonate of calcium and dry metallic sulphate adapted to be fed as a mixture in the dry state to the water.

9. The process of purifying water which comprises mingling commercial mono-carbonate of calcium with an acid metallic salt which will not re-act therewith when in a dry state and then feeding the dry mixture to the water to be treated.

1,535,710. OIL BURNER. ALBERT W. BREIDING, Sterling, Ill. Filed July 30, 1923. Serial No. 654,666. 4 Claims. (Cl. 158—66.)



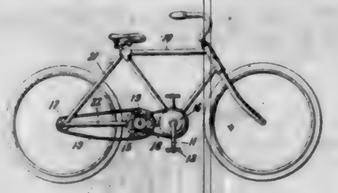
1. An oil burner comprising a hollow dome open at the bottom, a tube extending downwardly from the top of the dome, an oil pipe passing through said dome and having an orifice discharging downwardly into said tube, means for controlling the flow of fuel through said orifice, and a plate held some distance below the bottom of said dome, said dome resting upon said plate and having an opening through which said tube and oil pipe pass, said tube being removable therefrom to permit said oil pipe to pass through the opening.

1,535,711. MANUFACTURE OF ELECTRIC CABLES. ERNEST A. BAYLES, Helsby, England, assignor to British Insulated & Helsby Cables Limited, Prescot, England (a Limited Liability Company registered under the laws of England). Filed Apr. 10, 1924. Serial No. 705,699. 1 Claim. (Cl. 173—264.)

The manufacture of electric cables by initially covering the cores with rubber, covering the same with tape, laying up together the said taped cores, wrapping these cores together as a cable by tape windings, enclosing the cores in an outer rubber covering, and subjecting the cable to vulcanization in a manner to fully vulcanize the outer rubber covering while avoiding undue vulcanization of the initial rubber covering.

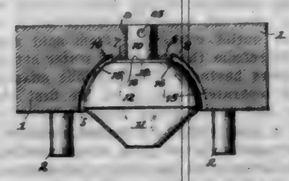
1,535,712. TRUCK. ALLEN J. BECKER, Upper Montclair, N. J. Filed Nov. 19, 1923. Serial No. 675,488. 1 Claim. (Cl. 280—53.)

A carboy supporting truck, comprising an axle, a pair of wheels supporting the axle, a pair of levers straight in plan, angular in side elevation, and mounted at their angles to pivot and slide on the axle, the ends of said bars in front of the axle being relatively short as compared to the other ends of the bars, the said shorter ends adapted to receive a carboy and said longer ends constituting handles, lazy tongs connecting the bars and maintaining them in parallel relationship in all positions of adjustment, and means connecting the bars and automatically locking them against movement away from each other but permitting their adjustment toward each other.



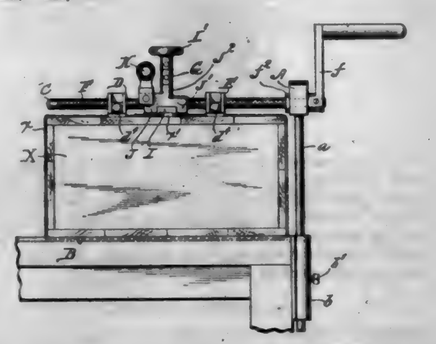
1,535,713. FOLDING BRACE. NADINE BELDEN, Oakland, Calif. Filed July 25, 1923. Serial No. 653,788. 1 Claim. (Cl. 45—48.)

In combination with a pair of hinged members, one of said members having a groove formed therein, a plate over said groove, said plate having a slot formed therein, of a brace hinged to the second of said hinged members, a shoe formed on said brace, said shoe being slidable within said groove behind the plate, a rest on said plate, said rest being formed by bending the plate



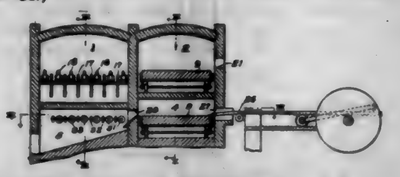
inwardly in the groove at the edges of the slot and adjacent the top of the plate, a shoulder on said brace adapted to engage said rest in the unfolded position of said hinged members, said shoe being retained behind the plate in the folded position of the hinged members.

1,535,714. BICYCLE GEARING. LOT F. BURKE, Schenectady, N. Y. Filed Apr. 12, 1924. Serial No. 706,083. 7 Claims. (Cl. 208—154.)



1. In a bicycle drive, the combination with the usual crank shaft, sprocket wheel thereon and rear wheel sprocket, of a frame having a relatively movable rear end, a second shaft journaled in said rear end between the crank shaft and rear wheel sprocket, said second shaft having two sprockets of different size on one end, the larger of the two being on the outer end of said second shaft and in line with said rear wheel sprocket, and means between the crank shaft and said second shaft for securing said relatively movable rear end in any desired position.

1,535,715. METHOD OF PRODUCING TANK BALLS. ALBERT HOMER CANFIELD, Bridgeport, Conn. Filed Nov. 2, 1922. Serial No. 598,593. 7 Claims. (Cl. 18—56.)

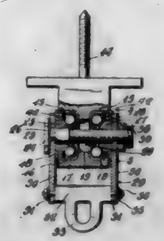


1. That method of forming tank balls which consists in placing within a cavity formed in a mold section, material sufficient to produce the ball in its entirety forcing down onto said material a second mold section, said second section having a core mounted in a cavity formed therein and in spaced relation to the walls of the cavity, said core likewise having an outwardly extending portion which portion when the mold sections are brought together contacts the material and causes a flow thereof throughout the cavities in the mold and finally vulcanizing the ball thus produced.

1,535,716. IMPLEMENT FOR APPLYING AND FASTENING PACKAGE BINDERS. SPENCER C. CARY, Brooklyn, N. Y., assignor to Cary Manufacturing Co., Brooklyn, N. Y., a Corporation of New York. Filed Dec. 9, 1919. Serial No. 343,555. 28 Claims. (Cl. 100—31.)

10 In an implement for applying and fastening a package binder, the combination with binder-tensioning means for applying tension at separated points to a binder the ends of which are in crossing relation, of a binder-fastening means positioned for operation upon the crossing portions of the binder and intermediate the points of tension application by said binder-tensioning means, said binder-fastening means including a retaining member for a seal-part and a rotatable head operable for twisting said end portions of the binder into locking engagement with a seal-part.

1,535,717. WINDOW-GLASS APPARATUS. JAMES G. CLEVELAND and HARVEY L. KELLER, Arnold, Pa. Filed Mar. 24, 1923. Serial No. 627,466. 5 Claims. (Cl. 49—44.)



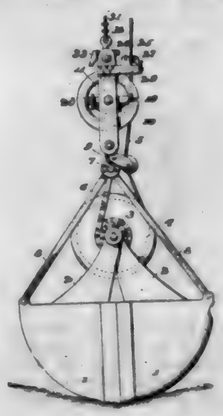
2. In window glass flattening apparatus the combination of an intake chamber, a furnace chamber and a leer chamber, the said chambers being straight-walled and arranged in parallelism and the intake chamber and the leer chamber overlapping the furnace chamber and communicating therewith through lateral openings, and the said intake chamber and the said leer chamber being arranged vertically one above the other.

1,535,718. PIVOTED SWING HANGER. WILLIAM W. DEGLER, Davis, W. Va. Filed Mar. 31, 1923. Serial No. 629,157. 1 Claim. (Cl. 248—64.)

A hanger block to be secured to a support and having a recess formed therein extending from one side thereof to the other, said recess having an internal annular flange arranged centrally thereof, a grease cup attached to the central portion of the block to supply grease to

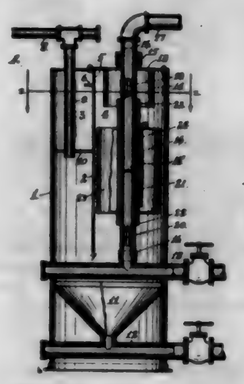
the recess at its center, race ways mounted within the end portions of the recess and engaging the sides of the internal flange, balls held within the race ways, a pivot suspension element passing through the recess and race ways, radial and end thrust rings mounted upon the pivot suspension element upon the outer side

of the race ways and engaging the balls, a hanger element embodying side plates arranged in close relation to said sides and apertured for receiving the pivot suspension element, packing arranged between said sides and the side plates, and means carried by the pivot suspension element for holding the side plates in proper contact with the packing.



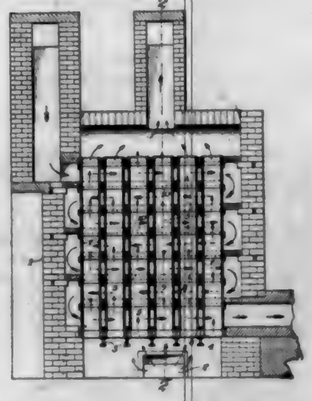
1,535,719. GOLF CLUB. CHARLES FISHER, Chicago, Ill., assignor, by direct and mesne assignments, to The Automatic Recording Safe Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 6, 1921. Serial No. 459,053. 2 Claims. (Cl. 273—80.)

2. A golf club comprising a tubular handle-section provided with a downwardly tapering lower end portion, a wooden shaft-section having a reduced extremity extending into said handle and equipped with a downwardly tapering ferrule, said reduced extension being expanded within said ferrule, and an angular club-head secured to the lower end of said wooden shaft-section, said sections being of approximately equal length and adapted to telescope with relation to each other and said sections being adapted to be securely bound together in the extended position by action of inertia.



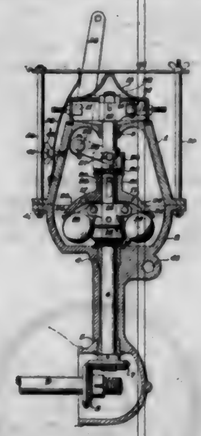
1,535,720. OPERATING AND DETACHING MECHANISM FOR EXCAVATING BUCKETS. OMAR N. GARDNER, Jamestown, N. Y. Filed Nov. 18, 1921. Serial No. 516,082. 10 Claims. (Cl. 37—184.)

1. A device of the character described comprising an excavating bucket having a power wheel, hoisting and holding lines for operating said bucket, an attachment secured to said bucket, independent of said power wheel, to which said hoisting and holding lines are detachably



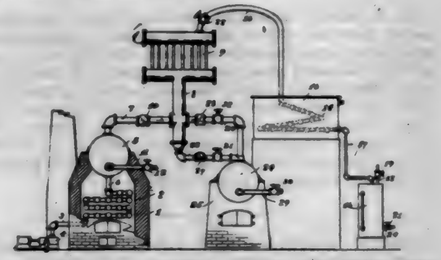
fixed, and means connecting said attachment to said power wheel whereby upon the hoisting or lowering of said bucket said power wheel is rotated to close or open said bucket.

1,535,721. GAS, OIL, AND SAND SEPARATOR. HARRISON M. GILL, Taft, Calif. Filed Nov. 3, 1924. Serial No. 747,571. 1 Claim. (Cl. 183—2.7.)



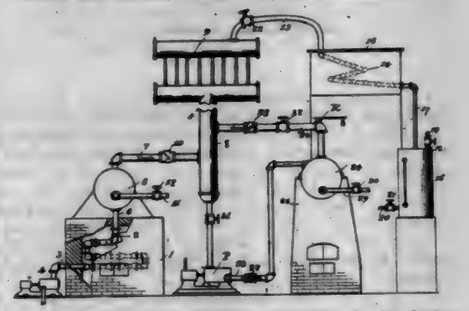
A gas and oil separator comprising a closed shell divided interiorly into separate chambers; an inlet connection for receiving in the first of said chambers a mixture of gas, oil, sand and water as it comes from a well; an outlet connection from said shell for discharging therefrom the sand and water settling therein, said chambers having communications adapting the gas and oil to separately pass from the first chamber into the upper and lower areas respectively of the second chamber; a pipe within the second chamber having an upper port and a lower port communicating with the upper and lower areas respectively of said second chamber, said pipe between the ports being interiorly divided; a delivery pipe from each end of said ported pipe; a sleeve valve slidably fitted upon said ported pipe and adapted to reciprocally proportionally control the ports thereof; a float carried by said sleeve valve; and a removable head cap of the shell covering the second chamber, and provided with a downwardly extending baffle flange surrounding the upper ports of said pipe.

1,535,722. RECUPERATOR. ROBERT GOOD, Washington, Pa., assignor of one-half to Hazel-Atlas Glass Company, Wheeling, W. Va., a Corporation of West Virginia. Filed Feb. 9, 1923. Serial No. 618,035. 2 Claims. (Cl. 263—20.)



1. In a recuperator construction, a plurality of vertical flues arranged in horizontal alignment, a plurality of horizontal baffles forming passages for the waste gases through the recuperator, said vertical flues formed of conventional bell-mouth tiles arranged end to end, each of said horizontal baffles arranged in a continuous line from side to side of the recuperator and supported on the bell-mouth flanges.

1,535,723. GOVERNOR MECHANISM FOR INTERNAL-COMBUSTION ENGINES. FRANCIS R. HOSTETLER, Kokomo, Ind. Filed Oct. 14, 1922. Serial No. 594,666. 5 Claims. (Cl. 264—15.)

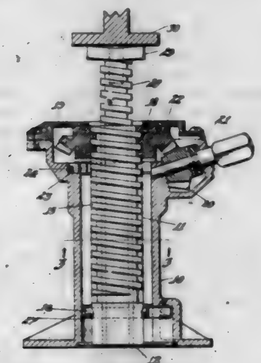


5. A governor mechanism of the character described, comprising a casing, a rotatable shaft mounted within the casing, a bracket casting fixedly secured to the shaft with its lower face in contact with a roller bearing, centrifugally operated weights pivoted to the casting, a slidable sleeve mounted on the shaft disposed above the casting and formed with an outwardly and downwardly extended member having a curved recess formed in its lower face near its outer edge, a loose slidable sleeve disposed above said member with its lower face in contact with a thrust roller bearing and formed with a plurality of lateral extensions, a horizontal shaft mounted through the casing, eccentric arms engaging with said extensions and fixedly secured to the horizontal shaft, a throttle controlling lever secured to one end of the said horizontal shaft, and a tensioned adjusting device fixedly secured to the outside of the casing with its free end resting in contact with said lever.

1,535,724. PROCESS AND APPARATUS FOR TREATING HYDROCARBONS. WILLIAM R. HOWARD, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Sept. 8, 1919, Serial No. 322,456. Renewed Dec. 27, 1924. 8 Claims. (Cl. 196—47.)

1. A process of converting relatively high boiling point hydrocarbons into lower boiling point hydrocarbons consisting in passing the oil continuously through a cracking zone, thence to a vapor chamber located outside the cracking zone, passing the vapors from the vapor chamber to a reflux condenser, passing a portion of the vapors, i. e. those of lower boiling point to a final condenser and receiving tank, returning the refluxed portion to a secondary cracking zone, without intermingling it with the oil in the first cracking zone, redistilling the reflux in said secondary zone and causing the vapors generated in said latter zone to return again to the reflux condenser, where a portion of them are again condensed and retreated in said secondary cracking zone and maintaining a super-atmospheric vapor pressure on the oil during treatment.

1,535,725. PROCESS FOR TREATING HYDROCARBONS. WILLIAM R. HOWARD, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Sept. 8, 1919. Serial No. 322,457. 4 Claims. (Cl. 196—47.)

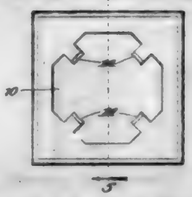


1. A process of converting relatively heavy hydrocarbons into those of lower boiling point, consisting in passing the oil continuously through a cracking zone, thence to a vapor chamber passing the vapors from said vapor chamber to a reflux condenser, passing the uncondensed portion of the vapors from the reflux condenser to a final condenser and receiving tank, returning the liquid portion condensed in the reflux condenser under forced pressure to a secondary cracking zone, dis-

tilling the liquid portion in said zone and again passing the vapors generated to the reflux condenser, continuously retreating the reflux condensate in said secondary cracking zone, maintaining a predetermined superatmospheric vapor pressure on the oil in said first cracking zone, and maintaining a higher vapor pressure on the oil in said secondary cracking zone.

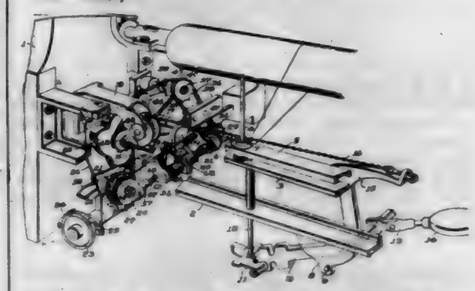
1,535,726. PLASTIC COMPOSITION AND PROCESS. HENRY G. JAEGER, Rose Hill, Calif., assignor of one-fourth to Everett R. Lambertson and one-fourth to George P. Clements, both of Eagle Rock City, Calif., and one-fourth to Julius Schneider, Los Angeles, Calif. Filed Oct. 4, 1922. Serial No. 592,422. 2 Claims. (Cl. 106—29.)

1. A plastic composition formed by saturating about seven parts by volume of a dry organic material with a solution of magnesium chloride, draining the same, mixing therewith about one part of calcined magnesite, separately mixing about one part of finely powdered silica with approximately an equal bulk of calcined magnesite, incorporating the last mentioned mixture with the mixture previously made, and adding to the resultant mixture sufficient of a solution of magnesium chloride to render the product plastic.



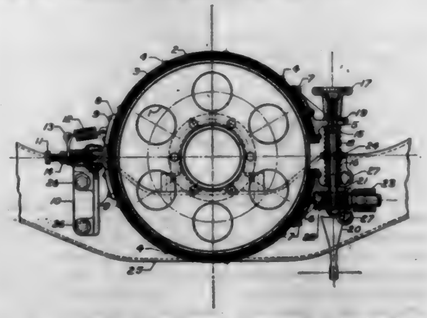
1,535,727. DOUBLE-SCREW JACK. ALVIN L. JOHNSON, Springfield, Mass., assignor of forty-eight per cent to W. Goulding Warren, Holden, Mass., and four per cent to Albert E. Fay, Worcester, Mass. Filed Mar. 9, 1925. Serial No. 13,952. 4 Claims. (Cl. 254—102.)

4. In a double screw jack, the combination with the two screws one threaded in the other, and means for rotating one of them to raise or lower it, of a casing for supporting the screws, a plurality of guides for preventing the rotation of one screw where it is being raised or lowered, said guides having slanting ends to permit of their becoming effective for the purpose specified at all points around the circumference, and a latch for positively stopping the rotation of the screws at one point and starting it to move longitudinally.



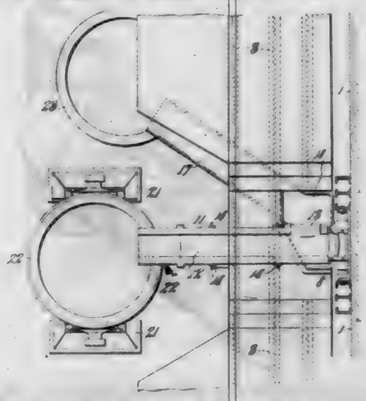
1,535,728. THREAD-CUTTING DIE. OTTAR S. LEE, Chicago, Ill., assignor to The Nye Tool & Machine Works, Chicago, Ill., a Corporation of Illinois. Filed Sept. 10, 1923. Serial No. 661,878. 5 Claims. Cl. 10—120.)

3. A die comprising a hollow frame-like body presenting an aperture therethrough and containing slots in its opposite face portions opening into said aperture and formed of similar sections secured together and each presenting one of said face portions with flanges



extending therefrom, the latter constituting the side walls of said body, and die segments located, and secured, in said slots.

1,535,729. BUILDER MECHANISM FOR YARN WINDING AND SPINNING MACHINES. HARRY A. LEONARD, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed May 20, 1924. Serial No. 714,540. 14 Claims. (Cl. 242—43.7.)



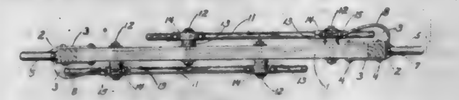
1. In a builder mechanism, the combination of yarn guides for directing yarn to yarn receivers, a builder arm and regular traverse cam, connections between the builder arm and yarn guides, a bunch builder member mounted on the builder arm and normally maintained in an inoperative position, a manually operated trip mounted on the builder arm for releasing the bunch builder member that it may move to bunch builder position, and means for automatically returning the bunch builder member to inoperative position on completion of the bunch.

1,535,730. BRAKE MECHANISM. VINCENT LINK, Detroit, Mich., assignor to Studebaker Corporation, a Corporation of New Jersey. Filed Jan. 9, 1922. Serial No. 528,044. 3 Claims. (Cl. 188—77.)

1. In a braking mechanism, a support, a brake drum, a brake band surrounding said brake drum supported intermediate its ends on said support, brackets having openings therein secured to said brake band adjacent its ends, a bolt extending through said openings in said brackets, springs mounted on said bolt intermediate said brackets, means on the outer end of said bolt to adjust the tension of said springs, a bracket having an end interposed between said springs adjustably mounted on said support, said bracket being adapted to equalize the clearance between the ends of said brake band and said brake drum.

1,535,731. SLAG SKIMMER. FRANK B. MCKUNE, Hamilton, Ontario, Canada. Filed Feb. 26, 1924. Serial No. 695,342. 5 Claims. (Cl. 266—38.)

1. In apparatus of the class described, a tapping trough leading from the furnace to the ladle, said trough having a branch whose bottom is at a higher level than that of the trough proper, and means for pivotally holding the trough in place whereby its discharging end may be raised and lowered to control the flow of metal through the ladle and slag into the branch.

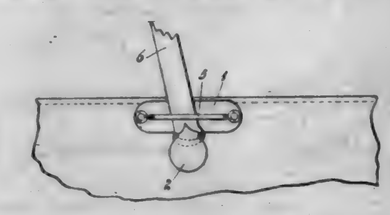


1,535,732. BAG TIE. JOHAN FREDRICK MALM, Chicago, Ill., assignor to Julius H. Wald, Chicago, Ill. Filed June 16, 1923. Serial No. 645,789. 3 Claims. (Cl. 150—11.)

1. A method of tying a bag comprising gathering the material of the bag to form a neck, passing a loop of cord through a single passage through the material of the bag at the neck, placing the loop over the ends of the gathers and around the neck and drawing the loop up snugly about the neck.

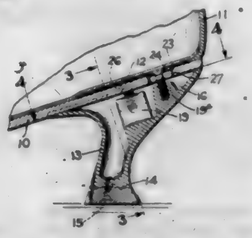
1,535,733. TROLLEY-CONDUCTOR INSULATOR. SAMUEL S. MATTHES, Mansfield, Ohio, assignor to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed Nov. 28, 1923. Serial No. 677,432. 7 Claims. (Cl. 191—39.)

1. A section insulator comprising in combination, an insulating member, an end member secured to each end of the insulator member, a pair of laterally spaced guide bars in insulated relation and having their inner ends overlapping and to be engaged simultaneously by a current collector, air insulation separating said guide



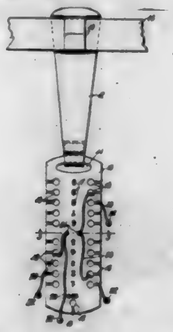
bars from each other and from the insulating member and means to secure said guide bars in said relation, each guide bar being electrically connected to one of the end members.

1,535,734. SUPPORT FOR TABLE TALKERS AND METHOD OF MAKING THE SAME. DAVID H. MOSS, Brooklyn, N. Y., assignor to C. Brandes, Inc., New York, N. Y., a Corporation of New York. Filed Feb. 9, 1924. Serial No. 691,812. 4 Claims. (Cl. 179—146.)



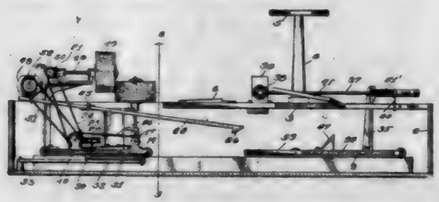
1. A support for an electromagnetic sound reproducing mechanism, comprising in combination a casing including an electromagnetic operating mechanism, a cap secured to said casing, a plurality of depending projections on said cap, and a base provided with a plurality of apertures arranged to receive said projections when said casing is inserted in said base for locking said casing against relative rotation with respect to said base.

1,535,735. SUSPENDER BUTTON. FREDERICK GEORGE PARKER, Sr., Oakland, Calif. Filed Oct. 6, 1924. Serial No. 741,833. 3 Claims. (Cl. 24—90.)



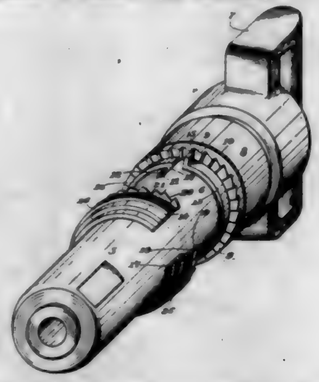
1. A suspender button comprising a substantially flat strip, a head integral therewith and depending therefrom in substantially the same plane, and means to secure said button to trousers.

1,535,736. SHOE HEEL. WILLIAM E. PERRY, New Haven, Conn., assignor to The Augur-Perry Company, New Haven, Conn., a Corporation of Connecticut. Filed Mar. 26, 1921. Serial No. 455,923. 3 Claims. (Cl. 36—40.)



1. A hollow shoe heel having a pair of upstanding lugs formed at the attaching end thereof at opposite points adjacent the periphery thereof, having inwardly facing guideways formed therein, and a centrally disposed lug positioned between the two first mentioned lugs and provided with a guideway at each side to cooperate with the first mentioned guideways.

1,535,737. COUNTING DEVICE. MITCHELL D. PRICE, Miami, Fla. Filed Sept. 24, 1923. Serial No. 664,582. 2 Claims. (Cl. 235—1.)

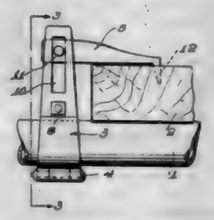


1. In a counter of the class described a tablet provided with a plurality of apertures adjacent the edge thereof together with slots extending from said apertures to the edge of the tablet, indicating indicia associated with said apertures and a flexible counting element insertable through a selected aperture by means of the associated slot.

1,535,738. SHOE-POLISHING MACHINE. PAUL M. RAYSOR, Bryan, Tex. Filed Dec. 28, 1922. Serial No. 609,461. 5 Claims. (Cl. 15—32.)

2. A shoe polishing machine, comprising a stand having foot blocks, a polishing carriage movable with relation to the foot blocks, polishing brushes carried by said carriage, a lever arm movable with the carriage and having a hook terminal, a dauber carriage movable in the stand with relation to the blocks, dauber brushes movable with said dauber carriage, a projection on the dauber carriage adapted to be engaged by said hook terminal, and a cam operative with the polishing carriage to control the movement of said lever arm.

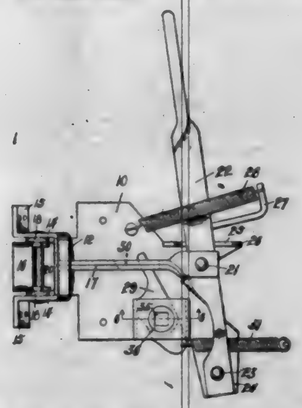
1,535,739. HANDLE LOCK FOR PNEUMATIC TOOLS. JOHN R. L. SANTOS, Baltimore, Md., assignor to George Oldham & Son Company, Baltimore, Md., a Corporation of Pennsylvania. Filed June 4, 1920. Serial No. 386,518. 6 Claims. (Cl. 121—36.)



1. In a pneumatic tool, the combination with a barrel; a handle having threaded engagement with the barrel, said handle likewise having a series of ratchet teeth upon its lower end; a locking ring encircling the barrel and likewise having ratchet teeth upon one face, adapted to coact with the ratchet teeth upon the handle; and a split spring ring, one end engaging a recess formed in the barrel and the other engaging the locking ring aforesaid, whereby when the ring is rotated with reference to the handle, it will tend to spread the spring ring and set to screw the handle upon the barrel, when the ratchet teeth on the locking ring are meshed with the ratchet teeth on the handle preventing retrograde movement of the locking ring with reference to the handle.

1,535,740. SULPHURIZED CHEMICAL PRODUCT. WALTER O. SNELLING, Allentown, Pa. Filed Sept. 5, 1919. Serial No. 321,943. 23 Claims. (Cl. 260—17.)

4. The process which comprises contacting a nonvulcanizing oil with sulfuric chloride until dehydrogenation occurs.



1,535,741. FASTENER TO CLAMP BOARDS ON SCAFFOLD BRACKETS. OSCAR CLINTON SNODGRASS, AUGISSTA BRUCH HAWKINS, and WILLIAM F. STAGGERS, Mannington, W. Va. Filed May 24, 1923. Serial No. 641,177. Renewed Feb. 4, 1925. 2 Claims. (Cl. 304—32.)

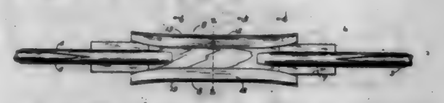
2. In a device of the class described, hingedly connected clamping plates, the plates having bulging portions suitably shaped to engage around a bracket member,

a bolt adjustably connecting the free ends of the clamping plates for securing the plates in clamped position, and a board clamping hook swingably and adjustably mounted on the clamping plates near their free ends, substantially as shown.

1,535,742. DOORLOCK. HARRY N. SORENSON, Toledo, Ohio. Filed Oct. 28, 1922. Serial No. 597,443. 4 Claims. (Cl. 292—192.)

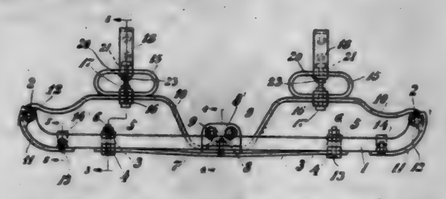
3. In a lock of the class described, a frame plate, a part projecting laterally from one end thereof and forming a channel member with its channel facing outward with respect to the plate and extending transversely of the plate, a U-shaped catch member pivoted at the terminal ends of its legs within the channel to respective side walls thereof, and means carried by the plate in connection with the catch member through the channel bottom and normally operable to project the free end portion of the catch member outward with respect to the channel member and manually operable to retract the catch member.

1,535,743. PROCESS OF SEPARATING ANTIMONY AND LEAD. BURT C. STANNARD, Berkeley, and CALVIN W. HAFFEY, Selby, Calif., assignors to American Smelting and Refining Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 12, 1921. Serial No. 514,658. 12 Claims. (Cl. 75—17.)



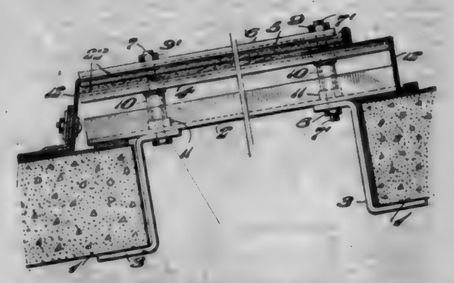
1. The process of recovering commercially pure antimony oxide directly from lead bullion containing antimony in excess of a relatively fixed percentage that forms a stable oxide of antimony in quantity in the presence of lead, which consists in melting the bullion, heating the bath under oxidizing conditions to an appropriate temperature to effect continuous volatilization of the excess antimony, and maintaining said temperature until substantially all of the excess antimony is removed from the bath as a fume.

1,535,744. VEHICLE SPRING. BYRD E. STODDARD, Minneapolis, Minn. Filed Oct. 30, 1922. Serial No. 597,975. 10 Claims. (Cl. 267—45.)



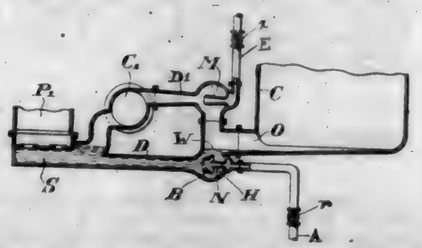
1. The combination with a pair of vehicle springs located substantially in line with each other and in substantially the same vertical plane, of a shaft below each spring and extending at right angles to the plane of the springs, bearings in which said shafts are mounted, a vehicle body frame supported upon said bearings and located in the same horizontal plane as the upper portions of the springs, said springs having no connection with said frame except through said shafts.

1,535,745. TROLLEY-CONDUCTOR INSULATOR. SAMUEL S. STOLP, Mansfield, Ohio, assignor to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed Nov. 30, 1923. Serial No. 677,636. 10 Claims. (Cl. 191—36.)



1. A section insulator comprising in combination means for holding the adjacent ends of a trolley conductor in fixed and insulated relation, and a pair of parallel guide bars laterally spaced from each other and from the said means adapted to guide either a grooved wheel or sliding current collector across the break in the line conductor, each bar being electrically connected to a different trolley conductor and normally insulated from each other.

1,535,746. BUMPER. JOSEPH STEATINSKY, Chicago, Ill. Filed July 18, 1924. Serial No. 726,809. 4 Claims. (Cl. 293—55.)

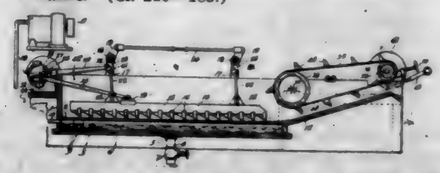


1. A bumper comprising a plurality of flat bars, spaced between their flat surfaces and turned edgewise to the front, bent rearwardly at their ends, having these ends suitably covered with flat guards and in combination with it a plurality of flat rear springs pivotally mounted at the ends, and near the centre of the flat bars; having also suitably supported on the rear springs oblong shaped spring rings rigidly fastened between the overlapping ends of a bracket, which in turn is rigidly fastened to the frame of a vehicle.

1,535,747. ADJUSTABLE ROOF STRUCTURE. JOHN FRANKLIN STUCKERT, Philadelphia, Pa. Filed July 3, 1924. Serial No. 723,855. 6 Claims. (Cl. 108—16.)

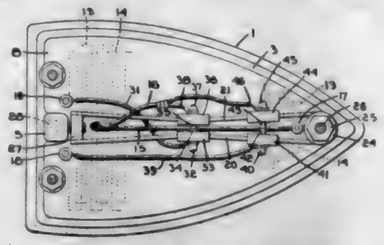
1. In a building construction a pair of supports, a gutter spanning said supports, means arranged above said gutter for supporting a roof in a fixed, rigid manner, means for securing predetermined adjustments of said supporting means toward or away from said gutter at the time of erection and means for retaining permanent said adjustments.

1,535,748. AUXILIARY APPARATUS FOR CONDENSERS. ROBERT SUCZEK, Philadelphia, Pa., assignor to C. H. Wheeler Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 18, 1922. Serial No. 554,512. 19 Claims. (Cl. 230—13.)



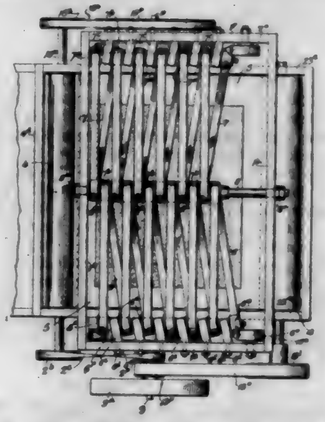
1. The combination with a receptacle for liquid, of an ejector submerged in the liquid, a second receptacle to which said liquid is delivered by said ejector at higher pressure, and a second ejector delivering fluid at increased pressure to said second receptacle independently of said first named ejector.

1,535,749. REGISTERING DEVICE. EDWARD G. THOMAS, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed May 27, 1921. Serial No. 473,100. 7 Claims. (Cl. 235—91.)



1. In a weighing scale, in combination, weighing mechanism including a load-receiver, automatic load-counterbalancing mechanism and means connecting said automatic load-counterbalancing mechanism with said weighing mechanism, and a registering device connected to said weighing mechanism for counting the loads received by said load-receiver.

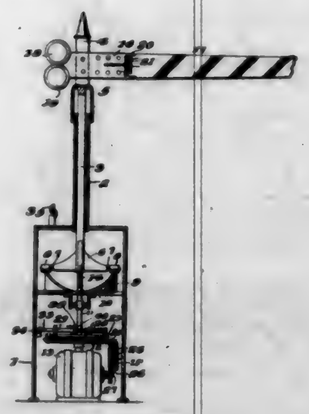
1,535,750. FILTER. WARREN C. TRACY, Los Angeles, Calif. Filed Sept. 27, 1921. Serial No. 503,561. 6 Claims. (Cl. 210—185.)



1. In a filter of the nature disclosed, a tank, a filter element defining a lower chamber for receiving ore solution, a discharge chute extending and angled upwardly from one end of the filter element, means propelling ore pulp along said element towards the discharge chute, and means propelling the ore tailings upwardly along the discharge chute.

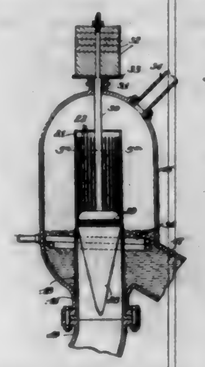
1,535,751. THERMOSTATICALLY-CONTROLLED IRON. WILFRED J. TURENNE, Danvers, Mass. Filed Aug. 9, 1921. Serial No. 491,051. 10 Claims. (Cl. 219—25.)

1. An electrically heated device comprising a base member, a heating unit, a circuit for supplying electric current to said heating unit, a curved member having a different coefficient of expansion than that of the base member, rigidly anchored to said base member at points remote from each other, co-operating switch members in said circuit one of which is mounted upon the curved portion of said curved member and normally arranged to contact with the other switch member, but operable by the relative expansion of said base member and curved member to separate said switch members and thereby interrupt the electric circuit.



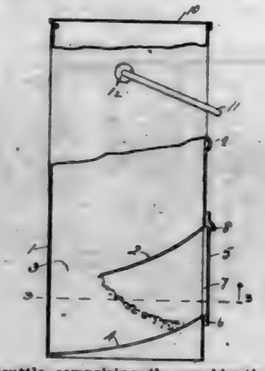
1,535,752. BRONZING MACHINE. BURT F. UPHAM, Brookline, and FRANK C. STEVENS, Cohasset, Mass., assignors to United Printing Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed June 8, 1922. Serial No. 566,778. 18 Claims. (Cl. 91—59.)

1. In a machine of the character specified, a sheet conveyor, and belts arranged at obtuse angles to the line of movement of the sheets adapted to operate upon the sheets as they move forward on the conveyor.



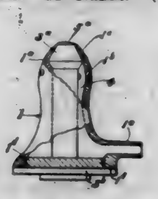
11. In a machine of the character specified, a sheet conveyor, belts, guides for each belt disposed above the path of the sheet whereby each belt is caused to make a plurality of substantially parallel loops above the sheets, the portions of each belt at the underside of said loops being adapted to operate upon the sheets as they are moved by the conveyor, substantially as described.

1,535,753. AUTOMATIC SAFETY GATE. GRANT G. WEISER, Hellertown, Pa. Filed Apr. 16, 1923. Serial No. 632,383. 4 Claims. (Cl. 246—128.)



1. An automatic gate in combination with a railroad track, comprising a housing, a rotatable shaft extending from said housing, a signal arm carried by said shaft, a T-shaped extension formed on the lower extremity of said shaft arranged in said housing, a roller arranged at each end of said T-shaped extension, stationary cam surfaces engaging said rollers for elevating said shaft and signal arm when said shaft is turned, whereby when said shaft is released it will return to its normal position by gravity, and train initiated means for turning and elevating said shaft and arm against the action of gravity.

1,535,754. METHOD OF AND APPARATUS FOR SEPARATING GASES AND LIQUIDS. ARTHUR SHALER WILLIAMS, Ithaca, N. Y. Filed Sept. 4, 1923. Serial No. 660,684. 21 Claims. (Cl. 183—26.)

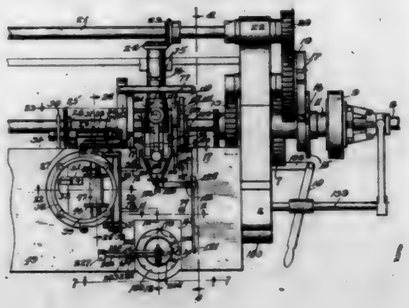


1. The method of separating a gas and a liquid from a mixture thereof consisting in causing the mixture to flow through a multiplicity of small, "thin-plate" orifices having a low pressure difference between opposite sides thereof and allowing the mixture to expand freely from said orifices into a space under the lesser pressure whereby the sudden free expansion of the gas causes it to separate out and the liquid to condense and fall.

1,535,755. COAL SCUTTLE. JOHN W. ACOSTA and ARTHUR E. BAKER, Philadelphia, Pa. Filed Oct. 6, 1922. Serial No. 592,707. 1 Claim. (Cl. 220—2.)

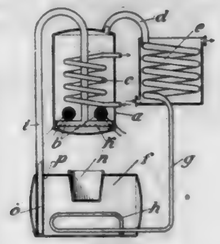
A coal scuttle comprising the combination with a receptacle including upper and lower compartments separated by a partition terminating short of one of the walls of said receptacle to form a communication between the two compartments and the side wall of said receptacle opposite the communication between the two compartments having a doorway formed therein communicating with the lower compartment, of a vertically slidable door to normally close said opening, a hollow finger piece formed with the upper edge of said door and a projection formed from that wall of the receptacle in which the doorway is formed and located a distance above said doorway for coaction with the hollow finger piece to hold the door in an elevated position.

1,535,756. RECTAL DILATOR AND IRRIGATOR. ALBERT L. AUSTIN, Cleveland, Ohio. Filed Apr. 4, 1921. Serial No. 458,415. 14 Claims. (Cl. 128—240.)



1. An irrigating rectal dilator, comprising a hollow dilator member, a hollow irrigating member extending therethrough and removable therefrom, and a removable plug provided with a head forming a part of said dilator member when seated.

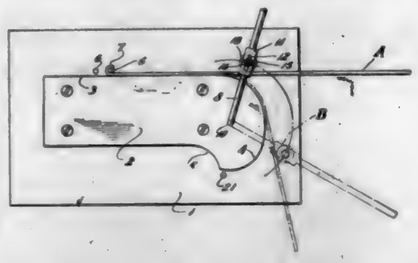
4. An irrigating dilator of hollow formation including a nozzle head having a central opening and a series of tangentially arranged jet openings spaced from said central opening, and a tubular irrigating member removably seated in and communicating with said central opening and spaced from the walls of said dilator forming an annular chamber therein communicating with said jet openings whereby when said tubular irrigating member is seated an irrigating zone is formed between said jet openings and said central opening of said nozzle head.



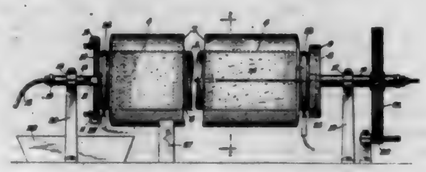
1,535,757. SUNDAE-CUP-FORMING MACHINE. CESARE BARBIERI, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Sept. 25, 1922. Serial No. 590,265. 36 Claims. (Cl. 93—36.)

1. A cup forming machine comprising an automatic cup forming mechanism, a mechanism for automatically feeding cup blanks into the field of operation of said

forming mechanism to be formed into cups, means for automatically centering the cup blanks, an automatic cup stacking mechanism, means for automatically transferring the formed cups from the forming mechanism over said stacking mechanism, and means for automatically pushing the cups into said stacking mechanism.



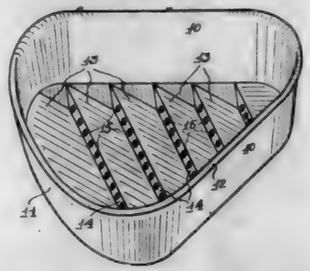
1,535,758. REFRIGERATING APPARATUS. GAUDENZ BAYER and CARL HOCHHERR, Augsburg, Germany, assignors to the Firm Gebrüder Bayer, Augsburg, Germany. Filed Dec. 19, 1923. Serial No. 681,526. 7 Claims. (Cl. 62—118.)



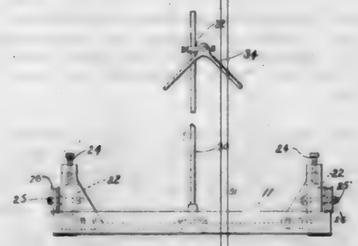
7. A refrigerating apparatus of the intermittently acting absorption type, including a still-absorber, an evaporator, valveless, permanently open communication means between the evaporator and the still-absorber, and having an outlet from the upper part of the evaporator and an outlet from the lower part of the evaporator, the relative areas of said outlets being such that the first mentioned outlet permits the free escape of gas during normal cooling operation, but permits the development of pressure in the evaporator and the forcing of liquid through said second mentioned outlet upon abnormal high rate of evaporation in the evaporation, and a second communication means between the still absorber and the evaporator, and including a condenser and a liquid seal.

1,535,759. MACHINE FOR BENDING BUMPER BRACKETS. JOHN F. BEANS, Canton, and ALONZO J. MERCIER, Massillon, Ohio, assignors to The Beans Spring Company, Massillon, Ohio, a Corporation of Ohio. Filed Nov. 17, 1922. Serial No. 601,592. 2 Claims. (Cl. 153—45.)

1. A bending machine including a table, a fixed bending block thereon having a straight edge terminating in a curved edge, a swinging arm arranged to be pivotally connected to the block and provided with a roller for bending the bar around the curved edge of the block, the table having a bearing aperture at the extremity of said curved edge of the block, a detachable arm having a journal portion adapted to be engaged in said bearing aperture, a removable block adapted to bear against said journal portion, and a roller upon said detachable arm for bending the free extremity of the bar back upon the removable block.



1,535,760. MANUFACTURE OF LITHOPONE. JAMES ELIOT BOOGE, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Nov. 3, 1920. Serial No. 421,432. 2 Claims. (Cl. 134—78.)



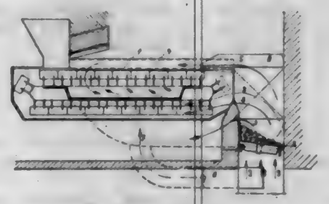
1. The process of muffling lithopone which comprises calcining the lothopone in a closed retort whose interior walls are composed of calorized iron.

1,535,761. SINK STRAINER. RALPH R. BOYLES, St. Paul, Minn., assignor to American Aluminum Ware Co., a Corporation of New Jersey. Filed Sept. 23, 1922. Serial No. 590,041. 3 Claims. (Cl. 210—149.)

2. A removable triangular strainer for the corner of a sink, having side walls for its entire periphery and a bottom which is provided with parallel draining portions inclined toward the small end of the strainer when the strainer is in normal position and in the opposite direction when the strainer is tilted, said bottom having an outlet between the adjacent edges of each two of said draining portions and said edges being in such relation to each other that one portion drains onto the other when the strainer is tilted.

1,535,762. WHEEL-REMOVING DEVICE. ANTHONY C. BRESKA, Cleveland, Ohio, assignor of one-half to Louis Horley, Cleveland, Ohio. Filed Jan. 10, 1924. Serial No. 685,429. 12 Claims. (Cl. 214—1.)

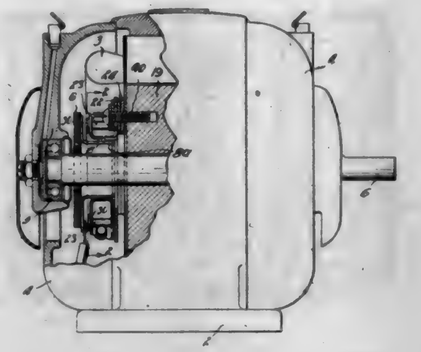
1. In combination, a trackway adapted to be disposed axially of a vehicle wheel, a platform on the trackway, mechanism for enabling the platform to be raised vertically with reference to the trackway for engaging and supporting said wheel, whereby said platform may be moved axially of the wheel for removal and replacement purposes.



1,535,763. RESISTANT-SURFACE ALLOY OF IRON. GEORGE H. CHARLS, Canton, Ohio, assignor to United Alloy Steel Corporation, Canton, Ohio, a Corporation of New York. Filed Apr. 14, 1924. Serial No. 706,564. 11 Claims. (Cl. 75—1.)

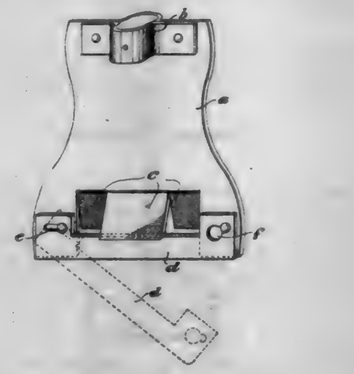
1. A resistant-surface alloy of iron comprising, in combination with the iron, chromium from 3.0% to 30.0%, copper from .10% to 2.0%, and molybdenum from .05% to .35%.

1,535,764. RESISTANT-SURFACE ALLOY OF IRON. GEORGE H. CHARLS, Canton, Ohio, assignor to United Alloy Steel Corporation, Canton, Ohio, a Corporation of New York. Filed Apr. 14, 1924. Serial No. 706,565. 10 Claims. (Cl. 75—1.)



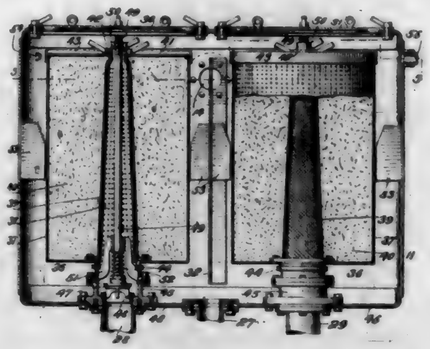
1. A resistant-surface alloy of iron comprising, in combination with the iron, chromium from 3.0% to 30.0%, silicon from .50% to 6.0%, copper from .10% to 2.0%, and molybdenum from .05% to .35%.

1,535,765. DEVICE FOR UTILIZING THE HEAT CONTAINED IN THE FUEL RESIDUES OF FURNACES. CHRISTIAN CHRISTIANS, Wilmersdorf, near Berlin, Germany. Filed Aug. 29, 1921. Serial No. 496,653. 3 Claims. (Cl. 110—1.)



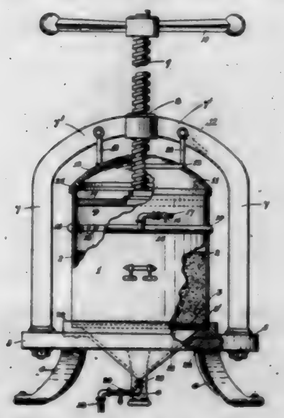
1. In a furnace, the combination, with a travelling grate, of a secondary grate adapted to receive the residues from the said travelling grate; a conduit adapted to lead combustion-air to the said secondary grate; and a conduit adapted to lead the heated mixture of the said air and the combustion-gases from the secondary grate to the travelling grate, for the purpose as described.

1,535,766. CENTRIFUGAL MOTOR SWITCH. JOEL R. COOK, Lakewood, Ohio, assignor to The Domestic Electric Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 5, 1922. Serial No. 579,789. 6 Claims. (Cl. 200—80.)



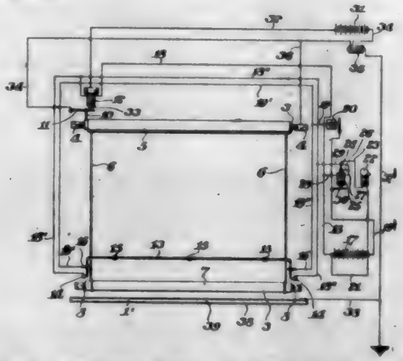
1. In a centrifugal switch, the combination of a rotary support, a stationary contact, a plurality of contact arms pivotally mounted upon the support and spaced equi-angularly thereon, the pivotal center of the arms being spaced at equal radial distances from the center of rotation of the switch, said contact arms having U-shaped bearing portions comprising the pivotal mountings thereof and spring members connected to said arms intermediate the legs of the U-shaped portions and connected to equi-angularly spaced lugs formed on said rotary support.

1,535,767. MOP-CLOTH HOLDER. FRANK LESLIE CUNNINGHAM, Calgary, Alberta, Canada. Filed Sept. 21, 1922. Serial No. 589,633. 1 Claim. (Cl. 15—150.)



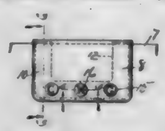
A mop holder comprising a plate provided with a handle receiving socket at one end thereof, the opposite end of said plate being provided with a rectangular recess, said plate being provided with a plurality of slits extending into said recess, and the alternative portions of the plate between said slits being bent forwardly and rearwardly to form a jaw, a clamping jaw pivoted to the portion of said plate forming one side of the recess, and means carried by the portion of the plate forming the other side of the recess for detachably retaining said pivoted jaw in clamping position.

1,535,768. FEED-WATER GREASE-EXTRACTOR APPARATUS. HOWARD C. DAVIS, Elizabeth, N. J., assignor to Row & Davis Engineers, Inc., New York, N. Y., a Corporation of Delaware. Filed Sept. 15, 1920. Serial No. 410,514. 3 Claims. (Cl. 210—43.)



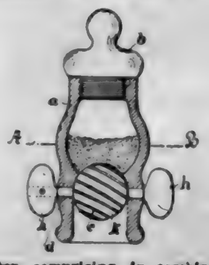
1. Unitary apparatus of the character described for use on a tank-steamship comprising a receiving tank for holding a body of water at a substantially uniform level and having an inlet for steam and water of condensation leading into said tank below the water level therein and a gravity discharge leading from the lower portion of the tank, said receiving tank also having means for the automatic discharge of oil from the upper surface of the water and means for maintaining the water at a substantially uniform predetermined level, a filter tank having an inlet through which said gravity discharge delivers into the filter tank from said receiving tank, spaced-apart self-contained removable unit filters submerged in said filter tank for filtering the water therein and having valved outlets leading therefrom for filtered water and adapted to permit either or both filters to remain in operation, and removable cover-plates at the top of said filter tank over said filters to provide for the introduction of the filters and the removal of either or both thereof.

1,535,769. INFUSION EXTRACTOR. JOSEPH JOACHIM GALLARDO, San Tecla, Salvador. Filed Aug. 16, 1924. Serial No. 732,533. 3 Claims. (Cl. 167—4.)



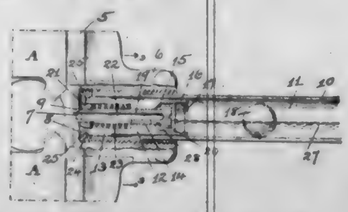
1. An improved apparatus for use in making extractions of coffee, tea, cocoa, and like substances, comprising a container for receiving the substance, a hollow jacket surrounding said container, a belt of perforations encircling the wall of the container and enclosed by the jacket, means for supplying boiling water or steam to said jacket, and means for applying direct pressure to the moist and hot substance within the container.

1,535,770. BURGLAR-DETECTIVE APPARATUS. TRAVILLA C. GETTELL, Philadelphia, Pa., assignor of one-half to Frederick Lambden, Baltimore, Md. Filed Jan. 26, 1921. Serial No. 440,045. 6 Claims. (Cl. 20—40.)



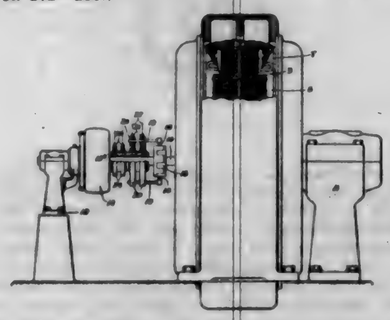
1. In a protective system of the character described, the combination with a closure, of a curtain, means for operating said curtain, and mechanism comprising an automatically movable device normally restrained from movement by said closure for rendering said operative means inoperative.

1,535,771. HAND GRASP FOR AUTOMOBILES. CARL H. GUSTAFSON, Hartford, Conn. Filed Feb. 6, 1923. Serial No. 617,203. 2 Claims. (Cl. 296—44.)



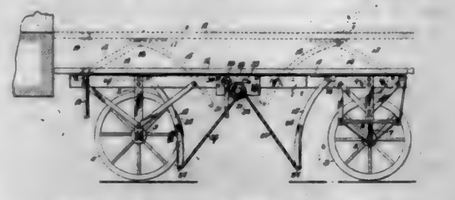
1. A hand grasp comprising a piece of material formed to provide flaps, a form of shaping material made in the form of a U-shaped frame with an end and with side bars bounding a central opening and constituting a border corresponding in shape to that of said flaps with the intermediate portion of the flaps free of the form and means for securing the frame to said flaps.

1,535,772. PEPPER CASTER. GOTTLOB HAUFLER, Stuttgart, Germany. Filed Apr. 10, 1924. Serial No. 705,704. 1 Claim. (Cl. 146—61.)



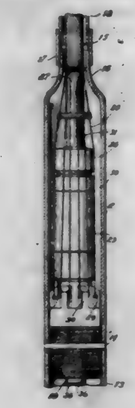
A pepper-caster, comprising, in combination: a receptacle adapted to receive the peppercorns and having a comparatively wide outlet passage, the wall of which is spherically contracted near the pepper corn-receiving receptacle-chamber; and forms an inwardly projecting edge at its upper end; means for closing the receptacle at its top; a comparatively large ball forming the bottom of the peppercorn receiving receptacle-chamber and being arranged in said wide outlet-passage and provided with a spirally-running groove adapted to co-operate with said edge; a spindle supported in the lower part of the receptacle-chamber, being firmly connected with said grooved ball, and a handle at either end of said spindle.

1,535,773. OIL-FEED DEVICE FOR DIESTOCKS. THOMAS HEER, Baltimore, Md., assignor, by direct and mesne assignments, to John A. Baker, Reisterstown, Md. Filed Mar. 22, 1923. Serial No. 626,836. 5 Claims. (Cl. 10—126.)



4. The combination with a stock-body having a handle socket and an oil-passage leading therefrom, of a handle provided with an oil-chamber; a cylindrical valve-body secured in the inner end of the handle and having an annular rim-edge valve-seat at its outer end and also having a second valve-seat adjacent to said rim-edge valve-seat; a valve stem extending longitudinally through body and provided with a passage therethrough and having a valve head at its outer end; spring means for drawing the valve-stem closed when the handle is detached, and a ball valve in the oil-chamber of the handle to seat on the rim-edge valve-seat when the handle is elevated.

1,535,774. SELF-STARTING SYNCHRONOUS MOTOR. TRUMAN HIBBARD, Minneapolis, Minn., assignor, by mesne assignments, to Electric Machinery Mfg. Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Nov. 7, 1919. Serial No. 336,302. 6 Claims. (Cl. 172—280.)

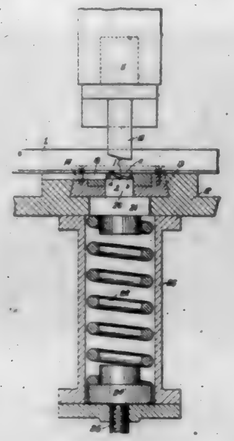


1. The combination with a self-starting synchronous motor having a damper winding and adapted to be started as an induction motor, of means including a redirecting commutator driven with the rotor of said motor and having its field sectors connected to the field terminals of said motor, and independently rotated brushes co-operating therewith for reversing the polarity of the rotor magnets to produce a torque to enable the motor to pull into synchronism under substantially full load.

1,535,775. LOADING AND UNLOADING TRUCK. WILLIAM T. HOLLAWAY, Alliance, Ohio, assignor of one-half to Harold A. Simms, sr., Chicago, Ill., and Walter A. McCullough, Alliance, Ohio. Filed Mar. 24, 1923. Serial No. 627,376. 5 Claims. (Cl. 254—8.)

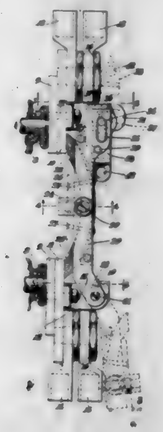
1. A loading and unloading truck, including a body, a platform, a pair of angular levers pivoted near each end of the body, a roller journaled at the angular portion of each lever and engaging the under side of the platform, a drum journaled through the body, cables connected to the lower ends of the levers and wound upon the drum, means for rotating the drum and means for holding the drum in any desired position.

1,535,776. OIL-WELL HEATER. GEORGE S. HOLLISTER, Burkburnett, Tex., assignor to James B. Pauley, trustee, Chicago, Ill. Filed July 13, 1922. Serial No. 574,649. 10 Claims. (Cl. 219—33.)



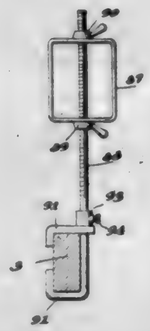
10. In a device of the class described, the combination with a heating unit, an electric circuit therefor, and means for normally preventing water from gaining entrance to the channel leading to the heating unit of electrical connections in said circuit and located in said channel, and a strata of insulating material such as mica filling such channel around said connections.

1,535,777. METHOD AND APPARATUS FOR MANUFACTURING HARD-STEEL FENCEPOSTS. VERNON HOXIE and MARTIN C. EPKE, Adrian, Mich., assignors to Peerless Wire & Fence Company, Adrian, Mich., a Corporation of Delaware. Filed Dec. 29, 1922. Serial No. 609,662. 9 Claims. (Cl. 153—2.)



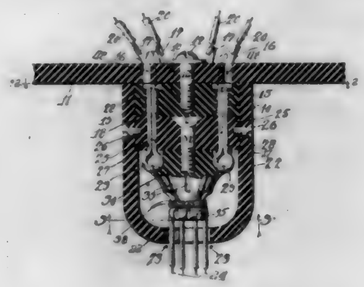
1. The method of making a metallic fence post or similar article with an integral tongue for subsequent back bending, which consists in taking a hard steel blank, stripping a tongue throughout its length from the blank by a punching operation, and in the same operation imparting an initial back bed to the outer end portion of the tongue toward the opening from which it is stripped and in the direction of intended subsequent bending.

6. An apparatus for forming tongues on hard steel stock, including a recessed die, and a punch for cooperating with the die to form a tongue on the stock, said punch having a nose portion receding rearwardly at



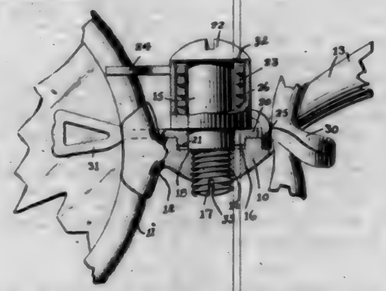
substantially a 3° angle to the face of the stock operated on and having a heel portion extending rearwardly from the nose portion at substantially a 20° angle to the stock face.

1,535,778. ELECTRICAL SWITCH. JOSEPH ALLEN JOHNSON, Niagara Falls, N. Y., and HARRY M. KING, Niagara Falls, Ontario, Canada. Filed July 18, 1919. Serial No. 311,773. 19 Claims. (Cl. 200—169.)



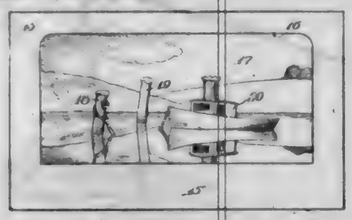
19. An electric switch having in combination, two electrical contact members, a switch member pivotally mounted with respect to said contact members and adapted to be swung about its pivot to electrically connect said contact members, means fixed with respect to the contact members and means on the switch member adapted to cooperate with said first means to hold the switch closed, one of said means including a pivotally mounted member adapted to engage the other means with a cam action to force the switch closed, the carrying of the cam past dead center acting to lock the switch in closed position.

1,535,779. SCAFFOLD BENCH AND ANCHOR. FRANK B. JOHNSTON, New York, N. Y., assignor to American Safety Device Company, a Corporation of New York. Filed Mar. 15, 1922. Serial No. 544,058. 2 Claims. (Cl. 304—15.)



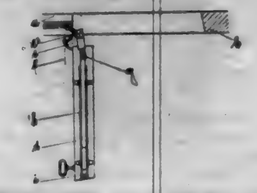
1. An outrigger support comprising a screw standard having a clamp member at its base adapted to embrace the lower portion of a floor joist, a second clamp member adapted to be placed above the joist, a sleeve on the second clamp member about the standard, securing means carried by the sleeve and engaging the standard for supporting the latter in the sleeve, and an outrigger frame on the standard.

1,535,780. ELECTRICAL CONNECTION DEVICE. HOWARD B. JONES, Evanston, Ill. Filed Aug. 28, 1922. Serial No. 584,901. 7 Claims. (Cl. 173—338.)



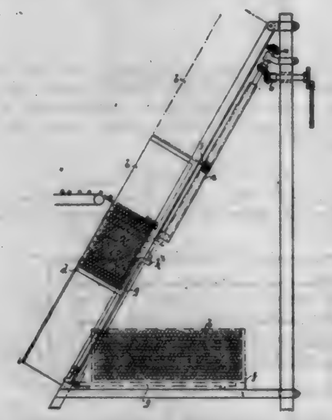
1. In an electrical connection plug of the character described, the combination of a disc-like supporting member of insulating material having apertures therethrough substantially parallel with the axis thereof for accommodating contact stems, a headed contact stem in the form of a cotter pin loosely positioned in each of said apertures with the heads of said stems on the inner side of the supporting member, a housing of insulating material including a tubular part having an open end adapted to receive a socket member encompassing said supporting member and stems with the supporting member intermediate the ends of the housing and held readily removably therein, said stems terminating short of but close to the open end of the housing while extending materially beyond the outer surface of the supporting member, means for holding said stems against inward movement, and means carried by the supporting member for binding wires thereagainst, the end of the housing opposite said open end having an aperture for wires.

1,535,781. EYEGLASS CONSTRUCTION. PERCIVAL W. JONES, Providence, R. I., assignor to Bay State Optical Company, Attleboro, Mass., a Corporation of Maine. Filed Mar. 28, 1922. Serial No. 547,408. 5 Claims. (Cl. 88—50.)



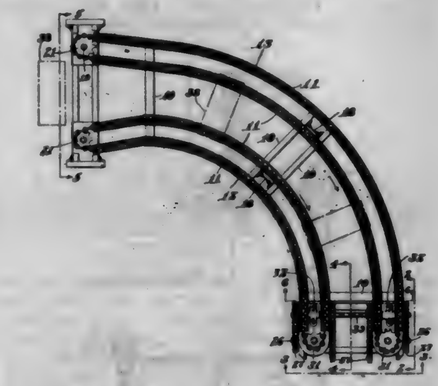
1. In eyeglass construction, in combination, an eyeglass frame, a nose lever adapted to swing thereon, a screw member passing through an opening in said nose lever and engaging said frame and having a head at its end remote from said frame, said head being beveled under its outer edge, a spring coiled upon said said screw member and connected to swing said lever, and a casing substantially covering said spring, one end of said casing resting upon said nose lever and its other end registering with said bevel on said screw head.

1,535,782. SCENIC EFFECT. FRANK O. KING, Glencoe, Ill. Filed May 10, 1923. Serial No. 638,131. 4 Claims. (Cl. 272—11.)



1. In the art of creating scenic effects, the provision of a scenic representation appropriate to the presence of a body of water, and in association therewith a shaped object standing out in relief and below said shaped object and substantially vertical therewith a similarly shaped object in inverted position with respect to the upper object and also standing out in relief, the lower object representing a reflection of the upper object, as in water.

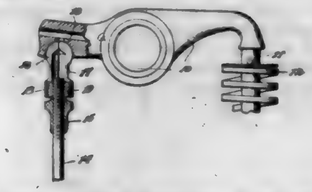
1,535,783. HINGE FOR WINDOWS AND DOORS OF MOTOR CARS. HANNS KLEMM, Sindelfingen, Germany, assignor to Daimler-Motoren-Gesellschaft, Stuttgart-Unterturkheim, Germany, a Corporation of Germany. Filed Mar. 17, 1924. Serial No. 699,732. 6 Claims. (Cl. 16—179.)



5. A hinge for windows and doors of motor cars, more especially for motor cars with detachable and collapsible tops and with the axis of the door hinge displaces against the axis of the window hinges, in combination with a hinge member connecting the window with the top of the car body, said hinge member being flexible and shiftable and forming one shank-fitting of the general hinge, said shank-fitting being jointed in the fitting-portion engaging the window frame and one portion of the jointed fitting engaging a suitable portion of the window frame so as to be shiftable, substantially as described.

1,535,784. TRESTLE OR CONTAINER FOR RECEIVING MANUFACTURED CIGARETTES. EWALD KOERNER, Dresden, Germany, assignor to United Cigarette Machine Company, Inc., Lynchburg, Va., a Corporation of Virginia. Filed June 21, 1924. Serial No. 721,508. 11 Claims. (Cl. 131—39.)

1. A filling device for cigarette machines, comprising a container, means for moving the container step by step, each step being a distance in accordance with the thickness of the individual cigarettes being handled, and means for inserting a layer of cigarettes into the container at each movement of the latter.

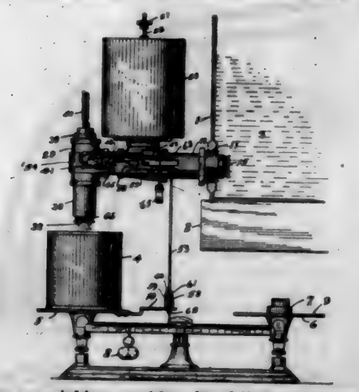


1,535,785. CHAIN CURVE. GRAFTON E. LUCE, Chicago, Ill. Filed May 31, 1923. Serial No. 642,527. 3 Claims. (Cl. 198—182.)

1. In an improved curved conveyor for carrying articles or objects around a curve of any desired radius and length, the combination of a plurality of troughs arranged in pairs and parallel to each other and lying in a

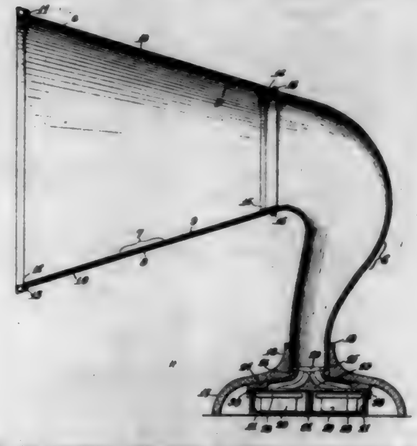
plane, an endless conveyor chain arranged in each pair of troughs, and means for driving adjacent reaches of the conveyor chains simultaneously in the same direction and at the same angular speed.

1,535,786. VALVE-ACTUATING MECHANISM. JESSE JULIUS MORSCH, Douglas, Wyo. Filed June 27, 1923, Serial No. 648,134. Renewed Mar. 19, 1925. 4 Claims. (Cl. 123—90.)



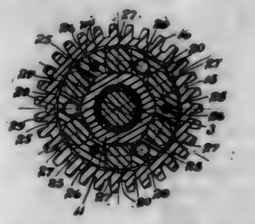
1. In valve-actuating mechanism, a ball end including a hollow thrusting member slotted longitudinally on radial lines to define spring fingers connected by a relatively thin skirt and a bushing fitting within the skirt for engagement with a push rod.

1,535,787. MUFFLER. JOHN RAGANY, Canton, Ohio. Filed Nov. 25, 1924. Serial No. 752,179. 4 Claims. (Cl. 137—160.)



1. In a device of the class described, a tubular casing provided at one extremity with an end member, a conduit opening through the end member, the conduit being extended backwardly along the casing, and into the casing at a point adjacent to the other extremity of and spaced from the casing, the conduit comprising a part disposed within the casing and opening through the end member, first baffles in the space between said part of the conduit and the casing, and second baffles in said part of the conduit.

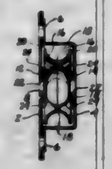
1,535,788. LIQUID-WEIGHING MACHINE. HERMAN RAUCHFUSS, Englewood, Colo. Filed Jan. 5, 1924. Serial No. 684,533. 5 Claims. (Cl. 249—55.)



1. In a weighing machine for filling containers with a predetermined weight of liquid, in combination, a liquid supply tank, a valve mechanism connected thereto, a scale, a container supported by said scale, said valve mechanism having an opening located directly above said container, a valve member operatively associated with said valve mechanism for closing said opening, means tending to move said valve member towards closing position, means comprising a latch member for holding said valve member in open position, said latch member having an opening for the reception of a control rod (53), said control rod having means for engaging the latch member and rendering said latch inoperative when the rod moves downwardly a predetermined distance, and means on the scale which co-operates with the rod and holds the latch engaging means out of contact with the latch until the weight of liquid in the container reaches a predetermined value and then permits the latch-engaging means to come into contact with the latch member and to be supported entirely thereby for the purpose of releasing the latch and permitting the valve member to move to closing position.

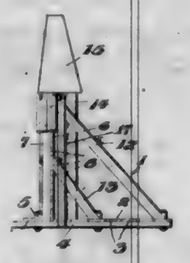
1,535,789. AMPLIFIER. JOSEPH A. RAYDER, Philadelphia, Pa. Filed May 3, 1924. Serial No. 710,886. 7 Claims. (Cl. 181—27.)

1. An amplifier embodying a cellular walled horn and an insulate material base, said base affording attachment for a reproducing instrumentality enclosure, and a cover for the enclosure having a spiralized passage communicating with the aforesaid horn.



1,535,790. TRANSMISSION-GEARING CLUTCH. BAYARD E. RICHARDSON and ALGER M. LINN, Grand Rapids, Mich., assignors to Mechano Gear Shift Company, Grand Rapids, Mich., a Corporation of Michigan. Filed Dec. 5, 1921. Serial No. 519,878. 4 Claims. (Cl. 192—45.)

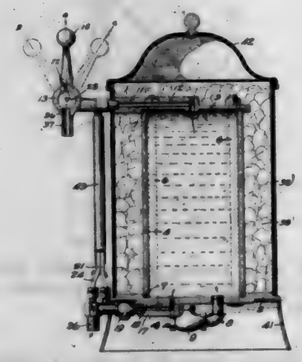
3. A clutch comprising an inner member having a plurality of sides arranged at angles to each other, a roller carrying cage around the inner member including clutch rollers loosely carried therein, one at each side



of the inner member, an outer clutch member of cup-like form located over the cage and inner member and provided with a plurality of depressions on its inner side and having a plurality of ball receiving recesses in its bottom, and spring actuated balls carried by the cage and pressed into said recesses.

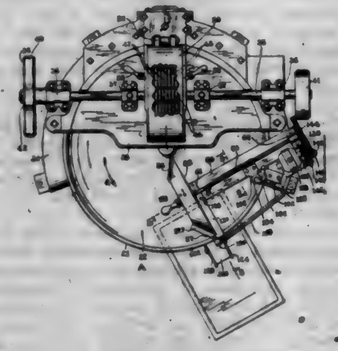
1,535,791. PULLEY. WILLIAM RAEBURN, Waterbury, Conn., assignor to The Mattatuck Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Jan. 3, 1924. Serial No. 684,161. 5 Claims. (Cl. 254—192.)

1. A pulley comprising a housing having substantially parallel perforated sides, and a sheet metal pulley wheel composed of two parts secured together, each part having a hollow tubular projection passing through one of the sides of said housing and forming a trunnion for the wheel, and a boss surrounding the axis of said projection and engaging the corresponding side of the housing so as to space the rim of the pulley therefrom.



1,535,792. SEA WALL. CHARLES H. RUGGLES, West Palm Beach, Fla. Filed May 26, 1924. Serial No. 715,974. 6 Claims. (Cl. 61—4.)

3. A well for the purpose set forth comprising horizontally disposed sleepers, a deck secured thereon and spaced from the forward ends thereof, standards mounted on the sleepers forwardly of the deck, a vertically disposed sheathing positioned against the rear face of and of the same height as the standards and further interposed between the deck and the standards, a longitudinal toe-piece secured to the sleepers and positioned against the forward face of the standards, bracing elements secured to the rear face of the sheathing and against the upper face of the deck, and a cementitious body enclosing said standards and arranged against the forward face of the sheathing.

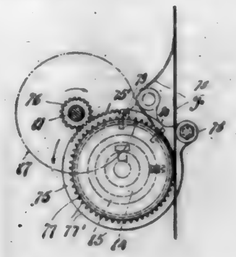


1,535,793. WATER-CHARGING APPARATUS. BASIL H. SAVAGE, San Francisco, Calif., assignor, by mesne assignments, to Michael J. Savage, Los Angeles, Calif. Filed Apr. 13, 1922. Serial No. 552,367. 1 Claim. (Cl. 225—21.)

In an apparatus for charging water with gas, a charging tank, a passage for connecting said tank to a source of water, a discharge passage for the charged water opening from the top of the tank, a valve for controlling the flow of charged water arranged in said passage, a passage connecting a source of gas to said valve

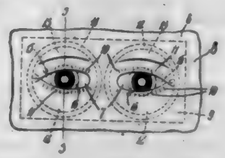
seat, and a passage extending from said valve seat to the bottom of said tank, said valve being recessed to connect said last two passages when the discharge water passage is closed.

1,535,794. UNLOADING MEANS FOR MEAT-CUTTING MACHINES. OSCAR C. SCHMIDT, Cincinnati, Ohio, assignor to The Cincinnati Butchers' Supply Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Nov. 12, 1923. Serial No. 674,135. 22 Claims. (Cl. 146—215.)



1. In a meat cutting machine, the combination of a rotary meat-trough, a rotary unloader, and means whereby to move said rotary unloader into said meat-trough.

1,535,795. FILM-ADJUSTING MECHANISM FOR CINEMATOGRAPHS OR THE LIKE. HERMANN SEUFERT, Brooklyn, N. Y. Filed Nov. 13, 1922. Serial No. 600,574. 1 Claim. (Cl. 88—17.)



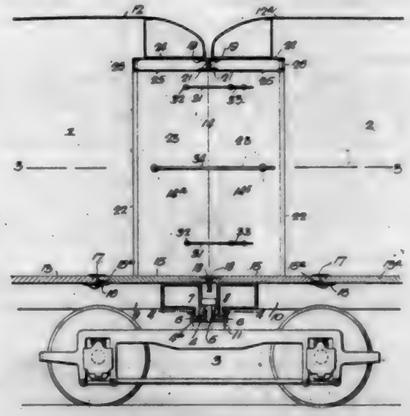
In a cinematograph or the like, the combination with a driven shaft and the film feeding drum thereon, of a film adjusting device comprising a wheel loosely mounted on said shaft and formed on its periphery with a toothed sector and diametrically opposite said sector with an arm extending parallel to said shaft across said drum, a roller rotatable on said drum and adapted

to bear against the outer face of said film, a spindle extending parallel to said shaft formed at one end with a hand wheel and at its opposite end with a pinion,

said pinion being adapted to mesh with said sector and means for limiting the rotary movement of said wheel to the length of a film picture.

1,535,796. DOLL. MABEL H. SLATER, New York, N. Y. Filed Feb. 23, 1924. Serial No. 694,504. 7 Claims. (Cl. 46—40.)

5. As an article of manufacture, an eye member for dolls comprising a receptacle provided with a chamber opening through one face thereof, an iris member shiftably positioned in said chamber and a piece of transparent material extending across said chamber opening and adapted to be fastened to the face portion of a doll in alignment with an eye opening in said face portion.



1,535,797. DECOLORIZING CARBON AND PROCESS OF PRODUCING THE SAME. LEONARD WICKENDEN, Flushing, N. Y., assignor to Industrial Chemical Company, New York, N. Y., a Corporation of New York. Filed Feb. 24, 1919. Serial No. 278,834. 14 Claims. (Cl. 252—8.)

1. The process of increasing the decolorizing power of porous, carbonized material which comprises boiling said material in an aqueous solution of manganese sulphate and effecting adsorption of the metallic radical thereof, and calcining the impregnated material at a temperature of about 860° to 900° centigrade in the presence of carbon-dioxide to effect the limited oxidation of said carbonized material and greatly increase its decolorizing power without undesirable oxidation loss thereof.

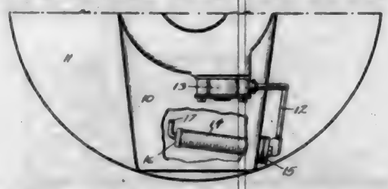
1,535,798. DECOLORIZING CARBON AND PROCESS OF PRODUCING THE SAME. LEONARD WICKENDEN, Flushing, N. Y., assignor to Industrial Chemical Company, New York, N. Y., a Corporation of New York. Filed Aug. 16, 1919. Serial No. 318,043. 8 Claims. (Cl. 252—8.)

1. The process of increasing the decolorizing power of the porous carbonized residue of a vegetable solution, which comprises boiling said carbonized residue in a solution of magnesium chloride and effecting adsorption of the metallic radical thereof and calcining the incorporated material at a temperature of about 800 to 900 degrees centigrade in the presence of carbon-dioxide to greatly increase the decolorizing power of said carbonized material without excessive oxidation loss thereof.

1,535,799. ARTICULATED CAR. WALTER S. ADAMS, Philadelphia, Pa., assignor to The J. G. Brill Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 27, 1924. Serial No. 716,191. 8 Claims. (Cl. 105—4.)

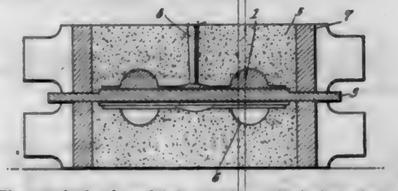
8. The combination in an articulated car, of two body sections, each having a segmental bearing at one end; a truck having a center bearing for the segmental body bearings; a vestibule mounted on the frames of the body sections, said vestibule consisting of two parts, each part having a frame, the frame of one part abutting the frame of the other part; and curved side portions extending from each frame and closing the space between the ends of the two body sections.

1,535,800. AIR CLEANER. MARTIN E. ANDERSON, Denver, Colo. Filed Sept. 30, 1924. Serial No. 740,743. 8 Claims. (Cl. 183—34.)



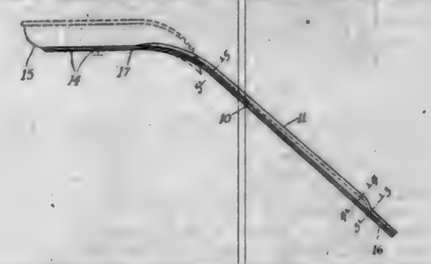
1. An air cleaner adapted to be attached to the air intake opening of an internal combustion engine comprising, in combination, a casing having an entrance opening and an exit opening, resilient means for varying the area of the entrance opening in accordance with the volume of air passing through the cleaner, whereby the velocity of the air on entering will be high at all rates of flow means for causing the air to make a sharp turn immediately upon entering the casing whereby solid particles carried by the air will be separated therefrom and means for entangling the dust thus separated so that it will not reenter the air stream.

1,535,801. OIL STRAINER. BLAINE ASHER, Spencer, Iowa. Filed Jan. 23, 1924. Serial No. 687,946. 2 Claims. (Cl. 210—170.)



1. An oil strainer comprising a foraminous tube open at one end and having an end member at its other end,

an upwardly extending tube communicating with the interior of said strainer through the latter end, whereby

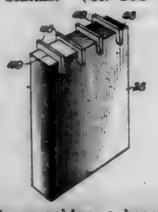


the oil from the oil container is permitted to pass when said oil is too cold to be drawn through said foraminous tube.

1,535,802. METHOD OF MULTIPLE CASTING. VICTOR F. BENDIXEN, Chicago, Ill. Filed July 18, 1923. Serial No. 652,414. 1 Claim. (Cl. 22—197.)

The method of multiple casting which includes forming a pattern impression in each of the opposed members of a flask, said impressions being duplicates, interposing between the impressions a core having its opposed faces duplicated and extending equally into the respective impressions, said core being formed with vertical gates extending therethrough, there being horizontal gates in the mold members communicating with the vertical gates, and then pouring metal into the mold.

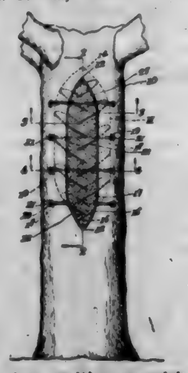
1,535,803. SEAT SPRING. HERT R. BENJAMIN, Oak Park, Ill., assignor to International Harvester Company, a Corporation of New Jersey. Filed Nov. 11, 1920. Serial No. 423,236. 5 Claims. (Cl. 267—47.)



3. A flat spring of uniform cross section comprising two angularly disposed portions, one of said portions being relatively longer than the other and having a gradually diverging, longitudinally extending, embossed bead therein of both varying width and depth.

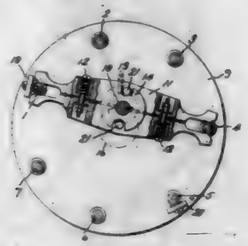
1,535,804. DRYING APPARATUS. LARS H. BERGMAN, Chicago, Ill., assignor to Raymond Bros. Engineering Co., Chicago, Ill., a Corporation of Illinois. Filed Oct. 13, 1923. Serial No. 668,333. 8 Claims. (Cl. 34—37.)

1. In apparatus for drying comminuted material, the combination with a closed tower adapted to receive material at the upper end and discharge it at the bottom thereof, of means for passing heated air through the tower in opposition to the movement of the material, inclined chutes over which said material slides by gravity, and means for separately varying the inclination of each of said chutes to vary the velocity of said material comprising, in each case, a shaft, arms fixed on said shaft, links connecting said arms with one of said chutes, a gear fixed to the shaft a transverse shaft, a worm on said transverse shaft adapted to mesh with said gear, and means for operating said transverse shaft.



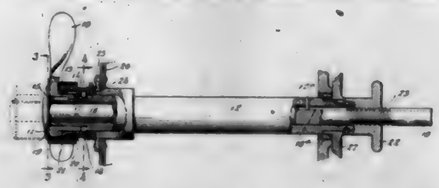
1,535,805. LUG-CUTTING MACHINE. JOSEPH W. BISHOP, Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill., a Corporation of Delaware. Filed Sept. 22, 1921. Serial No. 502,335. 9 Claims. (Cl. 164—38.)

1. In a lug cutting machine, a base, a frame mounted on said base, a second frame adjustable relative to the first frame, adjustable guides carried by said frames, a pair of knives carried by said frames in parallel relation, means for feeding plugs along said guides and between said knives, a third knife arranged above said guides, and means actuated by the advancing plug for moving the third knife into position.



1,535,806. TREE SURGERY. CONWAY MONCURE BLUME, Orange, Tex. Filed May 22, 1924. Serial No. 715,160. 5 Claims. (Cl. 47—8.)

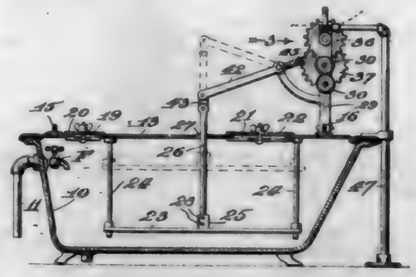
1. A filling for tree cavities comprising a homogeneous mass adapted to fill the cavity and provided with flexible insertes extending inwardly at an obtuse angle



and in staggered relation from the opposite edges of the filler to permit flexing of the filler throughout its length and to prevent cracking thereof.

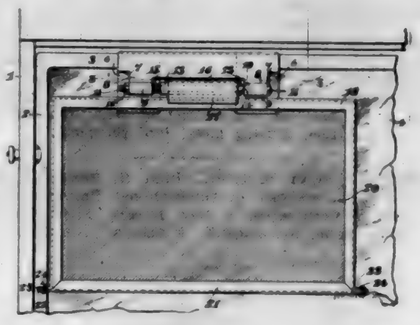
1,535,807. SWITCH. LOUIS F. BLUME, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Jan. 13, 1923. Serial No. 612,452. 5 Claims. (Cl. 200—6.)

1. A switch inculding a plurality of terminals, a terminal connecting member having surfaces for contact with said terminals, and means for supporting said connecting member and for moving it to carry one of its contact surfaces from one terminal to another in a curved path convex toward said supporting means and in a direction along said path opposite to that of said supporting means.



1,535,808. PROPELLER. FREDERICK BRACCO, Lynd-hurst, N. J. Original application filed May 29, 1922, Serial No. 564,434, Patent No. 1,491,512, dated Apr. 22, 1924. Divided and this application filed May 17, 1923. Serial No. 639,576. 3 Claims. (Cl. 170—160.)

3. The combination of a hollow shaft, a plurality of collars rotatably mounted upon said shaft and upon each other, propeller blades carried by said collars and located in a common circumferential plane, said blades being adjustable by said collars, in said common plane, to an unfolded, operative position and to a folded inoperative position, said collars being provided with apertures adapted to register with each other in each position of the blades, an auxiliary shaft slidably mounted within said hollow shaft, a head carried by said auxiliary shaft, locking members projecting from said head and adapted to enter said apertures to lock said blades in either position and means whereby said auxiliary shaft is slidably actuated to shift said locking members into and out of said apertures.

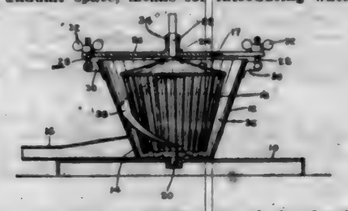


1,535,809. WASHING MACHINE. MAX BRANDT, Los Angeles, Calif. Filed Dec. 13, 1923. Serial No. 680,357. 1 Claim. (Cl. 68—37.)

A household laundering appliance comprising a cover plate that is adapted to be detachably positioned on top of a bath tub, a clothes receiving rack mounted for vertical reciprocatory movement beneath the central portion of said cover plate, guide rods depending from said cover plate, which guide rods provide bearings for the end portions of said vertically reciprocating rack, there being a normally closed opening formed in that portion of said cover plate that is positioned over the faucets of the bath tub, and a normally closed opening formed in said cover plate above the clothes receiving rack, a post secured to one end of said cover plate, the lower end of which post is adapted to rest on the

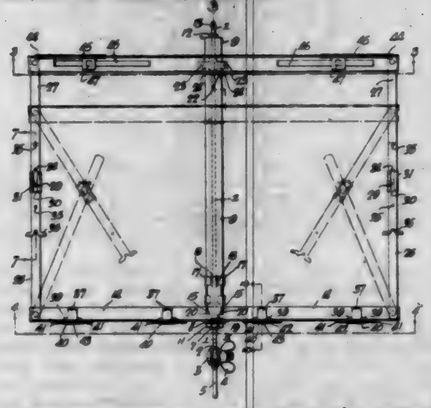
floor adjacent to the bath tub to which the cover plate is applied, and motor driven means mounted above one end of the cover plate for imparting reciprocatory movement to the clothes receiving rack.

1,535,810. GLARE SCREEN. JOHN BERY, Hancock, Mich. Filed Oct. 12, 1923. Serial No. 668,153. 1 Claim. (Cl. 296—97.)



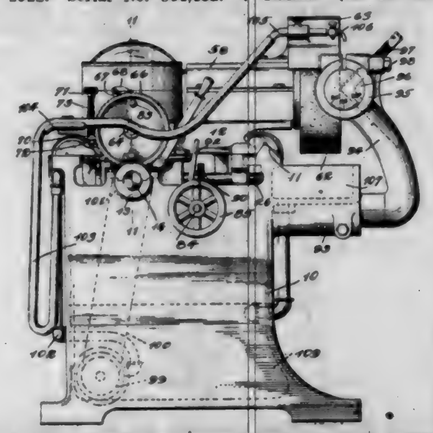
A device of the class described comprising a clip device adapted to bear over the upper edges of a support and having spaced bearings, one of said bearings having a notch in its inner end with the sides thereof in parallel relation, a rod extending through said bearings, a sleeve slidable on said rod and having a projection with its sides in parallel relation and adapted to engage said notch, a spring operating to hold said sleeve with its projection yieldably engaged with said notch when in one position, and positively locking the sleeve to the bearing when in one position and releasable only by moving the sleeve longitudinally, and a member supported by said sleeve and rotatable therewith upon the rod.

1,535,811. DEVICE FOR FREEING GLUTEN FROM STARCH. CHARLES H. BRIGGS, Minneapolis, Minn. Filed Oct. 18, 1922. Serial No. 595,414. 2 Claims. (Cl. 127—25.)



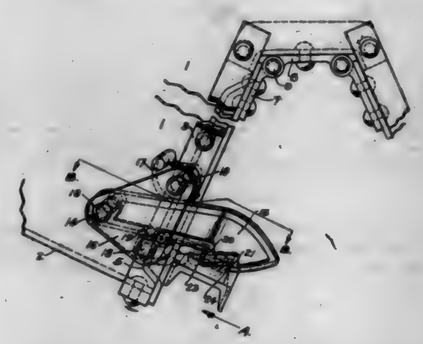
1. A device for freeing gluten from starch comprising a frusto conical imperforate receptacle having a roughened surface and having its smaller end down, a frusto conical imperforate member having a roughened surface and having its smaller end down, said member being spaced within said receptacle to form an annular chamber, and the walls of said receptacle and member being inclined at different angles whereby said chamber

is narrower at its lower end than at its upper end, means for rotating said member for kneading dough in said annular space, means for introducing water into



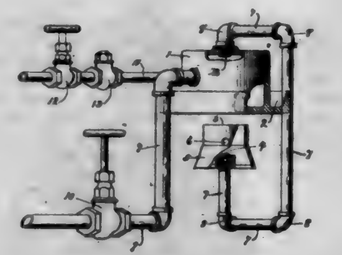
said space to wash the starch out of the dough, and means for permitting escape of the water and starch while retaining the gluten.

1,535,812. MUSIC STAND. CHARLES A. CARMANY, Schaefferstown, Pa. Filed Apr. 11, 1922. Serial No. 551,444. 15 Claims. (Cl. 45—14.)



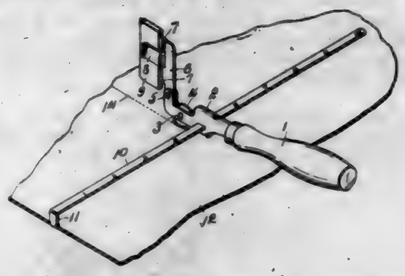
1. The combination in a music stand, of a supporting spindle; a flat supporting bar mounted to turn on said spindle and having means for holding it in either of its two positions; an upper and a lower rail; connecting links at the ends of the rails; and means for removably holding the rails to the bar.

1,535,813. LATHE-KNIFE-GRINDING MACHINE. WILLIAM H. COLLIER, Painesville, Ohio. Filed May 29, 1922. Serial No. 564,452. 7 Claims. (Cl. 51—56.)



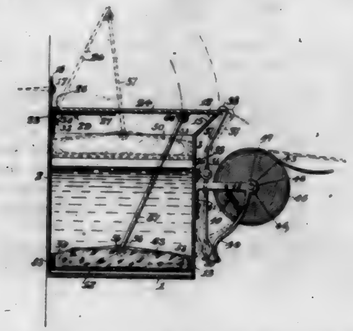
1. In a grinder for veneer knives, means to support a knife, a grinding wheel, driving means for said wheel, traversing means to move said wheel longitudinally in front of said knife support, reversing means for reversing the action of the traversing means at each end of the longitudinal movement of the grinding wheel, and an automatic feed arranged to advance the grinding wheel toward the knife support in a step by step movement said automatic feed being operated by the action of the reversing means.

1,535,814. CAR-DOOR MECHANISM. WILLIAM F. CREMEAN, Toledo, Ohio. Filed Apr. 28, 1923. Serial No. 635,192. 11 Claims. (Cl. 105—308.)



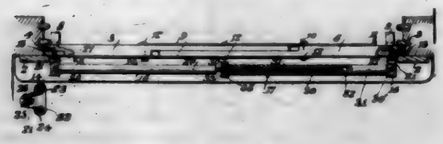
1. A car device including in combination with a hinged car door, a reinforcing bar attached to the outer surface of said door, said bar having secured thereto a plurality of hook engaging ledges, a hook pivoted upon the side of the car provided with a plurality of door engaging ledges, said ledges being located in the same spaced relation as the ledges on the door-reinforcing bar.

1,535,815. OIL BURNER. WALTER T. CUNNINGHAM, Wichita, Kans. Filed Oct. 2, 1924. Serial No. 741,176. 1 Claim. (Cl. 158—81.)



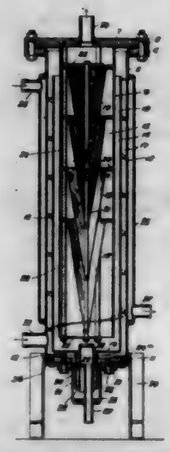
In an oil burner, a retort chamber having an annular integral pan thereabout, an outlet at the top of said chamber, a burner positioned concentrically beneath said chamber and connected to said outlet, a mixing sleeve surrounding said burner and having a frusto conical lower portion and a perforated cylindrical upper portion a valved oil inlet to said retort, a valved gas inlet connecting with said oil inlet between the valve thereon and the retort, and a check valve on the gas inlet pipe between the valve and the connection to the oil inlet, whereby the gas is cut off by an excess of pressure in the retort, substantially as shown and for the purpose described.

1,535,816. MARKING GAUGE. LILLIAN M. DARNEY, Kansas City, Kans. Filed Oct. 30, 1922. Serial No. 597,880. 8 Claims. (Cl. 33—42.)



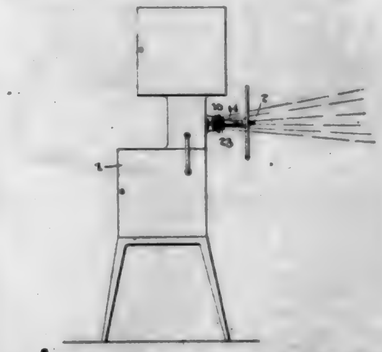
1. In a marking gauge, a handle, a marking wheel rotatable thereon, and a chalk holder movable on the handle to positions in which the wheel or the chalk holder may be used in operative alinement with each other for marking purposes, substantially as set forth.

1,535,817. LIQUID-SUPPLY DEVICE FOR TOILET PURPOSES. CHARLES DIONNE, Lowell, Mass. Filed Aug. 20, 1924. Serial No. 734,362. 8 Claims. (Cl. 4—1.)



1. A liquid supply device for toilet purposes comprising a liquid cleansing medium reservoir, a water reservoir, a spring controlled cover common to and normally closing said reservoirs, means for automatically releasing said cover, a pair of vertically movable carriers arranged within said reservoirs and each provided with an absorbent body, and connections between said cover and carriers whereby these latter are automatically elevated in said reservoirs when the cover is released.

1,535,818. SECTIONAL-WINDOW-SCREEN LOCK. HORACE R. ELLIS, Meadville, Pa. Filed July 8, 1924. Serial No. 724,830. 4 Claims. (Cl. 292—278.)



1. A locking device for the sections of a window screen comprising a pair of telescopic locking bars adjustable relatively to each other and each adapted to be secured to one of the sections of the screen, an adjustable nut threadedly engaging with one of said bars, extended therefrom and having its extended portion provided with an opening spaced from said bar, a fixed plate secured to and extended from the inner end of the other of said bars and having its extended portion provided with an opening for registration with the opening in said nut, and means extending through the registered openings for coupling the nut and plate together thereby maintaining the said bars in adjusted position.

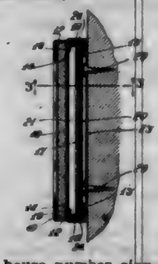
1,535,819. COOLER AND SEPARATOR. WILLIAM L. R. EMMET, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 26, 1922. Serial No. 609,162. 8 Claims. (Cl. 183—32.)

1. In an apparatus of the character described, the combination of an elongated closed casing, walls within the casing forming a series of chambers, said chambers lying one within the other and extending longitudinally of the casing, alternate adjacent ends of said chambers being in communication with each other whereby said chambers are connected in series, means forming a spiral passage through the outermost chamber in a longitudinal direction, a plurality of screens within the innermost chamber, an inlet conduit and an outlet conduit connected with the interior of the casing, and cooling means surrounding the casing.

1,535,820. SHUTTER-TIMING MECHANISM FOR MOTION-PICTURE MACHINES. JOHN C. FOSTER, Merkel, Tex. Filed Jan. 24, 1924. Serial No. 688,229. 8 Claims. (Cl. 88—19.3.)

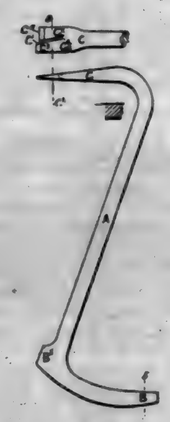
1. A shutter timing mechanism for the purpose set forth comprising a shutter carrying member, means engaging one end of said member for shifting it lengthwise with respect to a revolvable shutter driving shaft, and a combined guide and securing element carried by said means for revolving said member to adjust the shutter when said member is shifted lengthwise, said element common to said means and member for securing said means and member to said shaft to provide for the bodily revolving of said member, means and element with said shaft.

1,535,821. SPRING WHEEL. DAVID E. FULTZ and OTIS L. GRIGG, Madill, Okla. Filed Mar. 20, 1924. Serial No. 700,658. 3 Claims. (Cl. 152—45.)



1. A vehicle wheel comprising a tire, an annular web within the tire and attached thereto, a spider within the annular web and having its outer portion comprised between spaced portions thereof, and substantially radial spring connections between the spider and web.

1,535,822. REMEDIAL APPLIANCE. ROY GOODWIN, Wilmette, Ill. Filed July 5, 1923. Serial No. 649,409. 3 Claims. (Cl. 128—60.)

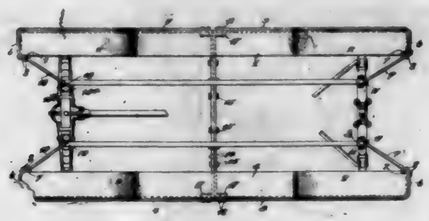


2. A remedial device of the class described comprising a ball upon which the patient can lie and roll in a massaging operation, an elongated protuberance projecting from the spherical periphery of said ball, said protuberance projecting upwardly in use for localizing a concentrated pressure on the abdominal wall below the sternum, the upper convex surface of the ball immediately surrounding said protuberance applying a general pressure to the abdominal wall around said region of concentrated pressure.

1,535,823. LUMINOUS SIGN. ROY GOODWIN, Wilmette, Ill. Filed Mar. 22, 1924. Serial No. 700,994. 8 Claims. (Cl. 40—134.)

3. A luminous house number sign comprising a frame having top and bottom channels, a plurality of separate interchangeable characters adapted to be received in said channels, and shoes at top and bottom of each character of semi-circular cross section for resilient gripping in said channels.

1,535,824. COMBINED NAIL PULLER AND CASE OPENER. HENRY CHARLES GORE, Dunedin, New Zealand. Filed Feb. 26, 1923. Serial No. 621,309. 2 Claims. (Cl. 7—17.)

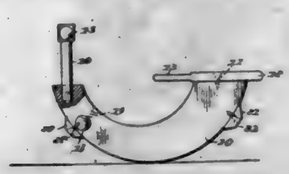


1. A tool of the character described comprising a shank provided with an angularly bent part, said part having a flattened portion adjacent one end, said portion being formed with a slot in a plane intersecting the flat surfaces of said portion and the terminal edge thereof, thereby bifurcating said portion, one of said bifurcations being provided with a chisel edge and the other terminating in a blunt edge in advance of said chisel edge, the walls of said slot being formed with shearing edges.

1,535,825. NONSET AUTOMATIC PHONOGRAPH STOP. CHARLES R. GOTSHALL and RALPH S. SNYDER, Uhrichsville, Ohio. Filed May 16, 1922. Serial No. 561,859. 2 Claims. (Cl. 192—118.)

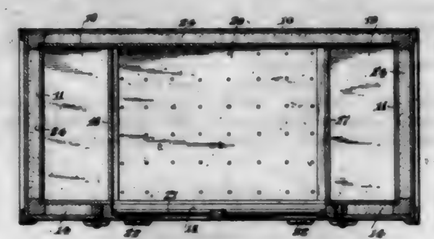
1. A sound reproducing machine stop device, comprising a tone arm and quadrant arm, and means for coupling them for simultaneous movement, a fulcrum wheel driven by the machine motor, a stop quadrant and driving means between the stop quadrant and the quadrant arm, trip means between the stop quadrant and the turn table of the machine, and brake means responsive to movement of the trip means to apply the braking means to the turn table to stop it.

1,535,826. FENDER-PROTECTING BRACE. ELLIS FAYETTE GRAHAM, Louisville, Ky. Filed Apr. 15, 1924. Serial No. 706,764. 1 Claim. (Cl. 280—152.)



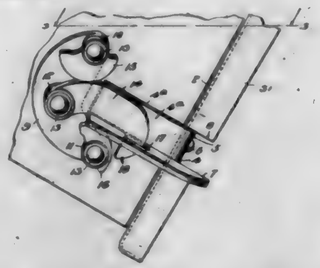
In combination with an automobile chassis having running boards at its opposite sides and wheel fenders at the ends of the running boards, a brace structure comprising sections extended around the ends of the wheel fenders and along the outer edges of the fenders and the running boards, bracing bars disposed transversely of the intermediate portion of the chassis and connected with each other and disposed in parallel relation, said bars having angularly disposed end portions extending in opposite directions and secured to the intermediate portions of the said sections at points below the intermediate portions of the running boards, and brace rods connected at their outer ends with the end portions of the sections which are disposed around the ends of the fenders, said brace rods being provided at their inner ends with angularly disposed extremities and clamp devices connecting said extremities with the chassis at the ends thereof.

1,535,827. BAKER'S DOUGH BOX. SAM GREENWALD, Brooklyn, N. Y. Filed Dec. 15, 1924. Serial No. 755,847. 10 Claims. (Cl. 107—7.)



1. The combination with a baker's dough box, of a sheet, means for rolling up said sheet when not in use, and means for maintaining said sheet in the operative position thereof in spaced relation to the bottom of said box.

1,535,828. KIDDIE BOAT. CHARLES H. GUISCHARD, Richmond Hill, N. Y. Filed Jan. 2, 1923. Serial No. 610,335. 1 Claim. (Cl. 272—53.)

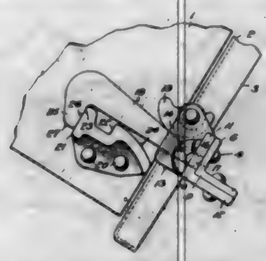


A toy having a crescent-shaped rocker provided at its extremities respectively with a handle bar and a seat, foot rests extending laterally from the rocker adjacent its front end, and front and rear yielding bumpers projecting downwardly from the under or bearing face of the rocker adjacent the front and rear ends, the front bumper being disposed adjacent the foot rests whereby pressure on said bumper may be regulated to effect a step by step forward progress of the rocker over its supporting surface.

1,535,829. ELECTRIC INCUBATOR HEATER. CLAUDE HAMILTON, Garnett, Kans. Filed Feb. 28, 1924. Serial No. 695,731. 1 Claim. (Cl. 219—19.)

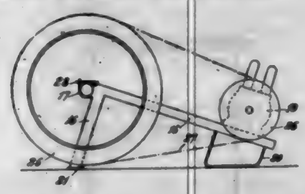
In a device of the class described, a stationary support, a combined supporting rod and adjusting member threaded at one end and mounted for rotation in the stationary support and extending externally of the same, said extended portion having means for the application of a turning implement, a movable supporting member attached at one end to the stationary support and with a threaded aperture engaged by the threaded rod, a diaphragm actuated member bearing upon said movable support, a lever arm mounted to swing and with an electric contact at one end and pivoted at the other end to said diaphragm operated means, and an electric contact adapted to be engaged by the contact of said lever arm when the diaphragm member is expanded, said contacts being connected into an electric circuit.

1,535,830. CAR-DOOR MECHANISM. CLEON M. HANNAFORD, Richmond, Va., assignor to Wine Railway Appliance Company, Toledo, Ohio, a Corporation of Ohio. Filed May 2, 1924. Serial No. 710,593. 11 Claims. (Cl. 105—308.)



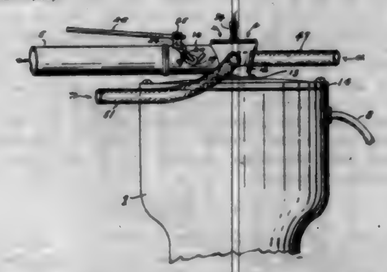
8. The combination with a hopper, of a swinging door adapted to close the opening thereof, of a bracket rigidly mounted on the side sheet of said hopper, an angle bar connected to the outer face of said door, a portion of said angle bar projecting beyond a free edge of said door, said projecting portion extending substantially parallel to and overlying said hopper sheet, means mounted on said bracket for engaging the projecting portion of said angle bar, and means pivotally connected to said bracket for maintaining said first named means in engaging position.

1,535,831. CAR-DOOR MECHANISM. CLEON M. HANNAFORD, Richmond, Va., assignor to Wine Railway Appliance Company, Toledo, Ohio, a Corporation of Ohio. Filed May 2, 1924. Serial No. 710,594. 6 Claims. (Cl. 105—308.)



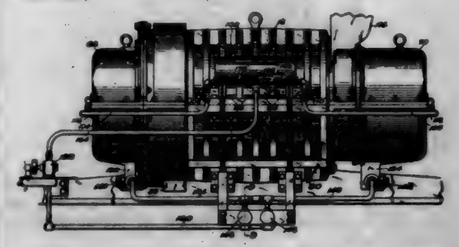
2. In combination with a hopper, of a swinging door adapted to close the opening thereof, a flanged spreader connected to the outer face of said door, a portion of said spreader extending beyond a free edge of said door, a flanged bracket overlying and secured to the projecting

portion of said spreader, a hook pivotally connected to said bracket, said hook being adapted to overlie the side sheet of said hopper, and a member connected to said



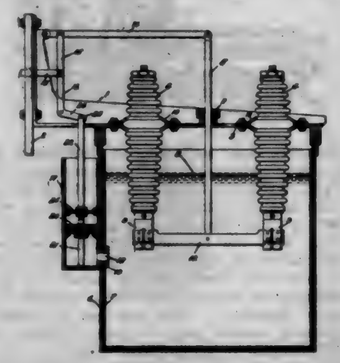
hopper side sheet for cooperation with said hook, said member having a plurality of hook engaging seats whereby said hook may support said door in a plurality of positions.

1,535,832. COUPLING ARRANGEMENT BETWEEN A PUMP AND AN AUTOMOBILE. JACOB CHRISTIAN HANSEN-ELLEHAMMER, Hellerup, Denmark. Original application filed Apr. 12, 1923, Serial No. 631,563. Divided and this application filed Feb. 23, 1924. Serial No. 694,581. 5 Claims. (Cl. 103—218.)



1. Coupling arrangement between a pump an automobile, consisting of a pump and a lever, said lever having one arm with which the rear end of the automobile is lifted and supported with one or both rear wheels in an elevated position, and the second arm of the lever having the pump supportingly mounted upon it, whereby the weight of the pump acting on said arm of the lever will lock the automobile in an elevated stationary position.

1,535,833. PNEUMATIC-CONTROL VALVE. CLINTON H. HANSON, Chicago, Ill., assignor to Motor Player Corporation, a Corporation of Illinois. Filed Sept. 16, 1920. Serial No. 410,753. 19 Claims. (Cl. 84—41.)

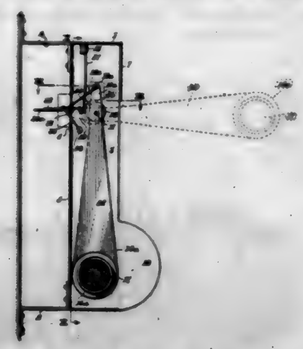


1. In a suction mechanism for operating a player piano, an electrically driven motor and fan suction device, means whereby the air impelled by the fan is caused to flow past the motor for cooling purposes, a hollow member attached to the suction device, a tube projecting laterally from the member and connected with the wind chest of the player piano, means for closing the passageway in the tube by varying degrees and a yieldingly operated valve opening to the atmosphere intermediate said means and the suction device, whereby the air passing through the device remains constant in volume independently of the volume of air flowing through said wind chest.

1,535,834. METHOD OF AND APPARATUS FOR WORKING PAPER STOCK. ANTON J. HAUG, Nashua, N. H., assignor to Improved Paper Machinery Company, Nashua, N. H., a Corporation of Maine. Filed Apr. 6, 1921. Serial No. 459,057. 38 Claims. (Cl. 92—20.)

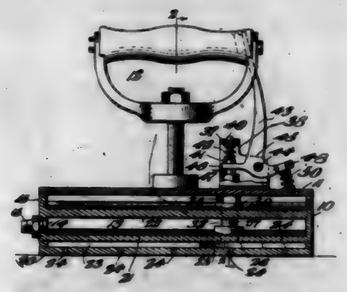
33. A machine for working paper stock having a casing presenting a curved stock-receiving surface, one or more rolls within the casing, means to cause the roll to move over the curved surface in an orbital path, and scraping devices for the roll and for the surface also movable in an orbital path and adapted to remove the accumulated material and impel it against the stock-receiving surface.

1,535,835. ELECTRIC SWITCH. JOHN D. HILLIARD, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 20, 1922. Serial No. 601,956. 6 Claims. (Cl. 200—150.)



1. A switching apparatus comprising a tank, electrodes separable within said tank to break a circuit, means for operating said electrodes, and a device responsive to pressure within said tank to prevent reclosure of said electrodes, said electrodes being movable independently of said device.

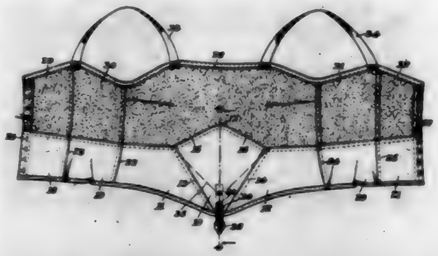
1,535,836. TRAFFIC SIGNAL FOR AUTOMOBILES. EDWIN L. HILMER, Hagersville, Pa. Filed Dec. 28, 1922. Serial No. 609,468. 2 Claims. (Cl. 116—53.)



1. In a signal of the class described, a casing having a closed upper end and having an outer side portion open, a shaft extending through said casing, a signal arm movable through the open side and having a cam constituting a hub and mounted eccentrically on said shaft,

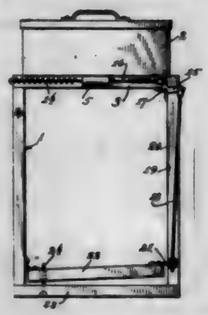
said cam having a latch shoulder formed thereon, a spring finger having one end fixed to the casing and its other end frictionally engaging the hub to check swinging of the arm in normal position, said finger engaging

the shoulder to hold the arm raised upon movement of the arm to signalling position, means to actuate the arm, and means to move the finger off the shoulder to release the arm.



1,535,837. STEAM PRESSING IRON. HARRY A. KOENIG, Philadelphia, Pa. Filed July 28, 1923. Serial No. 654,344. 2 Claims. (Cl. 68—26.)

1. A pressing iron, comprising in combination an iron body having a steam chamber longitudinally disposed therein and having its bottom wall inclined toward one side of the iron, a steam inlet communicating with the high side of said chamber and a steam outlet communicating with the low side of said chamber, said body also having a distributing channel longitudinally disposed below said steam chamber, means for establishing communication between said steam chamber and said distributing channel, a valve arranged to control said communicating means, and a device exterior of said iron body arranged to actuate said valve.

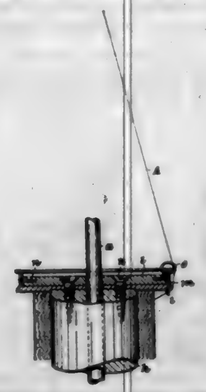


1,535,838. BRASSIÈRE. WALDEMAR KOPS, New York, N. Y., assignor to Nemo Circlet Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 25, 1923. Serial No. 634,440. 5 Claims. (Cl. 2—42.)

5. In a brassière, a lower or girdle member and an upper member of lace or open-work material, the said girdle member having a front central section and a tension member underlying the front central section and at its upper edge secured to the upper edge of the front central section, a tape secured at one end to the lower edge of the tension member, a hook secured to the opposite end of the tape and adapted to engage with each of a plurality of eyelets provided therefor in the front central section, and a hook adjustable to position on the tape and adapted to engage with an under garment whereby tension is applied both circumferentially and longitudinally through the front central section and

only longitudinally through the tension member to adjust and secure the garment in position on the body of the wearer.

1,535,839. AUTOMATIC HOG-OILING DEVICE. ORLANDO A. LEMON, York, Nebr. Filed Feb. 29, 1924. Serial No. 696,022. 3 Claims. (Cl. 119—159.)

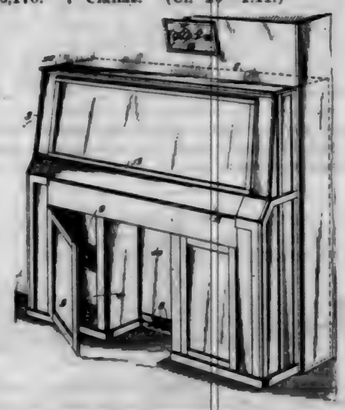


2. A stock disinfecting device comprising a frame, a reservoir mounted thereon, a casing associated with the bottom of said reservoir, the casing having an opening in the upper portion thereof communicating with an opening provided in the bottom of said reservoir, a cylinder suuported in said casing and adapted for slidable movement therein, said cylinder having an opening in the upper portion thereof communicating with said mentioned openings, whereby the cylinder may be filled with the liquid disinfectant contained in said reservoir by the action of gravity, means for normally holding said cylinder in its filling position, said cylinder having a discharge opening in the bottom thereof adapted to register with a discharge opening provided in the bottom of said casing upon the forward movement of said cylinder in said casing, means in said frame and connected with said cylinder for moving the same into an operative position upon the passing of stock through said frame, whereby the charge within said cylinder is dispensed through said discharge openings onto said stock by the action of gravity.

1,535,840. APPARATUS FOR SPINNING. EMORY J. LIPPS, Fountain Hill, Pa. Filed Dec. 13, 1924. Serial No. 755,619. 5 Claims. (Cl. 117—26.)

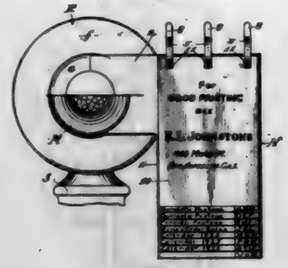
1. A yarn spinning unit of the class specified including, in combination, a rotating support having the windings to be delivered wound around its axis of rotation and having at the delivery end of the mass of windings an endless race formed around said axis, and a traveler adapted to receive and guide the delivered

portion of the yarn and operatively connected with the race and free to slip around the same continuously, said support also having at said end of the mass of windings



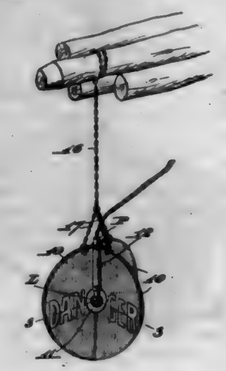
a smooth peripheral contact surface substantially concentric with said axis and around which said delivered portion of the yarn is held bent and in wiping contact therewith.

1,535,841. FASTENER. LOUIS A. LUPIEN, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed Feb. 7, 1924. Serial No 691,136. 4 Claims. (Cl. 24—206.)



1. A fastening device comprising a keeper plate having adjustment openings therein and upstanding shoulders surrounding the rims of such openings and a hook engageable in said openings having a shank with a depression therein to snap over in back of such shoulders when the hook is engaged in the openings.

1,535,842. BUILT-IN PIANO. MALCOLM M. MACDONALD, Tacoma, Wash. Filed May 2, 1923. Serial No. 636,170. 7 Claims. (Cl. 20—1.11.)

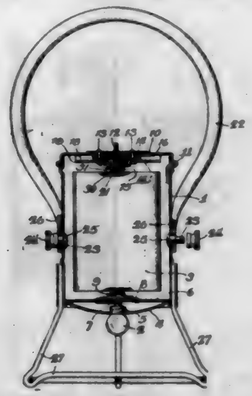


1. A built-in piano comprising the combination with the wall of a room, of a piano action enclosing casing secured to and having its back formed by said wall, said casing formed of the same material and finished similar to the woodwork of the room in which the casing is installed.

1,535,843. TELEPHONE INDEX. JESSE MCCOMAS, Los Angeles, Calif. Filed Mar. 27, 1924. Serial No. 702,407. 5 Claims. (Cl. 40—10.5.)

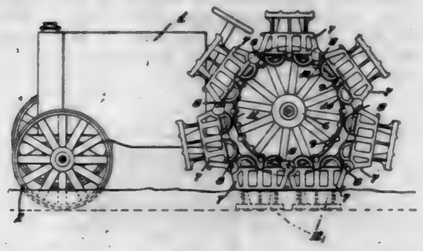
1. A telephone index including a holder integrally formed of sheet metal and having a vertically extended portion and a horizontally extended portion formed in the same plane, said horizontal portion being adapted for attachment to a telephone transmitter, and said vertical portion having elongated cuts made therein with the material from said cuts formed into narrow strips and bent upwardly and thence forwardly and rearwardly, forming loops and supporting portions for holding a plurality of index cards in operative and inoperative position thereon.

1,535,844. EXTENDED-LOAD DANGER SIGNAL FOR VEHICLES. FREDERICK M. MCLEMORE, Los Angeles, Calif., assignor, by mesne assignments, to L. L. Hollister, Los Angeles, Calif. Filed Jan. 29, 1924. Serial No. 689,252. 5 Claims. (Cl. 40—130.)



1. In an extended load danger signal, a plurality of radially arranged connected plates that are colored red, each pair of the adjacent faces of said plates bearing the word Danger a flexible member for suspending said signal from a support whereby said signal may rotate and swing freely in all directions.

1,535,845. ELECTRIC LANTERN. THOMAS MEE, Jr., Clinton, Ill. Filed Oct. 15, 1923. Serial No. 668,561. 15 Claims. (Cl. 240—8.5.)

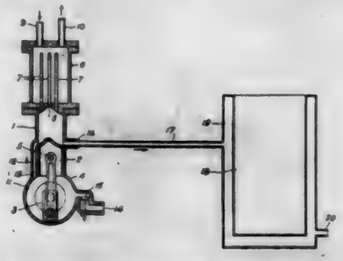


1. In an electric lantern, a metal body, a lamp socket for the bottom of said body, a battery in said body, a cover for the top of said body, a switch on said cover, said switch comprising contacts which engage and disengage each other to close and open the circuit of the lamp, whereby the entire switch is carried by the cover, means to connect one terminal of the lamp with the bot-

tom of said battery, and means to connect said switch with the top of said battery, the other terminal of the lamp being in contact with the bottom of said body,

said body being of metal, whereby operation of said switch will open or close the lamp circuit through said battery and including said body.

1,535,846. LEVELING MEANS. ROYAL R. MILLER, Chicago, Ill., assignor to Miller Traction Tread Company, a Corporation of Delaware. Filed Feb. 6, 1922. Serial No. 534,379. 6 Claims. (Cl. 180—41.)

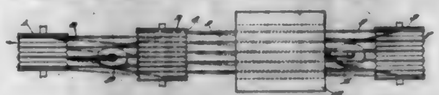


1. The combination with a tractor having track-laying tread type driving means, of leveling means adapted to be detachably secured on said driving means on one side of the tractor to maintain the tractor frame in proper position to be used for plowing.

1,535,847. AUTOMOBILE BUMPER. RICHARD T. NEWTON, New York, N. Y. Filed Nov. 20, 1920. Serial No. 425,342. 5 Claims. (Cl. 180—83.)

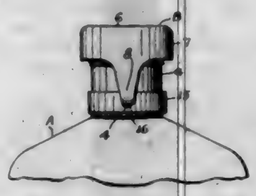
1. A bumper of the character described, comprising an impact member extending transversely of the vehicle, strap metal supporting arms for the ends of said impact member, said supporting arms extending outward beyond the plane of the running wheels of the vehicle, and brake shoes mounted on the said supporting arms in substantial alignment with said wheels and adapted to engage the peripheries thereof on inward deflection of said arms.

1,535,848. AIR REFRIGERATING APPARATUS. ARTHUR HAROLD NICHOLSON, Worcester, England. Filed Sept. 3, 1924. Serial No. 735,666. 3 Claims. (Cl. 62—136.)



1. A refrigerating apparatus comprising, in combination, a pump cylinder having an outlet in its wall, a piston reciprocating in said cylinder, a crank case connected to one end of said cylinder, a crank rotatable in said crank case, a connecting rod connecting said piston and said crank, a chamber connected to the other end of said cylinder, tubes in said chamber, closed at one end and open at the other end to said cylinder, means for cooling said tubes, means for admitting gaseous fluid to said crank case, a refrigerating chamber and a pipe connecting the outlet of said cylinder with said refrigerating chamber.

1,535,849. CLINICAL-THERMOMETER TUBING. MATSUBURO NODA, New York, N. Y. Filed Mar. 16, 1921. Serial No. 452,670. 2 Claims. (Cl. 73—52.)

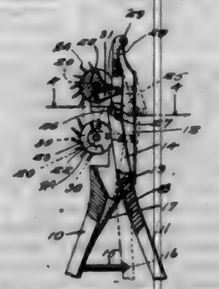


1. A prismatical thermometer comprising a substantially triangular transparent body, a mercury tube positioned in said body at the approximate center thereof, means forming a reflecting surface positioned behind said tube and extending substantially the length of the base of the triangular body, guide lines in said body on opposite sides of the mercury tube parallel therewith for guiding the eye and index marks located near the apex of said triangular body for reading the position of the mercury column.

1,535,850. APPARATUS FOR ENAMELING ARTICLES. ELIOT O'HARA, Waltham, Mass. Filed Feb. 18, 1924. Serial No. 693,588. 4 Claims. (Cl. 91—55.)

1. Apparatus for enameling articles having a conveyor for supporting the articles while receiving the coating of enamel, a second conveyor onto which the coated articles are transferred automatically from the said first conveyor and a furnace through which the articles are carried by the second conveyor, each conveyor having a plurality of parallel runs, the adjacent ends of the runs of the two conveyors lapping past each other for some distance in such manner that the lapping portions of each run of each conveyor will be intermediate two runs of the other conveyor.

1,535,851. CLOSURE DEVICE. LOUIS R. O'NEILL, Newark, N. J., assignor to The Mennen Company, Newark, N. J., a Corporation of New Jersey. Filed Mar. 28, 1922. Serial No. 547,583. 1 Claim. (Cl. 221—60.)

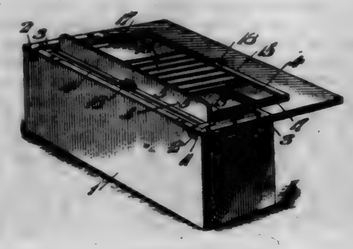


A container closure, comprising a discharge nozzle having a smooth cylindrical portion and an exteriorly threaded portion of a greater diameter than the threaded portion, said smooth portion being substantially longer than the threaded portion, a sleeve mounted on the nozzle, and provided with a pair of oppositely disposed openings, and an interiorly threaded closure cap having a pair of downwardly extending and converging arms formed integral with the cap and adapted for pivotal connection with the sleeve, said sleeve being of a width that will permit the cap to clear said discharge nozzle when swung to and from its closed position.

1,535,852. BISCUIT-MAKING APPARATUS. CHRISTIAN ORNDO, Toronto, Ontario, Canada. Filed Nov. 22, 1924. Serial No. 751,656. 5 Claims. (Cl. 107—52.)

1. In a device of the class described, an open ended cylinder, a flange forming an abutment at the front end thereof, a mouthpiece positioned against such abutment, said mouthpiece being provided with an orifice, a retainer securing said mouthpiece, means for detachably locking the retainer to the cylinder, a head fitted to the rear end of such cylinder, a piston, and means carried by the head for operating the piston within the cylinder in order to expel its contents through the orifice of the mouthpiece.

1,535,853. PIANO-HAMMER FELT-SOFTENING TOOL. DANIEL PRIDE, Wichita, Kans. Filed Sept. 27, 1923. Serial No. 665,186. 6 Claims. (Cl. 84—460.)

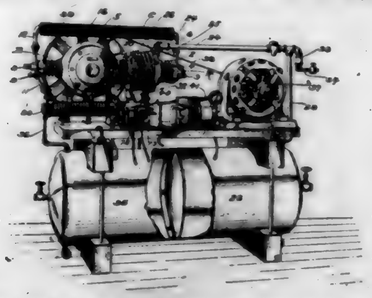


1. A tool for softening piano hammer felts having turnable prickers, and means to operate said prickers toward each other and with respect to the same hammer.

1,535,854. DIMMER FOR AUTOMOBILE HEADLIGHTS. GLENN PRATT, Springfield, Mo. Filed Mar. 5, 1923. Serial No. 622,974. 2 Claims. (Cl. 240—486.)

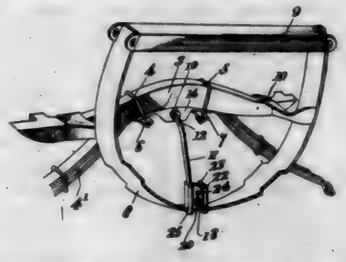
1. A shield for automobile headlights comprising a one-piece sheet metal member having a body portion with an aperture therein to fit over the top of the headlight bulb and side wings extending downwardly therefrom to straddle the bulb, the front portion of said body member having a visor projecting forwardly in advance of the bulb to deflect the light rays against impinging the top of the deflector, and a bendable metal strip carried by one of the wings adapted to be bent around the connection which unites the bulb to its conductor to assist in holding the device in operative position.

1,535,855. VERTICAL FILING SYSTEM. WILLIAM A. RINGLER, Philadelphia, Pa., assignor to Globe Wernicke Co., Cincinnati, Ohio, a Corporation of Ohio. Filed Apr. 15, 1921. Serial No. 461,723. 12 Claims. (Cl. 129—16.)



1. In a card filing system, a cabinet, card-carrying frames disposed vertically within said cabinet and adapted when raised to be supported laterally above said cabinet to render the cards carried by said frames accessible, said frames having guide members which when in raised position extend above the cabinet.

1,535,856. COMBINATION AIR COMPRESSOR AND VACUUM PUMP. EDWARD A. RIX, San Francisco, Calif. Filed May 15, 1924. Serial No. 713,899. 15 Claims. (Cl. 230—32.)

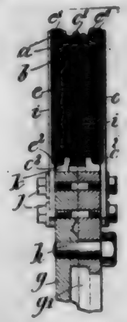


1. A device of the character described, comprising a pair of cylinders, a piston in each cylinder, one cylinder serving as an air compressor and the other as a vacuum pump, a tank for the reception of the compressed air, a tank connected with the second cylinder and adapted to be evacuated thereby, means for transmitting a reciprocal movement to the pistons, an elec-

tric motor for driving said means, means actuated by a predetermined pressure in the compressed air receiving tank for automatically throwing the compressing

cylinder out of action, and means actuated by a predetermined vacuum in the other tank for throwing the vacuum producing cylinder out of action.

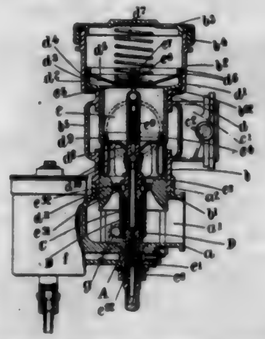
1,535,857. TIRE-RACK BRACE. JOHN QUINCE ROBERTS, Memphis, Tenn. Filed Aug. 22, 1923. Serial No. 658,801. 1 Claim. (Cl. 224—29.)



In combination with a vehicle having a tire rack, a pair of channel clamps having claws adapted to grasp the tire rack said clamp having perforations therein, a rod having a lower angular threaded end adapted to be selectively engaged in the perforations and having nuts on opposite sides of the clamp members for securing the rod to the clamp members and the clamp members together, a block secured to the upper angled end of said rod and adapted to fit beneath the arched channel bar of the frame and having slotted diverging wings extending from the upper side edges of the block, a spring fitted within the channel bar and partially held in place by said slotted wings, and U-shape bolts having plates for securing said wings to the frame member.

1,535,858. METAL AND METAL ALLOY FOR THERMOELECTRIC PURPOSES IN PARTICULAR FOR MAKING THERMOCOUPLES. WILHELM ROHN, Hanau, Germany. Filed May 14, 1920. Serial No. 381,520. 2 Claims. (Cl. 204—64.)

1. The method of preparing uniform base metals and base metal alloys for use in thermocouples, which comprises degasification by melting under predetermined reduced pressures and predetermined temperatures.



1,535,859. COIL FOR ELECTRICAL TRANSFORMERS. JAN ROOTHAAN, Hayes, England. Filed Feb. 8, 1922. Serial No. 534,888. 7 Claims. (Cl. 175—362.)

1. A transformer coil comprising adjacent sets of convolutions of bare conductor, radial separators adapted to space the sets of convolutions apart, distance pieces, each consisting of a small plate, interposed between successive convolutions of the same set to space them apart, and radial binders applied to each set of convolutions after the winding thereof is completed, the separators, distance pieces and binders being separate

members all formed of homogeneous insulating material and being arranged at intervals around the convolutions of conductor in such a manner that the convolutions are mainly insulated from each other by air previous to immersion in oil.

1,535,860. CARBURETOR FOR INTERNAL-COMBUSTION ENGINES. FREDERICK HENRY ROYCE, Derby, England, assignor to Rolls Royce Limited, Derby, England. Filed May 14, 1924. Serial No. 713,287. 7 Claims. (Cl. 261—49.)

1. A carburetor, comprising an outer cylindrical member provided with an enlarged circumferential portion constituting a throttle chamber and having a fuel nozzle therein, and an induction pipe communicating with such portion; an inner cylindrical member slidable in the outer member and formed with circumferential ports which, according to the relative positions of the two members, open more or less into said chamber; a diaphragm in the inner member above said ports; and means whereby the position of the inner member within the outer member is automatically adjusted by the degree of vacuum in the throttle chamber.

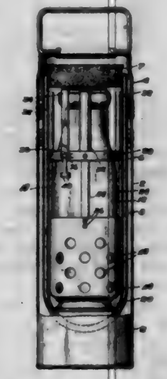
6. A carburetor for internal combustion engines, comprising an outer cylindrical body member having a circumferentially-enlarged portion constituting a throttle chamber from which the induction pipe to the engine is branched; an inner cylindrical member slidable in the outer member having its lower portion shaped to form a choke tube and communicating with the air inlet; a nozzle with which the choke tube is associated; and a suction-actuated diaphragm carried by the upper portion of the inner member for controlling the sliding movements of that member, the portion of said inner member between the diaphragm and the choke tube be-

ing provided with circumferential ports which open more or less fully into said throttle chamber according to the position of the inner member, to regulate the passage of fuel mixture from the said inner member to the throttle chamber.

1,535,861. SAFETY PAPER AND PROCESS OF MAKING THE SAME. CHARLES FRANK SAMMET, Dalton, Mass., assignor to Crane & Company, Dalton, Mass., a Partnership. Filed Oct. 31, 1921. Serial No. 511,808. 25 Claims. (Cl. 92—40.)

3. The process of making safety paper which consists in adding to the paper an insoluble salt of benzidine.

1,535,862. SAFETY PAPER AND PROCESS OF MAKING THE SAME. CHARLES FRANK SAMMET, Dalton, Mass., assignor to Crane & Company, Dalton, Mass., a Partnership. Filed Oct. 31, 1921. Serial No. 511,809. 25 Claims. (Cl. 92—40.)

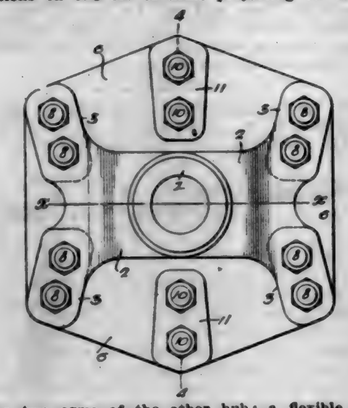


25. Paper, having diphenylamin sulphate incorporated therein.

1,535,863. SAFETY PAPER AND METHOD OF FORMING THE SAME. CHARLES FRANK SAMMET, Dalton, Mass., assignor to Crane & Company, Dalton, Mass., a Partnership. Filed Oct. 31, 1921. Serial No. 511,810. 6 Claims. (Cl. 91—67.95.)

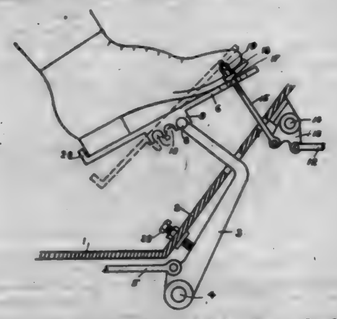
1. Paper, having applied thereon an ingredient composed of colorless insoluble "benzidine material."

4. The process of making paper safe against chemical erasure which comprises the application to the surface thereof of a colorless insoluble benzidine material.



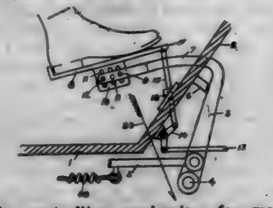
1,535,864. BOTTLE HOLDER FOR VACUUM JARS OR SIMILAR ARTICLES. GEORGE E. SAVAGE and LOUIS H. WILKINSON, Meriden, Conn., assignors to Manning, Bowman & Company, Meriden, Conn., a Corporation of Connecticut. Filed July 31, 1923. Serial No. 654,842. 10 Claims. (Cl. 215—13.)

1. A device for holding a bottle or similar article in a vacuum jar or similar container having, in combination, a receptacle provided with a bottom wall for containing and carrying ice for cooling the interior of said container, and a rack for receiving the article, the ice receptacle and rack being secured together so as to be removable as a unit from the container.



1,535,865. FLEXIBLE COUPLING. CARL A. SCHELL, Cleveland, Ohio, assignor to Thermoid Rubber Company, Hamilton Township, N. J., a Corporation of New Jersey. Filed Aug. 1, 1924. Serial No. 729,533. 3 Claims. (Cl. 64—96.)

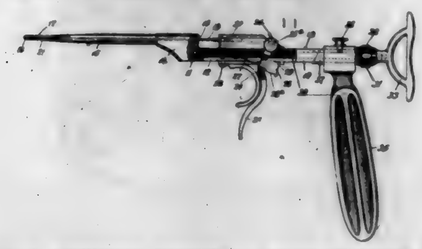
1. The combination in a flexible coupling, of two hubs, each hub having two arms, the arms of one hub being arranged at right angles to the arms of the other hub; extensions on one set of arms projecting on each side



of the two arms of the other hub; a flexible member located between the two sets of arms; and bolts securing the arms to the flexible member.

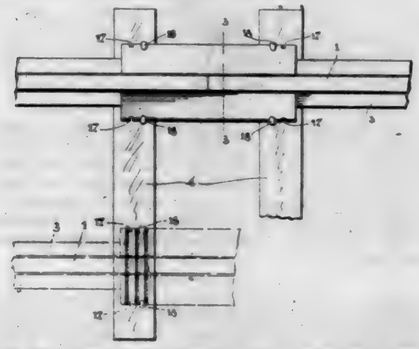
1,535,866. CONTROLLING MECHANISM FOR MOTOR VEHICLES. WILLARD T. SEARS, Montclair, N. J.; Mabel Helena Sears executrix of said Willard T. Sears, deceased. Filed Jan. 7, 1922. Serial No. 527,597. 3 Claims. (Cl. 74—81.)

1. The combination of a pedal having a fixed support allowing to said pedal a pivotal movement and a bodily movement, an accelerator connection operated by such pivotal movement, a brake lever standing in the path of the bodily movement of said pedal and means for adjusting the height of said pedal relative to its pivot to cause said pedal normally to stand in proper relation to said brake lever.



1,535,867. CONTROLLING MECHANISM FOR MOTOR VEHICLES. WILLARD T. SEARS, Montclair, N. J.; Mabel Helena Sears executrix of said Willard T. Sears, deceased. Filed Feb. 3, 1922, Serial No. 533,882. Renewed Nov. 29, 1924. 5 Claims. (Cl. 74—81.)

1. In the controlling mechanism for motor vehicles, the combination of a brake lever, a pedal pivoted on said brake lever, and an accelerator connection operated by

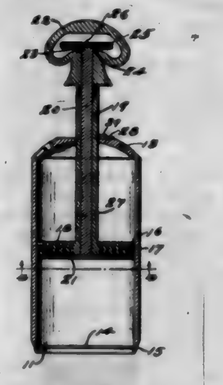


a tilting motion of said pedal about its pivot, the fulcrum of said brake lever occupying a forward position relative to said pedal such that the line of force due to the ordinary pressure of the foot on said pedal passes no farther forward than said fulcrum, or not materially farther forward than said fulcrum.

1,535,868. TONSILLOTOME. ABRAHAM J. SHEKTER, Huntington, N. Y. Filed Dec. 2, 1922. Serial No. 604,475. 3 Claims. (Cl. 128—320.)

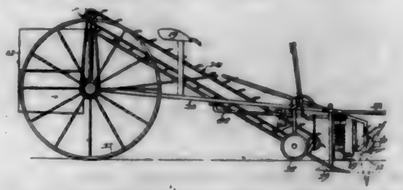
1. A tonsillotome comprising a carrier terminating at one end in a fenestra and having a smooth guide surface, a snare-wire movable relatively to the fenestra, a slide connected with said wire and slidable on said guide surface, a finger-piece connected with said slide and extending downwardly therefrom for slidably actuating the same to operate said snare-wire, a trigger pivotally connected with said slide and located rearwardly of said finger-piece in contiguous relation thereto, means operated by a rearward movement of said trigger for locking said slide in an adjusted position, mechanism for shifting said slide from said adjusted position when said means is in locked position and a grip connected with said carrier and extending therefrom in a direction at right angles to the plane of said fenestra.

1,535,869. RAIL-JOINT FASTENER. OSCAR SHELTON, Yorktown, Tex. Filed Apr. 21, 1924. Serial No. 707,987. 2 Claims. (Cl. 238—193.)



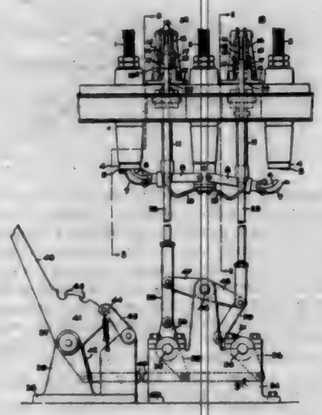
1. In a rail joint fastener, the combination with a pair of rails, of a pair of clamping members of substantial length positioned one on each side of said rails and each comprising a base, an inclined intermediate portion and a vertical upper portion, the longitudinal inner edge faces of said bases being vertical and abutting throughout beneath the rail clamped therebetween, a notched head formed longitudinally of the face of one of said bases and terminating inwardly of each end thereof, a resilient tongue formed longitudinally of the under side of the other base and terminating inwardly of each end and further adapted to receive and hold the notched head against the under side of the adjacent base, to retain said clamping members in position, and means for effecting a locking engagement between said upper portions and said rail.

1,535,870. PROCESS MOLDING PRESS TO MAKE MOLDS IN WAX AND OTHER SUBSTANCES FOR THE USE OF ELECTROTYPERS AND OTHERS. ANTHONY M. SOUKUP, Chicago, Ill. Filed May 5, 1924. Serial No. 711,098. 8 Claims. (Cl. 18—16.)



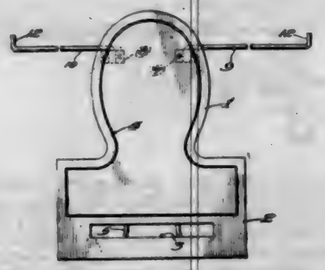
1. In a device of the type described, a base, opposed sides carried thereby, a plurality of parallel arms hingedly connected to the upper edge of one of said sides and resting, while in use, upon the upper edge of the other side, a feed screw threaded in each end portion of each arm, a gear fixed to each screw, and mechanical means operable to successively engage said gears for sequentially advancing said screws.

1,535,871. MEASURING AND FILLING DEVICE. EDWARD L. STAHLEY, Hammond, Ind., assignor of one-half to Fred. A. Sebenste, Hammond, Ind. Filed Oct. 18, 1923. Serial No. 669,342. 2 Claims. (Cl. 107—48.)



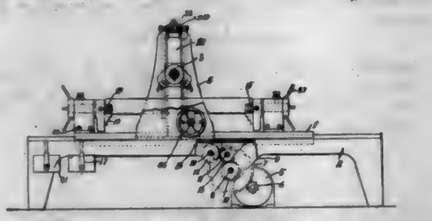
1. A dispensing device of the character described, comprising a cylindrical shell, a plunger movably mounted within said shell, a rod secured to said plunger, a knife blade positioned beneath said plunger, a second rod connected to said knife blade, a hand wheel attached to said second mentioned rod for revolving said knife blade, and a handle attached to said first mentioned rod for reciprocating said plunger in said shell, said handle and hand wheel being so arranged that the fingers of the operator's hand that grips said handle may be used to rotate said hand wheel.

1,535,872. BEET HARVESTER. JOHN T. STANAGE, Three Oaks, Mich. Filed Feb. 9, 1922. Serial No. 535,393. 1 Claim. (Cl. 55—107.)



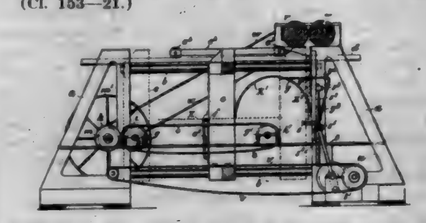
A beet harvesting apparatus having a wheel supported frame and beet heading means carried thereby and consisting of a blade, a follower carried by the frame and supporting the blade adjacent the surface of the soil traversed by the machine, a spring bearing upon the follower to maintain the blade at its lowermost position, a foot lever rockably mounted on the frame, and a stem carried by the follower and having a terminal flexible connection with the foot lever, whereby the follower and blade may be elevated upon depression of the foot lever.

1,535,873. ELECTRIC SWITCH. HARRY M. STEVENS, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 16, 1920. Serial No. 389,466. 6 Claims. (Cl. 200—50.)



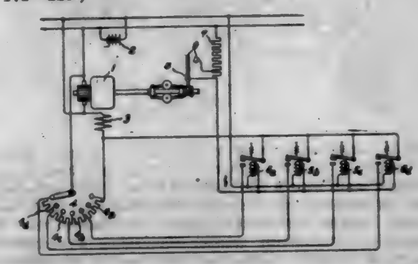
6. In an electric switch, the combination of two separate switch elements, separate actuating mechanisms for each element, means interconnecting said mechanisms comprising rotatable shafts, members for actuating said mechanisms in response to rotation of said shafts, arms secured to said shafts for rotating them, a reciprocating rod connecting said arms, and a common operating lever for moving said reciprocating rod in one direction to close one of said switch elements and in the opposite direction to close the other of said switch elements.

1,535,874. DISPLAY STAND FOR HOSIERY. NORMAN L. STEVENS, Bloomfield, N. J., assignor to The Meyercord Company, a Corporation of Illinois. Filed Aug. 21, 1924. Serial No. 733,311. 6 Claims. (Cl. 211—24.)



3. A device of the character described comprising a solid panel having a long transverse slot through the same, laterally-projecting arms on the panel above the slot, and means for supporting the panel in a more or less upright position, the parts being so proportioned and the slot being of such a height and width that one end of each of a plurality of stockings hung upon said arms may be passed through the slot from the rear of the panel and be exhibited in front of the panel.

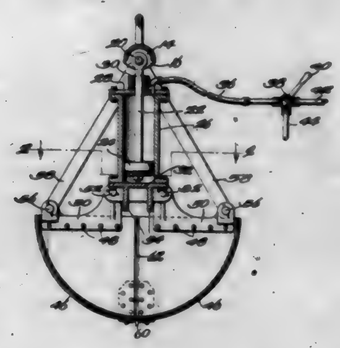
1,535,875. SPECIAL PLANER. JOHN BLAIR SUTTON, Pittsburgh, Pa., assignor to Sutton-Abramsen Engineering Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 21, 1920. Serial No. 375,470. 16 Claims. (Cl. 90—53.)



16. A machine for operating on the surface of metallic objects comprising a reciprocable work supporting carriage, a rotatable cutting head; a pair of oppositely faced gouging tools in said cutting head arranged to operate during alternate reciprocations of the carriage, and mounting and actuating means for said cutting head comprising a driving worm and hand operated actuating means therefor arranged to rotate the cutting head to force the tool into and remove it from the work on an arc and to hold the cutting head to cause the tool to exert a gouging action on the work on the carriage.

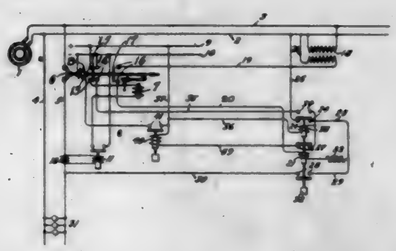
1,535,876. APPARATUS FOR USE IN THE MANUFACTURE OF TIN PLATES OR SHEETS. HUBERT SPENCE THOMAS, Llandaff, near Cardiff, and WILLIAM ROBERT DAVIES, Whitchurch, near Cardiff, Wales. Filed Mar. 23, 1922. Serial No. 546,145. 5 Claims. (Cl. 153—21.)

1. In a machine for use in the manufacture of tinplates, sheets or the like embodying means for mechanically conveying and feeding the plate or sheet to be folded into the machine, means for applying end pressure to the said plate or sheet so as to effect a folding thereof, and means for transferring the folded plate or sheet in preparation for a re-folding or subsequent operation.



1,535,877. REGULATING SYSTEM. LOUIS W. THOMPSON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 23, 1924. Serial No. 708,560. 5 Claims. (Cl. 171—229.)

1. A regulating system for maintaining constant the speed of a motor which is supplied from a variable voltage source comprising a resistor arranged so that

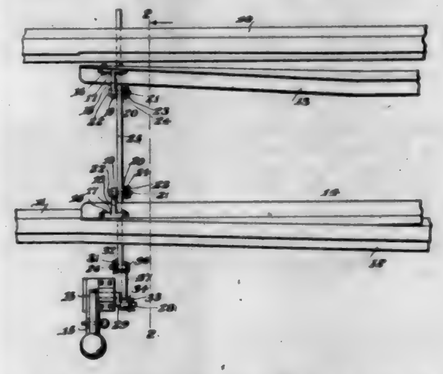


short-circuiting said resistor varies the excitation of said motor, a plurality of relays arranged to short circuit different portions of said resistor, each relay being connected across said source and being responsive to a different voltage, and means responsive to the speed of said motor for varying the voltage impressed on said relays.

1,535,878. GRAB BUCKET. JOHN S. TOWNSEND, Harvey, Ill., assignor to Whiting Corporation, Harvey, Ill., a Corporation of Illinois. Filed Mar. 17, 1924. Serial No. 699,633. 2 Claims. (Cl. 37—186.)

1. In a grab bucket device including a pair of pivoted load carrying members and a cylinder and piston mechanism for operating them, a block, and rods connecting said load carrying members and the piston of the cylinder and piston operating mechanism to said block whereby the device is suspended from the block, said block having an elongated semi-cylindrical recess formed in the under face thereof, partition lugs extending across said recess at spaced intervals, and a shaft engaged through said lugs to which the upper ends of all of said rods are connected.

1,535,879. ELECTRICAL SYSTEM OF CONTROL. OLIVER C. TRAVER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 22, 1920. Serial No. 367,734. 8 Claims. (Cl. 175—294.)

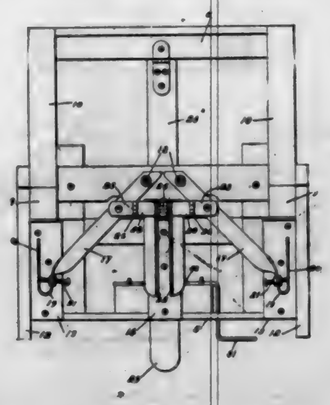


8. In combination with a load circuit, a main source of current, a circuit breaker connecting said load circuit and said main source and adapted to be opened automatically in response to abnormal conditions on said load circuit, means for automatically controlling the reclosing of said circuit breaker comprising an auxiliary source of current, electroresponsive means arranged to be energized by said auxiliary source when said circuit breaker opens to effect the connection of said auxiliary source across said load circuit, and means responsive to the current flow through said load circuit from said auxiliary source and operative to effect the closing of said circuit breaker when said current reaches a predetermined value.

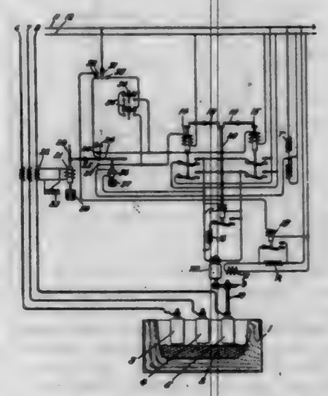
1,535,880. CHASSIS EXTENSION FOR AUTOMOBILES. ENNES L. WESTMORELAND, Ogden, Utah. Filed Mar. 29, 1924. Serial No. 702,830. 1 Claim. (Cl. 180—1.)

An automobile chassis having its side bars in front and rear sections, splice elements connecting said sections, a drive shaft extension including a housing connected to the engine and to the ordinary drive shaft housing, the latter drive shaft housing terminating substantially in line with the rear sections of the side bars, a cross plate connecting said rear sections adjacent their forward ends and also connecting said drive shaft housing and drive shaft extension housing, brace elements extending from said drive shaft extension housing to said cross plate, and a fuel-tank supporting means carried by said splice members.

1,535,881. RAILWAY SWITCH. GLEN WHITE, BURLEY WHITE, and CHARLES E. COUNTS, Henlawson, W. Va. Filed Feb. 5, 1925. Serial No. 7,091. 3 Claims. (Cl. 246—411.)



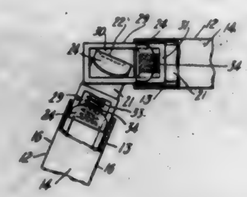
2. The combination with co-acting switch bars, of a bracket device attached to each of the switch bars and each bracket device formed with a laterally directed arm and each arm formed with downwardly directed and upwardly opening portion laterally apertured to receive a holding bolt, said downwardly directed portions adapted to receive and support a switch bar and the latter apertured to receive the holding bolts.



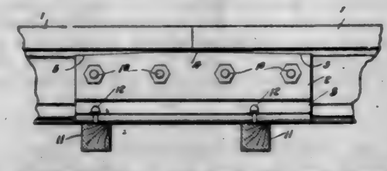
1,535,882. CRATE-MAKING MACHINE. HUGH H. WHITEHEAD, Palmetto, Fla. Filed Feb. 15, 1921. Serial No. 445,241. 1 Claim. (Cl. 144—295.)

A box forming machine including a frame, arms having pivotal connection with the frame and having jaws

at their outer ends, jaws mounted between the arms, hinge members for connecting the jaws mounted between the arms, and means having connection with the hinge members for moving the arms and jaws mounted between the arms simultaneously.

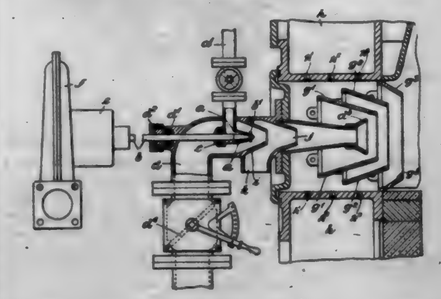


1,535,883. ELECTRIC-FURNACE CONTROL. HARRY A. WINNE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 23, 1921. Serial No. 517,401. 2 Claims. (Cl. 204—64.)



1. A regulating system for electric furnaces comprising in combination with an electrode, an energy supply source therefor, an electric motor for moving said electrode, electromagnetic means responsive to variations in the electrode circuit for controlling the movement of said electrode by said motor in two directions, a pair of resistance devices connected in series across said supply source, a second electromagnet mechanically connected to the first, and eletrical connections between one terminal of said second electromagnet and one terminal of said motor and between the other terminal of said second electromagnet and a point between said resistance devices, whereby said second electromagnet is energized to oppose the first upon movement of said electrode in either direction.

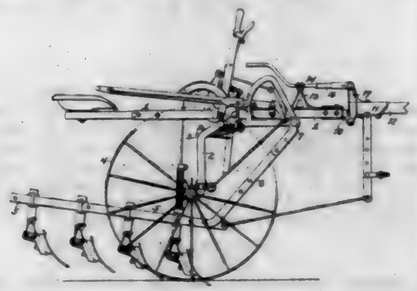
1,535,884. ORNAMENTAL CHAIN. HENRY WOLCOTT, Providence, R. I. Filed Oct. 27, 1924. Serial No. 746,004. 2 Claims. (Cl. 59—79.)



1. In an article of the type set forth, a series of exterior hollow casings, having open ends and provided with perforations, resilient carrier members mounted in the casings, projections on the carrier members registering in the perforations to lock the carriers, slidable links upon the carriers extending into adjacent shells adapted to engage the carriers therein, and springs supported by the links engaging the carriers.

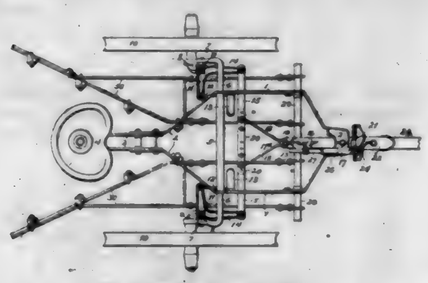
1,535,885. RAIL JOINT. HARVEY A. WREN, Navy Yard, S. C., assignor of forty one-hundredths to J. L. Paul, Johns Island, S. C. Filed June 3, 1924. Serial No. 717,598. 2 Claims. (Cl. 238—248.)

1. A fishplate for a rail joint, the same comprising vertical and horizontal members, the intermediate portion of the top edge of the vertical member being straight and the end portions sloping outwardly in opposite directions, and the intermediate portion of the horizontal member being hollow upon its bottom side.



1,535,886. LIQUID-FUEL BURNER OR ATOMIZER. CORNELIS ZULVER, London, England. Filed July 30, 1924. Serial No. 729,161. 10 Claims. (Cl. 110—22.)

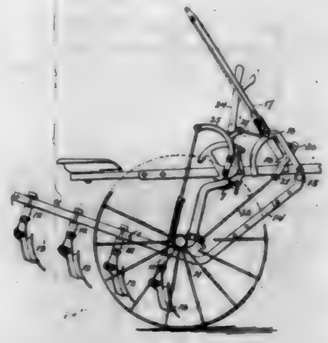
5. A fuel burner comprising an oil supply section and a solid fuel supply section, said oil section having mechanical atomizing means for atomizing the oil, an air pressure chamber surrounding said atomizer, an air and oil mixing chamber mounted forwardly of said atomizer, said mixing chamber having tapering walls, said solid fuel supply section comprising a supply pipe and a mixing chamber, said mixing chamber substantially enclos-



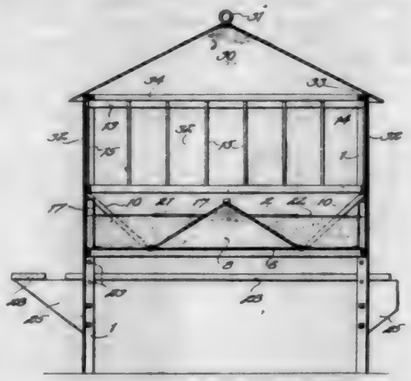
ing the tapering walls of said oil mixing chamber and adapted to mix the atomized oil with said solid fuel, and a series of air chambers for regulating the air admitted into the furnace.

1,535,887. WHEELED CULTIVATOR. RUDOLPH J. ALTGELT and HERMAN E. ALTGELT, South Bend, Ind., assignors to Oliver Chilled Plow Works, South Bend, Ind. Filed Aug. 8, 1922. Serial No. 580,451. 3 Claims. (Cl. 37—236.)

1. In a cultivator, the combination with a wheeled frame and cultivator gang frames connected therewith and carrying cultivator shovels, of a pole bracket having pivotal connection with the frame by a horizontal pivot, and screw adjusting devices between said pole bracket and a part connected with the cultivator frame for effecting relative movement of said cultivator frame and the pole bracket on said horizontal pivot.



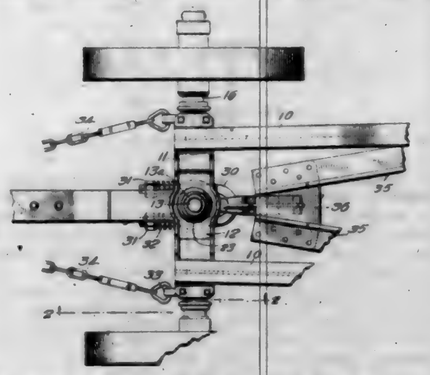
1,535,888. WHEELED CULTIVATOR. RUDOLPH J. ALTGELT and HERMAN E. ALTGELT, South Bend, Ind., assignors to Oliver Chilled Plow Works, South Bend, Ind. Filed Aug. 8, 1922. Serial No. 580,452. 3 Claims. (Cl. 97—181.)



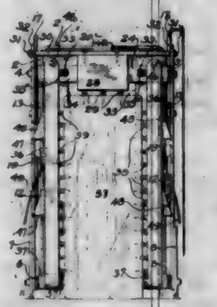
1. In a cultivator, the combination with a frame, cultivator gangs, pivot axles and carrying wheels, of a pole structure having connection with the frame by a vertical pivot, bell-cranks secured to said pivot axles, means connecting arms of said bell-cranks, means connecting said connecting means with the pivoted pole structure, and foot levers connected with other arms of said bell-cranks.

1,535,889. WHEELED CULTIVATOR. RUDOLPH J. ALTGELT, HERMAN E. ALTGELT, and CHARLES F. CUNNINGHAM, South Bend, Ind., assignors to Oliver Chilled Plow Works, South Bend, Ind. Filed Aug. 8, 1922. Serial No. 580,453. 5 Claims. (Cl. 97—148.)

1. In a cultivator, the combination with a wheeled frame and a plurality of cultivator gang frames, of a main lifting lever, secondary lifting levers, lifting connections between each secondary lifting lever and one of the gang frames, said lifting connections including a member pivoted to each secondary lever, connections between the main lifting lever and the said lifting connections, means for locking the main lifting lever, and locking segments for the secondary lifting levers, said locking segments fixedly secured to the wheeled frame.



1,535,890. POULTRY FEEDER. ELMER AMBORN, Bangor, Wis. Filed July 8, 1924. Serial No. 724,849. 7 Claims. (Cl. 119—59.)

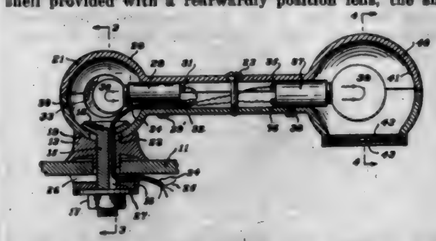


1. A poultry feeder including a body which is substantially square in plan having an open top and its bottom centrally formed with a frusto-pyramidal member, guards of wire mesh arranged between the sides of the frusto-pyramidal member and the sides and ends of the body and designed to rest on the feed when placed in the body and to gravitate on said feed when the latter is diminished, and vertically disposed guides in the body providing guides for the guards and permitting the swinging of the guards against the body when the feed is to be replenished.

1,535,891. DIRECT-DRAFT MECHANISM FOR ROAD GRADERS. FRANKLIN E. ARNDT, Galion, Ohio, assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio, a Corporation of Ohio. Filed Mar. 18, 1924. Serial No. 700,120. 18 Claims. (Cl. 280—33.44.)

1. In a road grader, a main frame, a front axle, a tongue and a draw bar, means for supporting the front end of the main frame on the axle comprising a vertically disposed sleeve, a king pin passing through the forward end of the main frame, through said sleeve and operatively engaging the axle at its lower end, means for engaging the tongue with opposite ends of the sleeve, and means for connecting the mold board draft device to the sleeve between the points of engagement of the tongue therewith.

1,535,892. ICE-CUTTING MACHINE. FREDERICK H. AUSTIN, Greeneville, Tenn. Filed July 14, 1923. Serial No. 651,635. 12 Claims. (Cl. 125—23.)



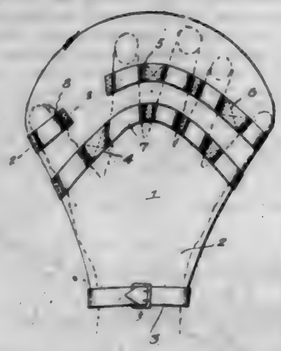
1. In a machine of the class described, a frame adapted to straddle a block of ice, severing elements arranged at the top and sides of the frame with the top cutting edge perpendicular to the side cutting edges, and means for moving all of said elements simultaneously toward the center of the machine to sever a block of ice positioned therein, while maintaining the perpendicular relation between said cutting edges.

1,535,893. PUMP VALVE. MARK BELCHER, Dalsetta, Tex. Filed May 27, 1924. Serial No. 716,104. 7 Claims. (Cl. 99—12.)

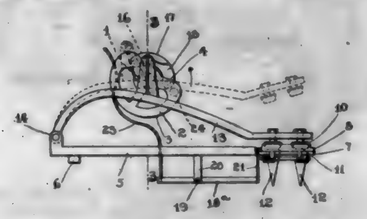
5. A process of forming valve discs for mud pumps comprising thoroughly seasoning the wood, soaking the discs for several hours in linseed oil, boiling the discs in equal parts of graphite and white lead mixed with oil, charring the outer surface of the discs and smoothing the lower surface.

1,535,894. SIDE-ILLUMINATING DEVICE FOR VEHICLES. REUBEN T. BIDDLE, Philadelphia, Pa. Filed Feb. 26, 1923. Serial No. 621,289. 2 Claims. (Cl. 240—7.)

2. In a side illuminating device for vehicles, a cylindrical sleeve, substantially spherical shell on each end of said sleeve, means engaging one of said shells for rotatably connecting the shell to a vehicle, said last named shell provided with a rearwardly position lens, the shell on the end of the sleeve remote from said last named shell having a downwardly position transparent lens and illuminating means within said shell.

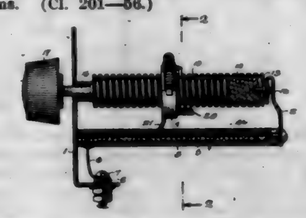


1,535,895. CARD-TABLE COVER. DAWSON J. BLACKMORE, Cincinnati, Ohio. Filed Sept. 17, 1923. Serial No. 663,050. 3 Claims. (Cl. 278—136.)



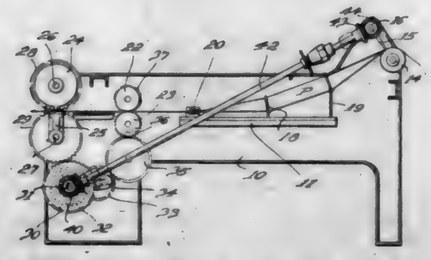
1. A table cover formed of paper, notched at each corner to define folding lines, marginal flaps, and a terminal tab for each flap, said tabs being gummed on their reverse side, and the obverse side of the sheet at each corner thereof having conventional scoring data.

1,535,896. SWIMMING GLOVE. JOHN BOCIEK, Chicago, Ill. Filed May 12, 1924. Serial No. 712,869. 1 Claim. (Cl. 9—21.)



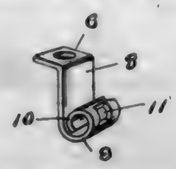
A swimming glove comprising a fan-shaped flexible body, an adjustable wrist strap connected to the smaller end of the body, spaced curved strips attached to the body by transverse rows of stitching arranged in spaced relation to form finger loops longitudinally of the strips, one of said strips being extended entirely across the body to form an individual loop for each of the fingers and thumb of the hand, the other strip being extended partially across the body to form loops for the fingers of the hand and an individual outer thumb sewed to the body and disposed in alignment with the thumb on the first mentioned strip.

1,535,897. APPARATUS FOR THE MANUFACTURE OF ICE-CREAM CONES. HARRY L. BOWDOIN, Long Island City, N. Y., assignor to Cone Company of America, Long Island City, N. Y., a Corporation of Delaware. Filed Apr. 17, 1922. Serial No. 553,764. 1 Claim. (Cl. 107—20.)



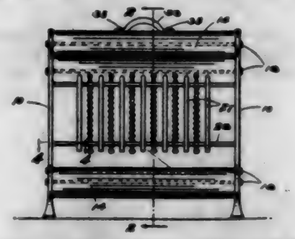
In an apparatus for the manufacture of ice cream cones, in combination, a cone support having an upper, movable portion, a chute to direct a falling cone to the support, a cutter, a cam, means actuated by a moving part of the apparatus to rotate the cam, means upon the cutter co-acting with the cam, for its operation, means for raising and lowering he movable portion of the cone support, to release a cone therefrom, and means upon the cam to operate said raising and lowering means.

1,535,898. RHEOSTAT. RAY MONTAGUE CAMP, Daytona, Fla. Filed June 28, 1923. Serial No. 647,360. 3 Claims. (Cl. 201—56.)



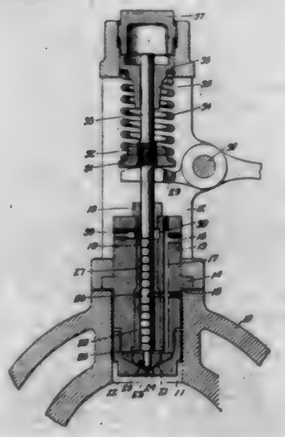
1. A rheostat including an insulating support having a spiral groove in its surface, a threaded conducting nut embracing said support, a conductor in said groove, a spring plate supporting and connected to the rear end of the support, and a stop on the nut to engage said plate when the nut has traveled a definite distance to the rear of the support whereby further movement of the nut will move the spring plate away from the support to break the connection therebetween.

1,535,899. ADJUSTING MECHANISM FOR BAG-TUBE CUTTERS. GEORGE T. TRUNDLE, Jr., Cleveland, and BURTON G. CARLSON, Cleveland Heights, Ohio. Filed Jan. 9, 1922. Serial No. 527,956. 6 Claims. (Cl. 93—33.)



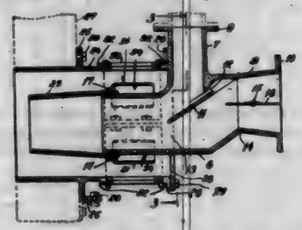
5. In a paper tube forming mechanism having a preliminary shearing mechanism and a final shearing mechanism, the combination of means for driving said shearing mechanisms including a connecting shaft parted intermediate said mechanisms and joined by adjustable coupling means whereby said shearing mechanisms may be adjusted to act upon the tube at different periods.

1,535,900. LOOM-SHUTTLE-THREAD GUIDE. NAPOLEON CARON, Nashua, N. H. Filed Feb. 9, 1924. Serial No. 691,778. 4 Claims. (Cl. 139—219.)



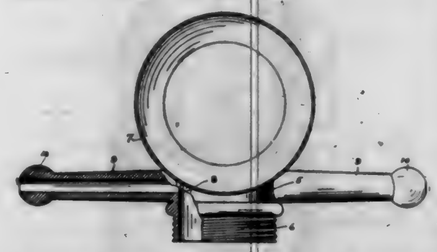
1. A thread guide for loom shuttles formed from a relatively short strip of metal having a straight side to be arranged against one of the side walls of the throat in the nose portion of the shuttle, and having its lower portion rounded and continued in elliptical formation against the bottom and opposite side wall of the throat, the inner wall of the elliptical portion of the guide being spaced from the straight side thereof and the terminal edge thereof being disposed approximately in a line with the longitudinal center of the first mentioned rounded portion but slightly spaced therefrom.

1,535,901. ELECTRIC HEATER. WALTER CLARK, Toronto, Ontario, Canada. Filed Dec. 31, 1923. Serial No. 683,733. 5 Claims. (Cl. 219—34.)



1. A heater of the character stated, including a body substantially C-shaped in vertical cross section formed of spaced plates; ends for said body; a heating element mounted forwardly of said body; and a guard disposed forwardly of said heating element.

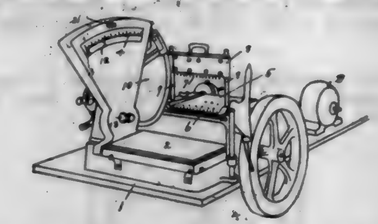
1,535,902. SPRAY VALVE. CLARENCE W. CLEMENTS, Jacksonville, Fla., assignor to Crankless Engine Company, Jacksonville, Fla., a Corporation of Florida. Filed Aug. 17, 1922. Serial No. 582,566. 3 Claims. (Cl. 299—133.)



2. In a spray valve for internal combustion engines, a cylindrical valve casing having an annular flange, a housing surrounding the casing and its flange and adapted to be secured to the engine, a valve in the casing having a central enlargement said casing having an inner bore divided by circumferential shoulders into parts of different diameter, bearing means interposed between the casing and the valve and comprising differential pressure chambers adjacent said shoulders, and a removable spray tip at the foot of the casing providing for the removal of the bearing means substantially as set forth.

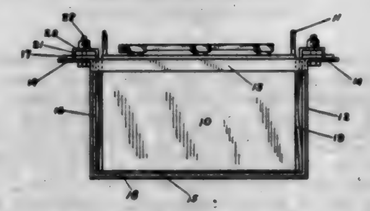
1,535,903. PULVERIZED-FUEL BURNER. HARRY RAYMOND COLLINS, Allentown, Pa., assignor to Fuller-Lehigh Company, a Corporation of Pennsylvania. Filed Mar. 14, 1922. Serial No. 543,603. 11 Claims. (Cl. 110—104.)

4. In a pulverized fuel burner, a mixing chamber, inlets for fuel and air thereto, and a deflector plate arranged to receive the fuel from the inlet therefor and to deflect it in the path of an air current for discharging fuel from the burner, the deflector being spaced from the walls of the chamber to provide passageways for a main fuel discharging current under the plate and an auxiliary current above the plate, and the chamber being flattened vertically and enlarged transversely so as to make the area of the passageway under the deflector plate substantially the same as the smallest area of the air inlet.



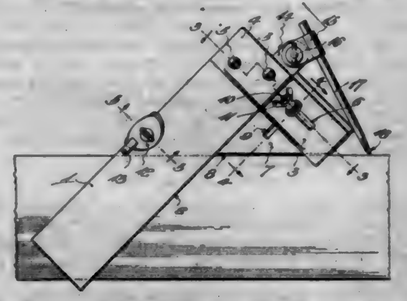
1,535,904. RADIATOR COOLER. ADDISON L. DANIELS, Sioux City, Iowa. Filed July 21, 1922. Serial No. 576,460. 1 Claim. (Cl. 257—25.)

A cooling device for a radiator having a threaded neck including an elbow tube adapted to be mounted in the threaded neck, laterally extending handle thereon for manipulating the elbow tube, the elbow having a forwardly-directed mouth, and the handles having eduction passages communicating with the interior of the elbow tube, the eduction passages being located substantially centrally fore and aft of the elbow tube, whereby a current of air may follow a path into the elbow tube, along the back thereof, and from the tube along the sides thereof to the eduction passages.



1,535,905. CUTTING AND WEIGHING MACHINE. JACOB DASHEW, Baltimore, Md. Filed Sept. 22, 1924. Serial No. 739,046. 2 Claims. (Cl. 249—62.)

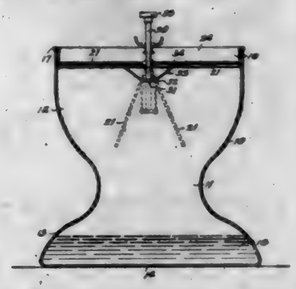
1. A cutting and weighing machine comprising a cutting blade, means for operating the cutting blade, a platform on which the material falls when cut, an adjustable finger to indicate the amount to be cut, an index



finger operated by said platform, and means whereby when the index finger coincides with the adjustable finger the cutting will be automatically stopped.

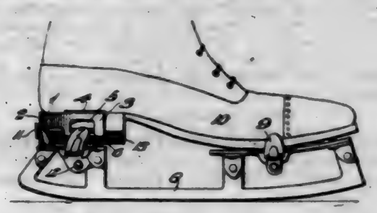
1,535,906. BATTERY HOLDDOWN. HARLEY J. DAVOLL, Lincoln, Nebr. Filed July 12, 1924. Serial No. 725,751. 1 Claim. (Cl. 180—68.5.)

A battery hold-down which is adapted to clamp a battery container to its support, said battery hold-down comprising a frame which is adapted to be secured to the support in fixed and spaced apart relation to one of the sides of the battery container, said frame being vertically positioned and having an outwardly projecting ear at its upper extremity, said ear being provided with a transverse groove in its upper surface, a clamping member positioned loosely between said support and the battery container, the lower extremity of said clamping member being held fixed relative to said support, an outwardly projecting ear at the upper extremity of said clamping member, said last named ear overlying the ear of said support and having a downwardly projecting tongue which is adapted to engage the groove in the upper surface of the first named ear, and means for drawing said two ears together to thereby cause buckling of the intermediate portion of said clamping member.



1,535,907. RAFTER-CUT-MARKING TOOL. FRANKLIN JOSEPH DESHLER, Santa Ana, Calif. Filed Oct. 18, 1923. Serial No. 669,352. 6 Claims. (Cl. 33—90.)

1. A rafter cut marking tool comprising a blade provided with a marking edge, a pair of rigid converging arms extending from one end of said blade and having

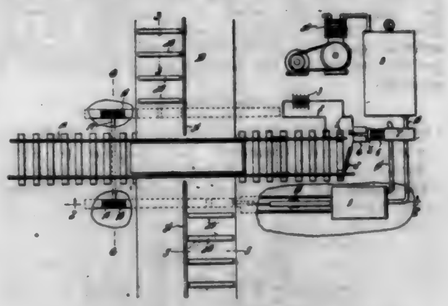


flat sides in planes oblique to the sides of said blade, and flat wings held against said flat sides of said arms and having marking edges extending obliquely to the marking edge of said blade for marking rafter edges.

1,535,908. SMOKER'S RECEPTACLE. JOHN A. DOLAN, Hempstead, N. Y. Filed May 16, 1923. Serial No. 639,381. 3 Claims. (Cl. 131—51.)

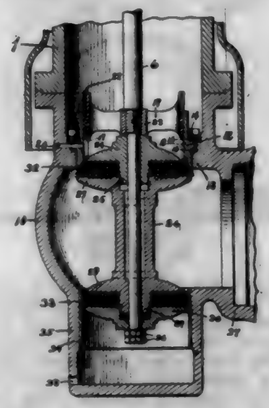
1. A smoker's receptacle comprising a substantially cup shaped body within the lower end of which a liquid dousing medium is contained, a tray member removably fitted within the upper open end and constituting an initial receiver for smoking refuse, said tray member comprising an annular wall having a marginal outwardly projecting bead at its upper end, a transverse pivot shaft carried by the lower end of the annular wall, a pair of semi-circular bottom wall sections hingedly connected to the pivot shaft, said pivot shaft having a central upstanding apertured bearing, a vertical plunger shaft mounted in said bearing, a linked connection between the undersides of the bottom wall sections and the lower end of the plunger shaft and springs carried by the pivot shaft and connected with said bottom wall sections for normally moving the same to a horizontal plane to define the bottom of the initial receiver.

1,535,909. SKATE CLAMP. JOHN C. EBBELS, Jr., Haddon Heights, N. J. Filed Mar. 28, 1922. Serial No. 547,372. 2 Claims. (Cl. 46—50.)



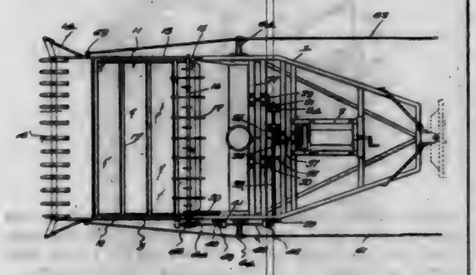
1. An auxiliary skate clamp comprising a narrow flexible band, the forward end of each side of which terminates in an enlarged part provided near its upper portion with an inwardly extending flange and with an aperture beneath said flange to accommodate a skate clamping jaw and also forming a shoulder adapted to co-operate with said clamping jaw.

1,535,910. ALLOY. CHARLES T. EVANS, Titusville, Pa., assignor to Cyclops Steel Company, New York, N. Y., a Corporation of New York. Filed Oct. 3, 1919, Serial No. 328,336. Renewed Aug. 8, 1924. 6 Claims. (Cl. 75—1.)



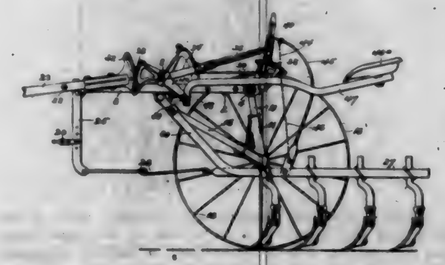
1. An alloy having the characteristics of steel and comprising iron, and silicon and zirconium, the combined percentage of silicon and zirconium being not less than 2% nor more than about 2.6%.

1,535,911. CROSSING PROTECTING DEVICE. EDWARD P. FARRELL, Malvern, Ohio. Filed Aug. 6, 1923. Serial No. 655,985. 1 Claim. (Cl. 246—128.)



A safety appliance for a railroad crossing comprising a plurality of barriers arranged at each side of the crossing, shafts arranged under the barriers for operating the same, eccentric means connecting the shafts with the barriers, pinions on the shafts, rack bars engaging the pinions, a shaft and pinions thereon for communicating the movement of one rack bar to the other, a cylinder, a piston therein connected with one of the rack bars, a receptacle containing fluid under pressure, a pipe connecting the same with the cylinder, a sliding valve for controlling the passage of fluid through the pipe, an armature connected with the valve, a magnet associated with the armature, an electric circuit connected with the magnet and means for completing the same by a train approaching a crossing.

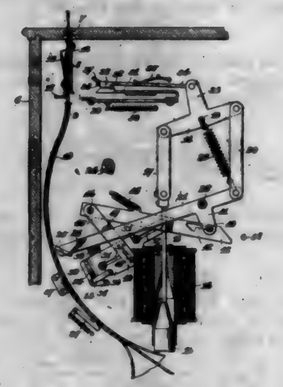
1,535,912. HYDRANT VALVE. JOHN W. FLOWER, Detroit, Mich., assignor, by mesne assignments, to Michigan Valve Foundry and Engineering Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 31, 1921, Serial No. 457,251. Renewed Oct. 18, 1923. 2 Claims. (Cl. 137—13.)



1. In a hydrant, the combination of a body and a valve chamber connected to the lower end thereof, a valve seat in said chamber, an upright valve stem central with the valve seat, a guide for the stem slidable in the valve seat, said valve chamber having a cylindrical downward extension in alinement with the valve stem, a spool mounted on the valve stem and having a flange at each end, a disk on the stem at each end of the spool, a conical valve at the upper end of the spool between the flange and disk adapted to engage the valve seat and a piston on the stem at the lower end of the spool between the flange and disk adapted to slide in said cylindrical extension of the valve chamber, said chamber having an inlet between the valve seat and cylindrical extension and a vent in said extension.

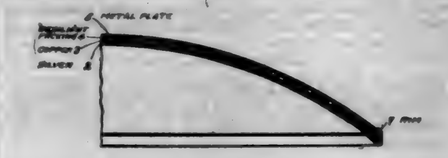
1,535,913. SNOWPLOW. FRED L. FULCER and RAYMOND J. RITGER, Hortonville, Wis. Filed Apr. 4, 1924. Serial No. 704,177. 3 Claims. (Cl. 37—42.)

1. A snow plow comprising a frame, a hopper mounted thereon, ejectors mounted in the hopper for removing the snow therefrom, an inclined elevator arranged to deliver the snow into the hopper, cutters located in advance of the elevator, and beaters located above the delivery end of the elevator and the receiving edge of the hopper, and adapted to reduce the volume of snow which is elevated by the elevator into strips as it passes into the hopper.



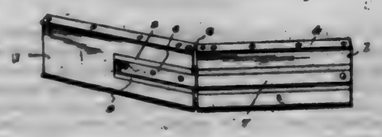
1,535,914. WHEELED CULTIVATOR. ARTHUR D. GALLAGHER, South Bend, Ind., assignor to Oliver Chilled Plow Works, South Bend, Ind. Filed July 21, 1921. Serial No. 486,417. 13 Claims. (Cl. 97—148.)

1. In a cultivator, the combination with a wheeled frame, a cultivator gang pivotally connected therewith, a pole, and a horizontal pivot connection between the forward portion of the frame and the pole forwardly of the rear end of the latter, of a lever mounted on the frame, connections between said lever and the cultivator gang, and power transmitting means between said lever and the rear end of the pole.



2. In a cultivator, the combination with a wheeled frame, a cultivator gang pivotally connected therewith, a pole, and a horizontal pivot connection between the forward portion of the frame and the pole forwardly of the rear end of the latter, of a lever mounted on the frame, connections between said lever and the cultivator gang, power transmitting means between the lever and the rear end of the pole, a seat, supporting rails for said seat fulcrumed on the rear portion of the frame, and connections between the forward portions of said seat rails and said lever.

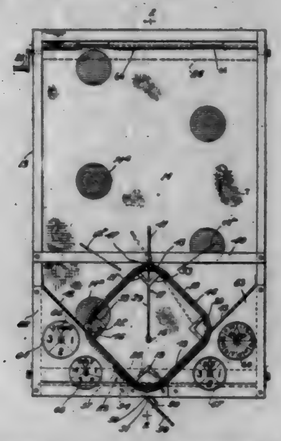
1,535,915. DISPENSING MACHINE. PHILIP GANZ, New York, N. Y. Filed June 8, 1924. Serial No. 717,626. 18 Claims. (Cl. 101—69.)



1. In a check dispensing machine, a check feeding mechanism, means controlled by the act of removal of a check from the machine for operating said feeding mechanism, and means actuated by the operation of said feeding mechanism for printing a check.

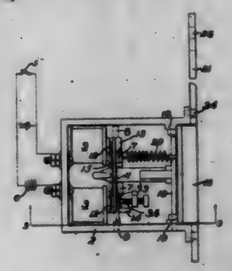
1,535,916. METAL MIRROR. CROMWELL A. B. HALVORSON, Jr., Lynn, Mass., assignor to General Electric Company, a Corporation of New York. Filed Feb. 28, 1924. Serial No. 695,867. 3 Claims. (Cl. 88—1.)

1. A mirror consisting of a metallic reflecting surface formed upon and lifted from a matrix, a reinforcing member of suitable material deposited upon the back of the reflecting surface, a metallic protecting cover secured to the back of the mirror with a resilient packing between the cover and the deposited metal.



1,535,917. PAPER-HANGER'S FOLDING STRAIGHT-EDGE. CLARENCE W. HARBIN, Los Angeles, Calif. Filed Dec. 21, 1920. Serial No. 432,310. 1 Claim. (Cl. 33—75.)

A folding straightedge comprising two sections having bodies fitting together end to end and having front and back faces, hinges secured to the back faces of the meeting ends, wearing strips secured to the edges of the bodies and extending beyond the front faces, there being a recess formed in the front face of one body and extending from the meeting end and a second recess formed in the front face of the other body and extending the full length, a locking bar slidably mounted in the re-

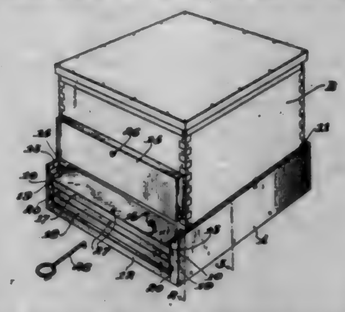


cesses and retaining strips fastened to the bodies to hold the locking bar in place so that the locking bar may be moved into the long recess out of use and the rule folded and moved across the meeting line when the rule is straightened to hold the rule straight.

1,535,918. BASEBALL GAME DEVICE. RUDOLPH HOFFMAN, Kankakee, Ill. Filed Dec. 8, 1920. Serial No. 429,050. 20 Claims. (Cl. 46—61.)

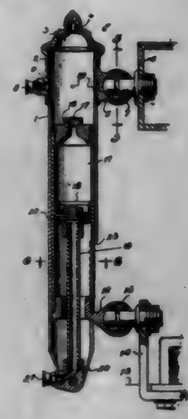
1. A baseball game device comprising in combination, a movable field, means for impelling a ball onto said field, a frame fixedly mounted above said movable field to provide a definite path for a runner, means for causing a runner to move along said path, and means operable to position the ball substantially in the line of travel of the runner.

1,535,919. DOOR-RELEASE MECHANISM. JAMES W. IRWIN and ERVAN L. MCDONALD, San Francisco, Calif. Filed Dec. 17, 1923. Serial No. 681,056. 22 Claims. (Cl. 70—52.)



1. In a door release mechanism, a pivoted tumbler, a stop for blocking the movement of said tumbler and comprising a pivoted bar disposed tangentially to the arc of movement of said tumbler, an armature pivoted coaxially with said stop and adapted to swing the stop out of the path of said tumbler, and magnetic devices for actuating said armature.

1,535,920. BEEHIVE ATTACHMENT. MEGOMICH M. JONIAN, Chelsea, Mass. Filed Oct. 6, 1924. Serial No. 742,043. 6 Claims. (Cl. 6—1.)

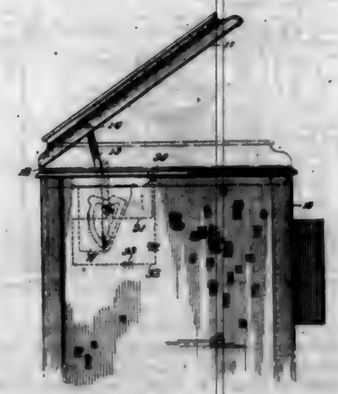


1. The combination with a bee hive, of a base proportioned to support the hive, a plurality of boards slidably removable from said base, and a closure for the bee entrance adapted to co-act with any of said boards to form a complete closure.

5. A base for a bee hive comprising spaced side walls provided with corresponding horizontal grooves, a cushioning member in the vertical bottom of said grooves, a board proportioned to be inserted between the side walls,

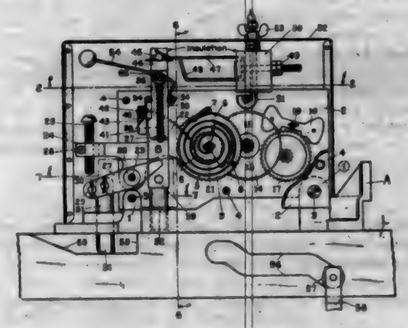
rollers carried by the board proportioned to roll in said grooves with their perimeters in contact with the cushions, and cushioning disks attached to the rollers positioned to engage the horizontal sides of the grooves.

1,535,921. SHOCK ABSORBER. CELESTIN LAMPER, Elyria, Ohio. Filed Aug. 25, 1922. Serial No. 584,816. 1 Claim. (Cl. 188—88.)



A shock absorber comprising a cylinder open at its lower end and provided with a pair of divergent arms and also having a longitudinal slot, a casting supported between the arms and provided with a lubricant passage, a tubular piston rod supported by the casting and arranged within the cylinder and having communication with the lubricant passage, means for supplying lubricant to said passage, a second cylinder slidable within the first mentioned cylinder and provided with a bleed opening at its upper end, an arm extending laterally from the lower end of the last mentioned cylinder and disposed between the walls of the slot and adapted to be operatively connected with part of an automobile suspension spring, and means carried by the upper end of the first mentioned cylinder for connecting the same to a rigid part of an automobile.

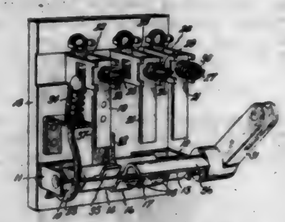
1,535,922. TALKING-MACHINE LIGHT SWITCH. OSCAR LARSEN, Brooklyn, N. Y. Filed Jan. 22, 1921. Serial No. 439,164. 4 Claims. (Cl. 200—54.)



1. An attachment for talking machines comprising a plate having a substantially horizontal groove therein, the lower wall of the groove being recessed, a support

of insulated material received in the lower portion of said recess, a pair of spring contact fingers mounted on said support and having their terminals extended into the upper portion of the recess to form a continuation

of the walls of the recess, a brace member for attachment to the lid of the talking machine, and a projection carried by said brace member and adapted to ride on the lower wall of the groove and the contact fingers in making and breaking the circuit.

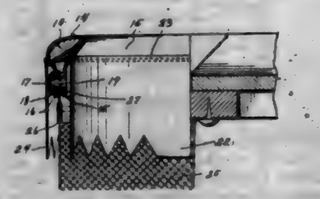


1,535,923. MECHANICAL TIME RELEASE. RICHARD C. LEAKE, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y., a Corporation of New York. Filed Feb. 10, 1920. Serial No. 357,939. 5 Claims. (Cl. 246—161.)

1. In a time release mechanism of the character described, the combination with a lever, a vertically movable locking bolt actuated by said lever and adapted to prevent movement of said lever in one direction in a predetermined position thereof, and circuit controlling means automatically opened and closed in correspondence with the movement of said bolt to its locking and unlocking positions.

1,535,924. ELECTRIC SWITCH. GEORGE S. LEDDICK, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed July 9, 1924. Serial No. 725,079. 5 Claims. (Cl. 200—6.)

1. An electric switch mechanism comprising a plurality of movable contact fingers, a relatively movable bridging member operable into overlapping contact with each of said fingers to interconnect the same, the relative length of overlapping contact with one of said fingers being less than with the other fingers whereby continued operation of said member effects the disengagement of said one finger and maintains contact with said

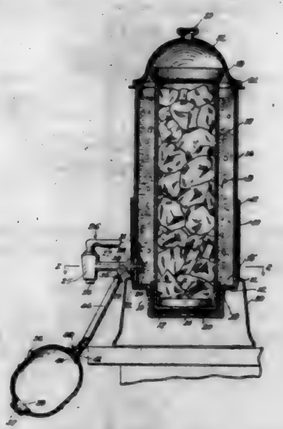


other fingers, and means for preventing electrical contact with said one finger upon the return movement of said member.

1,535,925. FIGURE TOY. ARTHUR LEE, New York, N. Y., assignor of one-half to Rudolph A. Shirek, New York, N. Y. Filed Oct. 25, 1922. Serial No. 596,821. 1 Claim. (Cl. 46—40.)

An amusement device comprising an outlined head member having plane parallel opposite side surfaces, pieces representing features appropriate of the head member, said feature pieces being outlined by edges and having plane parallel opposite side surfaces, the feature pieces being applicable to the surface of the head member in parallel planes, the obverse surfaces of the feature pieces bearing representations of characteristic organisms so positioned upon the pieces as to present expression of emotion variable as the feature pieces are turned in their positions upon the head member.

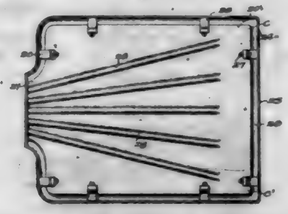
1,535,926. POOL-TABLE POCKET. ANTHONY LEONE, Greensburg, Pa. Filed Mar. 10, 1923. Serial No. 624,201. 3 Claims. (Cl. 218—12.)



1. A pool table pocket including a pocket iron, a casing enclosing and fitting the pocket iron and formed to provide opposite depending margins having coacting fastening members and the pocket proper having a marginal band insertible between the margins of the casing and having apertures through which the snap fastener members engage.

1,535,927. BEVERAGE COOLER. CARROL A. LOOK, Los Angeles, Calif. Filed July 9, 1924. Serial No. 724,975. 10 Claims. (Cl. 225—40.)

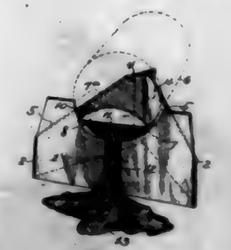
2. A beverage container comprising an outer receptacle, an inner receptacle disposed within said outer receptacle, a resilient member mounted upon the top edge of the outer receptacle, said resilient member having depending



flanges gripping the sides of the outer receptacle so as to maintain it thereon and a cover adapted to rest upon said resilient member and cover both receptacles.

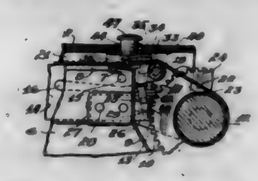
8. In a beverage container, an outer receptacle having a bottom in which is formed a depression, said depression being adapted to receive and to be substantially occupied by an inner receptacle.

9. A beverage container comprising an outer receptacle having a depression formed in its bottom, an inner receptacle having its bottom extend into and substantially occupy said depression, and a stand for the container, said stand presenting substantially flat top surfaces engaging the underside of the bottom of the outer receptacle and having an aperture therein adapted to receive the projection formed upon the bottom of the outer receptacle in providing said depression.



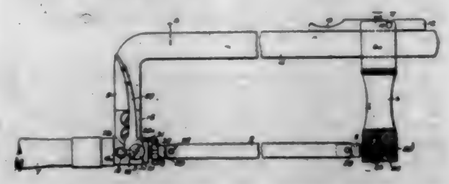
1,535,928. DRAIN TABLE. DORR F. LOUDON, New York, N. Y. Filed Aug. 15, 1923. Serial No. 657,642. 2 Claims. (Cl. 141—11.)

2. A removable drain board for wash tubs, comprising a body having a raised rim portion from which project downwardly extending flanges, forming with the raised rim portion a groove in the under face of the board, and a plurality of buffer blocks detachably secured to the flanges of the board, each block having on its upper face a shoulder forming a projection fitting in the groove of the board and having the outer portion of its lower face curved to fit upon a rolled rim of the wash tub to hold the said board thereon.



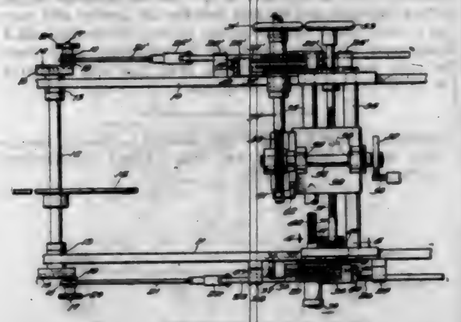
1,535,929. DISPLAY STAND. HOMER WILLIAM LUDWIG, Pittsburgh, Pa. Filed Oct. 15, 1923. Serial No. 668,684. 4 Claims. (Cl. 211—24.)

4. A display stand comprising a front and supporting means, said front having a recess to receive a container, a member united to the front at the intermediate portion only of said recess, said member being made to simulate a turned-up portion of the head of a container and material in the container, the intermediate front portion of the stand being pictured to simulate flowing material,



and an irregularly shaped member at the lower edge of the front and simulating a quantity of discharged material.

1,535,930. FILM-SPOOL-LOCKING DEVICE. MOTT W. MACDONALD, Bay View, Irondequoit, N. Y., assignor of one-fourth to Albert F. Hettig, one-fourth to Osborne F. Gurney, and one-fourth to Carl Gordon Samuelson, all of the Rochester, N. Y. Filed June 5, 1922. Serial No. 566,066. 9 Claims. (Cl. 95—31.)

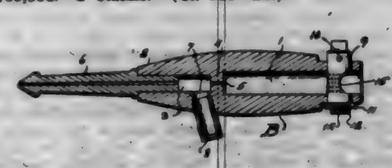


1. In a camera, a supporting frame, a roll film and backing strip movable across the frame, said backing strip having a plurality of regularly spaced apertures, means for locking the film and backing strip against movement, and a detent normally riding on the backing strip with a relatively spring tension, such detent adapted to be received in said apertures and by engagement with the wall of an aperture to effect actuation of the locking means through a slight continued movement of the backing strip.

1,535,931. HACK SAW. ALFRED FRED MACRINI, New York, N. Y. Filed Mar. 3, 1923. Serial No. 622,623. 5 Claims. (Cl. 145—34.)

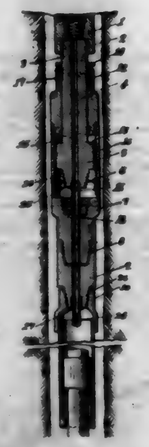
1. In a saw having a frame, including a main bar, a handle unit capable of being attached to the frame, said handle unit having a bore therein, a slidable rod in said bore, a spring in the bore back of the rod tending to force it out of the bore, the handle unit having a slot, a pin on the rod extending through said slot, a roller on the end of said pin, and a cam member pivotally attached to the outer surface of the handle unit, a portion of said cam member engaging the roller whereby the position of the rod within the bore can be regulated.

1,535,932. INDEX AND CROSS FEED MECHANISM. JOSEPH G. MANNING, Chicago, Ill. Filed June 23, 1924. Serial No. 721,649. 8 Claims. (Cl. 90—21.)



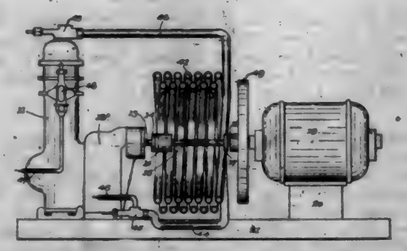
1. In an index and cross feed mechanism, operating means therefor comprising, in combination an index shaft, a cross feed shaft, a common drive shaft, a pair of reciprocable bars each connected adjustably therewith, and connections from one reciprocating bar to the cross feed shaft and other connections from the other reciprocating bar to the index shaft, each of said connections including a double pawl device wherein one pawl only at a time is operated, but wherein a predetermined movement range is obtained by operation of the other pawl, substantially as described.

1,535,933. SOLDERING IRON. JOHN MARINOS, New York, N. Y., assignor of one-half to Milton W. Emmett, Seattle, Wash. Filed May 27, 1924. Serial No. 716,184. 2 Claims. (Cl. 219—26.)



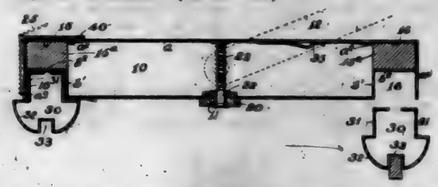
1. A soldering iron comprising a heating element, a hollow tip removably connected to the heating element, said tip comprising a chamber for solder, a handle connected to the heating element, a rod projecting through the heating element and into the handle and functioning the valve to control the escape of solder through the orifice, a cam on the rod and a member projecting outside of the handle and engaging the cam within the handle to move the rod longitudinally.

1,535,934. SMOKING PIPE. JAMES HUGH MCFADDEN, Farmer, S. Dak. Filed Sept. 23, 1924. Serial No. 739,834. 2 Claims. (Cl. 131—22.)



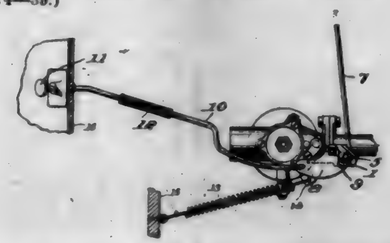
1. As a new article of manufacture, a smoking pipe comprising an elongated body having a bore disposed axially therethrough, a partition intersecting said bore dividing the body into a bowl and a stem, said partition having an opening therethrough communicating with such bowl and stem, a mouth piece engageable with the stem portion of the body, and a rotatable plug disposed through the body adjacent to the outer portion of the bowl and intersecting said bowl, the portion of the plug within the bowl having a recess thereacross to permit filling of the bowl when the plug is in one position.

1,535,935. ROTARY JAR. ANTHONY E. MCLEAN and JOHN M. SPRAGUE, Fullerton, Calif. Filed Dec. 13, 1923. Serial No. 680,443. 16 Claims. (Cl. 255—27.)



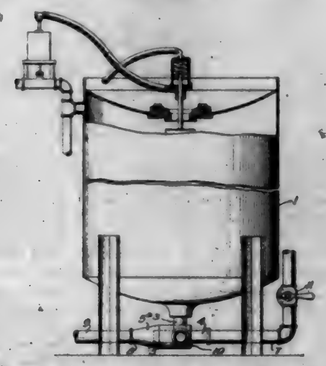
12. In a rotary jar, a shaft carrying a head provided with a thread adapted to engage a box to rotate the same and with a cam surface adapted to engage an anvil to jar the same.

1,535,936. COMPRESSOR UNIT. WILLIAM D. MERCER, Detroit, Mich., assignor, by mesne assignments, to Kelvinator Corporation, Detroit, Mich., a Corporation of Michigan. Filed Oct. 2, 1923. Serial No. 666,066. 4 Claims. (Cl. 62—116.)



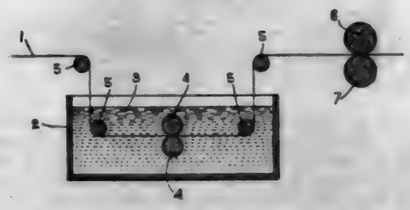
1. In combination, a compressor adapted to be inserted in a refrigerating system to compress the refrigerant, a motor adapted to drive said compressor and spaced from said compressor, a normally rigid shaft drive connecting said motor to said compressor, a fan also operated by said drive and at a point intermediate said motor and said compressor, a cylindrical condensing coil also adapted to be inserted in said refrigerating system and positioned between said motor and said compressor about said drive in the path of the current set up by said fan, and means interposed in said drive intermediate said fan and said compressor arranged to yield upon abnormal resistance to operation of said compressor to permit said motor and said fan to continue operating under such conditions without operating said compressor.

1,535,937. FLOOR-WAXING DEVICE. JAMES H. MILLHOLLAND, Philadelphia, Pa., assignor to John S. Clement Company, Inc., Philadelphia, Pa., a Corporation of Delaware. Filed Feb. 24, 1925. Serial No. 11,174. 8 Claims. (Cl. 91—30.)



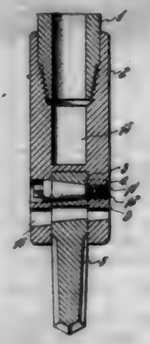
3. In a floor waxing device comprising a container having a bottom wall provided with an intermediate discharge outlet, and an open bottom endwise extension forming an applicator-receiving pocket; a hollow-formed sheet-material applicator device having a pocket engaging portion with yieldingly spaced walls, and a distributor-portion depending below the container bottom and formed with a pad-receiving groove.

1,535,938. CARBURETOR ATTACHMENT. ITSON MOODY, Pontiac, Mich. Filed Feb. 12, 1923, Serial No. 618,597. Renewed Oct. 6, 1924. 3 Claims. (Cl. 74—39.)



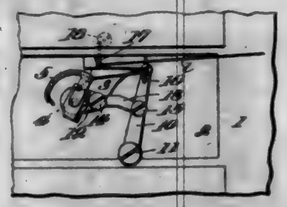
1. An attachment of the class described comprising a plate connected with the throttle valve of a carburetor, means for connecting said plate with the hand lever, a second plate pivotally secured to the first plate and having a shoulder thereon engaging the first plate and a foot pedal connected with the second plate.

1,535,939. SAND-BLAST-FEEDING MACHINE. RAYMOND H. MOORE, Chicago, Ill., assignor to The American Foundry Equipment Company, New York, N. Y., a Corporation of Ohio. Filed July 3, 1922. Serial No. 572,452. 1 Claim. (Cl. 51—12.)



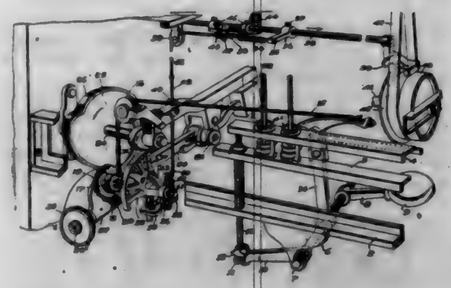
In sand blast apparatus, the combination of a supply tank, a sand outlet pipe extending downwardly from said tank, a horizontal sand and air pipe of like dimension connected with said downwardly extending pipe and receiving sand therefrom, said horizontal pipe having an open end portion projecting beyond said downwardly extending pipe sufficiently to prevent sand from falling out of the open end of said portion by gravity and having a compressed air connection of like dimension, and a compressed air pipe arranged to withdraw sand from the open end of said horizontal sand pipe and discharge the same for sand blast purposes.

1,535,940. PAPER PRODUCT. KIRKE L. MOSES, Brookline, Mass. Filed Mar. 14, 1924. Serial No. 699,279. 6 Claims. (Cl. 92—70.)



4. The process of producing a paper product which consists in wetting with a water-carrying solution a web or sheet of paper material having rubber incorporated therein and then passing the wet web or sheet between presser rolls operating at different surface speeds.

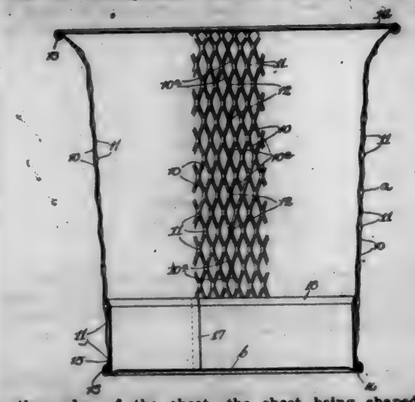
1,535,941. DRILL COLLAR. GEORGE S. MYERS, Electra, Tex. Filed Oct. 16, 1923. Serial No. 668,921. 1 Claim. (Cl. 279—97.)



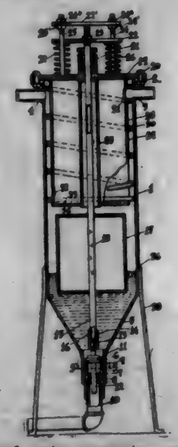
In combination with a drill bit and collar, said collar having a socket in its lower end, for receiving the shank of the bit, said shank having a tapered hole therein and the collar having a threaded small hole and a large hole for registering with the tapered hole, a pin having a tapered part engaging the tapered hole in the shank with its head of cylindrical shape for engaging the large hole and having its small end threaded to engage the threaded hole, a spring in said threaded hole engaging the threaded end of the pin, a plug closing the threaded hole and also engaging the spring and a wrench receiving part on the head of the pin arranged in the large hole.

1,535,942. LOOPER-THREAD CONTROLLER FOR SEWING MACHINES. LANSING ONDERDONK, New York, N. Y., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 27, 1922. Serial No. 603,504. 2 Claims. (Cl. 112—241.)

1. The combination with a looper carrier mounted to oscillate back and forth, a looper mounted in said carrier, means for imparting oscillations to said looper carrier and giving an extended dwell thereto at the forward end of the stroke of the looper, an arm projecting from the carrier, a thread controlling lever mounted at one side of the looper to oscillate in a plane parallel with the plane of oscillation of the looper, a link connecting said thread controlling lever with the arm of the looper carrier, said arm and link being so disposed as to move into alinement when the point of the looper is entering or leaving the needle thread loop.



1,535,943. BUILDER MECHANISM FOR WINDING MACHINES. CHARLIE A. PAYNE, Dalton, Ga., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Jan. 12, 1923, Serial No. 612,267. Renewed Nov. 15, 1924. 21 Claims. (Cl. 242—43.7.)

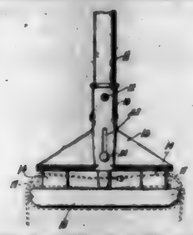


1. In a builder mechanism for yarn winding machines, the combination of a builder cam and builder arm, yarn guiding means connected to the builder arm, a bunch builder cam, a bunch builder segment mounted on the builder arm, and a segment controller rendered effective when the machine is stopped and the builder arm is lowered for moving the builder segment into operative relation with the builder cam for automatically winding a bunch when the machine is again started.

1,535,944. METAL BASKET. HENRY W. A. PRANGE, Chicago, Ill., assignor to Northwestern Expanded Metal Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 29, 1923. Serial No. 628,496. 4 Claims. (Cl. 220—19.)

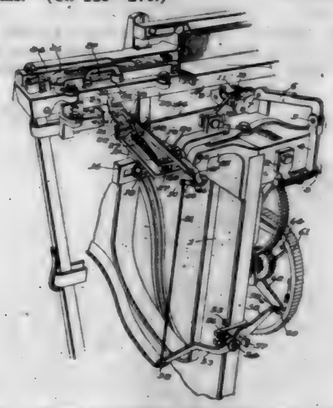
1. A basket body comprising a sheet of expanded metal having diamond-shaped meshes with the outer side corners of the meshes at one edge of the sheet in line with the corresponding corners of the meshes at the other edge of the sheet, the sheet being shaped into basket form and the meeting corners of the meshes welded together.

1,535,945. STEAM AND WATER SEPARATOR. ARTHUR L. PROUT and ADRAIN R. REYNOLDS, Long Beach, Calif. Filed June 19, 1924. Serial No. 720,914. 9 Claims. (Cl. 183—42.)



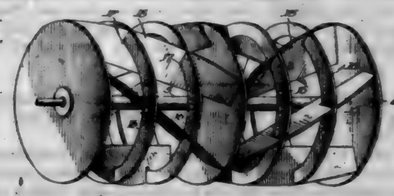
1. A steam and water separator comprising a cylinder vertically mounted and having an inlet nipple near the top at one side and an outlet nipple near the top at the other side, a cap closing the upper end of the cylinder, means mounted in the upper part of the cylinder adapted to separate the water from steam passing in at one nipple and out at the other, a valve at the bottom of the cylinder, a stem extending upwardly from the valve through the cap, a float upon the stem in the lower part of the cylinder, the stem being hollow and there being perforations within the float leading to the hollow so that steam or water in the float may blow out of the upper end of the stem.

1,535,946. MOP HEAD. WARREN RAWALT, Hot Springs, Ark. Filed Apr. 11, 1924. Serial No. 705,941. 1 Claim. (Cl. 15—228.)



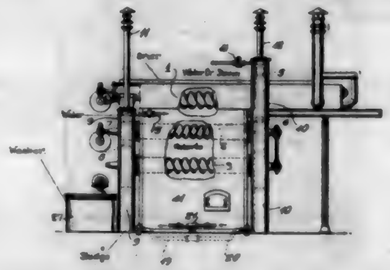
A mop head including a handle socket, reinforcing webs projecting from the opposite sides thereof, projections depending from the lower edges of said webs, a bar supported by the projections and arranged in spaced parallel relation with said webs, and about which the mopping cloth is adapted to be arranged, an elastic clo-

ment adapted to surround said projections and hold the cloth detachably associated therewith and with said bar, and a normally projected spring pressed pin arranged to slide within said socket, and having its lower end bi-



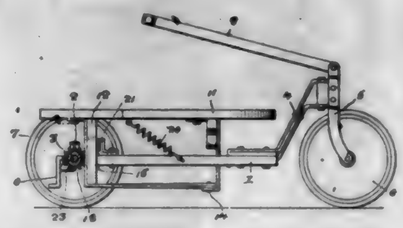
furcated to receive the adjacent edges of said cloth to assist in holding the latter associated with the mop head, said pin normally engaging the said bar at a point between said projections.

1,535,947. FEELER MECHANISM FOR LOOMS. ALONZO E. RHOADES, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Feb. 14, 1924. Serial No. 692,856. 10 Claims. (Cl. 139—270.)



1. In a feeler mechanism for looms, the combination of a feeler, a pivotal detent mounted for movement of its pivotal point towards and from the front of the loom for moving the feeler frontwardly out of cooperative relation with the filling and holding it at rest for a period of time and then releasing it to the performance of its feeling function, and means for operating the detent that the feeler may have periods of activity and be moved into a position of inactivity at intervals during weaving with the same supply of filling in the shuttle.

1,535,948. SAND CUTTER OR MIXER. ELMER A. RICH, Jr., Chicago, Ill., assignor to The American Foundry Equipment Company, New York, N. Y., a Corporation of Ohio. Filed Dec. 29, 1923. Serial No. 683,492. 6 Claims. (Cl. 22—69.)

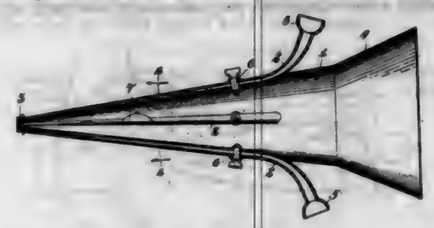


6. A cutting device for sand cutting machines comprising a rotary cylinder having rotary cutting blades and rings encircling the cylinder and crossing the blades.

1,535,949. APPARATUS FOR DRYING, BURNING, AND RECOVERING FINELY-DIVIDED MATERIALS. JOHAN NICOLAAS ADOLF SAUER, Amsterdam, Netherlands. Filed May 26, 1923. Serial No. 641,775. 1 Claim. (Cl. 252—3.)

Apparatus for the continuous drying and heating of finely divided material and especially suitable for reviving spent decolorizing carbon, kieselguhr, fuller's earth and the like adsorbents, comprising a plurality of drying and "burning" retorts, mechanical means for moving solid material through said retorts, and condensation and dust collecting apparatus, which condensation and dust collecting apparatus, which condensation and dust collecting apparatus is composed of a plurality of units, each of which is independently connected with the said retorts by short wide conduits not directly exposed to the heating medium, which conduits are capable of being cleaned from the outside, said condensing apparatus being provided with at least two receiving tanks for the solid material recovered in said condensing apparatus, said tanks communicating with each other, one of said tanks being closed by a water seal and serving for directly receiving said solid material, said other tank being provided with means for removing the treated material.

1,535,950. VEHICLE. EDWARD J. SCHRAMEK, Saginaw, Mich. Filed Sept. 29, 1924. Serial No. 740,647. 6 Claims. (Cl. 208—38.)



1. A vehicle of the class described comprising a wheeled frame, a platform tiltably supported on the frame, racks connected with the platform and rack wheels connected with some of the wheels of the vehicle whereby the rocking movement of the platform will rotate the wheels and means for moving the platform to a position where the racks will be out of engagement with the rack wheels and means for preventing the platform being rocked when in this position.

1,535,951. LOUD SPEAKER. LOUIS SCHWARTZ, Brooklyn, N. Y. Filed Mar. 25, 1924. Serial No. 701,791. 2 Claims. (Cl. 181—27.)

1. A device of the character described, comprising a main horn, auxiliary horns extending along the side wall

of the main horn and having their inlet ends in the same plane, said auxiliary horns integral throughout the

greater portion of their length with the main horn and at their outlet ends diverging from the main horn.

1,535,952. POLISHING COMPOSITION. JAKOB SCHWARZKOPF, Elmshorn, Germany. Filed Oct. 28, 1924. Serial No. 746,400. 2 Claims. (Cl. 134—24.)

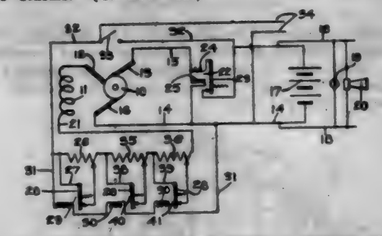
1. A polish made of wax and wax-like substances, for polishing leather, linoleum, wood and the like, including a solvent and the ingredient "coffee wax," as set forth.

1,535,953. CARBON REMOVER. IRA J. SHIPMAN, Midwest, Wyo. Filed Mar. 25, 1924. Serial No. 701,868. 2 Claims. (Cl. 87—5.)

2. A carbon remover consisting of about 65% of tallow, about 32% of sulphur and about 3% of alcohol.

1,535,954. LUNCH BOX. EDWARD P. SMITH, Pittston, Pa. Filed Apr. 3, 1924. Serial No. 704,037. 2 Claims. (Cl. 206—4.)

1. A lunch box comprising a box-like body member having an open side and a closed side, a box-like cover member having a closed side an open side, said cover member having a central longitudinal partition defining between the closed side and said partition a liquid receptacle provided at one end with a filling nozzle and a closure element therefor, the open sided portion of the cover member adapted to telescopically receive the open side of the body member to define a compartment for the reception of solid foods, the said latter compartment being adjustable in size whereby to increase and decrease the capacity thereof by relative telescopic adjustments of the sections.



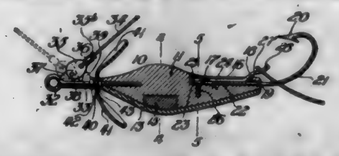
1,535,955. BRUSH AND THE LIKE. LEE SNYDER and CLARENCE SMITH, Freeport, Ill., assignors to John H. Northbridge, Freeport, Ill. Filed Aug. 10, 1922. Serial No. 580,830. 2 Claims. (Cl. 15—128.)

1. As a new article of manufacture a brush comprising in combination a handle unit having a suitable hand grip, a head at one end thereof, there being a longitudinally extending bore, through the hand grip and head, a hose connection at the other end in communication with said bore, there being a central recess reaching inwardly into the head and having a floor lying at right angles to the axis of the handle, there being a socket reaching into the head at each end of said floor and at right angles thereto, a spray tube threaded onto the head and extending longitudinally therefrom and in communication with the bore of the handle unit and provided with a series of side spray orifices, and a U-shaped twisted bristle holder of generally oval shape and having the ends of its wires brought relatively close together and into parallelism and adapted to reach directly into the floor sockets, a wedge block adapted to

seat into the recess of the handle unit and against the end portions of the wires of the bristle unit, and means for clamping the wedge block into said recess comprising a nut threaded onto the spray nozzle and against the wedge block, substantially as described.

1,535,956. ELECTRIC LIGHTING AND STARTING SYSTEM FOR MOTOR VEHICLES. FRANKLIN WESLEY STRINGER, Minneapolis, Minn. Filed Mar. 22, 1917, Serial No. 156,759. Renewed July 3, 1923. 39 Claims. (Cl. 290—41.)

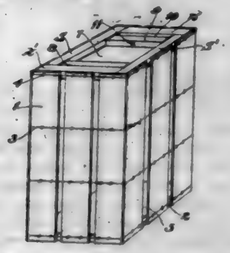
1. An electrical system comprising a third-brush generator having a field coil, a battery, means for connecting the field coil with the third brush and the battery so that the field coil receive at starting a separate exciting current from the battery through a portion of the armature winding of the generator, and means for reducing the charging current when the charging voltage reaches a predetermined point.



11. An electrical system comprising a third brush generator having an armature and field coil, a battery, a line connecting said armature and battery, an ignition system, a circuit connecting the field coil and ignition system with the third brush and one side of the line, a circuit connected with said last-named circuit at a point intermediate the ignition system and field coil and with the opposite side of the line, a switch in the last-named circuit, a relay connected across said line and rendered operative when the charging voltage reaches a predetermined point, and means actuated by said relay for reducing the charging current of said generator.

32. In an electric lighting and starting system for motor vehicles, the combination with a third brush generator operating with a falling current-speed characteristic and having a shunt field winding only, of a battery, means for connecting said generator to said battery, a resistance, and means responsive to a characteristic of

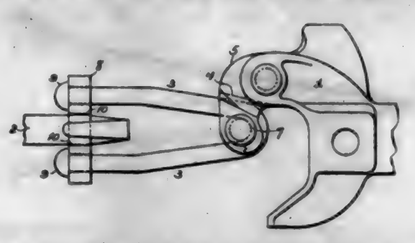
the battery energy supplied by said generator to said battery for inserting said resistance in the circuit of said field winding.



35. In an electric lighting and starting system for motor vehicles, a battery, a vehicle lamps, means for supply current of at least two different current-speed characteristics to said battery and said lamps and maintaining said battery at substantially full-charge voltage during the operation of said vehicle whereby said lamps are supplied in parallel with a charging battery while said supplying means is operating, on either characteristic, comprising a generator of the third brush type having a shunt field winding, a resistance, and means for inserting said resistance in said field winding in response to a predetermined full-charge voltage and for removing said resistance in response to a voltage not lower than that corresponding to a substantially fully-charged state.

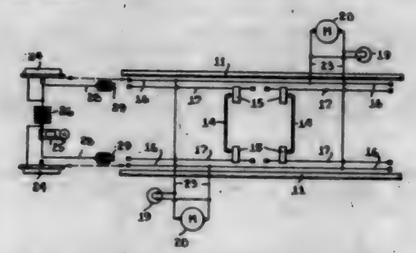
1,535,957. ARTIFICIAL BAIT. WILLIAM STANLEY and CHARLES J. STANLEY, Chicago, Ill. Filed Dec. 18, 1922. Serial No. 607,507. 12 Claims. (Cl. 43—39.)

1. In a fish bait, the combination of a plug configured to resemble a minnow body, a spinner having a rearwardly extending obliquely disposed blade overlying the forward end of the plug and swivelly mounted in advance of the plug, weed guard prongs pivoted in advance of the spinner and normally extending rearwardly and outwardly over the spinner and plug, and a stop member for limiting the rearward swing of the prongs to prevent interference of the spinner, substantially as described.



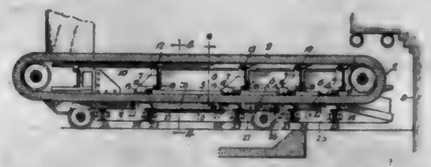
1,535,958. BOX AND METHOD OF MAKING THE SAME. ROSCOE STEELE, Rockaway, N. J., assignor to Wirebounds Patents Company, a Corporation of Maine. Filed July 13, 1920. Serial No. 395,838. 16 Claims. (Cl. 217—12.)

1. In a wirebound box having a cleat frame outlining the top thereof and so arranged that the top surface of no cleat of said frame is below the bottom surface of any other cleat of said frame, a removable section adapted to be inserted within said cleat frame without the box and, when shifted, to rest at a plurality of its extremities against the inner face of said cleat frame, and detechable means to hold said removable section in shifted position.



1,535,959. CAR-COUPLING DEVICE. HARRY WALTER STREITBACH, Columbus, Ohio, assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Original application filed Mar. 22, 1923, Serial No. 626,934. Divided and this application filed Nov. 5, 1923. Serial No. 672,886. 3 Claims. (Cl. 213—118.)

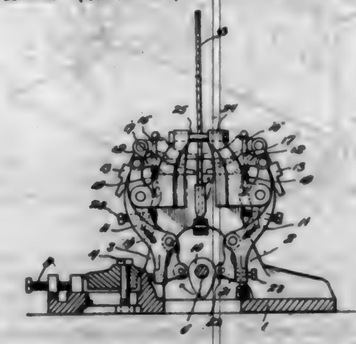
1. In a device of the class described, the combination of a hook coupler, an automatic coupler including a knuckle and a pin mounted vertically in the free end portion of the knuckle, the knuckle having a horizontal recess across which the pin passes, a U-bolt fitted slid-



ably in said recess and about the pin, and a yoke slidably fitted on the U-bolt and engaged through the hook coupler and with the sides of the said coupler.

1,535,960. SIGNALING DEVICE FOR RAILWAYS. VINCENT J. STEWART, Jacksonville, Fla., assignor of one-fifth to S. P. Livingston, Jacksonville, Fla. Filed Oct. 9, 1924. Serial No. 742,681. 4 Claims. (Cl. 246—125.)

1. An electric signaling system comprising, in combination, a track, railway rolling stock on said track, a signaling device carried by said rolling stock, a source of electrical energy carried by said rolling stock, a bridge associated with said track said bridge being normally maintained in elevated position and adapted to be depressed for closing the circuit through said signaling device, substantially as set forth.

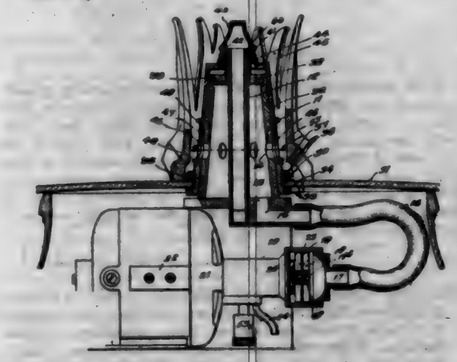


1,535,961. FURNACE STOKER. ARTHUR P. STRONG, Chicago, Ill., assignor to Green Engineering Company, East Chicago, Ind., a Corporation of Illinois. Filed Apr. 17, 1922. Serial No. 554,136. 8 Claims. (Cl. 110—40.)

1. In a furnace stoker, the combination with an endless chain grate having upper and lower leads, of transverse partitions dividing the space between said leads into a plurality of draft compartments, and air sealing means for the compartments along the upper and lower edges of said partitions, the lower sealing means consisting of a row of shoes for each partition and resting on the lower lead, and sealing plates between the shoes and their respective partitions, said plates having pivotal connections with said shoes and partitions.

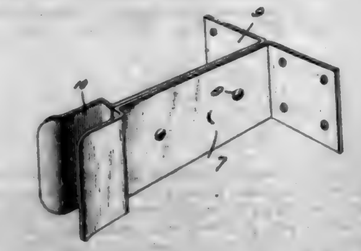
8. In combination in a furnace stoker, an endless chain grate having upper and lower leads, and means beneath the lower lead for supporting the same, said means consisting of connected longitudinal and transverse metal members with chambers between them for the collection of droppage through the lower lead to present a bearing floor for the lower lead of metal and droppage.

1,535,962. SAW SET. EDWARD VERNON SUMMERELL, Norfolk, Va. Filed May 24, 1924. Serial No. 715,033. 3 Claims. (Cl. 76—61.)



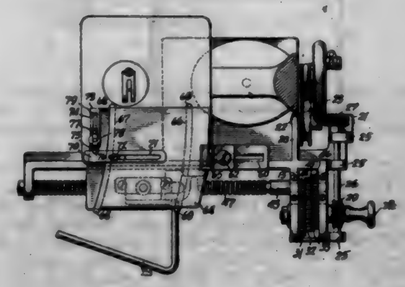
1. A saw-set comprising a base having a knee fixed thereon, a knee adjustably mounted upon the base, levers pivoted upon the knees, dogs pivoted upon the levers and guided along the upper portions of the knees, said dogs provided on their upper edges with notches, catch members provided with shoulders engageable with the notches of the dogs, springs attached to the ends of the catch members and to the levers, a shaft journaled upon the base between the levers, and a cam mounted upon the shaft and adapted to swing the levers as the shaft is turned.

1,535,963. ACCELERATOR FOR RUBBER VULCANIZATION. WELLINGTON LEE TANNER, Cleveland, Ohio, assignor to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 29, 1924. Serial No. 728,961. 10 Claims. (Cl. 18—53.)



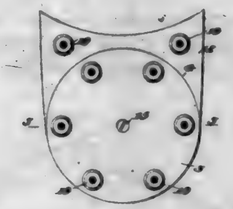
1. Process which comprises vulcanizing rubber in the presence of a halogenated alkylamine.

1,535,964. FOUNTAIN. ARTHUR J. TISLEY, Brooklyn, N. Y., assignor to Edwd. F. Caldwell & Co., Inc., New York, N. Y., a Corporation of New York. Filed Apr. 17, 1923. Serial No. 632,718. 4 Claims. (Cl. 299—7.)



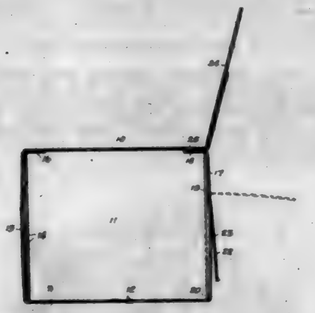
1. In a fountain a hollow member having means by which it may be secured to a bowl at an opening therein and provided with an inlet and a shoulder, a support having a vertically extending portion disposed within the hollow member and having an inlet at the first mentioned inlet and a threaded portion, an outlet extending upwardly from the support within its vertically extending portion and a nozzle having a thread meshing with the thread on the vertically extending portion which may be moved in the direction of the shoulder.

1,535,965. HAYRACK. EDVARD TOBIAS, Prescott, Wis. Filed Mar. 8, 1924. Serial No. 696,558. 1 Claim. (Cl. 296—9.)



In a hay rack, a spacing member adapted for disposition between a stake and a sill, said member comprising a pair of duplicate plates having their intermediate portions secured together, corresponding ends of said plates being bent laterally in opposite directions to provide attaching flanges, the opposite ends of the plates being bent laterally in opposite directions and then outwardly in spaced parallelism to provide a socket for reception of the stake, the extremities of the last named ends of the plates being flared to facilitate a connection with the stake.

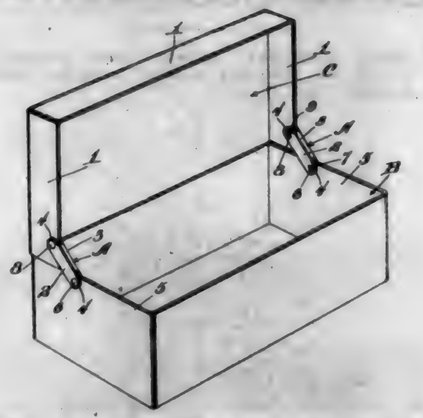
1,535,966. FEEDING DEVICE FOR PRODUCING SPIRAL STITCHES. BORIS TUCKER, Brooklyn, N. Y., assignor of one-half to Samuel Greenstein, Brooklyn, N. Y. Filed Aug. 5, 1921. Serial No. 490,060. 6 Claims. (Cl. 112—2.)



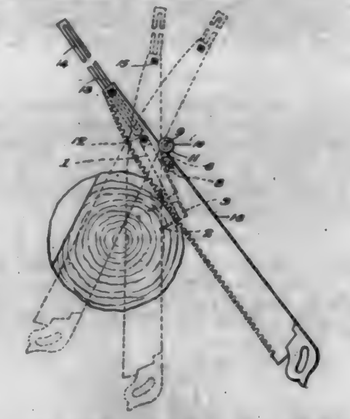
1. In a feeding device for producing spiral stitches, a frame adapted to be secured to the frame of a sewing machine, a shaft journaled in a bearing in the first frame, means for rotating the shaft adapted to be engaged by a moving part of the sewing machine, a second shaft, means by which the second shaft is adapted to be rotated by the first shaft, a third shaft having a thread, a plurality of gears of different diameters secured to one of the last two mentioned shafts, a plurality of gears of different diameters meshing with the first gears and mounted on the other of the said last two mentioned shafts, selective means to secure a predetermined gear of the last mentioned gears to the shaft on which it is mounted and a work holder having a tooth for engaging the thread on said third shaft.

1,535,967. RUBBER HEEL FOR FOOTWEAR. JESSE WEBB TURNER, Brownsville, Pa. Filed Aug. 21, 1924. Serial No. 733,420. 5 Claims. (Cl. 36—39.)

1. A heel for footwear comprising a main fixed member, a rotatable disk-like tread, a circular under-cut guideway and a circularly arranged series of headed studs or pins guided in said guideway and said studs and guideway adjustably and rotatably connecting said main and rotatable tread members.



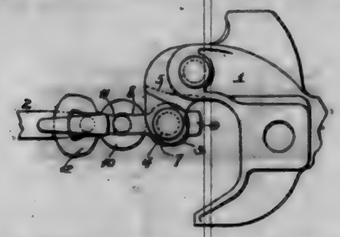
1,535,968. DISPLAY CARTON. RAYMOND VAN IDERSTINE, Glen Ridge, N. J. Filed Mar. 27, 1923. Serial No. 628,082. 4 Claims. (Cl. 206—44.)



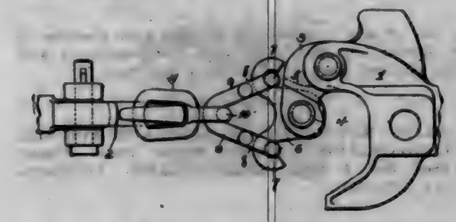
1. An advertising and display carton, comprising a box-like body having completely closed front, top, side and bottom walls, adapted to present surfaces for receiving and displaying advertising indicia relative to the contents, the rear wall having a dispensing opening for removing and vending the goods contained thereby, a closure flap normally closing said opening whereby the goods is housed and protected against handling or theft, and a combined display flap and supplemental covering for the rear wall adapted to respectively project upwardly and rearwardly when in display position and to cover the rear wall for retaining the closure flap in closed position.

1,535,969. BOX ATTACHMENT. HENRY J. VETTER, New York, N. Y. Filed Oct. 6, 1924. Serial No. 741,877. 4 Claims. (Cl. 217—60.)

1. The combination with a box body and a hinged cover therefor, a margin of the cover having a flange adapted to overlie a wall of the box body when the cover is in closed position; a member substantially U-shaped in cross section and adapted to straddle the upper marginal portion of said wall of the box body from above, means for pivotally connecting an end portion of said member to such wall, the opposite end portion of the member being provided with spaced ears to receive therebetween the flange of the box cover when the box cover is in open position.



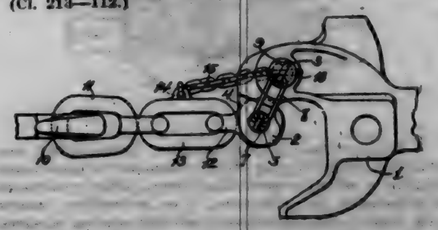
1,535,970. TREE-SAWING APPARATUS. DELL WELCH, Loreau, Mont. Filed Sept. 8, 1923. Serial No. 661,645. 2 Claims. (Cl. 143—163.)



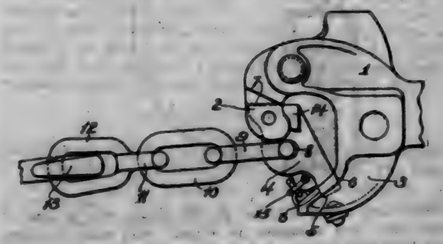
1. In a tree sawing apparatus, a body having spikes to be forced into a tree to be cut, a roller on the body, a spring influencing the roller away from the body, means for adjusting the spring with respect to the body, a slotted saw support pivotally secured to the outer end of the body, and said support designed to provide a rest for a saw which is provided with a pin that is received through the slot of said support, as and for the purpose set forth.

1,535,971. CAR-COUPLING DEVICE. JOHN CLIFFORD WHITRIDGE, GEORGE TEWKESBURY JOHNSON, and HARRY HAMILTON WOLFE, Columbus, Ohio, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Filed Nov. 5, 1923. Serial No. 672,855. 4 Claims. (Cl. 213—112.)

1. In a device of the class described, the combination of an automatic coupler including a knuckle, and a vertical pin in the free end portion of the knuckle, the free end of the knuckle having a horizontal notch therein, an element fitting within said notch and about said pin, a hook coupler, and connections between said element and the hook coupler permitting relative pivotal movement of the same, said connection having a part disposed behind the notch in the knuckle.

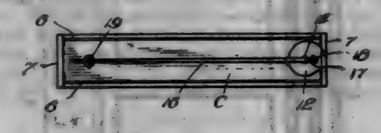


1,535,972. CAR-COUPLING DEVICE. JOHN CLIFFORD WHITRIDGE, GEORGE TEWKESBURY JOHNSON, and HARRY HAMILTON WOLFE, Columbus, Ohio, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Original application filed Mar. 22, 1923, Serial No. 626,934. Divided and this application filed Nov. 5, 1923. Serial No. 672,856. 3 Claims. (Cl. 213—112.)



1. In a device of the class described, the combination of an automatic coupler including a knuckle, and a vertical pin in the free end portion of the knuckle, a hook coupler, an eye engaged around said pin, and a foldable connection between said eye and the hook coupler, said connection including a V-shaped link carried by the eye and a trapezoidal link engaged with the hook coupler and provided at its outer end with a relatively narrow central extension engaged in the apex of the V-shaped link.

1,535,973. CAR-COUPLING DEVICE. JOHN CLIFFORD WHITRIDGE, GEORGE TEWKESBURY JOHNSON, and HARRY HAMILTON WOLFE, Columbus, Ohio, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Filed Nov. 23, 1923. Serial No. 676,575. 2 Claims. (Cl. 213—112.)

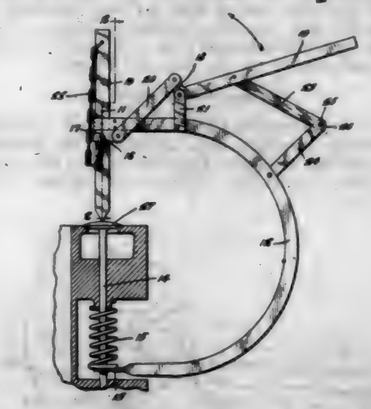


2. The combination of a drawhead, a knuckle pivoted therein, the pivot of the knuckle being secured against withdrawal and the knuckle being formed at its free end with a vertical opening terminating short of the bottom of the knuckle and with a horizontal notch intersecting said opening, a link seated in said notch, a pin passing through said link and housed in the vertical opening in the knuckle, and a link connection between the upper end of said pin and the pivot of the knuckle, said connection permitting release of the pin from the first-mentioned link but preventing complete withdrawal of the pin from the knuckle.

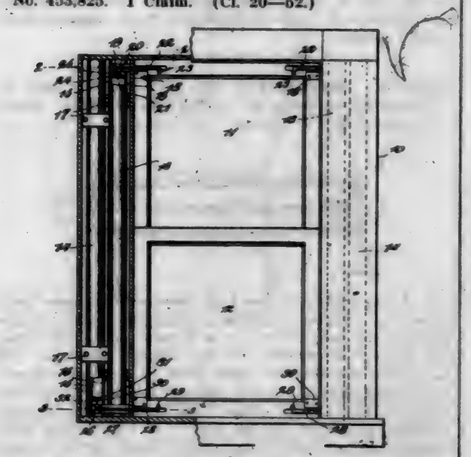
1,535,974. CAR-COUPLING DEVICE. JOHN CLIFFORD WHITRIDGE, Columbus, Ohio, assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Filed Nov. 23, 1923. Serial No. 676,578. 3 Claims. (Cl. 213—112.)

1. The combination of a coupler head including a slotted knuckle and a guard arm provided with a seat on its inner side, a member engaged freely at one end in the seat on the guard arm and at its opposite end in the slot of the knuckle, and links attached to said bar between its ends and adapted to be engaged with a hook coupler.

1,535,975. BROOCH PIN OR THE LIKE. CARL G. WHITEBUCK, Elgin, Ill. Filed May 21, 1923. Serial No. 640,313. 7 Claims. (63—20.)



1. In an article of the kind described, an open faced frame, a display medium therewithin and visible through the face thereof, a back plate arranged within the frame rearwardly of the display medium, and means for securing the back plate in position comprising a fixed element on the plate in interlocking relation with a part of the frame, and a rotatable element mounted to swivel on the plate for co-operation with another part of the frame, a pin mounted on the rotatable element, and means releasably holding the pin whereby to lock the rotatable element against swiveling, substantially as described.

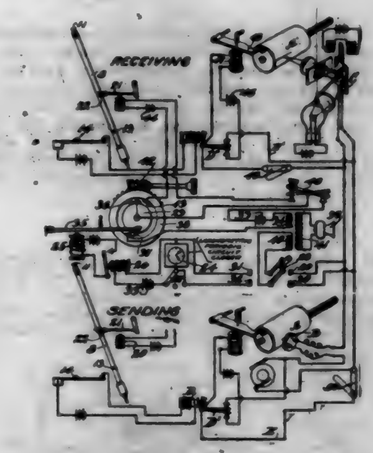


1,535,976. VALVE-SPRING COMPRESSOR. GEORGE C. WILSON, Lincoln, Nebr. Filed June 4, 1924. Serial No. 717,867. 1 Claim. (Cl. 29—96.5.)

A valve spring compressor comprising a rod adapted to engage the head of said valve, a yoke slidable on said rod and having one end terminating beneath the latter and designed to engage the lower end of said spring, a collar slidably receiving said rod, a lever pivoted upon the yoke, links pivotally connecting the adjacent end of said lever with said collar, means for holding said collar fixed with relation to said rod, whereby a downward pressure is exerted upon the rod simultaneously with the lifting of said yoke when the

lever is swung to an active position, a pair of pivotally connected links having their outer extremities pivotally connected with said yoke and lever respectively, and a lug formed on the inner end of one of said links and arranged to engage said yoke to limit and hold said lever in its active position with the spring compressed.

1,535,977. WINDOW STRUCTURE. JOSEPH WOROSILA, Fort Hancock, N. J. Filed Mar. 19, 1921. Serial No. 453,825. 1 Claim. (Cl. 20—52.)

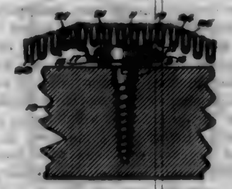


A window structure comprising a frame and a sash mounted for vertical movement therein, a vertically arranged tube extending alongside of the sash and provided in the wall adjacent the sash with a longitudinally extending slot and in the wall remote from said sash with a plurality of vertically aligned openings, a bracket secured to the sash and projecting through the slot into the tube, and a spring pressed plunger carried by the bracket and engageable in any desired one of said openings, said plunger being provided with operating means.

1,535,978. PORTABLE SCAFFOLD. HARRY T. BAKER, Los Angeles, Calif., assignor of one-half to Edgar E. Taylor, Los Angeles, Calif. Filed May 5, 1924. Serial No. 711,145. 3 Claims. (Cl. 304.)

1. An adjustable scaffold comprising a platform, a pair of members rigidly secured to said platform and extending upwardly from the end thereof, a pair of rigid inclined braces rigidly secured to said platform and to said pair of members, a flexible element attached to one of said members for securing said platform to an upright body, and a piercing point associated with said platform adapted to penetrate said body.

1,535,979. METHOD OF AND APPARATUS FOR SYNCHRONIZATION. EDOUARD BELIN, Paris, France. Filed Feb. 7, 1925. Serial No. 7,536. 18 Claims. (Cl. 177—311.)



7. The method of synchronising transmitting and recording cylinders of a record transmission system and located in widely separated stations, which consists in synchronizing the movement of a controlling member with that of the transmitting cylinder, sending a signal to the receiving station by said controlling member, synchronizing a controlling member at the receiving station with said signal, and releasing the last mentioned controlling member to operate in phase with the controlling member of the transmitting station.

1,535,980. MARKING GUIDE. NELSON I. CAMPBELL and ABRAHAM MARTIN HERRSMAN, Los Angeles, Calif. Filed Sept. 5, 1923. Serial No. 661,033. 2 Claims. (Cl. 33—177.)

1. A marking guide comprising a sheet adapted to be wrapped around a pipe and having perforations laid out so that the pipe may be marked through the perforations for making a cut at the desired angle.

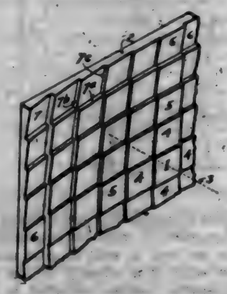
1,535,981. FASTENER. FRED S. CARR, Newton, Mass., assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Maine. Filed Jan. 22, 1924. Serial No. 687,751. 21 Claims. (Cl. 16—4.)

1. A carpet fastener socket installation comprising a casing underlying the back of a carpet and presenting upstanding prongs which penetrate the carpet backing and extend outwardly over the carpet web, said prongs being concealed by the pile of the carpet.

1,535,982. FASTENER. FRED S. CARR, Newton, Mass., assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Maine. Filed Jan. 22, 1924. Serial No. 687,752. 11 Claims. (Cl. 16—4.)

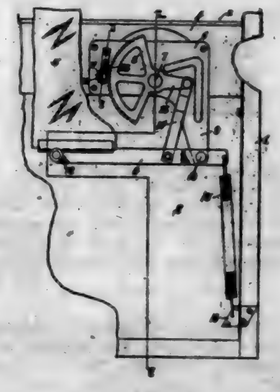
1. A carpet fastener socket including a single piece of metal providing a plurality of resilient fingers arranged about a stud-receiving aperture and each presenting a stud-engaging jaw at its end, said fingers yielding upwardly during entrance of the stud in the stud-receiving aperture, and prongs projecting from the periphery of the socket and bent outwardly to engage the backing of the carpet, in a zone relatively remote from said fingers, whereby said fingers may yield upwardly without interference from said prongs or the carpet backing underlying them.

1,535,983. FASTENER. FRED S. CARR, Newton, Mass., assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Maine. Filed Jan. 22, 1924. Serial No. 687,753. 11 Claims. (Cl. 16—4.)



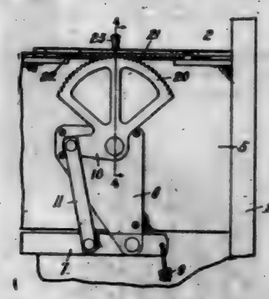
1. A carpet fastener socket comprising a casing presenting an outer cylindrical wall, an inner cylindrical wall, a web connecting said outer and inner walls, a plurality of stud-engaging fingers surrounding a stud-receiving aperture, and a plurality of attaching prongs extending upwardly from said outer cylindrical wall.

1,535,984. CURRENT-COLLECTING DEVICE. HOMER P. CHANDLER, Mansfield, Ohio, assignor to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed Apr. 9, 1924. Serial No. 705,215. 17 Claims. (Cl. 191—59.1.)



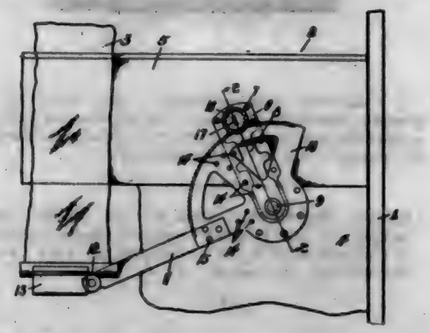
1. A current collector comprising a body member having a plurality of flat wire-engaging surfaces connected at their extremities by curved surfaces and having a plurality of fixed means to receive a support about which the collector can pivot so as to present either one of two predetermined flat surfaces to a wire and depending upon the direction of motion of the collector relative to the wire the number of flat wire-engaging faces and the number of fixed means being equal.

1,535,985. PROJECTION SCREEN. PAUL L. CLARK, Denver, Colo. Filed Aug. 27, 1920. Serial No. 406,382. 17 Claims. (Cl. 882—24.)



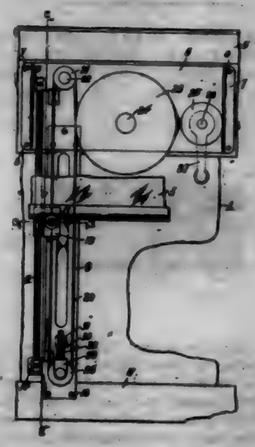
1. A flat light-dispersive structure comprising a plurality of reflecting elements arranged oblique to each other, the angle of obliquely of the general surface of any given element with respect to the general surface of the element at the axis of the aforesaid structure being proportional to its distance from the said axis, substantially as described.

1,535,986. WINDOW-CONTROL MECHANISM. ANGELO ROBERT CLAS, Toledo, Ohio, assignor to The Toledo Automotive Products Company, a Corporation of Ohio. Filed Aug. 13, 1923. Serial No. 657,050. 1 Claim. (Cl. 268—4.)



In a window control mechanism, a support adapted to be attached to the lock board of a window casing, a lever pivoted intermediate its ends to said support and normally extending in substantially a horizontal plane, one end of said lever being adapted operatively to engage an edge of the window, a spring connected to said lever and adapted to be connected at the opposite end thereof to a stationary point within the casing, a link movably connected to said lever between the window engaging end and pivot thereof, and interengaging toothed elements on said support and connected to one end of said link whereby actuation of said elements in one direction or the other raises or lowers the window.

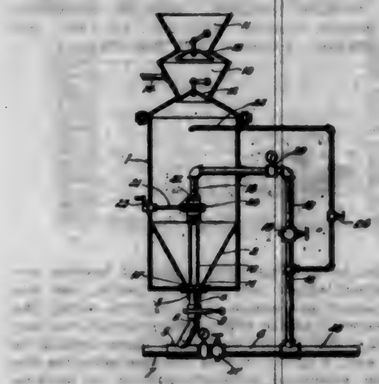
1,535,987. WINDOW-CONTROL MECHANISM. ANGELO ROBERT CLAS, Toledo, Ohio, assignor to The Toledo Automotive Products Company, a Corporation of Ohio. Filed Sept. 24, 1923. Serial No. 664,353. 1 Claim. (Cl. 268—4.)



A unitary window regulating mechanism for vehicles consisting of a support, a window supporting arm pivoted intermediate its ends to said support and adapted to engage the lower edge of a window at one end thereof, counterbalancing spring means connected to the opposite end of said arm adapted to engage a stationary part of the vehicle, a bell crank lever fulcrumed on said support, means connecting said lever and arm whereby rotation of said lever in one direction raises the window and in the other direction permits lowering thereof, a connection between said lever and arm whereby movement of said lever in one direction or the other controls the raising and lowering of the window, a gear integral with said lever, a rack bar meshing with said gear for operation thereof, and a guide on the vehicle structure for receiving the rack bar thereby to hold said bar in operative engagement with the gear.

1,535,988. WINDOW-CONTROL MECHANISM. ANGELO ROBERT CLAS, Toledo, Ohio, assignor to The Toledo Automotive Products Company, a Corporation of Ohio. Filed Feb. 8, 1924. Serial No. 691,847. 2 Claims. (Cl. 268—4.)

1. A window control mechanism comprising a bracket adapted to be secured to and extend below the lockboard of a vehicle door, a transverse pivot stud on said bracket and spaced from an edge of the lock board, an operating member pivoted on said stud, a window engaging arm on said member, a convolute spring encircling said stud below the lock board and having one end fixed to the stud, said spring being mounted in close juxtaposition to said bracket with one face thereof substantially flush with said bracket, stationary connecting means for the opposite end of the spring, and means to actuate said operating member.



1,535,989. WINDOW-CONTROL MEANS. ANGELO ROBERT CLAS, Toledo, Ohio, assignor to The Toledo Automotive Products Company, a Corporation of Ohio. Filed May 5, 1924. Serial No. 710,978. 1 Claim. (Cl. 268—4.)

The combination with a casing, and a member mounted for sliding movement in said casing, of a frame plate secured to the casing at one side of said member and having an arm extending therefrom in a direction parallel to the movement of said member, a cylindrical guide rod fixed at its ends to said plate and arm respectively and extending parallel to the movement of the slide member at a side thereof, a slide having a curved portion engaging said cylindrical guide rod for movement thereon, thereby to permit slight lateral movement between the slide and rod, means on said slide to support said slide member, a plurality of guide sheaves carried by said plate and arm, one of which acts as an operating sheave, operating means connected to said operating sheave, and a cable guided for movements by said sheaves and actuated by a rotation of the operating sheave, said cable having a flight portion parallel to and co-extensive with the permissible movements of the slide member and attached to said slide to move it therewith.

1,535,990. [WITHDRAWN.]

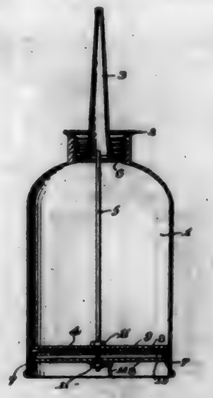
1,535,991. CEMENT-PLACING MACHINERY. JOHN M. CROM, Wilmette, Ill. Filed June 29, 1923. Serial No. 648,524. 1 Claim. (Cl. 302—53.)

In a device of the class described, the combination of a relatively air tight hopper having at its upper end means for introducing raw cement materials without escape of air under pressure from said hopper, and having at its lower end a centrally sloping floor, a discharge passage leading from the lowermost portion of said floor, a connection in conjunction with said discharge passage, a delivery connection from said connection, a compressed air connection to said connection, a valve in the connection between the hopper and said connection, a vertical jet pipe within the hopper having its discharge orifice in alignment with the delivery opening of the hopper, means for delivering compressed air directly to said jet pipe under control of the operator, and independently of the interior of the hopper, means exterior to the hopper for raising and lowering the jet pipe within the hopper and with respect to the delivery opening while maintaining the air connection aforesaid, another connection for the delivery of compressed air directly into the upper portion of the interior of the hopper, and suitable valves for controlling the delivery of compressed air to said connection and to the jet pipe independently of each other, whereby the operation of the device may be commenced by the use of said connection, and whereby the subsequent operation may be controlled by the use of the jet device, substantially as described.

1,535,992. FURNACE. WILLIAM H. FISHER, Los Angeles, and PETER CHAMBERS, Redondo, Calif. Filed May 15, 1923. Serial No. 638,081. 9 Claims. (Cl. 266—5.)

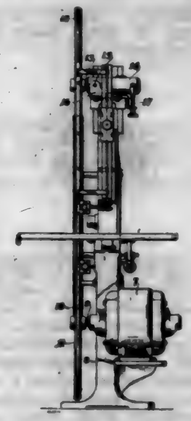
1. In a device of the character disclosed, the combination of: a retort having a work-holding chamber adapted to receive the work to be treated; means for heating said retort; and means for introducing a hydrocarbon liquid into said work-holding chamber without substantial vaporization of such hydrocarbon liquid outside said work-holding chamber.

1,535,993. UMBRELLA. HIMAN GARFINKEL, Corona, N. Y. Filed Aug. 28, 1922. Serial No. 584,828. 3 Claims. (Cl. 135—29.)



1. An anti-friction connection for the pivotally joined elements of an umbrella frame, comprising a member having spaced bearing ears carried by one of the joined elements, a pivot extending through said ears, a member carried by a second frame element and disposed between said bearing ears, said latter member being provided with a socketed portion having a concentric aperture and a concentrically apertured closure plate for the socketed portion through which apertures the pivot extends the said socketed portion defining a ball race, and anti-friction balls within said race disposed around the pivot pin.

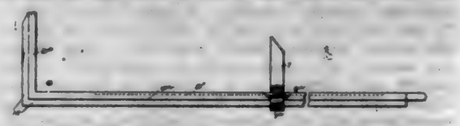
1,535,994. OIL CAN. MILES S. GATES, GEORGE W. BALCOM, and FRED L. ROBERSON, Lewellen, Nebr. Filed Aug. 6, 1923. Serial No. 656,048. 1 Claim. (Cl. 221—48.)



An oil can comprising a receptacle having its lower end open and a tapered spout at its upper end, a plurality of inwardly directed tongues struck from the walls of the can adjacent its lower end, a flexible washer arranged in the can and having around its periphery a portion bent up so as to lie against the wall of the receptacle, a disk arranged upon the upper face of the washer, a second disk arranged below the washer and spaced therefrom, a cleaner stem passing vertically through the disk and washer and adapted to pass into the spout, a coil spring interposed between the washer

and said second disk and pressing said bent portion of the washer against the wall of the receptacle, and a neck on the stem engaging said second disk and a finger en-

gaging element carried by the outer disk, the tongues preventing the washer and parts associated therewith from being wholly drawn from the can.

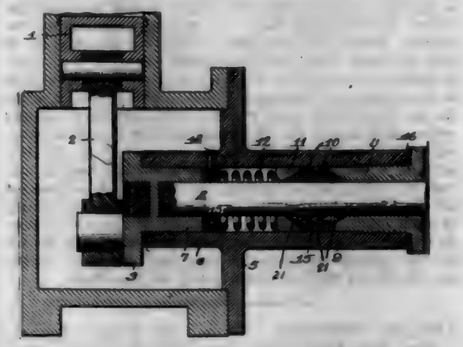


1,535,995. BAND SAW. ALFRED C. GETZ, Sidney, Ohio, assignor to The Sidney Machine Tool Company, Sidney, Ohio, a Corporation of Ohio. Filed Oct. 22, 1923. Serial No. 670,160. 1 Claim. (Cl. 143—17.)

In a band saw machine, the combination of a frame having its lower part provided with a transverse opening, a bracket formed integral with the frame at the bottom of said opening, a motor mounted solely and detachably on said bracket at one side of the said frame and having its drive shaft projecting through said opening to the opposite side of said frame, a lower band wheel rigidly secured to the outer end of said drive shaft, an upper band wheel, and a saw blade carried by said wheels whereby the motor may be removed without dismantling the machine.

1,535,996. FOOT MEASURE. WOLF T. GOLDSMITH, Newark, N. J. Filed Sept. 6, 1922. Serial No. 586,509. 1 Claim. (Cl. 33—3.)

A device of the character described comprising a bar-like measuring member having a groove in its upper face extending longitudinally thereof, said member having a scale extending on its upper face along said groove, a marker block having a transverse opening therethrough loosely receiving said measuring member, the bottom wall of said opening having a groove extending longitudinally thereof, a rib on the lower side of said measuring member engaging with the groove in the lower wall of said opening to hold said measuring member against

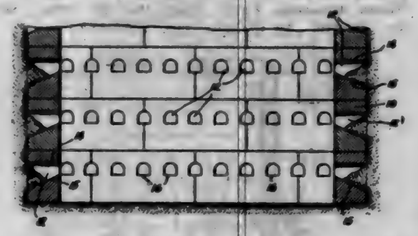


any appreciable lateral oscillation relatively to said measuring member, and a spring pressed plunger carried by said marker block in sliding engagement with said groove in the upper face of the measuring member for spacing said marker block from said scale and tending to hold said marker block in adjusted position along said measuring member.

1,535,997. TICKET HOLDER. BERNARD HALANSKY, Ottawa, Ontario, Canada. Filed Feb. 16, 1924. Serial No. 693,346. 3 Claims. (Cl. 206—39.)

1. A ticket holder comprising a pair of box-like sections including bottom, side and end walls, the side and end walls of one section being received within the side and end walls of the other section, one of said sections having a slot in one end and a finger opening in its bottom wall, a spring pressed follower plate for the other section, means for yieldingly holding the sections together to provide a closed ticket container and extensions along each side edge of each section to facilitate separation.

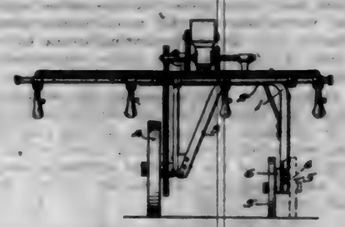
1,535,998. STUFFING BOX. CHARLES C. HANSON and JOHN TWARDOWSKY, Chicago, Ill., assignors, by mesne assignments, to Universe Corporation, Chicago, Ill., a Corporation of Illinois. Filed June 13, 1921. Serial No. 477,252. 4 Claims. (Cl. 286—7.)



1. In combination with a stuffing box, a shaft, a collar mounted thereon, a pair of members both sleeved upon the shaft and movable with respect to each other and each having a flaring end confronting the collar, a

pair of packing disks respectively contacting opposite faces of the collar and extending from the shaft to the walls of the stuffing box, loose compressible packing disposed between the two disks radially outward of the collar, loose compressible packing between each of the disks and the said flaring ends of said members facing the sides of the collar on which the respective disks are disposed, and spring means for compressing the said packing.

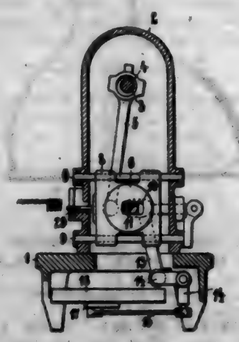
1,535,999. WATERPROOFING OF FABRIC ARTICLES. ARTHUR GEORGE HARRINGTON, London, England, assignor of one-half to Harold Lionel Brandon, London, England. Filed Dec. 1, 1924. Serial No. 753,838. 1 Claim. (Cl. 134—15.)



A composition for waterproofing fabrics including hard paraffin wax dissolved in petrol to which a small proportion of trichlorethylene has been added.

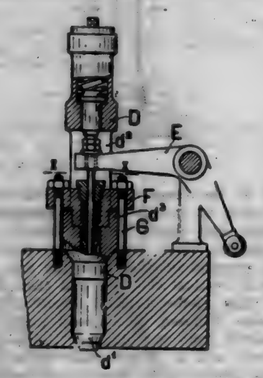
1,536,000. CESSPOOL-WALL CONSTRUCTION. JOHN HUGH HAWKINS, Sayville, N. Y. Filed Nov. 21, 1923. Serial No. 676,160. 1 Claim. (Cl. 182—2.)

A cesspool formed of a plurality of rectangular concrete blocks, each provided with a plurality of openings intermediate of its ends and having in each end a recess forming with adjacent blocks openings, said openings each being conical with their smaller ends at the inner face of the block.



1,536,001. PLANT-TREATING TRUCK. GEORGE H. HAYES, Atlanta, Ga. Filed Feb. 9, 1923. Serial No. 618,074. 1 Claim. (Cl. 280—29.)

A plant treating machine comprising a frame including an arch having one of its legs inclinedly arranged, wheels carried by the arch, shafts connected with the front of the frame to one side of the center thereof, and means provided for placing one of the wheels on the inner or outer face of one of the limbs of the arch.

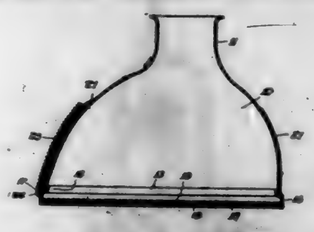


1,536,002. BUTTONHOLE-SEWING MACHINE. ALBERT HENNIG, Bielefeld, Germany, assignor to Anker-Werke Aktiengesellschaft, Bielefeld, Germany. Filed Feb. 14, 1925. Serial No. 9,246. 4 Claims. (Cl. 112—70.)

1. In a button hole sewing machine of that type having a driving shaft and a material feeding mechanism including a cam actuated in step by step movements, connections between said driving shaft and said cam including a slide, an oscillatory crank disk journaled in and shiftable with said slide and having a radial slot, a crank connection between the disk and the said driving shaft, a lever having operative connections with the

said cam, a block to which said lever is connected, movable in said slot of the disk and held against shifting movements of the latter with the slide, and connections for intermittently shifting the slide whereby to adjust the disk relative to said block.

1,536,003. FUEL VALVE FOR INTERNAL-COMBUSTION-ENGINES. ERNST HERKT, Kiel-Hassee, Germany, assignor to Fried. Krupp Aktiengesellschaft Germaniawerft, Kiel-Gaarden, Germany. Filed Oct. 26, 1921. Serial No. 510,468. 4 Claims. (Cl. 123—188.)

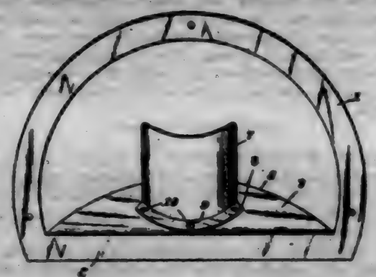


1. In a stem valve for engines, a casing forming a multiple guide for a single valve stem and a separate member engaging said casing and secured to the engine for holding said casing in place.

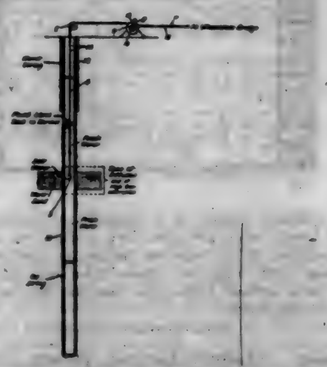
1,536,004. COLOR LIGHTING ATTACHMENT FOR REFLECTORS. PAUL M. HOTCHKIN, Chicago, Ill., assignor to The National X-Ray Reflector Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 24, 1920. Serial No. 360,822. 6 Claims. (Cl. 240—1.)

6. In a lighting fixture, the combination with a light reflector, of a color adapter therefor including a frame detachably associated with the reflector and open to passage of light rays emanating from said reflector,

said adapter having means conforming to the configuration of the reflector to fit the adapter thereto, a color screen displaceably mounted in said adapter to intercept the light rays passing therethrough, and means for detachably connecting the adapter to the light reflector.



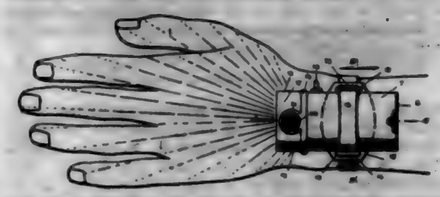
1,536,005. WINDOW SCREEN. GRANT L. HOUSTEAU, Youngstown, Ohio. Filed Nov. 15, 1923. Serial No. 674,950. 1 Claim. (Cl. 156—39.)



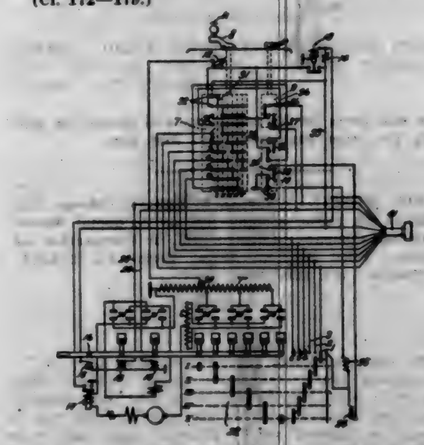
A device of the class described comprising a roller receiving casing to extend between opposed sides of a window frame, end plates for said casing, each of said plates having its inner vertical edge portion bent inwardly into parallel relation with the axis of said casing to form a vertical shoulder and then extended outwardly at right angles to said shoulder to provide a vertical flange disposed in a plane parallel with and spaced inwardly from the plane of the body portion of the end plate, and a substantially rectangular shaped shoe housing joined to the lower end of said flange, the outer side of said housing opening outwardly and having its upper, lower and rear walls terminating substantially in the plane of said flange, the front wall of said housing being disposed substantially in the plane of said shoulder and extending outwardly beyond the plane of said flange to substantially the outer edge of said shoulder and being secured to said shoulder, whereby to prevent relative springing of said housing and said shoulder.

1,536,006. GLARE ELIMINATOR FOR AUTOMOBILES. WILLIAM H. L. HOWARD, Washington, D. C. Filed July 20, 1922. Serial No. 576,345. 8 Claims. (Cl. 240—48.2.)

1. An attachment for eliminating the glare from headlights comprising a substantially segmental front frame arranged to close the lower portion of the headlight at the front thereof, a rearwardly extending approximately segmental support adapted to fit a reflector and cut off the lower portion of the same entirely from the lamp of the headlight and a curved shield extending upwardly from the support and arranged in front of the lamp.

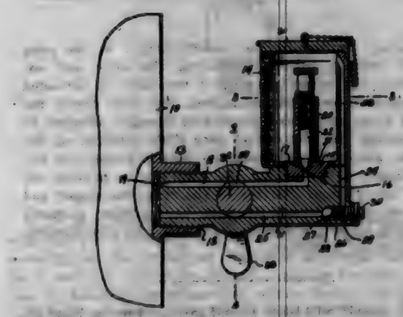


1,536,007. METHOD FOR LOCATING WATER-BEARING STRATA IN BORE HOLES. FREDERICK W. HUBER, Riverside, Calif. Filed Mar. 29, 1924. Serial No. 702,946. 10 Claims. (Cl. 175—183.)



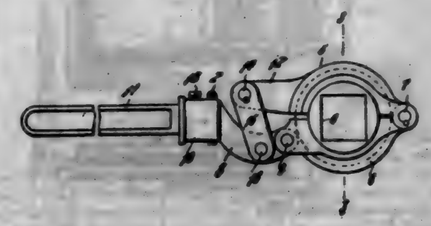
1. The method of determining the location of water bearing strata in bore holes which consists in supplying to the bore hole water presenting less saline concentration than the solution in the water bearing strata so that diffusion from the water bearing strata will establish a zone of relatively high saline concentration in the column of liquid in the bore hole opposite a water bearing stratum and then measuring the electrical conductivity of the liquid in situ at different parts of said column to determine the location of any part thereof presenting such relatively high saline concentration, while preventing fouling of the electrical measuring means by oil, and while employing alternating current in said measuring operation.

1,536,008. SIGNAL DEVICE. FREDERICK W. HUNT, Pasadena, Calif. Filed July 23, 1923. Serial No. 653,167. 1 Claim. (Cl. 177—329.)



A device of the character described comprising a lamp unit including a case for holding a battery, a lamp bulb carried by the forward end of the case, and a switch carried by said case, means for attaching said case to the arm with the forward end thereof projecting toward the back of the hand, and a reflector of C-shape in edge view overlapping the outer side of the case and having its curved end portions engaging across the edge portions of said case without obstructing the inner side of the case, said reflector being open at the inner side of the case and at that edge opposite to the case for directing the light rays to the back of the hand.

1,536,009. ELECTROPNEUMATIC CONTROL SYSTEM. LEOPOLD JANISCH, Berlin, Germany, assignor to General Electric Company, a Corporation of New York. Filed May 12, 1923. Serial No. 638,616. 4 Claims. (Cl. 172—179.)

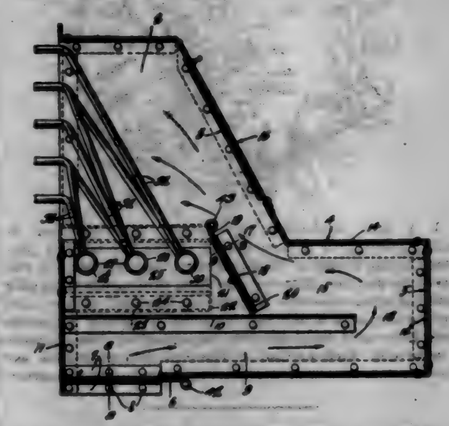


1. A system of motor control comprising electrically controlled fluid operated motor controlling switch mechanism, a master switch having an auxiliary independently operable switch associated therewith for controlling the said switch mechanism, a main supply conduit for the operating fluid for the said switch mechanism, a magnetically controlled valve in the said conduit under the control of the said master switch, and connections whereby the said master switch must be returned to the neutral position to place the said valve under the control of the said auxiliary switch.

1,536,010. LUBRICATOR. JOHN O. JOHNSON, Nakina, Ontario, Canada. Filed Aug. 6, 1923. Serial No. 656,118. 5 Claims. (Cl. 184—55.)

1. The combination with an air compressing cylinder having a piston operating therein, of an oil reservoir having separate inlet and outlet passages, the outlet passage extending from the bottom of the oil reservoir into the cylinder and the inlet passage extending from the cylinder to the top of the oil reservoir, a check valve disposed in the last named passage permitting the inlet of air but preventing the outlet of air, an adjustable valve for controlling the outlet of oil through the outlet passage and disposed entirely within the oil reservoir, and a manually operable valve disposed between the lubricant reservoir and the cylinder and adapted to close off both of said passages or open both of said passages.

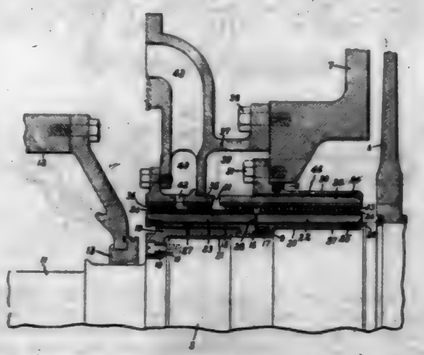
1,536,011. FRICTION WRENCH. GEORGE J. JONES and EDWIN J. BLANNING, New Castle, Pa. Filed Oct. 7, 1924. Serial No. 742,194. 1 Claim. (Cl. 81—58.)



A friction wrench comprising a nut or bolt turning head, hingedly connected jaws disposed in surrounding relation to said head, and a manual oscillatory element having a pivotal connection with one jaw and a link connection with the other jaw, the head being provided with a peripheral rib transversely triangular, and the jaws being formed with a correspondingly shaped groove for the reception of said rib.

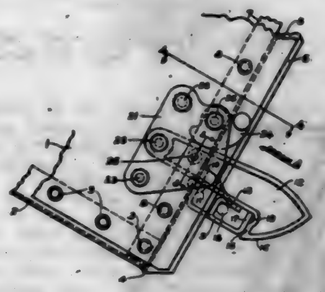
1,536,012. PRODUCT PRODUCED FROM SULPHONIC ACIDS AND PROTEIDS AND PROCESS OF MAKING. OMAR T. JOSLIN, Cincinnati, Ohio. Filed Feb. 23, 1923. Serial No. 620,844. 7 Claims. (Cl. 260—1.)

2. A magma formed by the combination of proteid bodies with sulphonic acid.



1,536,013. BURNER. WARNER J. JULIAN, Coffeyville, Kans. Filed Oct. 13, 1924. Serial No. 743,445. 3 Claims. (Cl. 158—7.)

1. A burner of the character described comprising a casing having a portion of its rear wall inclined, and a portion of its front open, a draft air passage formed in the casing, means for controlling the air thereto, a burner apparatus detachably associated with the casing



and having a portion thereof extending outwardly beyond the open front, deflecting plates for conveying air to the burner and a door for the inclined wall and provided with transparent means, as and for the purpose specified.

1,536,014. PACKING FOR ELASTIC-FLUID TURBINE AND THE LIKE. OSCAR JUNGGREN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 23, 1923. Serial No. 627,221. 5 Claims. (Cl. 286—9.)

2. In a packing structure, the combination with a shaft and an adjacent wall, of carrying elements fixed to and arranged in spaced relation to said shaft and wall, packing elements carried by and arranged in spaced relation to said carrying elements, and means defining passages for admitting elastic fluid to the spaces between the parts.

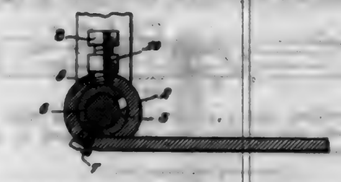
1,536,015. CAR-DOOR MECHANISM. BYERS W. KADEL, Baltimore, Md. Filed Apr. 7, 1923. Serial No. 630,483. 9 Claims. (Cl. 105—308.)

1. A door mechanism for railway cars including in combination with a door hinged to the car body, a pivoted member and a fixed member, one carried by the car body and the other by the door, said members having interengaging portions adapted for support of the door in closed position, the pivoted member having a depression in one of its faces, and a projection formed upon a relatively fixed portion of the car, said projection extending into the said depression of the pivoted member.

1,536,016. GUARD FOR GAS STOVES. PETER KAVANAGH, New York, N. Y. Filed June 2, 1924. Serial No. 717,374. 8 Claims. (Cl. 126—42.)

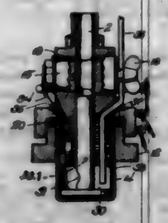
1. In combination with a gas stove having burner cocks arranged along the front thereof, of a protector for said cocks including a pair of separable parts arranged at right angle to each other, means for attaching

one of said parts to the gas stove, and means for supporting the other part from said first part.



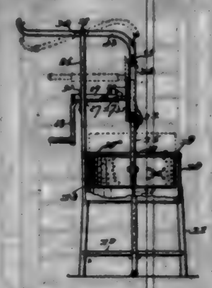
1,536,017. PENCIL. CHARLES R. KERRAN, Chicago, Ill., assignor, by mesne assignments, to Autopoint Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 22, 1918. Serial No. 213,241. 27 Claims. (Cl. 120—18.)

1. A pencil having in the lower portion of its body a slotted core, a tube surrounding the core and extending into the upper portion of the body, a threaded sleeve mounted for rotation within the tube above the core, and a threaded lead propelling plunger adapted to travel through the sleeve and core with rotation of the sleeve, the plunger being provided with a projecting element arranged to lie within the core slot to prevent rotation of the plunger relative to the core, the upper end of the core being formed to turn the plunger properly for aligning its projecting element with the slot therein, substantially as described.



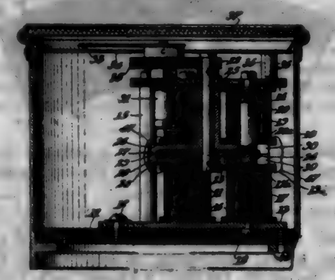
1,536,018. ADJUSTABLE BUSHING. EDWARD KELLEY, Altoona, Pa. Filed Nov. 8, 1924. Serial No. 748,685. 1 Claim. (Cl. 287—54.)

In an adjustable bushing construction, the combination of an eye, a bolt extending through said eye, a split bushing of case-hardened steel arranged in the eye and about the bolt, means for preventing turning of the



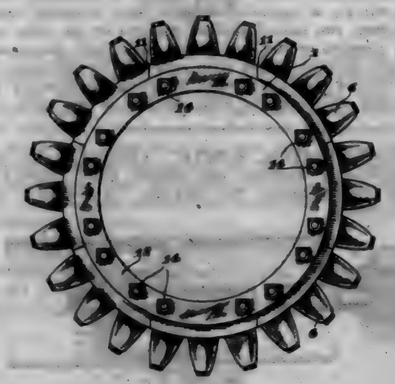
bushing in the eye, and an adjusting bolt threaded in the eye and engaging the bushing.

1,536,019. DRAIN COCK. JOHN F. KELLEY, Chicago, Ill. Filed Oct. 16, 1922. Serial No. 594,909. 8 Claims. (Cl. 137—34.3.)



7. A drain cock comprising a casing provided with a liquid chamber having an outlet, means arranged to normally close said outlet and adapted to be acted upon by the liquid in said chamber for opening said outlet when said liquid expands during freezing, an electric heater arranged adjacent said liquid chamber, a switch controlling said heater, and operating mechanism for said switch normally held in an inoperative position and coacting with said means so as to close said switch when said outlet is open.

1,536,020. DISHWASHER. NORA LEAH KENNER, Cordell, Okla. Filed Mar. 29, 1922. Serial No. 547,093. 2 Claims. (Cl. 141—9.)

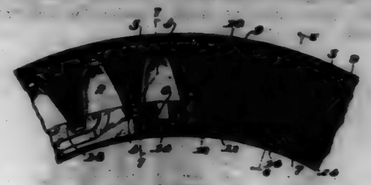


2. A dish washing apparatus having a vessel or receptacle for cleansing liquid, a rotary carrier or cage mounted in the vessel or reception for axial movement to a position above the liquid contents thereof, operating mechanism for imparting rotary motion to the carrier or cage, and lifting mechanism for raising the carrier or cage to its elevated position, the carrier having a shaft, and a sleeve having a swivel connection with the shaft, and the lifting mechanism having a lever operatively connected with said sleeve.

1,536,021. STEP-BY-STEP MOTOR. PETRUS VAN SANTEN KOLFF, Philadelphia, Pa., assignor to The Electric Tachometer Corporation, a Corporation of Delaware. Filed Mar. 11, 1922. Serial No. 543,058. 4 Claims. (Cl. 172—239.)

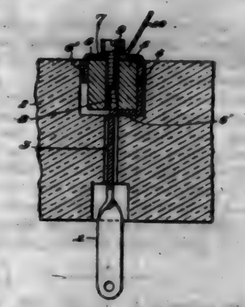
1. A step by step motor comprising a movable member of non-magnetic material containing magnetic elements of small extent in the direction of motion and magnetically separated from each other, a plurality of separate magnetic circuits each disposed to successively include the said magnetic elements and means for separately energizing the magnetic circuits, the number of magnetic elements being large relatively to the number of magnetic circuits and the relative position of the magnetic elements and circuits being such that when one magnetic element is included in one magnetic circuit, another magnetic element is less than the distance between adjacent elements away from another magnetic circuit.

1,536,022. COLLAPSIBLE CORE OR MANDREL. JOHN W. KUHN, Chillicothe, Ohio. Filed June 28, 1924. Serial No. 723,041. 2 Claims. (Cl. 18—45.)



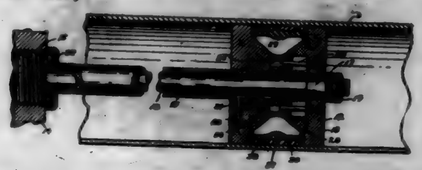
1. A collapsible core or mandrel composed of a plurality of units, each unit composed of two outer sections and an intermediate section, semi-cone-shaped protuberances extending radially from each of said outer sections, and wedge-shaped fingers extending radially from said intermediate section and adapted to engage the inner faces of said protuberances.

1,536,023. CUSHION TIRE. JOHN W. KUHN, Chillicothe, Ohio. Filed June 28, 1924. Serial No. 723,042. 4 Claims. (Cl. 152—1.)



4. A cushion tire including a body portion formed with a plurality of inwardly opening pockets, an annular

member positioned between the beads of the tire and provided with dished recesses on its inner periphery in



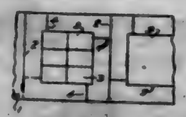
alignment with said pockets, and a plurality of shock-absorbing elements carried by said annular member and positioned in said pockets.

1,536,024. CONNECTION PIECE FOR CABLE HEADS. ALBERT KVAAL, Christiania, Norway. Filed Dec. 13, 1924. Serial No. 755,757. 2 Claims. (Cl. 173—259.)

2. A connection piece for cable heads, comprising, a metallic strip, one end of the strip having receiving means integral therewith to receive a clamping screw and nut for a continuation wire, said receiving means including, two spaced parallel portions of the strip running parallel to the axis of the strip, and two spaced parallel portions of the strip running at right angles to the axis of the strip, and a receiving aperture for the clamping screw in line with the axis of the strip.

1,536,025. PISTON SLEEVE. CHARLES LAMB and DOUGLAS E. RADFORD, Los Angeles, Calif. Filed Feb. 13, 1924. Serial No. 692,522. 3 Claims. (Cl. 74—109.)

1. In a piston sleeve, the combination of: an outer cylindrical body of pliable wear resisting rubber substance; and an inner cylindrical body of flexible fibrous material of sufficient stiffness to hold said outer pliable body in cylindrical form.

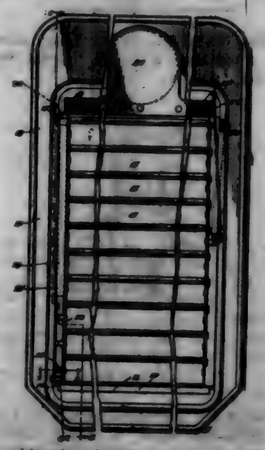


1,536,026. CAN OPENER. MARCUS D. MOORE, Waveland, Ind., assignor to Frankfort Novelty Company, Frankfort, Clinton County, Ind. Filed Feb. 5, 1923. Serial No. 617,085. 9 Claims. (Cl. 30—3.)

1. In a can opener, the combination, with a handle, and a penetrating point therefor, of a cutter blade engaging the handle and adjustable longitudinally thereof, a detent plate connected to the blade and movable relative thereto to and from a position for retaining the blade at any of its adjusted positions, means carried by the blade for shifting the detent plate to the re-

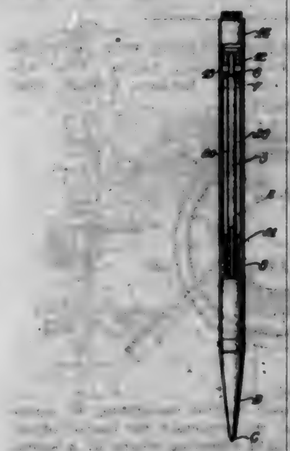
taining position, and a projection extending from the detent plate into position for being engaged by said shifting means.

1,536,027. METHOD OF MAKING SHINGLE STRIPS. CHARLES W. MORTIMER, Brooklyn, N. Y. Filed Feb. 1, 1922. Serial No. 533,227. 5 Claims. (Cl. 164—17.)



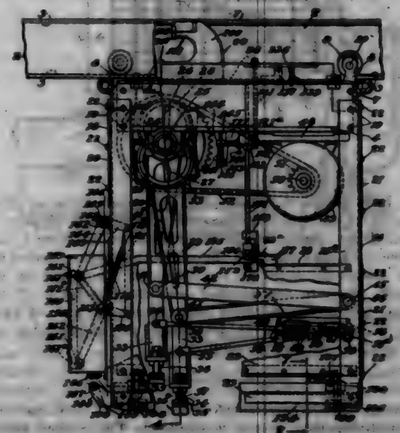
1. The process which comprises cutting a rectangle from a sheet of roofing material, cutting a rectangle from the center of said first named rectangle, and cutting the remaining portion so as to form four shingle strips, each having one end wider than the other.

1,536,028. METHOD OF MAKING STRIP SHEETS. HARRY M. NAUGLE and ARTHUR J. TOWNSEND, Canton, Ohio. Filed Aug. 22, 1922. Serial No. 583,612. 4 Claims. (Cl. 148—12.)



1. The method of making a strip sheet from a strip, skelp, bar or the like, which consists in rapidly reducing cold material to a strip sheet of less than half the original thickness, and then annealing the same by a continuous method.

1,536,029. SHUTTER APPARATUS FOR RADIATORS. CHRISTIAN NIELSEN, Jr., Chicago, Ill. Filed Mar. 22, 1924. Serial No. 700,987. 13 Claims. (Cl. 189—02.)



1. The combination in an apparatus of the class described, shutters, a frame therefor comprising a hollow closed dust excluding member and bearing members for said shutters supported by said dust excluding member, the bearing joints between the relatively moving bearing surfaces of said bearing members communicating with the interior of said hollow dust excluding member.

1,536,030. PENCIL. IRVING L. POMEROY, Chicago, Ill., assignor to Autopoint Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 8, 1922. Serial No. 605,567. 3 Claims. (Cl. 120—18.)

1. A pencil comprising in combination a body having an axial bore provided with a plurality of longitudinally-extending grooves which open into said axial bore, said grooves providing reserve lead chambers, a tube within the bore and containing lead propelling mechanism, said tube, when in place, serving to close off the respective reserve lead chambers, and a plate non-rotatably connected with said tube and having projections shaped to enter the said grooves to provide a bottom wall therefor and to prevent rotation of said tube.

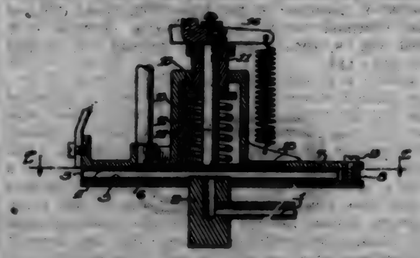
1,536,031. MOLD-RAMMING MACHINE. RILEY L. REDPATH, Buffalo, and SHERWOOD C. BLISS, Kenmore, N. Y., assignors to American Radiator Company, New York, N. Y., a Corporation of New Jersey. Filed July 6, 1922. Serial No. 573,140. 61 Claims. (Cl. 22—41.)

4. In a mold-ramming machine, a carriage, means for reciprocating the carriage across a mold, ramming means carried by the carriage, means for driving the ramming means during travel of the carriage across the mold, and means for automatically stopping the ramming means when the latter is clear of the mold.

1,536,032. PROCESS OF FORMING LOOSE MATERIALS INTO COHERENT BODIES. ALBERT L. STILLMAN, Plainfield, N. J., assignor to The Smelters' General Briquette Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 3, 1922. Serial No. 592,165. 4 Claims. (Cl. 75—73.)

1. The herein described method which consists in mixing with loose material containing an appreciable amount of iron oxide (FeO), a corrosive acid medium that will produce Fe_2O_3 as a binder by reacting with said material, and forming the mixture into coherent bodies by rolling pressure while such reaction is going on.

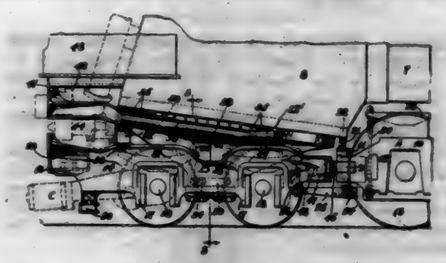
1,536,033. PROCESS OF AGGLOMERATING LOOSE MATERIALS. ALBERT L. STILLMAN, Plainfield, N. J., assignor to The Smelters' General Briquette Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 3, 1922. Serial No. 592,166. 6 Claims. (Cl. 75—73.)



1. The herein described process of agglomerating loose material, containing an appreciable amount of FeO which consists in adding to such material an agent having both agglutinant and corrosive characteristics with respect to such material, and then compacting the mixture by pressure.

1,536,034. DRILL BIT. MARTIN E. THOMAS, Plano, Tex., assignor, by direct and mesne assignments, of three-fourths to G. G. Acree and one-fourth to H. N. Thomas, both of Plano, Tex. Filed Mar. 2, 1922. Serial No. 542,394. 1 Claim. (Cl. 255—71.)

A drill bit adapted to be attached to a tubular rod and including a stock having a continuous longitudinal bore and with the end of the stock formed with reversely bevelled faces with the juncture of the bevelled faces forming a continuous medial line transversely of the stock and transecting the bore, and cutting disks revolubly mounted respectively on the bevelled faces of the stock with their contiguous cutting edges overlapping the transverse medial line at opposite sides of the discharge of the bore.

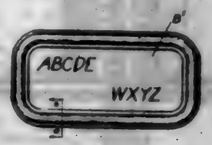


1,536,035. DIAPHRAGM-ACTUATED MECHANISM. JOHN TWARDOWSKY, Chicago, Ill. Filed Aug. 13, 1923. Serial No. 657,268. 11 Claims. (Cl. 137—156.)

1. The combination with a hollow diaphragm of the general nature of a shallow box having relatively flat heads adapted to be conveyed away from each other by fluid pressure within the diaphragm, of a support

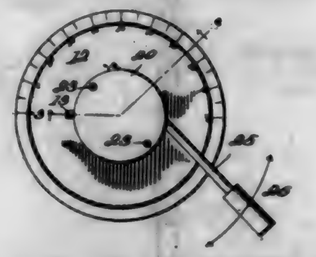
attached to one head; and a guard supported by the other head; the guard including a pair of guard plates respectively adapted to limit the convexing of the two heads of the diaphragm, and spacing means interposed between the guard plates and free of engagement with the diaphragm.

1,536,036. LOCOMOTIVE. WILLIAM E. WOODARD, Forest Hills, N. Y. Filed July 22, 1922. Serial No. 576,788. 25 Claims. (Cl. 105—174.)



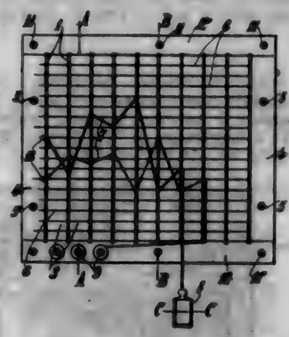
21. In a locomotive, the combination of a main frame primarily supporting the superstructure and its wheels, and a supplemental frame and its wheels, the supplemental frame being articulated to and extending rearwardly of the main frame and having its pulley members entirely outside the plane of its wheels.

1,536,037. LIGHT FOR VEHICLE CURTAINS. WILLIAM K. BISHOP, Binghamton, N. Y., assignor to The Brewer-Titchener Corporation, Cortland, N. Y., a Corporation of New York. Filed Oct. 15, 1923. Serial No. 668,530. 16 Claims. (Cl. 296—145.)



1. In a curtain light frame comprising members adapted to be nested, a male part for one of the members and a registering female part for the other member, and indented cleat means for interlocking the nested male and female parts.

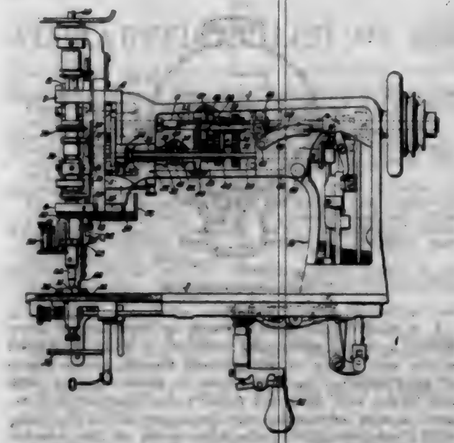
1,536,038. METHOD OF UNITING COMPLEMENTARY FRAME MEMBERS. WILLIAM K. BISHOP, Binghamton, N. Y., assignor to The Brewer-Titchener Corporation, Cortland, N. Y., a Corporation of New York. Filed Aug. 8, 1924. Serial No. 730,842. 17 Claims. (Cl. 113—116.)



1. The method of uniting a set of co-acting endless frame members adapted to encompass an opening therethrough, of which frame one member is provided with a female part while the other member is provided with a registering male part adapted for crimping or indenting into the female part when the parts are assembled, said method consists in crimping or indenting the male part into the female part subsequent to the assembly thereof.

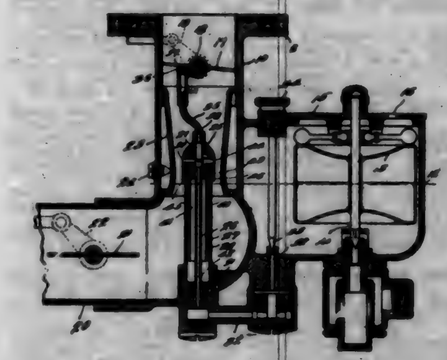
1,536,039. NO-CAPACITY CONTROL FOR CONDENSERS. JOHN T. BRADLEY, Tutuila, Samoa. Filed Apr. 3, 1923, Serial No. 629,737. Renewed Feb. 25, 1925. 6 Claims. (Cl. 250—41.)

1. A vernier condenser control comprising, in combination, means to move the condenser for coarse adjustment, means whereby said adjusting means by a second form of movement may control the vernier portion of the condenser.



1,536,040. DEVICE FOR THE GRAPHIC REPRESENTATION OF FUNCTIONS. PAUL LOUIS MERCIER and HENRI EMILE GUINEBRETAU, Paris, France. Filed June 4, 1923. Serial No. 643,471. 5 Claims. (Cl. 33—1.)

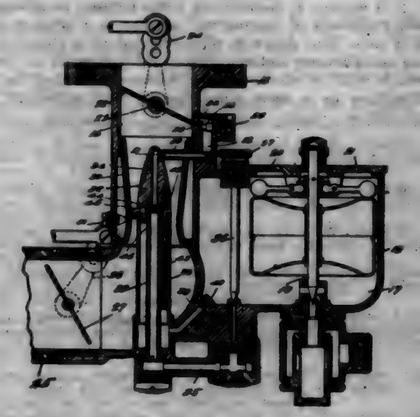
1. In a device for the graphic representation of functions, a plane support, bars resting on the support, a plurality of combs, each interposed between two successive bars, the teeth of the combs projecting above the bars, means for securing the bars and the combs on the support, threads for passing between the teeth of the combs, means for securing the threads at one of their ends to one of the combs, and means for maintaining the threads in a stretched condition.



1,536,041. EMBROIDERING MACHINE. WALTER MYERS, Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a Corporation of New Jersey. Filed Mar. 24, 1923. Serial No. 627,249. 9 Claims. (Cl. 112—98.)

1. In an emboridering machine, in combination, a main-shaft, stitch-forming mechanism including a reciprocatory needle, universal feeding mechanism, mechanism for controlling the direction of feed, a covering-thread guide disposed to rotate about said needle, actuating mechanism operatively connected with said main-shaft for rotating said guide, and means independent of

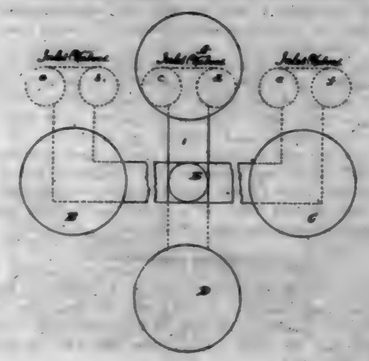
the direction of feed for at will varying the relative speed of rotation of said main-shaft and said guide during the operation of the machine.



1,536,042. CARBURETOR. EARL A. BESSOM, Indianapolis, Ind., assignor to The Wheeler-Schebler Carburetor Co., Indianapolis, Ind., a Corporation of Indiana. Filed Apr. 30, 1917. Serial No. 165,322. 4 Claims. (Cl. 261—41.)

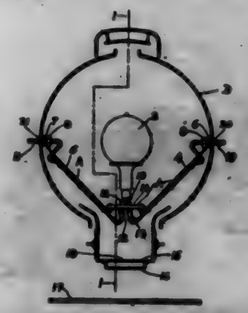
1. A carburetor, comprising a mixing tube having an air inlet opening, a throttle controlling the flow through said mixing tube, a fuel nozzle discharging into said mixing tube between said air inlet opening and the throttle, said throttle being provided with an opening through it, a supplemental fuel nozzle which when the throttle is closed projects into and substantially fits said opening for priming and as the throttle is opened leaves said opening to provide an air passage through said opening around said supplemental nozzle, a fuel conduit supplying said first fuel nozzle, and a second conduit passing through said mixing tube and leading from said first fuel nozzle to said supplemental fuel nozzle as a branch to the outlet of said first fuel nozzle.

4. A carburetor, comprising a mixing tube having an air inlet opening, a throttle controlling the flow through said mixing tube, said mixing tube having a venturi contraction between said air inlet opening and said throttle, a fuel nozzle discharging into said mixing tube at said venturi contraction between said air inlet opening and the throttle, a fuel conduit leading to said nozzle, a valve controlling such conduit, a supplemental fuel chamber supplied through a restricted opening from said fuel conduit at a point beyond such valve as a branch to the supply of the nozzle, said supplemental chamber having a Pitot inlet which is connected to it above the liquid level therein and receives the impact of the fluid flow through said mixing tube, and a tube communicating with said supplemental fuel chamber below the normal fuel level therein and arranged to discharge fuel into said mixing tube at a point above said normal level and at said venturi contraction.



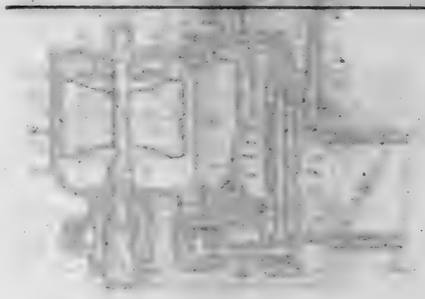
1,536,043. CARBURETOR. EARL A. BESSOM, Indianapolis, Ind., assignor to The Wheeler-Schebler Carburetor Co., Indianapolis, Ind., a Corporation of Indiana. Filed Apr. 30, 1917. Serial No. 165,323. 12 Claims. (Cl. 261—41.)

2. In a carburetor, the combination of a mixing tube, a main fuel nozzle discharging within said mixing tube, a throttle controlling the flow through said mixing tube and located therein on the discharge side of said fuel nozzle, and a supplemental fuel passage having two separated openings communicating with said mixing tube respectively on the discharge side and on the intake side of said throttle when the latter is closed, said supplemental fuel passage being provided with means for varying the effective size of the communication from one side to the other of the closed throttle through said two openings, said second opening being arranged so that as the throttle is opened the edge of the throttle sweeps over it.



6. In a carburetor, the combination of a mixing tube including a Venturi tube, a fuel nozzle located within said Venturi tube, a well having a restricted fuel supply passage, a tube dipping into said well, said fuel nozzle being provided with a main discharge opening having a fuel supply passage leading thereto and also with an auxiliary discharge opening communicating with the upper part of said tube dipping into said well, said well being provided with an inlet opening located within said Venturi tube and opening in a direction opposite to the flow through such Venturi tube so as to receive the impact due to the velocity of such flow, and a throttle and a choke valve located in said mixing tube respectively on the discharge and on the intake sides of said fuel nozzle.

1,536,044. METHOD AND MEANS TO FACILITATE THE DISTRIBUTION OF FUEL IN INTERNAL-COMBUSTION ENGINES. JOHN W. SWAN, Cleveland, Ohio. Filed Nov. 5, 1924. Serial No. 747,991. 23 Claims. (Cl. 123—52.)



1. A method of distributing a fuel mixture to an engine which consists in moving the mixture in a straight line to a zone from which it is distributed to a plurality of engine cylinders, and modifying said movement by forces which tend to distribute the mixture uniformly in all directions in a plane transverse to said movement.

1,536,045. SEARCHLIGHT. GEORGE E. YOUNG, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 19, 1922. Serial No. 613,588. 2 Claims. (Cl. 240—41.)

1. A light projector comprising in combination a reflector, a casing about said reflector, a frame supported within said casing to swing freely therein, and a source of light mounted on said frame to move together with said frame, said light and frame being mounted with respect to said reflector so that the source of light is maintained substantially at the focal point of the reflector in every position of the frame when the frame is swung about its axis.

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

Abraham & Straus, Inc., New York, N. Y. Men's and boys' clothing. 197,020; Apr. 7; Serial No. 205,047; published Jan. 13, 1925.

Ace Sheet Metal Works. (See Widman, Joseph.)

Altman, B., & Co., New York, N. Y. Clothing for women, misses, and children. 197,116; Apr. 7; Serial No. 204,691; published Jan. 13, 1925.

Aluminum Cooking Utensil Company, The, Pittsburgh, Pa. Cooking utensils made of aluminum and aluminum and aluminum alloys. 45,726; renewed Aug. 29, 1925.

American Crayon Company, The, Sandusky, Ohio. Candles. 196,992; Apr. 7; Serial No. 204,490; published Jan. 13, 1925.

Anaconda Copper Mining Company, New York, N. Y. Red-brass pipe. 197,028; Apr. 7; Serial No. 204,886; published Jan. 13, 1925.

Anderson Cotton Mills, Anderson, S. C. Sheetings and drillings. 46,079; renewed Sept. 5, 1925.

Arnold, Constable & Co., New York, N. Y. Hosiery, underwear, gloves, etc. 197,029; Apr. 7; Serial No. 204,808; published Jan. 13, 1925.

Atkins, Maurice W., New York, N. Y. Playing cards. 197,042–3; Apr. 7; Serial Nos. 205,850–1; published Jan. 20, 1925.

Auerbach & Guettel, doing business as The Palace Clothing Company, Kansas City, Mo. Men's and boys' suits. 197,093; Apr. 7; Serial No. 192,103; published Sept. 9, 1924.

B & H Drug Co., The. (See Bransky & Harris.)

Bair-Collins Co., Roundup, Mont. Coal. 197,056; Apr. 7; Serial No. 201,530; published Jan. 13, 1925.

Baker, Walter, & Company. (See Pierce, Henry L., assignor.)

Bamberger, L., & Company, Newark, N. J. Cigars. 197,063; Apr. 7; Serial No. 205,500; published Jan. 20, 1925.

Barbarino, Salvatore, Brooklyn, N. Y. Automobiles. 197,103; Apr. 7; Serial No. 205,464; published Jan. 6, 1925.

Benz & Cie. Rheinische Automobil- u. Motoren-Fabrik Aktiengesellschaft, Mannheim, Germany. Automobiles, luggage holders, mud guards, etc. 197,085; Apr. 7; Serial No. 201,828; published Jan. 6, 1925.

Berkeley Olive Association, The, Oroville, Calif. Canned ripe olives. 197,039; Apr. 7; Serial No. 205,985; published Jan. 20, 1925.

Bingham, Marion S., Decatur, Ala. Pavement. 197,079; Apr. 7; Serial No. 205,147; published Jan. 13, 1925.

Bird, James C., doing business as Robert A. Bird & Company, Glasgow, Scotland. Lithopone. 197,012; Apr. 7; Serial No. 200,708; published Oct. 21, 1924.

Blake, Moffitt & Towne, San Francisco, Calif. Writing and printing papers. 197,132; Apr. 7.

Bloomington Canning Co., Bloomington, Ill. Canned fruits and vegetables. 45,659; renewed Aug. 29, 1925.

Bloomington Canning Co., Bloomington, Ill. Canned fruits and vegetables. 45,678; renewed Aug. 29, 1925.

Bonker, Dr., Medicine Co. (See Glowacki, Zygmunt.)

Bonwit Teller & Co., New York, N. Y. Corsets. 196,988; Apr. 7; Serial No. 204,357; published Jan. 20, 1925.

Brandewie, Lee P., Houston, Ohio. Cow-tail holders. 197,095; Apr. 7; Serial No. 188,524; published Jan. 13, 1925.

Brandon Mills, Greenville, S. C. Sheetings and drills. 46,082; renewed Sept. 5, 1925.

Bransky & Harris, doing business as The B & H Drug Co., Norfolk, Va. Insecticides. 196,996; Apr. 7; Serial No. 203,251; published Dec. 16, 1924.

Breithaupt, Herman A., Des Moines, Iowa. Salad dressing and sandwich spread. 196,976; Apr. 7; Serial No. 201,534; published Jan. 20, 1925.

Cement, Hydraulic. Fort Scott Hydraulic Cement Co. 197,110; Apr. 7; Serial No. 202,290; published Jan. 20, 1925.

Cement, Portland. Sandusky Portland Cement Company. 44,957; renewed Aug. 1, 1925.

Eaves troughs, gutters, etc. J. Widman. 197,055; Apr. 7; Serial No. 205,459; published Jan. 6, 1926.

Gypsum precast slabs. Structural Gypsum Corporation. 197,098; Apr. 7; Serial No. 188,384; published Jan. 13, 1925.

Insulating and plaster-supporting board. Waldorf Paper Products Company. 197,102; Apr. 7; Serial No. 205,620; published Jan. 13, 1925.

Pavement. M. S. Bingham. 197,079; Apr. 7; Serial No. 205,147; published Jan. 13, 1925.

Roofing. Pioneer Paper Company. 197,122–3; Apr. 7.

Shingles and roofing material. Chatfield Manufacturing Company. 196,980; Apr. 7; Serial No. 202,003; published Dec. 23, 1924.

Weather strips. Niagara Metal Weather Strip Co. 197,118; Apr. 7.

CLASS 13.

Brass pipe, Red. Anaconda Copper Mining Company. 197,026; Apr. 7; Serial No. 204,886; published Jan. 13, 1925.

Chains, Trace. Cleveland Chain & Mfg. Co. 197,034; Apr. 7; Serial No. 204,758; published Jan. 13, 1925.

Cooking utensils. Aluminum Cooking Utensil Company. 45,726; renewed Aug. 29, 1925.

Labels and name plates, Metal. Stanley Manufacturing Company. 196,987; Apr. 7; Serial No. 204,205; published Jan. 13, 1925.

Radio sets, Nuts and screws for. A. E. Hill Manufacturing Company. 196,984; Apr. 7; Serial No. 203,520; published Jan. 13, 1925.

Rivets, tubular, solid, and pronged. Tubular Rivet & Stud Company. 45,490; renewed Aug. 22, 1925.

Toilet seats, Auxiliary. M. G. Hilpert. 197,082; Apr. 7; Serial No. 204,770; published Jan. 13, 1925.

CLASS 15.

Candles. American Crayon Company. 196,992; Apr. 7; Serial No. 204,490; published Jan. 13, 1925.

Candles. Standard Oil Company. 197,047; Apr. 7; Serial No. 205,615; published Jan. 20, 1925.

Candles. Standard Oil Company. 197,065; Apr. 7; Serial No. 205,237; published Jan. 13, 1925.

Gasoline. D. C. E. Sales Company. 196,999; Apr. 7; Serial No. 188,896; published Jan. 13, 1925.

Gasoline. Sunburst Refining Company. 197,040; Apr. 7; Serial No. 205,964; published Jan. 13, 1925.

Gasoline and benzine. Owl Drug Company. 196,974; Apr. 7; Serial No. 201,099; published Jan. 13, 1925.

Oil. Franklin Oil & Gas Company. 197,053; Apr. 7; Serial No. 204,765; published Jan. 13, 1925.

Oils and greases. G. L. Swift. 196,994; Apr. 7; Serial No. 136,859; published Jan. 13, 1925.

Oils and greases, Lubricating. Sherwood Bros. Inc. 197,004; Apr. 7; Serial No. 192,043; published Sept 9, 1924.

Oils Automobile tractor, truck, etc. W. A. Carran. 197,038; Apr. 7; Serial No. 204,583; published Jan. 13, 1925.

Oils, Base. Metalene Chemical Company. 197,031; Apr. 7; Serial No. 204,777; published Jan. 13, 1925.

Oils, Waterproofing, stuffing, and polishing. E. L. Post. 46,141; renewed Sept. 5, 1925.

CLASS 16.

Lithopone. J. C. Bird. 197,012; Apr. 7; Serial No. 200,708; published Oct. 21, 1924.

Paint product. Federal Varnish Company. 197,119; Apr. 7.

CLASS 17.

Cigars. L. Bamberger & Company. 197,053; Apr. 7; Serial No. 205,509; published Jan. 20, 1925.

Tobacco and snuff. Maclin-Zimmer-McGill Tobacco Co. 197,067; Apr. 7; Serial No. 205,168; published Jan. 20, 1925.

Tobacco, Bag granulated smoking. Threefoot Bros. & Co. 26,896; renewed Aug. 6, 1925.

CLASS 19.

Automobile brakes. Glendale Engineering Co. 197,081; Apr. 7; Serial No. 204,452; published Jan. 13, 1925.

Automobiles. S. Barbarino. 197,103; Apr. 7; Serial No. 205,464; published Jan. 6, 1925.

Automobiles and chassis. Rolls-Royce of America, Inc. 197,089; Apr. 7; Serial No. 197,394; published Jan. 13, 1925.

Automobiles, luggage holders, mud guards, etc. Benz & Cie. Rheinische Automobil- u. Motoren-Fabrik Aktiengesellschaft. 197,085; Apr. 7; Serial No. 201,828; published Jan. 6, 1925.

Gears, draft arms, hand brakes, etc., Spring and friction draft. Universal Draft Gear Attachment Co. 197,108; Apr. 7; Serial No. 204,427; published Jan. 6, 1925.

CLASS 21.

Insulators. W. T. C. Macallen Co. 44,477; renewed July 4, 1925.

CLASS 22.

Cards, Playing. M. W. Atkins. 197,042–3; Apr. 7; Serial No. 205,850–1; published Jan. 20, 1925.

Dice and game counters. Celluloid Company. 197,041; Apr. 7; Serial No. 205,855; published Jan. 20, 1925.

CLASS 23.

Locomotive sight-feed lubricators. Nathan Manufacturing Co. 45,896; renewed Aug. 29, 1925.

Packers, limit plugs, new-style common swabs, swab parts, etc. Robinson Packer Company. 197,002; Apr. 7; Serial No. 190,938; published Dec. 30, 1924.

Razors, Safety. Kampfe Bros. 26,980; renewed Aug. 20, 1925.

Screw drivers, wrenches, pliers, etc. Bridgeport Hardware Mfg. Corp. 197,009; Apr. 7; Serial No. 198,340; published Jan. 13, 1925.

Sewing-machine parts and attachments. Willcox & Gibbs Sewing Machine Company. 44,952; renewed Aug. 1, 1925.

Sewing machines. Willcox & Gibbs Sewing Machine Company. 45,835; renewed Aug. 29, 1925.

Sewing machines and attachments and parts. Willcox & Gibbs Sewing Machine Company. 44,722; renewed July 18, 1925.

Water wheels. James Leffel & Company. 45,829; renewed Aug. 15, 1925.

CLASS 26.

Optical frames. H. L. Pohs. 197,131; Apr. 7.

CLASS 29.

Toothbrushes. Raeburn Corporation. 197,066; Apr. 7; Serial No. 205,227; published Jan. 20, 1925.

CLASS 30.

Porcelain and porcelain goods. Königliche Porsellan Manufactur. 26,480–8; renewed Apr. 30, 1925.

CLASS 32.

Furniture, Certain named. Widdicomb Furniture Company. 45,751; renewed Aug. 29, 1925.

CLASS 33.

Glass lamp chimneys. Co-Operative Enterprise Glass Company. 197,027; Apr. 7; Serial No. 204,853; published Jan. 20, 1925.

CLASS 34.

Burners, Domestic oil. Standard Steam Corporation. 196,986; Apr. 7; Serial No. 203,910; published Jan. 6, 1925.

Fudge warmers. G. S. Ward. 197,096; Apr. 7; Serial No. 182,888; published Jan. 20, 1926.

Headlight reflectors, Metallic automobile. A. B. Hill Mfg. Co. 197,007; Apr. 7; Serial No. 196,301; published Jan. 6, 1925.

Heaters, Oil. Everbrite Stove Company. 197,019; Apr. 7; Serial No. 205,054; published Jan. 6, 1925.

Humidifying apparatus and ventilating apparatus. G. D. Doherty. 197,075; Apr. 7; Serial No. 205,745; published Jan. 20, 1925.

Stoves. W. J. Elliott Co. 197,126; Apr. 7.

Stoves and furnaces, Coal. Premier Warm Air Heater Company. 197,082; Apr. 7; Serial No. 204,194; published Jan. 13, 1925.

Stoves and ranges, Wood, coal, and gas. James Graham Manufacturing Co. 197,092; Apr. 7; Serial No. 194,861; published Jan. 20, 1925.

Rugs, mats, and laces. Pacific Orient Company. 207,755; Apr. 7.
Textile fabrics. Eagle Piece Dye Works. 204,590; Apr. 7.
Towels, Cotton. H. E. Reich. 208,068; Apr. 7.
Wool cloth for suits, overcoats, and wearing apparel. Ford Naylor, Inc. 209,178; Apr. 7.
Wool, cotton, and silk and mixtures of the same, Piece goods of. Societe Rodier. 206,546; Apr. 7.
Woolen piece goods. Forstmann & Huffmann Company. 209,634; Apr. 7.

CLASS 44.

Feet, Supports for the arches and other parts of the. Arrowsmith Manufacturing Company. 192,881; Apr. 7.
Manicure sets. Northam Warren Corporation. 209,186; Apr. 7.
Plasters and pads for treating abnormal growths and conditions of the feet. Arrowsmith Manufacturing Company. 192,878; Apr. 7.
Supports for the arches and other parts of the feet. Arrowsmith Manufacturing Company. 192,875; Apr. 7.
Supports for the arches and other parts of the feet. Arrowsmith Manufacturing Company. 192,877; Apr. 7.

CLASS 45.

Beverages and extracts and sirups for making same. Orange Frost Company. 205,773; Apr. 7.

CLASS 46.

Bread for infants and invalids, Prepared. Société l'Aliment Essential. 204,794; Apr. 7.
Cake. S. L. Domminey. 209,025; Apr. 7.
Candy. Foster Honey and Mercantile Co. 200,677; Apr. 7.
Candy. Robt. F. Mackenzie Co. 192,404; Apr. 7.
Candy. Sterling Chocolate Co., Inc. 209,708; Apr. 7.
Candy. Sweets Company of America, Incorporated. 204,379; Apr. 7.
Canned goods, condensed milk, potted meat, etc. W. H. Dunne Co. 205,000; Apr. 7.
Canned goods, marmalades, coffee, tea, etc. Frank C. Weber & Company. 200,128; Apr. 7.
Canned shrimp. Marine Products, Incorporated. 190,262; Apr. 7.
Canned spiced fish meats. Bosence & Eaton. 208,504; Apr. 7.
Coffee. Berdan Co. 208,220; Apr. 7.
Coffee, tea, food-flavoring extracts, and spices. St. Louis Coffee & Spice Mills. 192,504; Apr. 7.
Confection. P. Pickett. 208,007; Apr. 7.
Eggs. Challenge Cream and Butter Association. 208,640; Apr. 7.
Eggs and poultry. C. R. Holmes. 208,521; Apr. 7.
Flour, cereal breakfast food, poultry and stock feeds, Wheat and pancake. Cherry City Milling Company. 207,615; Apr. 7.
Flour, Wheat. Birdseye Flour Mills. 204,004; Apr. 7.
Flour, Wheat. Miner-Hillard Milling Co. 207,624; Apr. 7.
Flour, Wheat. Star Milling Company. 164,686; Apr. 7.
Flour, Wheat. Wilcox-Hayes Co. 207,638; Apr. 7.
Food, Cereal breakfast. Kellogg Company. 185,182; Apr. 7.
Food, Poultry and stock feeding. Western Maryland Dairy. 209,072; Apr. 7.
Fruits. Pelling, Stanley & Co. Ltd. 202,638; Apr. 7.
Fruits, fresh grapes, fresh citrous fruits, melons, and eggs and dressed poultry, Fresh deciduous. J. J. Graves. 208,894; Apr. 7.
Ham, bacon, and sausage. Chandler and Rudd Company. 196,431; Apr. 7.
Ice cream. Wheat's Ice Cream Company. 208,627; Apr. 7.
Ice in a cone, Shaved. Tru-Fruit Mfg. Co. 198,430; Apr. 7.
Icing preparations, food-flavoring extracts, and baking mixtures for cakes. Grennan Cake Corporation. 190,407; Apr. 7.
Marmalades, butters, preserves, and jellies, cranberry sauce, etc., Fruit. John Sexton and Company. 187,898; Apr. 7.
Mayonnaise and salad dressings, corn-meal mush, tartar sauce, etc. E. M. Eba. 206,225; Apr. 7.
Oil, Chocolated cod-liver. Scientific Products, Inc. 206,597; Apr. 7.
Oils, Olive. F. S. Rivera. 207,686; Apr. 7.
Oleomargarine. John F. Jelke Company. 209,217–8; Apr. 7.
Pickles, chowchow, pickled onions, canned baked beans, etc. H. J. Heins Company. 207,017; Apr. 7.
Pie fillings, cream filling and jelly powder. Columbia Food Products Co. 207,709; Apr. 7.
Sandwiches, Toasted. King Bun Company. 206,672; Apr. 7.
Sirup. Union Starch & Refining Company. 203,913–15; Apr. 7.
Sirup, Corn. Union Starch & Refining Company. 203,919; Apr. 7.
Sirup, Malt. P. A. Horback. 207,934; Apr. 7.
Sirups. H. T. Cottam & Company. 208,572; Apr. 7.
Sirups, Almond table. E. V. La Fontaine. 184,400; Apr. 7.
Stearine for food purposes, Deodorized, vegetable. Procter and Gamble Company. 208,312; Apr. 7.
Tea, coffee, flavoring extracts, spices, cocoa, etc. Athletic Tea Co. 164,841; Apr. 7.
Tinned and preserved fish and meat, fish and meat balls, sausage, farce fish and meat. A/S Firda. 204,590; Apr. 7.

CLASS 50.

Leather fabric, Imitation-. Western Shade Cloth Company. 207,701; Apr. 7.
Letters for changeable signs, Celluloid. Tablet & Ticket Company. 199,331; Apr. 7.
Shoe-trees. J. Goldsmith, jr. 209,083; Apr. 7.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 7TH DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Adams, Alfred R., Detroit, Mich. Reserve-supply-trapping means for gasoline tanks. 1,532,852; Apr. 7.
Adelson, Sophia, New York, N. Y. Ironing board. 1,532,978; Apr. 7.
Andrema Maschinenbau G. m. b. H. (See Deutsch, Hermann, assignor.)
Actien Gesellschaft für Anilin Fabrikation. (See Hohmann, Wilhelm, assignor.)
Actien Gesellschaft für Anilin Fabrikation. (See Spengler, O., and Thurm, assignors.)
Aguilar, Salvador S., San Francisco, Calif. Combination halter and bridle. 1,532,853; Apr. 7.
Ahlmann, Nikolai, Copenhagen, Denmark. Agglomerating ore and the like. 1,532,113; Apr. 7.
Aikman, Burton S., Whitefish Bay, assignor to National Brake & Electric Company, Milwaukee, Wis. Control system for compressors and the like. Re16,041; Apr. 7.
Akemann, Walther, Berlin-Dahlem, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Fire-control apparatus for naval guns. 1,532,794; Apr. 7.
Alber, Joseph J., and C. E. Dougherty, Brooklyn, N. Y. Hanger for displaying dressed poultry. 1,532,974; Apr. 7.
Aldinger, Robert A., Town Line, N. Y. Highway snowplow. 1,532,567; Apr. 7.
Allen, Joseph W., et al. (See Camden, Andrew B., assignor.)
Allen, S. H., et al. (See Camden, Andrew B., assignor.)
Altwegg, Jean, Lyon, France, assignor to Societe Chimique des Usines du Rhone, Paris, France. Preparation of alkylamine salts of the 4-hydroxy-3-acylamino-phenylarsonic acids. 1,532,361; Apr. 7.
American Balsa Wood Corporation. (See Broady, Harry W., assignor.)
American Can Company. (See Stollberg, Charles, assignor.)
American Chain Company. (See Weed, Harry D., assignor.)
American Chicle Company. (See Van Buren, John, assignor.)
American Cotton Oil Company, The. (See Gottschalk, Victor H., assignor.)
American Hoist & Derrick Company. (See Sederholm, John E., assignor.)
American Hotel Register Company. (See Hall, William H., assignor.)
American Rubber Company. (See Dennison, Charles H., assignor.)
American Standard Watch Case Company. (See Moylan, George D., assignor.)
American Telephone and Telegraph Company. (See Best, Fred H., assignor.)
American Telephone and Telegraph Company. (See Carson, John R., assignor.)
American Telephone and Telegraph Company. (See Thompson, George K., assignor.)
American Tube & Stamping Company, The. (See Keating, D. A., and Tatem, assignors.)
American Voith Contact Company. (See Rabus, Wilhelm, assignor.)
Andersen, Albert, and W. A. Chapin, assignors to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,532,854; Apr. 7.
Anderson, Carl E., Stratford, assignor to The Bryant Electric Company, Bridgeport, Conn. Electric switch. 1,532,855; Apr. 7.
Anderson, George F., Oklahoma City, Okla. Dispensing attachment for bottles. 1,532,975; Apr. 7.
Andes, Myrtle A., Huntington, W. Va. Music-roll receptacle. 1,532,496; Apr. 7.
Andreani, Findley E., Los Angeles, Calif., assignor to United States Bumper Co. Vehicle bumper. 1,532,218; Apr. 7.
Andren, Birger T., and J. Dilot, assignors to A. O. Smith Corporation, Milwaukee, Wis. Pressure-relieving means for drawing presses. 1,532,856; Apr. 7.
Andrew, James D., Englewood, N. J., assignor, by mesne assignments, to Welin Davit & Boat Corporation, Engaging and disengaging gear for ships' boats. 1,532,857; Apr. 7.
Annert, August W., Jersey City, N. J. Cleaning apparatus for water mains. 1,532,976; Apr. 7.
Anthony, Eugene, near Seattle, Wash. Controller for electrically-heated flatirons. 1,532,210; Apr. 7.
Antisell, Frank L., Perth Amboy, N. J. Skewback for furnaces. 1,532,568; Apr. 7.

Armentrout, Arthur L., Whittier, Calif., assignor of one-half to The Guiberson Corporation, Dallas, Tex. Piston. 1,532,293; Apr. 7.
Armstrong Cork Company. (See Busch, Herman F., assignor.)
Armstrong, John N. (See Hayes, W. F., and Armstrong.)
Arrouses, Frank P., and W. C. Hollins, Los Angeles, Calif. Plug box and plug. 1,532,220; Apr. 7.
Arundel, Thomas E., assignor of one-fourth to G. D. Shipherd and one-fourth to W. H. Metcalfe, Omaha, Nebr. Detector. 1,532,070; Apr. 7.
Atlas Powder Company. (See Djidics, Alexander, assignor.)
Atwood, Harry N., and G. B. Bains, 3d, Reading, Pa., assignors to Rubwood, Inc., Lawrence, Mass. Laminated landing wheel or the like. 1,532,725; Apr. 7.
Atwood, Harry N., Monson, assignor to Rubwood, Inc., Lawrence, Mass. Composite vehicle wheel. 1,532,977; Apr. 7.
Augenbraun, Peter F., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Automobile door lock. 1,532,294; Apr. 7.
Automatic Electric Company. (See Andersen, A., and Chapin, assignors.)
Automatic Electric Company. (See Baer, Fred L., assignor.)
Automatic Electric Company. (See Blessing, John G., assignor.)
Automatic Electric Company. (See Erickson, John, assignor.)
Automatic Electric Company. (See Richardson, Rodney G., assignor.)
Automatic Electric Company. (See Smith, S. R., and Savin, assignors.)
Automatic Electric Company. (See Willis, Bernard D., assignor.)
Avera, Edgar L., assignor to Interlocking Toggle Rim Company, Inc., Fort Valley, Ga. Automobile tire rim. 1,532,569; Apr. 7.
Bachmann, Edouard J. (See Ledru, M. J. L., and Bachmann.)
Bacon, Raymond F., New York, and C. H. Kidwell, New Brighton, N. Y., assignors to J. M. Van Heusen, Boston, Mass. Treatment of fabrics and the like. 1,532,114; Apr. 7.
Bacon, Raymond F., Pittsburgh, Pa., assignor, by mesne assignments, to The Fleischmann Co. Manufacture of yeast. 1,532,858; Apr. 7.
Badische Anilin- & Soda-Fabrik. (See Metzger, Richard, assignor.)
Badische, Anilin- & Soda-Fabrik. (See Meyer, K., and Orthner, assignors.)
Baer, Fred L., La Grange, assignor to Automatic Electric Company, Chicago, Ill. Calling device. 1,532,643; Apr. 7.
Bailey, Paul, Berkeley, Calif. Liquid meter. 1,532,295; Apr. 7.
Bailey, V. W., et al. (See Meredith, William, assignor.)
Bailey, William, Cleveland, Ohio. Armor coat. 1,532,382; Apr. 7.
Bains, George B., 3d. (See Atwood, H. N., and Bains.)
Baker, William H., Montreal, Quebec, Canada. Protecting warps from damage in looms. 1,532,667; Apr. 7.
Baker, William H., Montreal, Quebec, Canada. Protecting warps from damage in looms. 1,532,668; Apr. 7.
Balaban, Leon, Berlin-Friedenau, Germany. Circular wall. 1,532,978; Apr. 7.
Balch, Frank, Salem, Mass. Fluorescent screen and making same. 1,532,795; Apr. 7.
Balch, Frank, Salem, Mass. Fluorescent screen. 1,532,796; Apr. 7.
Balch, William H., Philadelphia, Pa. Self-defense shooting device. 1,532,859; Apr. 7.
Balderston, William. (See Graves, J., Balderston, and McEachron.)
Ball, Bert G., et al. (See Kinsella, William P., assignor.)
Balthasar, John and A. Viola, Jersey City, N. J. Air-supply and automatic control for furnace doors. 1,532,296; Apr. 7.
Baltimore Gas Engineering Corporation. (See Wilson, Robert E., assignor.)
Bamford, Arthur P., Irvington, N. J. Signal means for automobiles and the like. 1,532,221; Apr. 7.
Bankers Savings and Credit System Company, The. (See Kidwell, James A., assignor.)

Barbour, Russell C., Corsicana, Tex. Fishing tool. 1,532,979; Apr. 7.

Barker, Benjamin F., El Paso, Tex., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,532,115; Apr. 7.

Barksdale, Isaac R., and E. M. O'Connell, Glendale, assignors to C. C. Rambo and B. T. Wood, Los Angeles, Calif. Attachment for ironing presses or machines. 1,532,860; Apr. 7.

Barnett, John R., Cairo, Ill. Machine for making dovetail slots. 1,532,467; Apr. 7.

Bartels, Reinhard E., Lynn, Mass. Apparatus for attaching shoe parts. 1,532,861; Apr. 7.

Bartels, Reinhard E., Lynn, Mass. Fixing shank stiffeners in shoes. 1,532,862; Apr. 7.

Barteski, Emil A., St. Louis, Mo. Shooting apparatus. 1,532,669; Apr. 7.

Bartold, Samuel E., Chicago, Ill. Calendar-pad fastener. 1,532,863; Apr. 7.

Basham, Joseph F., assignor, by mesne assignments, to Evansville Tool Works, Incorporated, Evansville, Ind. Wedge for tool handles. 1,532,864; Apr. 7.

Basmaison, Pierre, San Francisco, Calif. Scraper. 1,532,570; Apr. 7.

Bastien, Paul, assignor to The Rubay Company, Cleveland, Ohio. Braking mechanism. 1,532,644; Apr. 7.

Batchelder, Edward C., assignor to Morley Button Manufacturing Company, Portsmouth, N. H. Clutch. 1,532,116; Apr. 7.

Batchelder, Edward C., assignor to Morley Button Manufacturing Company, Portsmouth, N. H. Severing mechanism for wet-paper machines. 1,532,117; Apr. 7.

Bausch, Carl L., and E. Hart, assignors to Bausch & Lomb Optical Company, Rochester, N. Y. Calipers. 1,532,297; Apr. 7.

Bausch & Lomb Optical Company. (See Bausch, C. L., and Hart, assignors.)

Bausman, Alonzo L., assignor to National Equipment Company, Springfield, Mass. Apparatus for coating confections. 1,532,797; Apr. 7.

Bawden, Samuel, Oakland, Calif. Rock-drill bit. 1,532,468; Apr. 7.

Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Tar extractor. 1,532,118; Apr. 7.

Bechaud, Leslie J., Coalinga, Calif. Tubing support. 1,532,670; Apr. 7.

Beck, Milo H., Oilton, Okla. Traffic signal. 1,532,865; Apr. 7.

Becker, Edmund H. (See Martus, M. L., Becker, and Schoenmehl.)

Becker, Leonard, Wiesbaden, Germany. Vaporizer for internal-combustion engines. 1,532,866; Apr. 7.

Bedford, Clayton W., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Vulcanizing rubber. 1,532,645; Apr. 7.

Bedford, Clayton W., Akron, Ohio, and R. L. Sibley, Elizabeth, N. J., assignors to The Goodyear Tire & Rubber Company, Akron, Ohio. Thiocarbanilide derivative. 1,532,646; Apr. 7.

Bedingfield, John A., Fort Valley, Ga., assignor to Interlocking Toggle Rim Company. Automobile tire rims. 1,532,571; Apr. 7.

Belding, Warren S., Philipsburg, Pa. Rifle-cleaning-rod tip. 1,532,222; Apr. 7.

Belding, Warren S., Philipsburg, Pa. Stop collar for rifle-cleaning rods. 1,532,223; Apr. 7.

Bell, Charles A., Medina, N. Dak. Combined collar button and tie fastener. 1,532,168; Apr. 7.

Benjamin, Bert R., Oak Park, Ill., assignor, by mesne assignments, to International Harvester Company. Controlling mechanism for harvesters. 1,533,057; Apr. 7.

Bennett, Alan M. (See Brown, H. A., and Bennett.)

Bennett, Albert J., Chicago, Ill. Waist-belt holder. 1,532,671; Apr. 7.

Bennett, George S. and L. L., Massena, N. Y. Faucet. 1,533,077; Apr. 7.

Bennett, Louis L. (See Bennett, George S. and L. L.)

Berg, John, assignor to Metal Specialties Mfg. Company, Chicago, Ill. Motor-vehicle visor. 1,532,726; Apr. 7.

Berger, Otto A. R., Chicago, Ill. Cigar-light extinguisher. 1,532,363; Apr. 7.

Bergman, Lars H., assignor to Raymond Bros. Engineering Co., Chicago, Ill. Method of and apparatus for preparing, feeding, and burning pulverized fuel. 1,532,647; Apr. 7.

Berman, Oscar A., Cincinnati, Ohio. Manufacture of condensers. 1,532,364; Apr. 7.

Bertona, Salvatore, New York, N. Y. Artificial-flower machine. 1,532,672; Apr. 7.

Bertrand, Joseph H., jr., Albany, N. Y. Automobile bumper. 1,532,673; Apr. 7.

Besso, Michele A., Rome, Italy, and F. P. Habicht, Schwanden, Switzerland. Making cloth substitute. 1,532,648; Apr. 7.

Best, Fred H., Westfield, N. J., assignor to American Telephone and Telegraph Company. Measuring transmission. 1,532,169; Apr. 7.

Bieber, Charles P., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Fiber-beating machine. 1,532,649; Apr. 7.

Bienvenu, Achille, Montreal, Quebec, Canada. Carton. Des. 66,963; Apr. 7.

Bigelow-Bruno Manufacturing Company. (See Bruno, Carl O., assignor.)

Bilger, Harry E., Chicago, Ill. Form. 1,532,365; Apr. 7.

Bingay, Robert V., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Radiator for transformer tanks. 1,532,887; Apr. 7.

Bishop, Fred A., Petersburg, Va. Antiglare headlight. 1,532,980; Apr. 7.

Bixler, Claude V., Frankfort, Ky. Radiator. 1,532,727; Apr. 7.

Black, Lee J., Beaumont, Tex. Wrench. 1,532,469; Apr. 7.

Black, Lee J., Beaumont, Tex. Hydraulic rotary coretaking device. 1,533,078; Apr. 7.

Blackburn, Jasper, Webster Groves, Mo. Braking device. 1,532,868; Apr. 7.

Blackburn, Jasper, St. Louis, Mo. Side closure for automobiles. 1,532,869; Apr. 7.

Blackburn, Jasper, Webster Groves, Mo. Braking device. 1,532,870; Apr. 7.

Blackett, Victor S., Moncton, New Brunswick, Canada. Track supporting device. 1,532,981; Apr. 7.

Blackmore, Lloyd, Highland Park, assignor to General Motors Corporation, Detroit, Mich. Vehicle having brakes. 1,532,470; Apr. 7.

Blair, Robert S., Sound Beach, Conn. Current-collecting apparatus. 1,532,224; Apr. 7.

Blakeslee, Howard R. (See Bouillon, C., and Blakeslee.)

Blessing, John G., assignor to Automatic Electric Company, Chicago, Ill. Automatic calling device. 1,532,674; Apr. 7.

Blessing, John G., assignor to Automatic Electric Company, Chicago, Ill. Automatic calling device. 1,532,675; Apr. 7.

Blessing, John G., assignor to Automatic Electric Company, Chicago, Ill. Automatic calling device. 1,532,676; Apr. 7.

Blessing, John G., assignor to Automatic Electric Company, Chicago, Ill. Automatic calling device. 1,532,677; Apr. 7.

Bloch, Franz G., Boblingen, Germany. Level-indicating device. 1,532,871; Apr. 7.

Blom, Albert, Stockholm, Sweden. Refrigerating arrangement for drinks and food. 1,532,982; Apr. 7.

Bloom, David, Berkeley, Calif. Basket. 1,532,298; Apr. 7.

Blum, Hosmer, San Francisco, Calif. Washing machine. 1,532,366. Apr. 7.

Bockman, William H., North Webster, Ind. Rowlock. 1,532,367; Apr. 7.

Bodkin, John A., New York, N. Y. Tie plate and rail anchor. 1,532,983; Apr. 7.

Boehringer, John A., Springfield, N. Y. Lighting-fixture arm. Des. 66,964; Apr. 7.

Boehringer, John A., Springfield, N. Y. Lighting-fixture arm. Des. 66,965; Apr. 7.

Boehringer, John A., Springfield, N. Y. Lamp husk for lighting fixtures. Des. 66,966; Apr. 7.

Bold, Frederick W., Chelsea, assignor to C. H. Pearson, Brookline, Mass. Fuse. 1,532,369; Apr. 7.

Bold, Fredrick W., Chelsea, assignor to C. H. Pearson, Brookline, Mass. Fuse. 1,532,368; Apr. 7.

Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Car roof. 1,532,872; Apr. 7.

Boom, Clifford A., Flint, assignor to General Motors Corporation, Detroit, Mich. Vehicle having brakes. 1,532,471; Apr. 7.

Booth, James S., Detroit, Mich. Vehicle spring. 1,532,678; Apr. 7.

Borduas, Hyacinthe O., Montreal, Quebec, Canada. Spinning wheel. 1,532,618; Apr. 7.

Borg & Beck Company. (See Nelson, Gustave C., assignor.)

Borthwick, Craigie G., Edinburgh, Scotland. Device for use in practicing the game of golf. 1,532,984; Apr. 7.

Borroughs, Joseph N., Oakland, Calif. Towel cabinet. 1,532,370; Apr. 7.

Bouffart, Maurice, Herstal, Belgium. Pressure-indicating apparatus. 1,532,170; Apr. 7.

Bouillon, Constant, and H. R. Blakeslee, assignors to The Hendey Machine Company, Torrington, Conn. Lathe attachment. 1,532,798; Apr. 7.

Boulden, Edward W., and C. J. Cowles, Sioux City, Iowa. Safety appliance for railway trains. 1,532,119; Apr. 7.

Bradley, Albert E., Bridgeport, Conn. Cue tip. 1,532,985; Apr. 7.

Bradley, George W., West Paterson, N. J. Golf club. 1,532,679; Apr. 7.

Braecklein, Alfred H., assignor of one-half to M. A. Braecklein, Baltimore, Md. Surgical device. 1,532,209; Apr. 7.

Braecklein, Marguerite A. (See Braecklein, Alfred H., assignor.)

Branson, Verne L., Lexington, Nebr. Harrow attachment for cultivators. 1,532,986; Apr. 7.

Brèguet, Louis G. and P. A., Geneva, Switzerland. Wire reducing. 1,532,873; Apr. 7.

Brèguet, Paul A. (See Brèguet, Louis G. and P. A.)

Brewer, Humphries W., Du Bois, Pa. Portable milling machine. 1,532,650; Apr. 7.

Brewster, Franklin W., Central Falls, assignor to Manville Jenckes Company, Pawtucket, R. I. Yarn-slicing machine. 1,532,572; Apr. 7.

Brice, John F. (See Singer, J. E., and Brice.)

Bridwell, William S. (See Snell, S., and Bridwell.)

Broady, Harry W., Bayside, N. Y., assignor, by mesne assignments, to American Balsa Wood Corporation. Built-up panel. 1,532,874; Apr. 7.

Brobst, Frank J., Portland, Oreg., assignor of one-half to B. L. Schneer, Habana, Cuba. Combination workstand and turntable. 1,532,726; Apr. 7.

Brockway, Carl P., assignor to Industrial Research Corporation, Toledo, Ohio. Electric starter. 1,533,072; Apr. 7.

Broderick & Bascom Rope Co. (See Grice, Frederick W., assignor.)

Brown, Bruce K., assignor to Commercial Solvents Corporation, Terre Haute, Ind. Manufacture of rubber goods. 1,532,651; Apr. 7.

Brown, Hugh A., and A. M. Bennett, Erie, Pa. Supplying current for arc welding and apparatus therefor. 1,532,680; Apr. 7.

Brown, James, Pawtucket, R. I. Puzzle. 1,532,875; Apr. 7.

Brown, Peter P., Lusk, Wyo. Window protector. 1,532,472; Apr. 7.

Brown, Phelps, I. B. Hendrickson, H. H. Clark, and T. G. Louis, Springfield, assignors to Wico Electric Company, West Springfield, Mass. Magneto. 1,532,799; Apr. 7.

Browne, Harry E. and W. M., Plainfield, N. J. Signal for an automobile or other vehicle and street and road purposes. 1,532,876; Apr. 7.

Browne, Walter M. (See Browne, Harry E. and W. M.)

Bruno, Carl O., assignor to Bigelow-Bruno Manufacturing Company, Chicago, Ill. Timer. 1,532,573; Apr. 7.

Brunson, William H., and C. Jamison, Bren, Calif. Rotary drilling tool. 1,532,371; Apr. 7.

Bryant Electric Company, The. (See Anderson, Carl E., assignor.)

Bryant, William O., Los Angeles, Calif., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,532,120; Apr. 7.

Bryce Brothers Company. (See Bryce, Gerard S., assignor.)

Bryce, Gerard S., assignor to Bryce Brothers Company, Mount Pleasant, Pa. Top for beverage mixers. 1,532,681; Apr. 7.

Buck, Harvey A., Toledo, Ohio. Gas saver. 1,532,372; Apr. 7.

Buck, Herman J., assignor to Mathews Conveyer Company, Ellwood City, Pa. Automatic brake for straight-lift elevators. 1,532,877; Apr. 7.

Buckeye Steel Castings Company, The. (See Wolfe, Harry H., assignor.)

Budd, Edward G., Manufacturing Company. (See Meadowcroft, Joseph W., assignor.)

Bugbee, Lucian W., assignor to Onepiece Bifocal Lens Company, Indianapolis, Ind. Lens protractor. 1,532,878; Apr. 7.

Bugbee, Lucian W., assignor to Onepiece Bifocal Lens Company, Indianapolis, Ind. Prism-measuring device in parallel systems. 1,532,879; Apr. 7.

Bugbee, Lucian W., jr., assignor to Onepiece Bifocal Lens Company, Indianapolis, Ind. Mirrored lens protractor. 1,532,880; Apr. 7.

Bumgarner, Stephen O., Waverly, Ohio. Gate and operating mechanism. 1,532,987; Apr. 7.

Burgess, Edward W., Chicago, Ill., assignor, by mesne assignments, to International Harvester Company. Tractor-operated implement. 1,533,058; Apr. 7.

Burgi, Herman, assignor of one-half to C. H. Tenney, Springfield, Mass. Continuous process of making coke and illuminating gas. 1,532,300; Apr. 7.

Burmeister, Paul, near Fulda, assignor of one-half to C. West and one-half to D. M. Mead, Fulda, Minn. Door-operating mechanism. 1,532,171; Apr. 7.

Burns, Jabes, & Sons. (See Burns, W. G., and Maxon, assignors.)

Burns, William G., New York, N. Y., and H. R. Maxon, Muncie, Ind., assignors to Jabes Burns & Sons. Roaster. 1,532,574; Apr. 7.

Busch, Herman F., Millvale, assignor to Armstrong Cork Company, Pittsburgh, Pa. Textile roll and making the same. 1,532,682; Apr. 7.

Bushnel, Charles S., Rochester, assignor to General Railway Signal Company, Gates, N. Y. Track element for train-control systems. 1,532,373; Apr. 7.

Butler, Charles R., Indianapolis, Ind. Piston. 1,532,121; Apr. 7.

Byrne, Charles F. S., Janesville, Wis., assignor to General Motors Corporation, Detroit, Mich. Exhaust fire screen. 1,532,473; Apr. 7.

C. and O'R. Corporation. (See Chalupa, E., and O'Rourke, assignors.)

Cadwell, Sidney M., Leonia, N. J., assignor to The Naugatuck Chemical Company. Vulcanizing rubber and product obtained thereby. 1,532,225; Apr. 7.

Cadwell, Sidney M., Leonia, N. J., assignor to The Naugatuck Chemical Company. Vulcanising rubber and product obtained thereby. 1,532,226; Apr. 7.

Cadwell, Sidney M., Leonia, N. J., assignor to The Naugatuck Chemical Company. Vulcanizing rubber and product obtained thereby. 1,532,227; Apr. 7.

Cady, Sherman W., Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, Chicago, Ill. Traction-actuated lift mechanism. 1,533,059; Apr. 7.

Calse, Charles. (See Kaiser, Charles.)

Camden, Andrew B., Durant, Okla., assignor to J. W. Allen and S. H. Allen, Temple, Tex. Traffic signal and signboard. 1,532,575; Apr. 7.

Camp, Curtis B., trustee. (See Chandler, Milford G., assignor.)

Campbell, A. S., Company. (See Campbell, Alphonso S., assignor.)

Campbell, Alphonso S., West Medford, assignor to A. S. Campbell Company, Boston, Mass. Window frame. 1,532,374; Apr. 7.

Campbell, Alphonso S., West Medford, assignor to A. S. Campbell Company, Boston, Mass. Window and window frame. 1,532,375; Apr. 7.

Campbell, Frederick H. (See Lloyd, G. F., Clapp, and Campbell.)

Canady, John F. (See Russell, W. C., and Canady.)

Cappi, Gaetano, San Francisco, Calif. Baking and cooking utensil. 1,532,881; Apr. 7.

Caracristi, Virginius Z., Bronxville, assignor to Locomotive Pulverized Fuel Company, New York, N. Y. Pneumatic conveying apparatus and the like. 1,532,122; Apr. 7.

Carborundum Company, The. (See Fitzpatrick, John, assignor.)

Carborundum Company, The. (See Smith, Edmund S., assignor.)

Carlson, Gustaf E., Oakland, Calif. Shrinkproof stud support. 1,532,729; Apr. 7.

Carlson, Gustave O., Weathersfield, assignor of one-third to H. Hanson, Middletown, and one-third to C. O. Hedstrom, Portland, Conn. Game apparatus. 1,532,576; Apr. 7.

Carpenter, Benjamin H., Boston, Mass. Coupling for rope. 1,532,882; Apr. 7.

Carpenter, Charles R., Robbinsdale, Minn. Hair waver. 1,532,883; Apr. 7.

Carpenter, Frederick S., assignor to The Hartford Rubber Works Company, Hartford, Conn. Deflecting device for conveyer systems. 1,532,228; Apr. 7.

Carr Fastener Company. (See Carr, Fred S., assignor.)

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Apparatus for locating securing parts of separable fasteners to carrying fabrics. 1,532,376; Apr. 7.

Carr, Fred S., Newton, Mass., assignor to Carr Fastener Company, Cambridge, Mass. Apparatus for locating securing parts of separble fasteners to carrying fabrics. 1,532,377; Apr. 7.

Carroll, Elbert H., assignor to Morgan Construction Company, Worcester, Mass. Machine for planing helical gears. 1,532,378; Apr. 7.

Carson, John R., New York, N. Y., assignor to American Telephone and Telegraph Company. Receiving weak signal currents. 1,532,172; Apr. 7.

Carter, Dolph C., Cleveland, Ohio. Dummy lay-out for advertisers. 1,532,379; Apr. 7.

Carter, Ray L., Syracuse, N. Y. Combined mortising and shaping machine. 1,532,683; Apr. 7.

Carter, William A., Milwaukee, Wis. Facing wall structures. 1,532,684; Apr. 7.

Cass, Olive S. (See Sandbank, Olive.)

Casto, Isabel B., and R. E. Hooper, Half Moon Bay, Calif. Sliding cover for tablets and the like. 1,532,527; Apr. 7.

Citizens of the United States. (See Cruess, William V.)

Chalupa, Emil, and T. F. O'Rourke, New York, N. Y., assignors to C. and O'R. Corporation. Smoke and gas strainer and filter. 1,532,730; Apr. 7.

Champion, Louis F. (See Corey, W. G., Knight, and Champion.)

Chandler, Milford G., Chicago, assignor, by mesne assignments, to C. B. Camp, trustee, Oak Park, Ill. Carburetor. 1,532,229; Apr. 7.

Chandler, Milton E., assignor to Stromberg Motor Devices Company, Chicago, Ill. Internal-combustion engine. 1,532,619; Apr. 7.

Chapin, Charles W., Louisville, Ky. Vehicle brake. 1,532,884; Apr. 7.

Chapin, William A. (See Andersen, A., and Chapin.)

Chapman, B. E., et al. (See Hayes, W. F., and Armstrong, assignors.)

Chapman, Washington H., Detroit, Mich. Thermopressure regulator. 1,532,988; Apr. 7.

Chemische Fabrik auf Actien (vorm. E. Schering). (See Emde, Hermann, assignor.)

Chemische Fabrik Griesheim Elektron. (See Suchy, R., and Michel, assignors.)

Chore-Utensils Corporation of America, The. (See Kingman, Russell B., assignor.)

Christensen, Christian N., Minneapolis, Minn. Brick jointer and raker. 1,532,380; Apr. 7.

Christoffersen, Henry M., Sidney, Nebr. Exercising machine. 1,532,474; Apr. 7.

Clapp, Frank B. (See Lloyd, G. F., Clapp, and Campbell.)

Clark Brothers Company. (See Reid, Joseph S., assignor.)

Clark, Emma E., Hammond, Ind., assignor to The Wilson Fastener Company, Cleveland, Ohio. Lingerie clasp. 1,532,381; Apr. 7.

Clark, Frederick J., Buffalo, N. Y., assignor to Steam Pressing Iron Company, Chicago, Ill. Pressing apparatus. 1,532,382; Apr. 7.

Clark, Harold H. (See Brown, P., Hendrickson, Clark, and Louis.)

Clark, Irwin A., Parco, Wyo., assignor to Producers and Refiners Corporation. Treating oils with prepared clays. 1,533,060; Apr. 7.

Clas, Angelo R., Toledo, Ohio. Window-control mechanism. 1,532,230; Apr. 7.

Cleland, James E., assignor of one-half to H. W. Lucas, Montreal, Quebec, Canada. Manufacturing goods of india rubber and other plastics. 1,532,383; Apr. 7.

Climax Engineering Company. (See Wishart, W., and Morrell, assignors.)

Cloos, Peter H., jr., Watertown, S. Dak. Coupling tightener bar. 1,532,173; Apr. 7.

Cole, Don, assignor of one-half to J. A. Dienner, Chicago, Ill. Internal-combustion engine. 1,532,384; Apr. 7.

Coleman, Paul H., and F. W. Stout, Lynch Mines, Ky. Route indicator for vehicles. 1,532,731; Apr. 7.

Coleman, Thomas E., assignor to Madison-Kipp Corporation, Madison, Wis. Lubricator. 1,532,620; Apr. 7.

Collins, Douglas, Salisbury, N. C. Cigarette holder. 1,532,732; Apr. 7.

Commercial Solvents Corporation. (See Brown, Bruce K., assignor.)

Commonwealth White Lead and Paints Proprietary Limited. (See Lloyd, G. F., Clapp, and Campbell, assignors.)

Conant, Arthur P. (See Wadsworth, A. W., and Conant.)

Conklin, David B., Brooklyn, N. Y. Game. 1,532,128; Apr. 7.

Connors, John W., Dedham, assignor to The Reece Button Hole Machine Company, Boston, Mass. Buttonhole-sewing machine. 1,532,301; Apr. 7.

Consolidated Car-Heating Company. (See Hynes, Lee P., assignor.)

Cook, Albert E., Evanston, and T. Van Tuyl, Kankakee, Ill.; said Van Tuyl assignor to said Cook. Compensating load-carrying device. 1,532,124; Apr. 7.

Cooke, George T. (See Everett, I., and Cooke.)

Coons, Charles H., assignor of three-fifths to The Tissue Company, Saugerties, N. Y. Napkin-folding machine. 1,532,475; Apr. 7.

Cooper, Charles W., Pittsburgh, Pa. Extension clothesline support. 1,532,302; Apr. 7.

Corcoran, Cornelius B., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,532,685; Apr. 7.

Cordier, Gustave, Calais, France. Machine for cutting, shortening, and shearing the loose threads of machine-made lace and all similar goods. 1,532,989; Apr. 7.

Corey, William G., Berkeley, R. C. Knight, and L. F. Champion, Oakland, Calif. Rodless deep-well pump. 1,532,231; Apr. 7.

Corfield, Stephen H., Santa Maria, Calif., assignor to Distillation Products Co., Phoenix, Ariz. Apparatus for the distillation of materials. 1,532,686; Apr. 7.

Cormier, Phillippe D., New Bedford, Mass. Apparatus for removing carbon from internal-combustion engines. 1,532,528; Apr. 7.

Coryell, Charles N., Mamaroneck, N. Y. Hinge. 1,532,885; Apr. 7.

Cowles, Charles J. (See Boulden, E. W., and Cowles.)

Cowles, Irving, Chicago, Ill. Hose coupling. 1,532,886; Apr. 7.

Cox, Stephen A. D. (See Meredith, W., Cox, and Foster.)

Cox, Walter M., Jersey City, N. J. Game apparatus for playing indoor football. 1,532,385; Apr. 7.

Cozzens, William W., San Jose, Calif. Evaporator. 1,532,308; Apr. 7.

Crandall Packing Company. (See Travers, John L., assignor.)

Croakman, Elmer G. (See Young, J., and Croakman.)

Crocker, James M., Terre Haute, Ind. Wrench. 1,532,174; Apr. 7.

Crompton & Knowles Loom Works. (See Lockwood, G. D., and Wakefield, assignors.)

Cruess, William V., Berkeley, Calif., dedicated, by mesne assignments, to the citizen of the United States. Glacéing fruit. 1,532,476; Apr. 7.

Csengery, George, South Norwalk, Conn. Boat. 1,532,990; Apr. 7.

Cullen, Joseph F., Midvale, Utah, assignor to United States Smelting, Refining & Mining Company. Making the arsenate of calcium and analogous elements. 1,532,577; Apr. 7.

Cullen, Joseph F., Midvale, Utah, assignor to United States Smelting, Refining & Mining Company, Portland, Me. Making the arsenate of calcium and analogous elements. 1,532,578; Apr. 7.

Cullinan, John J., Chicago, Ill. Tennis racket. 1,532,232; Apr. 7.

Culver, J. C. (See Palmgren, Philip, assignor.)

Culver, Lewis O., West Pittstown, Pa. Fastening device for jar tops. 1,532,585; Apr. 7.

Cummings, James, and H. A. M. Wilson, Sydney, New South Wales, Australia. Cinematograph machine. 1,532,386; Apr. 7.

Cunning, Donald V., Youngstown, Ohio. Body brace. 1,532,804; Apr. 7.

Cunningham, Edgar A., and H. Homad, Mallory, W. Va. Mining-car coupling. 1,532,887; Apr. 7.

Currier, Hiram D., and W. G. Shull, assignors to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,532,652; Apr. 7.

Currier, Hiram D., and W. G. Shull, assignors to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,532,888; Apr. 7.

Cutler-Hammer Mfg. Co., The. (See Hodgson, Howard E., assignor.)

Daane, Arthur J., Chicago, Ill. Ink-distributing roller. 1,533,062; Apr. 7.

Daane, Arthur J., Chicago, Ill. Vibrator for printing presses. 1,533,063; Apr. 7.

Daane, Arthur J., Chicago, Ill. Vibrator for printing presses. 1,533,064; Apr. 7.

Daane, Arthur J., Chicago, Ill. Vibrator for printing presses. 1,533,065; Apr. 7.

Daechsel, Frederick A., Ottawa, Ontario, Canada. Oil-burning apparatus. 1,532,733; Apr. 7.

Dahlberg, Arnold O., San Francisco, Calif. Milk-heating apparatus. 1,532,283; Apr. 7.

Daimler-Motoren-Gesellschaft. (See Gauss, Friedrich, assignor.)

Dakin, Francis J. V. (See Fries, Edward A., assignor.)

Darling, Frank, and J. Roche, Battle Creek, Mich. Balancing device for polishing wheels. 1,532,687; Apr. 7.

Darne, Régis, assignor to Etablissements Darne, St. Etienne, France. Device for regulating the rate of fire in automatic firearms. 1,532,305; Apr. 7.

Dauch, Alan D., assignor to George J. Hagan Company, Pittsburgh, Pa. Enameling furnace. 1,532,621; Apr. 7.

David, Carl B. (See Harting, W. C., Sindelar, and David.)

Davidson, John, Burton-on-Trent, England. Internal-combustion engine. 1,532,306; Apr. 7.

Davis, Augustine, jr. (See Shield, Paul S., assignor.)

Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. 1,532,175; Apr. 7.

Davis, Harry P., Hempstead, N. Y. Terminal connecter. 1,532,889; Apr. 7.

Davis, Oscar H., Kansas City, Mo. Smoking pipe. 1,532,387; Apr. 7.

Davison, Clarence M., assignor to Poole Engineering and Machine Company, Baltimore, Md. Valve-reseating tool. 1,532,653; Apr. 7.

Day, Wallace E., assignor to Spencer Elevator Company, San Francisco, Calif. Elevator safety appliance. 1,532,529; Apr. 7.

Dayton Steel Racquet Company, The. (See Larned, William A., assignor.)

Dean, John, Victoria, British Columbia, Canada. Pole and post protector. 1,532,734; Apr. 7.

De Cew, Judson A., Mount Vernon, N. Y. Treating paper. 1,532,579; Apr. 7.

De Loach, Douglas D. (See Foss, C. C., and De Loach.)

De Mesa, Bertie, assignor to Victor-Dye Limited, London, England. Tennis and badminton racket. 1,532,991; Apr. 7.

Denning, Ansel C., deceased, Johnson City; Workers Trust Company, administrator, assignor to Endicott Johnson Corporation, Endicott, N. Y. Floor and process of laying floor. 1,533,074; Apr. 7.

Dennison, Charles H., Quincy, assignor to American Rubber Company, East Cambridge, Mass. Superficially-finished rubber article or material and producing same. 1,532,234; Apr. 7.

Dent Hardware Company, The. (See Schrader, Thomas O., assignor.)

Detroit Vapor Stove Company. (See Sherman, Alvin G., assignor.)

De Turk, Ira F., assignor to C. W. Wass, Detroit, Mich. Gauge attachment for fuel tanks. 1,532,477; Apr. 7.

Deutsch, Hermann, Berlin-Groszlichterfelde, assignor to Adrema Maschinenbau G. m. b. H., Berlin, Germany. Addressing machine. 1,532,890; Apr. 7.

Deutsche Telephonwerke G. m. b. H. (See Fassbender, H., and Habann, assignors.)

Dewey, Haywood G. (See Jones, J. G., and Dewey.)

Dexter, Wallace G., Brooklyn, N. Y. Combined switch and fuse. 1,532,235; Apr. 7.

Dickerson, Ernest B., Bishop, Tex. Variable-capacity pump. 1,532,735; Apr. 7.

Dienner, John A. (See Cole, Don, assignor.)

Dietrich, Max, Halle-on-the-Saale, Germany, assignor to A. Schmid, New York, N. Y. Trousers stretcher. 1,532,586; Apr. 7.

Dillon, Lester E., Jefferson, S. Dak. Tire tread. Des. 66,967; Apr. 7.

Dilot, John. (See Andren, B. T., and Dilot.)

Distillation Products Co. (See Corfield, Stephen H., assignor.)

Dixon, Ralph H. (See Van Pelt, E. M., and Dixon.)

Djidics, Alexander, Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Device for firing explosives by electricity. 1,532,125; Apr. 7.

Dodds, Ethan I., Central Valley, N. Y., assignor to Flannery Bolt Company, Pittsburgh, Pa. Stay bolt for boilers. 1,532,736; Apr. 7.

Dohrmann, Albert C., Chicago, Ill. Safety latch for doors. 1,532,737; Apr. 7.

Donaldson Art Sign Company, The. (See Kisinger, William S., assignor.)

Dorward, Raymond, Jasonville, assignor to Insley Manufacturing Company, Indianapolis, Ind. Excavator. 1,533,061; Apr. 7.

Doty, Edmund F., North Tonawanda, N. Y. Centrifugal pump. 1,532,992; Apr. 7.

Dougherty, Charles E. (See Alber, J. J., and Dougherty.)

Douglas, John, Company, The. (See Hohmeister, Arthur E., assignor.)

Douglass, Leon F., Menlo Park, Calif. Method and apparatus for producing multiple-image effects in photography. 1,532,236; Apr. 7.

Dover, Ray W., Cambridge, Ohio. Toy. 1,532,307; Apr. 7.

Downing, Roswell, Oneida, N. Y. Glareshield. 1,532,308; Apr. 7.

Dowsett, Harry M., London, England, assignor to Radio Corporation of America. Wireless-telegraph apparatus for aeroplanes. 1,532,388; Apr. 7.

Dräger, Alexander B., Lubeck, Germany. Self-contained breathing apparatus. 1,532,654; Apr. 7.

Draper, Charles T., assignor to The Draper Manufacturing Company, Cleveland, Ohio. Producing and attaching closures for sheet-metal containers. 1,532,891; Apr. 7.

Draper Corporation. (See Davis, Harry A., assignor.)

Draper Corporation. (See Rhoades, Alonzo E., assignor.)

Draper Corporation. (See Schofield, Robert, assignor.)

Draper Manufacturing Company, The. (See Draper, Charles T., assignor.)

Dreyfus, Milton A., et al. (See Girard, Alfred O., assignor.)

Duda, Oswald, Houston, Tex., assignor to Reed Roller Bit Company. Lubricator for deep-well drills and the like. 1,532,552; Apr. 7.

Duda, Oswald, Houston, Tex., assignor, by mesne assignments, to Reed Roller Bit Company. Lubricator for deep-well drills and the like. 1,532,553; Apr. 7.

Duda, Oswald, Houston, Tex., assignor to Reed Roller Bit Company. Lubricator for deep-well drills and the like. 1,532,554; Apr. 7.

Dunsweiler, Carl J., assignor to Willard Storage Battery Company, Cleveland, Ohio. Storage-battery container. Des. 66,968; Apr. 7.

Durabilt Steel Locker Co. (See Kaser, Everett D., assignor.)

Durscent, William C. (See Sturt, Alfred T., assignor.)

Durham, Carroll E., Redford Township, Wayne County, assignor of one-half to T. B. Moore, Detroit, Mich. Bearing. 1,532,993; Apr. 7.

Dwyer, William C. (See Robinson, C. W., and Dwyer.)

Dysthe, Martinius, Minneapolis, Minn. Check-stub holder. 1,532,389; Apr. 7.

Earhart, Frank A., Philadelphia, Pa. Apparatus for forming and shaping hat brims. 1,532,892; Apr. 7.

Earle, Horatio S., Detroit, Mich. Ash sifter. 1,532,390; Apr. 7.

East, Jesse C., Columbus, Ga. Traveling hinge. 1,532,893; Apr. 7.

Eastman Kodak Company. (See Gutekunst, Gurney O., assignor.)

Eastman Kodak Company. (See Haste, James H., assignor.)

Eastman Kodak Company. (See Jones, J. G., and Dewey, assignors.)

Eastman Kodak Company. (See Sheppard, S. E., and Eberlin, assignors.)

Eastman Kodak Company. (See Sulzer, Albert F., assignor.)

Easy Pan Greasing Machine Co. (See Molier, Wilhelm, assignor.)

Eberlin, Leon W. (See Sheppard, S. E., and Eberlin.)

Edridge, Hartwell L., Minneapolis, Minn. Release relief valve for air-brake systems. 1,532,126; Apr. 7.

Edwards, Stella J., Jackson, Miss. Manuscript holder for typewriters. 1,532,478; Apr. 7.

Edwards, Ulysses G., Grandview, Wash. Tire tool. 1,532,580; Apr. 7.

Eggerss, August J., assignor to Eggerss-O'Flyng Company, Omaha, Nebr. Shipping container for plowshares. 1,532,894; Apr. 7.

Eggerss-O'Flyng Company. (See Eggerss, August J., assignor.)

Ehle, Augustus. (See Mueller, Albert B., assignor.)

Electric Service Supply Co. (See Kopprasch, Alexander H., assignor.)

Electric Service Supplies Company. (See Lewis, Henry G., assignor.)

Eliel, Oscar H., La Salle, Ill. Hermetic seal. 1,532,237; Apr. 7.

Elkins, Joseph, Blytheville, Ark. Sawmill-carriage wheel. 1,532,581; Apr. 7.

Elliott, Rosalie N., Evanston, Ill. Card holder. 1,532,127; Apr. 7.

Emde, Hermann, Berlin-Lankwitz, assignor to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Manufacturing hydroquinone. 1,532,800; Apr. 7.

Emery, Frederick L. (See Hunt, Jonathan A., assignor.)

Endicott Johnson Corporation. (See Denning, Ansel C., assignor.)

Engel, Frank, assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Combined battery shipping crate and stand. 1,532,738; Apr. 7.

Erickson, Edor, Philipsburg, Mont. Bridle bit. 1,532,622; Apr. 7.

Erickson, John, assignor to Automatic Electric Company, Chicago, Ill. Measured-service telephone system. 1,532,391; Apr. 7.

Erickson, John, assignor to Automatic Electric Company, Chicago, Ill. Measured-service telephone system. 1,532,392; Apr. 7.

Erickson, John, assignor to Automatic Electric Company, Chicago, Ill. Impulse transmitter for automatic telephone systems. 1,532,655; Apr. 7.

Estate Stove Company, The. (See Kahn, Bertrand B., assignor.)

Etablissements Darne. (See Darne, Régis, assignor.)

Evansville Tool Works, Incorporated. (See Basham, Joseph F., assignor.)

Everett, Ira, Sayre, Pa., and G. T. Cooke, New York, N. Y. Railway car. 1,532,309; Apr. 7.

Eynon, Thomas M., Philadelphia, Pa. Gas indicator for automobile dashboards. 1,532,530; Apr. 7.

Faber, John P., and W. Muller, Dunellen Borough, assignors, by mesne assignments, to Ransome Concrete Machinery Company, Plainfield, N. J. Concrete-mixing Machine. 1,532,801; Apr. 7.

Fabrizio, Achille, Elkton, Md. Torpedo. 1,532,531; Apr. 7.

Fahys, Joseph, & Co. (See Gordon, Peter J., assignor.)

Fancher, Walter H. (See Ford, Joseph T., assignor.)

Farbenfabriken vorm. Friedr. Bayer and Co. (See Heinze, Ernst, assignor.)

Farbenfabriken vorm. Friedr. Bayer & Co. (See Heusner, K., and Simon, assignor.)

Farbenfabriken vorm. Friedr. Bayer and Co. (See Mols, Emil, assignor.)

Farbenfabriken vorm. Friedr. Bayer and Co. (See Weiler, Max, assignor.)

Farber, Simon W., Brooklyn, N. Y. Metal casserole holder or similar article. Des. 66,969; Apr. 7.

Farber, Simon W., Brooklyn, N. Y. Metal casserole holder or similar article. Des. 66,970; Apr. 7.

Farber, Simon W., Brooklyn, N. Y. Metal dish or similar article. Des. 66,791; Apr. 7.

Farber, Simon W., Brooklyn, N. Y. Metal dish or similar article. Des. 66,972; Apr. 7.

Farrell, Edna M., Los Angeles, Calif. Hair curler. 1,532,238; Apr. 7.

Fassbender, Heinrich, Charlottenburg, and E. Habann, Waidmannslust, near Berlin, assignors to Deutsche Telephowerke G. m. b. H., Berlin, Germany. Circuit arrangement for multiplex cable telegraphy and telephony. 1,532,739; Apr. 7.

Fauser, George, assignor to Fisher Body Corporation, Detroit, Mich. Doorcheck. 1,532,239; Apr. 7.

Fay, Joseph G., assignor of one-fourth to J. K. McDowell, Seattle, Wash. Combined spare-tire-rim carrier and remover. 1,532,532; Apr. 7.

Fedowics, Louis P., Brooklyn, N. Y. Hydraulic hoist for automobiles. 1,532,479; Apr. 7.

Feistner, William F., Newport, Ky. Umbrella or parasol. 1,532,802; Apr. 7.

Ferree, Tyson T., Ashboro, N. C. Indicator. 1,532,740; Apr. 7.

Feuerstein, Arthur, Great Neck, N. Y. Radio receiver holder. 1,532,688; Apr. 7.

Finch, John W., Los Angeles, Calif. Eyeshade. 1,532,480; Apr. 7.

Fire Gun Manufacturing Company. (See Sammis, Albert V., assignor.)

Firpo, Antone, Stockton, Calif. Blotter attachment for fountain pens. 1,532,240; Apr. 7.

Fisher Body Corporation. (See Fauser, George, assignor)

Fitzpatrick, Jeremiah J., Tulsa, Okla. Pumping device for oil wells. 1,532,623; Apr. 7.

Fitzpatrick, John, Cincinnati, Ohio, assignor to The Carborundum Company, Niagara Falls, N. Y. Furnace. 1,532,689; Apr. 7.

Fivey, Robert E., Chicago, Ill. Flush valve. 1,532,656; Apr. 7.

Flad, Arthur, Berlin, and F. Lubberger, Schmargendorf, assignors to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Metering circuit for telephone systems. 1,532,241; Apr. 7.

Flaherty, Patrick J., assignor to The Johnson Bronze Company, New Castle, Pa. Method and apparatus for making centrifugal castings. 1,532,690; Apr. 7.

Flannery Bolt Company. (See Dodds, Ethan I., assignor.)

Flath, Otto S. (See Lollis, Benjamin F., assignor.)

Fleischmann Co., The. (See Bacon, Raymond F., assignor.)

Fleisher, Isaac, New York, N. Y. Air filter. 1,532,657; Apr. 7.

Fletcher, John P., U. S. Army. Convertible vehicle. 1,532,128; Apr. 7.
Florjancic, Louis. (See Sustarsic, M., and Florjancic.)
Foltz, Florence O., executrix. (See Foltz, Irving J.)
Foltz, Irving J., deceased; F. O. Foltz, executrix, Seattle, Wash. Oil burner. 1,532,393; Apr. 7.
Forbes, Nelson H., Detroit, Mich. Hinge. 1,532,481; Apr. 7.
Ford, Edward L., Youngstown, Ohio. Manufacture of puddled iron. 1,532,691; Apr. 7.
Ford, Joseph T., assignor of one-half to W. H. Fancher, East St. Louis, Ill. Figure toy. 1,532,482; Apr. 7.
Fosh, Christian C., Pulaski, and D. D. De Loach, Savannah, Ga. Rotary valve. 1,532,483; Apr. 7.
Foster, Walter L. (See Meredith, W., Cox, and Foster.)
Fowler, Lewis D., Oklahoma City, Okla. Pipe wrench. 1,532,803; Apr. 7.
Fraling, Joseph, Bemidji, Minn. Match lighter. 1,532,994; Apr. 7.
French Battery & Carbon Company. (See Graves, J., Balderston, and McEachron, assignors.)
Fried. Krupp Aktiengesellschaft. (See Akemann, Walther, assignor.)
Fried. Krupp Aktiengesellschaft. (See Klingelhöffer, Reinhard, assignor.)
Fried. Krupp Aktiengesellschaft. (See Sundhaussen, Hermann, assignor.)
Fries, Edward A., Dorchester, assignor, by mesne assignments, to F. J. V. Dakin, Boston, Mass. Commutator. 1,532,129; Apr. 7.
Fritz, Emil F. L., Chicago, Ill. Garment. 1,532,394; Apr. 7.
From, Owen C., assignor to Western Electric Company, Incorporated, New York, N. Y. Controlling mechanism. 1,532,130; Apr. 7.
Fuld and Hatch Knitting Company. (See Thomayer, George T., assignor.)
Fulford, C. E., Limited. (See Tindall, George W., assignor.)
Fulton, William H., Irvington, N. J., assignor, by mesne assignments, to Titeflex Metal Hose Co. Swivel coupling. 1,532,395; Apr. 7.
Funke, Elisabetha, Zurich, Switzerland. Hat convertible into umbrella. 1,532,310; Apr. 7.
Gage, André, St.-Ouen, France. Level indicator of the luminous type. 1,532,995; Apr. 7.
Gaisman, Henry J., New York, N. Y. Razor-blade holder. 1,532,131; Apr. 7.
Gallegos, J. C. (See Montoya, Tib, assignor.)
Gammeter, John R., and W. D. Kmentt, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Valve mechanism. 1,532,396; Apr. 7.
Garner, Walter, Comanche, Tex. Fountain brush. 1,532,804; Apr. 7.
Garvey, James D., Chicago, Ill. Brush. 1,532,397; Apr. 7.
Gaspar, Joseph, New York, N. Y. Interchangeable boot and shoe heel. 1,532,484; Apr. 7.
Gathmann, Emil, assignor to The Gathmann Engineering Company, Baltimore, Md. Ingot mold. 1,532,741; Apr. 7.
Gathmann Engineering Company, The. (See Gathmann, Emil, assignor.)
Gaunt, Ray B., Breckenridge, Mo. Grain shocker. 1,532,132; Apr. 7.
Gauriat, Pierre S., assignor to Pathe Cinema, Anciens Etablissements Pathe Freres, Paris, France. Motion-picture apparatus. 1,532,805; Apr. 7.
Gauss, Friedrich, Oberturkheim, assignor to Daimler-Motoren-Gesellschaft, Unterturkheim, Germany. Motor vehicle of any kind. 1,532,176; Apr. 7.
Gawronski, Frank, Chicago, Ill. Strainer for cooking vessels. 1,532,133; Apr. 7.
Geer, William C., and W. N. Jones, Akron, Ohio, assignors to B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 1,532,398; Apr. 7.
Geiger, Josef, Augsburg, Germany. Apparatus for indicating and registering the stroke average of the piston pressure in prime movers, pumps, or compressors. 1,532,692; Apr. 7.
Geistharp, Frederick, Tarentum, Pa., assignor to Pittsburgh Plate Glass Company. Method and apparatus for making sheet glass. 1,532,134; Apr. 7.
General Motors Corporation. (See Blackmore, Lloyd, assignor.)
General Motors Corporation. (See Boom, Clifford A., assignor.)
General Motors Corporation. (See Byrne, Charles F. S., assignor.)
General Motors Corporation. (See Williams, Charles E., assignor.)
General Railway Signal Company. (See Bushnell, Charles S., assignor.)
Geoghegan, Edward A., New York, N. Y. Superheater. 1,532,242; Apr. 7.
Gerber, David, assignor to Maryland Baking Company, Baltimore, Md. Ice-cream cone. 1,532,806; Apr. 7.
Getting, Georges, and A. Jonas, St.-Denis, France. Endless conveyer belt. 1,532,807; Apr. 7.
Giard, Napoléon, St. Michel de Rougemont, Quebec, Canada. Extensible table. 1,532,996; Apr. 7.
Gibbs, Alonzo L., New York, N. Y. Refrigerating apparatus. 1,532,399; Apr. 7.
Gibbs, William H., Milwaukee, Wis. Sectional hammer. 1,532,135; Apr. 7.
Gibson, John. (See Lewis, Henry C., assignor.)
Gilchrist Company, The. (See Ruggaber, John W., assignor.)
Gillespie, Edward D., Lake Village, Ark. Metal wheel. 1,532,485; Apr. 7.
Gilligan, Edward J., South Hadley, Mass. Loom picker. 1,532,808; Apr. 7.
Girard, Alfred O., assignor of one-third to B. B. Lipsner, one-third to P. Sporer, and one-third to M. A. Dreyfus, Chicago, Ill. Dishwasher-nozzle. 1,532,809; Apr. 7.
Gist, William V., assignor of one-half to D. C. McCall, jr., St. Joseph, Mo. Hose housing. 1,532,177; Apr. 7.
Godbold, Louis A., Houston, Tex. Lubricator. 1,532,178; Apr. 7.
Golladay, Clyde H., Los Angeles, Calif. Casement-window fastener. 1,532,997; Apr. 7.
Goodrich, B. F., Company, The. (See Gammeter, J. R., and Kmentt, assignors.)
Goodrich, B. F., Company. (See Geer, W. C., and Jones, assignors.)
Goodrich, B. F., Company, The. (See Winkelmann, Herbert A., assignor.)
Goodwin, John B., Elko, Nev. Gas producer. 1,532,179; Apr. 7.
Goodyear Tire & Rubber Company, The. (See Bedford, C. W., and Sibley, assignors.)
Goodyear Tire & Rubber Company, The. (See Bedford, Clayton W., assignor.)
Goodyear Tire & Rubber Company, The. (See Bieber, Charles P., assignor.)
Goodyear Tire & Rubber Company, The. (See Hale, James E., assignor.)
Goodyear Tire & Rubber Company, The. (See Patterson, Ian D., assignor.)
Gordon, Peter J., Sag Harbor, assignor to Joseph Fahys & Co., New York, N. Y. Spoon or similar article. Des. 66,973; Apr. 7.
Gottschalk, Victor H., Chicago, Ill., assignor to The American Cotton Oil Company, New York, N. Y. Manufacture of soap. 1,532,692; Apr. 7.
Gourley, Edia M., Overton, Nebr. Lace-making implement. 1,532,810; Apr. 7.
Graden, James H. and Z. E., Ellenwood, Ga. Oil burner. 1,532,582; Apr. 7.
Graden, Zack E. (See Graden, James H. and J. E.)
Graf, Ernest L., New York, N. Y. Method and structure for analytical measuring of weights. 1,532,136; Apr. 7.
Grafe, Louis M., St. Louis, Mo. Ventilated seat pad. 1,532,400; Apr. 7.
Graham, Edward A., Brockley, England. Cabinet for use with sound-reproducing devices. 1,532,811; Apr. 7.
Grand, Justinien V., Busigny, France. Nut lock. 1,532,998; Apr. 7.
Graves, John, W. Balderston, and E. J. McEachron, assignors to French Battery & Carbon Company, Madison, Wis. Gelatinizing machine for battery electrolytes. 1,532,401; Apr. 7.
Gray Telephone Pay Station Company, The. (See Long, George A., assignor.)
Green, Walter R., Chicago, Ill. Tire carrier. 1,532,137; Apr. 7.
Greenham, Richard, San Francisco, Calif. Boiler. 1,532,999; Apr. 7.
Grice, Frederick W., assignor to Broderick & Bascom Rope Co., St. Louis, Mo. Automatic release for tramway buckets. 1,532,812; Apr. 7.
Griffith, Randall D., and C. S. Hunter, Des Moines, Iowa. Condenser for motor-vehicle radiators. 1,532,624; Apr. 7.
Groene, William F., assignor, by mesne assignments to The R. K. Le Blond Machine Tool Company, Cincinnati, Ohio. Turning and facing lathe. Re16,038; Apr. 7.
Gross, Samuel M. (See Spence, Thomas H., assignor.)
Gross, William J., Westphalia, Mich. Hinge construction. 1,532,180; Apr. 7.
Guerra, Francisco F., Mexico, Mexico. Grease strainer for journal boxes. 1,532,813; Apr. 7.
Guiberson Corporation, The. (See Armentrout, Arthur L., assignor.)
Gurnovitz, John, Milwaukee, Wis. Tie. 1,533,000; Apr. 7.
Gutekunst, Gurney O., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic sensitiser and making same. 1,532,814; Apr. 7.
Guymon, Ralph A., Springdeld, Ill. Combined tail light and direction indicator. 1,532,583; Apr. 7.
Gwynn, Susie E. (See Gwynn, William A., assignor.)
Gwynn, William A., assignor to S. E. Gwynn, St. Louis, Mo. Vulcanizing machine. 1,532,694; Apr. 7.
Haarberg, Cato, Chicago, Ill. Lifting device. 1,533,001; Apr. 7.
Habann, Erich. (See Fassbender, H., and Habann.)
Haberfeld, Erwin O., Berlin, Germany. Card index, letter, and document file. 1,533,002; Apr. 7.
Habicht, F. Paul. (See Besso, M. A., and Habicht.)
Hadsel, Alvah D., assignor of one-half to F. N. Woods, jr., San Francisco, Calif. Rock crusher. 1,532,742; Apr. 7.
Hadsel, Alvah D., assignor of one-half to F. N. Woods, jr., San Francisco, Calif. Flexible coupling. 1,532,743; Apr. 7.

Hagan, George J., Company. (See Dauch, Alan D., assignor.)
Hagan, George J., Company. (See Talley, Randal E., assignor.)
Hagar, Albert L. (See McMahan, Earl, assignor.)
Hahn, William J., Philadelphia, Pa. Tongs. 1,532,815; Apr. 7.
Haigler, Claude C., San Jose, Calif. Bearing. 1,532,181; Apr. 7.
Halank, Gustav F., assignor to the Firm Johann Carl Müller, Dresden, Germany. Machine for affixing labels or the like. 1,532,895; Apr. 7.
Hale, James E., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Valve stem for pneumatic tires and accommodating wheel rim therefor. 1,532,358; Apr. 7.
Hall, Charles O., East Orange, N. J. Electric fan. 1,532,402; Apr. 7.
Hall, William H., Cicero, assignor to American Hotel Register Company, Chicago, Ill. Bulletin-display frame. 1,532,896; Apr. 7.
Hansen, Melvin. (See Hansen, Peter B. and M.)
Hansen, Peter B. and M., Viborg, S. Dak. Whip-actuating device. 1,532,816; Apr. 7.
Hanson, Henry, et al. (See Carlson, Gustave O., assignor.)
Hanson, Oscar, Warder, British Columbia, and O. Stjornstrom, Calgary, Canada. Trap. 1,532,584; Apr. 7.
Harnsberger, Harry H., New York, N. Y. Cigarette holder. 1,532,403; Apr. 7.
Harrington, Vincent J., Summerside, Prince Edward Island, Canada. Fox-breeding den. 1,532,486; Apr. 7.
Harris, James E., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Colloidal suspension. 1,532,538; Apr. 7.
Harris, Thomas P., Clarinda, Iowa. Radiator protector. 1,532,404; Apr. 7.
Harrison, Thomas L., Philadelphia, Pa. Collapsible-tube-closing machine. 1,532,689; Apr. 7.
Hart, Edwin. (See Bausch, C. L., and Hart.)
Hart, Henry B., Montclair, N. J. Playing device. 1,532,625; Apr. 7.
Hartford Rubber Works Company, The. (See Carpenter, Frederick S., assignor.)
Hartford Rubber Works Company, The. (See Steinle, William J., assignor.)
Harting, Walter C. T. A. Sindelar, and C. E. David, assignors to Hydraulic Pressed Steel Company, Cleveland, Ohio. Metal building. 1,532,695; Apr. 7.
Hartweg, Frederick E., Philadelphia, Pa. Electrical fitting. 1,532,817; Apr. 7.
Haskell, Broderick, Franklin, Pa. Brake-beam support. 1,532,626; Apr. 7.
Hassard, Robert J., Brooklyn; A. H. Spalding, Arvene; and F. T. Powers, Douglaston Manor, assignors to Powers Photo-Engraving Company, New York, N. Y. Making half-tone printing plates. 1,532,696; Apr. 7.
Haste, James H., assignor to Eastman Kodak Company, Rochester, N. Y. Composite film. 1,532,818; Apr. 7.
Haste, James H., assignor to Eastman Kodak Company, Rochester, N. Y. Preparing photographic films. 1,532,819; Apr. 7.
Hayes, Jeremiah, Everett, Wash. Automobile bumper. 1,532,487; Apr. 7.
Hayes, William F., and J. N. Armstrong, assignors of one-third to B. B. Chapman and one-third to H. H. Milling, Mineral Wells, Tex. Furniture polish. 1,532,587; Apr. 7.
Heal, William E., Washington, D. C. Drawing glass and apparatus therefor. 1,532,182; Apr. 7.
Hebeacker, Wilhelm, Heilbronn, Germany. Excavating machine. 1,532,243; Apr. 7.
Hedstrom, Carl O., et al. (See Carlson, Gustave O., assignor.)
Heerlein, Charles F., et al. (See Kinsella, William P., assignor.)
Heftler, Victor R., Detroit, Mich., assignor to Société du Carburateur Zenith, Lyon, France. Carburetor. 1,532,697; Apr. 7.
Hein, George N., San Francisco, Calif. Guard for hypodermic syringes. 1,532,744; Apr. 7.
Hein, Richard, Witkowski, Czechoslovakia. Rolling mill. 1,532,488; Apr. 7.
Heinecke, Otto, Berlin, Germany. Parachute. 1,532,588; Apr. 7.
Heinze, Ernst, Wiesdorf-on-the-Rhine, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Producing the hydroxides of alkali metals or of alkaline-earth metals. 1,532,489; Apr. 7.
Heller, Perry O., Prophetstown, Ill. Whip-actuating device. 1,533,003; Apr. 7.
Hendey Machine Company, The. (See Bouillon, C., and Blakeslee, assignors.)
Hendrickson, Ira E. (See Brown, P., Hendrickson, Clark, and Louis.)
Henry, Martin, Verden, Okla. Multiple-cylinder combustion motor. 1,533,004; Apr. 7.
Hepburn, Donald M., Philadelphia, Pa. Device for introducing fluids into cylinders of internal-combustion motors. 1,532,820; Apr. 7.
Herbert, Charles C., San Jose, Calif. Water circulator. 1,532,405; Apr. 7.
Herman, John H., Houston, Tex. Combined percussion and rotary drilling apparatus. 1,532,311; Apr. 7.
Hersog Electric & Engineering Company. (See Lawrence, Joseph L., assignor.)
Heusner, Karl, and M. Simon, assignors to Farbenfabriken vorm. Friedr. Bayer & Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Preparation of aminoazo compounds. 1,532,627; Apr. 7.
Hewitt, Edward R., Midvale, N. J. Leader and making the same. 1,532,534; Apr. 7.
Hickerson, Clarence C., Tulsa, Okla. Mixing valve. 1,532,745; Apr. 7.
Hicks, James O. (See Rose, H. W., and Hicks.)
Higgins, Eugene, Jackson, Mich. Shaft coupling. 1,532,183; Apr. 7.
Hill, Richard D., Wichita Falls, assignor to E. B. Zittel, Burkburnett, Tex. Wrench for pipe or tubing. 1,532,406; Apr. 7.
Hine, Charles F. (See Rees, C., and Hine.)
Hirshstein, Joseph, Cleveland, Ohio. Drain. 1,532,897; Apr. 7.
Hobson, John S., assignor to Massey Concrete Products Corporation, Chicago, Ill. Concrete-molding apparatus. 1,532,407; Apr. 7.
Hodgson, Howard E., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electromagnetic brake. 1,532,138; Apr. 7.
Hofer, William L., Manhattan, Kans. Fountain pen. 1,532,746; Apr. 7.
Hohmann, Wilhelm, Delitzsch, near Halle, assignor to Actien Gesellschaft für Anilin Fabrikation, Berlin, Germany. Apparatus for splicing films. 1,532,747; Apr. 7.
Hohmeister, Arthur E., Cincinnati, assignor to The John Douglas Company, Carthage, Ohio. Flush valve. 1,532,408; Apr. 7.
Holland, Walter M., assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Box handle. 1,532,898; Apr. 7.
Hollins, Willis C. (See Arrouses, F. P., and Hollins.)
Holm, Hans A., Minneapolis, Minn. Fog crossing signal. 1,532,748; Apr. 7.
Holsopple, Merril. (See Wendle, H. C., and Holsopple.)
Holtschmit Friedrich, Duisburg, Germany. Toothed gearing for driving the drum of pulley blocks. 1,532,899; Apr. 7.
Homad, Harry. (See Cunningham, E. A., and Homad.)
Hood, Henry H., assignor to B. G. Lincoln, Chicago, Ill. Mop cleaner. 1,532,139; Apr. 7.
Hooper, Rebecca E. (See Casto, I. B., and Hooper.)
Hopp, Hermann and L., New York, N. Y. Price-ticket holder. 1,533,005; Apr. 7.
Hopp, Leo. (See Hopp, Hermann and L.)
Hopp, Otto W. (See Wajer, J., and Hopp.)
Houghland, Frank H., deceased, Cincinnati, Ohio; L. Houghland, administratrix, assignor to W. F. Zent, Memphis, Tenn. Adhesive binding strip for closing and reclosing packages. 1,532,900; Apr. 7.
Houghland, Lillian, administratrix. (See Houghland, Frank H.)
Howcott, Harley A. W. (See Mitchell, Donald H., assignor.)
Hultgren, Charles R., assignor to S. Karpen & Bros., Chicago, Ill. Packaging device and method. 1,532,749; Apr. 7.
Humphrey, William J., Cleveland, Ohio. Identification or laundry tag. 1,532,901; Apr. 7.
Hunt, Jonathan A., Salem, assignor to F. L. Emery, Lexington, Mass. Rod-grinding machine. 1,532,490; Apr. 7.
Hunter, Charles S. (See Griffith, R. D., and Hunter.)
Hunter, William P., Plains, Kans. Expansion hitch. 1,533,006; Apr. 7.
Hurd, Zenus L., Nashville, Tenn. Folding ironing board. 1,532,812; Apr. 7.
Hutsell Motor Company. (See Hutsell, Thomas A., assignor.)
Hutsell, Thomas A., assignor to Hutsell Motor Company, Spokane, Wash. Piston. 1,532,491; Apr. 7.
Hutchens, Edward, Milwaukee, assignor to Utility Manufacturing Company, Cudahy, Wis. Hydraulic press. 1,532,140; Apr. 7.
Hydraulic Pressed Steel Company. (See Harting, W. C., Sindelar, and David, assignors.)
Hynes, Lee P., assignor to Consolidated Car-Heating Company, Albany, N. Y. Door control. 1,532,492; Apr. 7.
Illinois Glass Company. (See Seabold, Walter G., assignor.)
Illinois-Pacific Glass Company. (See Raynes, Harry, assignor.)
Immers, Jean B., Brussels, Belgium. Aeroplane. 1,532,902; Apr. 7.
Industrial Research Corporation. (See Brockway, Carl P., assignor.)
Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)
Ingersoll-Rand Company. (See Slater, Fred M., assignor.)
Inland Glass Company. (See Stewart, Frederick W., assignor.)
Insley Manufacturing Company. (See Dorward, Raymond, assignor.)

Interlocking Toggle Rim Company. (See Avers, Edgar L., assignor.)
Interlocking Toggle Rim Company. (See Bedingfield, John A., assignor.)
International Advertising Specialty Company. (See Seiders, Hiester, assignor.)
International Harvester Company. (See Benjamin, Bert B., assignor.)
International Harvester Company. (See Burgess, Edward W., assignor.)
International Harvester Company. (See Cady, Sherman W., assignor.)
International Harvester Company. (See Mowry, Edward, assignor.)
International Harvester Company. (See Pearson, Charles, assignor.)
International Harvester Company. (See Robinson, C. W., and Dwyer, assignors.)
International Motor Company. (See Josephs, Lyman C., jr., assignor.)
International Motor Company. (See Masury, Alfred F., assignor.)
International Silver Company. (See Leech, John, assignor.)
Irish, Charles F., Bratenahl, Ohio. Tree-transplanting device. 1,532,244; Apr. 7.
Ivie, Will E., Washington, D. C. Signal light. 1,532,493; Apr. 7.
Ivory, James W., Philadelphia, Pa. Rubber-dam clamp. 1,532,821; Apr. 7.
Jamison, Clarence. (See Brunson, W. H., and Jamison.)
James, Leslie, Chicago, Ill. Automobile clutch control. 1,532,494; Apr. 7.
Jensen, Elin O., San Francisco, Calif. Hair retainer. 1,532,495; Apr. 7.
Jensen, Peter L. (See Pridham, E. S., and Jensen.)
Jeter, Thomas F., Everett, Wash. Burial vault. 1,532,813; Apr. 7.
John, Elmer N., assignor to Reliable Knitting Works, Milwaukee, Wis. Knitted cap. 1,532,750; Apr. 7.
Johansson, Ernst O. (See Nordström, E. R. I., and Johansson.)
Johle, Henry C., Temple, Tex. Gear shift. 1,532,314; Apr. 7.
Johnson, Arthur A., Washington, D. C., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,532,751; Apr. 7.
Johnson Bronze Company, The. (See Flaherty, Patrick, J., assignor.)
Johnson, Evan G. (See Long, William, assignor.)
Johnson, John A., College Springs, Iowa. Object-testing apparatus. 1,532,496; Apr. 7.
Johnson, John E., assignor to The Speedaumatic Company, Chicago, Ill. Printing device. 1,532,698; Apr. 7.
Johnson, Lane, assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Rolling-mill-spindle coupling. 1,532,752; Apr. 7.
Jonas, Adrien. (See Getting, G., and Jonas.)
Jones, Ebbert A., Danville, Va. Mattress. 1,532,497; Apr. 7.
Jones, John G., and H. G. Dewey, assignors to Eastman Kodak Company, Rochester, N. Y. Automatic film-spooling machine. 1,532,753; Apr. 7.
Jones, Webster N. (See Geer, W. C., and Jones.)
Josephs, Lyman C., jr., Allentown, Pa., assignor to International Motor Company, New York, N. Y. Bogie truck for self-propelled rail cars. 1,532,699; Apr. 7.
Joyce, James D., Philadelphia, Pa. Bobbin-winding machine. 1,532,409; Apr. 7.
Jupp, Alfred E. (See Place, Alfred G., assignor.)
Kagiwada, Ryohei, Washington, D. C. Structural tower. 1,532,410; Apr. 7.
Kahn, Bertrand B., assignor to The Estate Stove Company, Hamilton, Ohio. Toaster. 1,532,184; Apr. 7.
Kaiser, Charles, now by judicial change of name C. Caise, Atlantic City, N. J. Electric-induction water heater. 1,532,498; Apr. 7.
Kaminski, Paul, Berlin-Pankow, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Arrangement for the telecontrol of guns or the like. 1,532,754; Apr. 7.
Kammerer, Fred W. G., Brooklyn, N. Y. Antitheft device. 1,533,007; Apr. 7.
Karbowski, Victor, Chicago, Ill. Pipe cutter. 1,532,315; Apr. 7.
Karpen, S., & Bros. (See Hultgren, Charles R., assignor.)
Kaser, Everett D., assignor to Durabilt Steel Locker Co., Aurora, Ill. Locker lock. 1,532,245; Apr. 7.
Katz, Jack, New York, N. Y. Book end. Des. 66,974; Apr. 7.
Kaufman, Adam W., Milwaukee, Wis. Timer. 1,532,755; Apr. 7.
Kaufman, Adam W., Milwaukee, Wis. Combination step plate and luggage carrier. 1,532,756; Apr. 7.
Kaufman, Adam W., Milwaukee, Wis. Timer. 1,532,757; Apr. 7.
Kaufman, Ferdinand M., Atlanta, Ga. Collapsible box. 1,532,316; Apr. 7.
Kavanaugh, Bedford T., Chicago, Ill. Razor-blade knife. 1,532,499; Apr. 7.
Kay, Edgar B., Washington, D. C. Incinerator. 1,532,758; Apr. 7.
Keating, Daniel A., Bridgeport, and J. B. Tatem, Putnam, assignors of one-half to The American Tube & Stamping Company, Bridgeport, and one-half to J. B. Tatem, Putnam, Conn. Picker stick. 1,532,759; Apr. 7.
Keating, Daniel A., Bridgeport, and J. B. Tatem, Putnam, assignors of one-half to The American Tube & Stamping Company, Bridgeport, and one-half to J. B. Tatem, Putnam, Conn. Picker stick. 1,532,760; Apr. 7.
Keating, Daniel A., Bridgeport, and J. B. Tatem, Putnam, assignors of one-half to The American Tube & Stamping Company, Bridgeport, and one-half to J. B. Tatem, Putnam, Conn. Picker stick. 1,532,761; Apr. 7.
Keating, Daniel A., Bridgeport, and J. B. Tatem, Putnam, assignors of one-half to The American Tube & Stamping Company, Bridgeport, and one-half to J. B. Tatem, Putnam, Conn. Picker stick. 1,532,762; Apr. 7.
Kelser, Charles R., Auburn, Ind., assignor to The Regal Rubber Co., Dayton, Ohio. Rubber half sole. 1,533,008; Apr. 7.
Kellogg Switchboard and Supply Company. (See Currier, H. D., and Shull, assignors.)
Kellogg Switchboard and Supply Company. (See Yanochowski, George A., assignor.)
Kelly, Mike J. (See Younker, W. C., and Kelly.)
Kemp, Irving S., Evansville, Ind. Tool handle. 1,532,822; Apr. 7.
Kennedy, William. (See Noble, W., and Kennedy.)
Kenyon, Percy G., Rochdale, assignor to Turner Brothers Asbestos Company Limited, Spotland, Rochdale, Lancaster, England. Brake band. 1,532,141; Apr. 7.
Kenner, Isaac D., Knoxville, Tenn. Governor. 1,532,763; Apr. 7.
Kercher, Arthur J., Berkeley, Calif. Water heater. 1,532,903; Apr. 7.
Kersten, Julius, Mannheim, Germany. Treatment of alkali-metal chlorides. 1,533,009; Apr. 7.
Kidwell, Anna D., administratrix. (See Kidwell, James A.)
Kidwell, Cleo H. (See Bacon, R. F., and Kidwell.)
Kidwell, James A., deceased, Lakewood; A. D. Kidwell, administratrix, assignor to The Bankers Savings and Credit System Company, Cleveland, Ohio. Coin savings bank. 1,532,411; Apr. 7.
Kidwell, James A., deceased, Lakewood; A. D. Kidwell, administratrix, assignor to The Bankers Savings and Credit System Company, Cleveland, Ohio. Coin savings bank. 1,532,412; Apr. 7.
Kilbourn, George S., Owen Sound, Ontario, Canada. Treatment of magnesite or dolomite. 1,532,500; Apr. 7.
Kiligas, Gustav J., Brooklyn, N. Y. Sewing machine. 1,532,535; Apr. 7.
Kimber, Herbert G., Oakland, Calif. Bake. 1,532,764; Apr. 7.
King, Edward L., Fonda, Iowa. Direction indicator for motor vehicles. 1,532,501; Apr. 7.
King, Van Rensselaer C., Radnor, Pa., assignor to King's Concrete Cross Tie Corporation, New York, N. Y. Concrete and metal crosstie structure. 1,532,589; Apr. 7.
Kingman, Russell B., Orange, assignor to The Chore-Utensils Corporation of America, West Orange, N. J. Scouring implement. 1,532,904; Apr. 7.
King's Concrete Cross Tie Corporation. (See King, Van Rensselaer C., assignor.)
Kingsbury, Edmund W., Framingham, Mass. Eyeshield. 1,532,317; Apr. 7.
Kinsella, William P., Bayside, assignor of one-half to B. G. Ball, Astoria, and one-half to C. F. Heerlein, Long Island City, N. Y. Hand truck. 1,532,700; Apr. 7.
Kinslow, Henry M., Santa Ana, Calif. Pattern. 1,533,010; Apr. 7.
Kirby, Regina B., Somerville, N. J. Corset. 1,532,823; Apr. 7.
Kirby, Robert H., St. Louis, Mo. Washing machine for light household service. 1,532,185; Apr. 7.
Kirkham, Charles B. (See Lent, L. B., and Kirkham.)
Kisinger, William S., assignor to The Donaldson Art Sign Company, Covington, Ky. Panel-manufacturing device. 1,532,318; Apr. 7.
Kistler, A. M., et al. (See Mays, James F., assignor.)
Kita, Otonosuke, Irvington, Calif. Stationary knife. 1,532,413; Apr. 7.
Kittelson, Halmer C., assignor to R. O. Olson, Minneapolis, Minn. Combination smoking set and advertising device. 1,532,590; Apr. 7.
Kiser, William H., Beggs, Okla. Weight-motor governor. 1,532,142; Apr. 7.
Klein, Benjamin F., Chicago, Ill. Game of skill. 1,532,186; Apr. 7.
Klingelhöffer, Reinhard, Werden-Ruhr, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Turbine locomotive. 1,532,319; Apr. 7.
Kmentt, Waldemar D. (See Gammeter, J. R., and Kmentt.)
Knagge, Roy S., New York, N. Y. Toy construction. 1,533,011; Apr. 7.
Knapp, Archer L., assignor to Packard Motor Car Company, Detroit, Mich. Dome light. Des. 66,975; Apr. 7.
Knapp, Archer L., assignor to Packard Motor Car Company, Detroit, Mich. Robe support and handle. 1,532,320; Apr. 7.
Knoll, Charles H., Oakmont, Pa. Rail anchor. 1,532,414; Apr. 7.

Knight, Remi C. (See Corey, W. G., Knight, and Champion.)
Knowlton, Harry W., assignor to Knowlton & Newton Co., Inc., Lowell, Mass. Picker air intake. 1,532,415; Apr. 7.
Knowlton & Newton Co. (See Knowlton, Harry W., assignor.)
Knox, George F., Milwaukee, Wis. Refrigerating apparatus. 1,532,824; Apr. 7.
Koehring Company. (See Lichtenberg, Erich H., assignor.)
Koehring Company. (See Trester, Herault A., assignor.)
Kopprasch, Alexander H., Chicago, Ill., assignor to Electric Service Supply Co., Philadelphia, Pa. Coil-winding machine. 1,532,187; Apr. 7.
Koretsky, Israel, et al. (See Koretzky, H. M., and Teitelbaum, assignors.)
Koretzky, Harry M., and B. H. Teitelbaum, Brooklyn; said Teitelbaum assignor to said Harry M. and I. Koretzky, New York, N. Y. Dry-cell battery. 1,533,012; Apr. 7.
Kottke, Rudolph A., Detroit, Mich. Bake-pan lifter. 1,532,246; Apr. 7.
Kottke, Rudolph A., Detroit, Mich. Pan lifter. 1,532,247; Apr. 7.
Kosminski, William W., Milwaukee, Wis. Curtain-rod fixture. 1,532,701; Apr. 7.
Krakes, James, Chicago, Ill. Lithographic printing plate and preparing the same. 1,532,188; Apr. 7.
Krentler, Walter A., Detroit, Mich. Hinge last. 1,533,066; Apr. 7.
Kress, Claude W., New York, N. Y. Card support. 1,532,536; Apr. 7.
Krokavetz, Eugene, Cleveland, Ohio. Ignition timer. 1,532,501; Apr. 7.
Kuhlmann, Arthur H., St. Louis, Mo. Weather strip. 1,532,321; Apr. 7.
Kurtis, Angelos, Brooklyn, N. Y. Life-preserving suit. 1,532,143; Apr. 7.
Kutina, Joseph P., Cicero, Ill. Rim-operating tool. 1,532,416; Apr. 7.
Ladd, James B., Ardmore, Pa., assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Method and apparatus for centrifugal casting. 1,532,537; Apr. 7.
Lamont, Lewis H., Chicago, Ill. Thermostatically-controlled heating element. 1,532,189; Apr. 7.
Landis Tool Company. (See Stoner, Paul, assignor.)
Lane, George, assignor to Lane Brothers Company, Poughkeepsie, N. Y. Lifting jack. 1,532,702; Apr. 7.
Lane, James H., Richfield, Idaho. Door catch. 1,532,322; Apr. 7.
Lane Brothers Company. (See Lane, George, assignor.)
Langston, Samuel M., Wenonah, N. J. Manufacture of shingle strips. 1,532,538; Apr. 7.
Larned, William A., Summit, N. J., assignor to The Dayton Steel Racquet Company, Dayton, Ohio. Controlling the elasticity of an elastic-metal stringing. 1,532,703; Apr. 7.
Larsen, Charles F., Chicago, Ill. Gas lighter. 1,533,013; Apr. 7.
Lassagne, Victor F., Chicago, Ill. Subsoil packer. 1,533,014; Apr. 7.
Laudan, William L., Sterling, Colo. Vaporizer for internal-combustion engines. 1,532,248; Apr. 7.
Laughlin, James T., Santa Barbara, Calif. Eyeglass mounting. 1,532,323; Apr. 7.
Lawler, James J., Mount Vernon, N. Y. Thermostatic urinal automatic flushing apparatus. 1,532,905; Apr. 7.
Lawrence, Harry G., Salt Lake City, Utah. Flush valve. 1,532,324; Apr. 7.
Lawrence, Joseph L., assignor to Herzog Electric & Engineering Company, San Francisco, Calif. Electric heater. 1,532,502; Apr. 7.
Layne & Bowler Corporation. (See Layne, Mahlon E., assignor.)
Layne, Mahlon E., Houston, Tex., assignor to Layne & Bowler Corporation, Los Angeles, Calif. Forming well screens. 1,532,592; Apr. 7.
Layng, Haral R., deceased, San Francisco, Calif.; H. P. Layng, administratrix. Chloridizing volatilization process. 1,532,503; Apr. 7.
Layng, Hattie F., administratrix. (See Layng, Haral R.)
Layton, Frank, Houston, Tex. Wooden tub. 1,533,015; Apr. 7.
Le Blond, R. K., Machine Tool Company, The. (See Greene, William F., assignor.)
Ledin, Charles, assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Lock. 1,532,765; Apr. 7.
Ledru, Marcel J. L., and E. J. Bachman, Roussillon, assignors to Societe Chimique des Usines du Rhone, Paris, France. Manufacture of acetaldehyde. 1,532,190; Apr. 7.
Lee, Gock Y., San Francisco, Calif. Producing forms. 1,532,325; Apr. 7.
Leech, John, assignor to International Silver Company, Bridgeport, Conn. Spoon or similar article. Des. 66,976; Apr. 7.
Leech, Stanley, Detroit, Mich. Wringer. 1,532,016; Apr. 7.
Leibowitz, Isaac, Brooklyn, N. Y. Calendar. 1,532,906; Apr. 7.
Leidy, Daniel D., Boyertown, Pa. Catch. 1,533,017; Apr. 7.
Le Mare, Ernest B., St. Helens, assignor to Pilkington Brothers Limited, Liverpool, England. Apparatus for producing a continuous strip of glass. 1,532,704; Apr. 7.
Leming, Elmer E., Salt Lake City, Utah. Device for the application of power. 1,532,191; Apr. 7.
Lent, Leon B., New York, and C. B. Kirkham, Garden City, N. Y. Fluid-transfer device. 1,532,326; Apr. 7.
Leopold, Cassella & Co., Gesellschaft mit beschränkter Haftung. (See Müns, Ferdinand, assignor.)
Leslie, John W., Evanston, Ill. Joint. 1,532,825; Apr. 7.
Lessing, Rudolf, London, England. Treament of coal. 1,532,826; Apr. 7.
Letts, William T., St. Joseph, Mo. Convertible table settee. 1,532,417; Apr. 7.
Levin, Abram, Simferopol, Russia. Method and apparatus for measuring pulsating pressures. 1,532,705; Apr. 7.
Levy, Abraham H., New York, N. Y. Container. 1,532,766; Apr. 7.
Lewis, George C., Philadelphia, Pa. Rotary fan. 1,532,827; Apr. 7.
Lewis, Henry C., assignor of one-half to J. Gibson, Ontario, Wis. Combined ironing board and ladder. 1,532,418; Apr. 7.
Lewis, Henry G., assignor to Electric Service Supplies Company, Philadelphia, Pa. Headlight. 1,532,598; Apr. 7.
Lichtenberg, Erich H., assignor to Koehring Company, Milwaukee, Wis. Automatic power discharge chute. 1,532,249; Apr. 7.
Lichtenfeld, Leopold, Vienna, Austria. Parquetry-slat flooring. 1,532,504; Apr. 7.
Lichtenstein, William C. (See Roberts, Isaiah L., assignor.)
Lieberman, George, Galveston, Tex. Separator. 1,533,018; Apr. 7.
Lincoln, Buford G. (See Hood, Harry H., assignor.)
Lincoln Meter Company Limited. (See Paine, Louis A., assignor.)
Lindemann, Albert J., assignor to A. J. Lindemann & Hoverson Company, Milwaukee, Wis. Toaster. 1,533,078; Apr. 7.
Lindemann, A. J., & Hoverson Company. (See Lindemann, Albert J., assignor.)
Lindemann, Emily A., New York, N. Y. Brassière. 1,532,250; Apr. 7.
Link, Albert and L. W., Brooklyn, N. Y.; said L. W. Link assignor to said Albert Link. Coupler for masks. 1,533,019; Apr. 7.
Link, Harry C., Traverse City, Mich. Shipping basket. 1,532,144; Apr. 7.
Link, Lester W. (See Link, Albert and L. W.)
Lipener, B. B., et al. (See Girard, Alfred O., assignor.)
Little, Leon M., Dublin, Ga. Fire escape. 1,532767; Apr. 7.
Little, Leon M., Dublin, Ga. Fire escape. 1,532,768; Apr. 7.
Lloyd, George F., Brighton, and F. B. Clapp and F. H. Campbell, Melbourne, assignors to Commonwealth White Lead and Paints Proprietary Limited, Brighton, Victoria, Australia. Manufacture of white lead. 1,532,419; Apr. 7.
Lockwood, George D., and W. H. Wakefield, assignors to Crompton & Knowles Loom Works, Worcester, Mass. Tube frame for Axminster looms. 1,532,145; Apr. 7.
Locomotive Pulverized Fuel Company. (See Caracristi, Virginius Z., assignor.)
Lollis, Benjamin F., Berwyn, assignor of one-half to O. S. Flath, Chicago, Ill. Signal blade. 1,532,828; Apr. 7.
Long, George A., assignor to The Gray Telephone Pay Station Company, Hartford, Conn. Telephone pay station. 1,532,706; Apr. 7.
Long, William, assignor of one-half to E. G. Johnson, Parma, Idaho. Fluid-pressure regulator. 1,532,907; Apr. 7.
Lord, Sam S., Whitefield, England. Machine for treating hanks of yarn. 1,532,420; Apr. 7.
Lorraine, David G., Los Angeles, Calif. Valve. 1,532,251; Apr. 7.
Louis, Terrence G. (See Brown, P., Hendrickson, Clark, and Louis.)
Lowe, William S., Haverhill, Mass. Plastic composition for articles of manufacture. 1,532,908; Apr. 7.
Lubac, Alfred, Paris, France. Machine for composing and justifying lines of printing types. 1,532,909; Apr. 7.
Lubberger, Fritz. (See Flad, A., and Lubberger.)
Lucas, Harry W. (See Cleland, James E., assignor.)
Luppino, Frank, Watkins, N. Y. Invisibly-stitched seam and making same. 1,532,327; Apr. 7.
Luscher, Herman, Far Rockaway, N. Y. Can opener. 1,532,594; Apr. 7.
Lyde, Charles H., Dorridge, England. Portable receptacle suitable for containing and displaying articles such as travelers' samples. 1,532,146; Apr. 7.
Lyness, Horatio S., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for treating vamps. 1,532,589; Apr. 7.
Lyon, Babet R. H. (See Lyon, De Witt T., assignor.)

Lyon, De Witt T., assignor of one-half to B. R. H. Lyon, Chicago, Ill. Ventilating device. 1,532,505; Apr. 7.
MacArthur Concrete Pile & Foundation Co. (See Newton, Donald M., assignor.)
MacDonald, Lionel H., Kansas City, Mo. Motor-vehicle fender guard. 1,532,508; Apr. 7.
MacDougall, Hugh K. (See Van Dyke, Gerald M., assignor.)
Maclnnes, Hugh, Jersey City, N. J., and W. J. Riley, Boston, Mass. Shingle fastener. 1,532,421; Apr. 7.
MacKenzie, John S., Delaware, Ohio. Window ventilator. 1,532,628; Apr. 7.
MacPherson, Kenneth, Nanton, Alberta, Canada. Combination tool. 1,532,147; Apr. 7.
Mader, Herman F., Portland, Oreg. Mixer for gasoline engines. 1,532,770; Apr. 7.
Madison-Kipp Corporation. (See Coleman, Thomas E., assignor.)
Madlem, John D., Lititz, Pa. Cigar-head-forming plate. 1,532,422; Apr. 7.
Madsen, Martin, Monterey Park, assignor of one-half to P. Madsen, Los Angeles, Calif. Hose clamp. 1,532,596; Apr. 7.
Madsen, Peter. (See Madsen, Martin, assignor.)
Magee, Chauncey L. C., Chicago, Ill. Friction brake mechanism. 1,532,629; Apr. 7.
Magnavox Company, The. (See Pridham, E. S., and Jensen, assignors.)
Mahood, Frank, Amity, Oreg. Steering mechanism for tractors. 1,532,509; Apr. 7.
Major, Alfred, Holland, N. Y. Can holder. 1,532,913; Apr. 7.
Makarewicz, Marius K., Courbevoie, Seine, France. Apparatus for boring the connecting rods and bearings of internal-combustion engines. 1,532,914; Apr. 7.
Malloy, Irene, Fort Wayne, Ind. Lady's combination hat. 1,532,193; Apr. 7.
Malone, Mackey K., Wills Point, assignor of one-half to D. L. Sanders, Wills, Tex. Cotter key. 1,532,148; Apr. 7.
Manville Jenckes Company. (See Brewster, Franklin W., assignor.)
Marceau, Joseph A., Montreal, Quebec, Canada. Container. 1,532,830; Apr. 7.
Margetson, Oliver, and W. P. Widdowson, London, England. Internal-combustion-engine piston. 1,532,915; Apr. 7.
Markel, Joseph, Buffalo, N. Y. Electric-light bowl. Des. 66,977; Apr. 7.
Markwick, Fred, Detroit, Mich. Tire and combination tire protector and antiskid device. 1,532,425; Apr. 7.
Marshall, Charles J., assignor to P. B. Yates Machine Company, Beloit, Wis. Electric-motor controller for woodworking machines. 1,532,428; Apr. 7.
Martin, Berent, San Francisco, Calif. Doorknob. Des. 66,978; Apr. 7.
Martin, William F., assignor to Penn Spring Works Inc., Baldwinsville, N. Y. Display plate for automobile bumpers. 1,533,068; Apr. 7.
Martin, William F., assignor to Penn Spring Works Inc., Baldwinsville, N. Y. Tie-plate for automobile bumpers. 1,533,069; Apr. 7.
Martin, William H., Davenport, Iowa. Baling machine. 1,532,194; Apr. 7.
Martus, Martin L., Woodbury, and E. H. Becker and H. B. Schoenmehl, Waterbury, Conn. Providing and releasing oil in battery solutions. 1,532,252; Apr. 7.
Marx, Louis, New York, N. Y. Toy savings bank. 1,532,424; Apr. 7.
Maryland Baking Company. (See Gerber, David, assignor.)
Mason, Arch L., Meadville, Pa. Window construction. 1,532,916; Apr. 7.
Massey Concrete Products Corporation. (See Hobson, John S., assignor.)
Mastin, Marion G., Canajoharie, N. Y. Preserving and packing of foods. 1,532,831; Apr. 7.
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Cushion connection for vehicle construction. 1,532,541; Apr. 7.
Mather, Raymond, Holyoke, Mass. Finger-nail file. 1,533,020; Apr. 7.
Mather, Raymond, Holyoke, Mass. Mop wringer and pail. 1,533,021; Apr. 7.
Mathews Conveyer Company. (See Buck, Herman J., assignor.)
Mathews, Theodore R., Cleveland, Minn. Safety clothespin. 1,532,510; Apr. 7.
Maxon, Harry R. (See Burns, W. G., and Maxon.)
Mayoux, Barthelemy, St.-Etienne, France. Machine for treating skeins or hanks in dyeing rooms. 1,532,707; Apr. 7.
Mayo, James F., Lexington, N. C., assignor of one-fourth to A. M. Kistler, Morganton, and one-fourth D. E. Rhyne, Lincolnton, N. C. Calculating machine. 1,532,832; Apr. 7.
McCall, Wo Witt C., jr. (See Gist, William V., assignor.)
McCann, Laurence V., Jeannette, Pa. Glass-cutting table. 1,532,910; Apr. 7.
McConnell-Browning Engineering Company, The. (See McConnell, Harry R., assignor.)
McConnell, Harry R., assignor to The McConnell-Browning Engineering Company, Richmond, Va. Chuck. 1,532,328; Apr. 7.
McConnell, Harry R., assignor to The McConnell-Browning Engineering Company, Richmond, Va. Chuck. 1,532,329; Apr. 7.
McDowell, James K. (See Fay, Joseph G., assignor.)
McEachron, Edgar J. (See Graves, J., Balderston, and McEachron.)
McElroy, Charles H., Indianapolis, Ind. Safety device for windows. 1,532,769; Apr. 7.
McGregor, Donald, Tacoma, Wash. Steam and air heater. 1,532,506; Apr. 7.
McIalwain, Ray H., Jackson, Minn. End-gate construction. 1,532,540; Apr. 7.
McKowen, John L., Sapulpa, Okla. Water-circulation unit for boilers. 1,532,507; Apr. 7.
McLain, Eugene K., Webster City, Iowa. Spring wheel. 1,532,911; Apr. 7.
McLaughlin, John C., East Orange, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,532,192; Apr. 7.
McMahan, Earl, Portland, Oreg., assignor of one-half to A. L. Hagar, Council, Idaho. Collapsible grate. 1,532,912; Apr. 7.
McMannis, George L., Los Angeles, Calif. Mechanical toy. 1,532,595; Apr. 7.
McMillan, Henry L., Chicago, Ill. Sewage-flow regulator. 1,532,829; Apr. 7.
McNelly, Harry, Claymont, Del. Spruce plate for ingot molds. 1,533,067; Apr. 7.
Mead, Delmer M., et al. (See Burmeister, Paul, assignor.)
Mead, Thaddeus, New Haven, Conn. Artificial bait. 1,533,022; Apr. 7.
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Electric-welding jig. 1,532,833; Apr. 7.
Medical Electric Apparatus Corporation. (See Winterfield, Arthur, assignor.)
Meltz, Meyer N., Atlanta, Ga. Coupling. 1,532,511; Apr. 7.
Meredith, Owen, Morgantown, W. Va. Water ski. 1,533,023; Apr. 7.
Meredith, William, S. A. D. Cox, Huntington Beach, and W. L. Foster, Whittier, Calif. Flow-nozzle structure. 1,532,253; Apr. 7.
Meredith, William, Huntington Beach, assignor of one-third to V. W. Bailey, Pasadena, and one-third to W. H. Taylor, South Pasadena, Calif. Rotary underreamer. 1,532,917; Apr. 7.
Metal Specialties Mfg. Company. (See Berg, John, assignor.)
Metal Specialties Manufacturing Company. (See Wille, Carl L., assignor.)
Metcalf, Walter E., Hudson Falls, assignor to Process Engineers, Inc., New York, N. Y. Preventing froth on paper machines. 1,532,597; Apr. 7.
Metcalfe, William H., et al. (See Arundel, Thomas R., assignor.)
Methlin, Nicolas E., assignor to Schneider & Cie., Paris, France. Arrangement for launching aeroplanes in the air from the ground or from a vessel. 1,532,630; Apr. 7.
Metz, Charles W., Sidney, Nebr. Ford motor attachment. 1,532,426; Apr. 7.
Metzger, Richard, Heidelberg, assignor to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany. Treatment of cellulose esters for dyeing. 1,532,427; Apr. 7.
Metz-Metzetti, Charlie, New York, N. Y. Radiocabinet. Des. 66,979; Apr. 7.
Meyer, Gottfried, St. Paul, Minn. Preparing cheese. Re16,039; Apr. 7.
Meyer, Kurt, Mannheim, and L. Orthner, Freiburg-Breisgau, assignors to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Bavaria, Germany. Producing formic-acid derivatives. 1,532,428; Apr. 7.
Meyer, William K., New York, N. Y. Necktie. 1,532,598; Apr. 7.
Michel, Josef. (See Suchy, R., and Michel.)
Miller, Fred W., Seymour, Conn. Self-heated tool. 1,532,024; Apr. 7.
Miller, Robert L., Dallas, Tex. Fixture for poultry houses and coops. 1,532,429; Apr. 7.
Miller, Thomas S., South Orange, N. J. Thrusting mechanism. 1,532,542; Apr. 7.
Miller, William J., Swissvale Borough, Pa. Process and apparatus for controlling the feeding of glass. 1,532,254; Apr. 7.
Miller, William J., Swissvale Borough, Pa. Transporting glass articles. 1,532,255; Apr. 7.
Milling, H. H., et al. (See Hayes, W. F., and Armstrong, assignors.)
Millspaugh, William H., Sandusky, Ohio. Antifriction journal bearing. 1,532,430; Apr. 7.
Minerals Separation North American Corporation. (See Smith, Harold H., assignor.)
Mitchell, Alexander F., Frost, Tex. Headlight. 1,532,431; Apr. 7.
Mitchell, Donald H., Chattanooga, Tenn., assignor of one-half to H. A. W. Howcott, New Orleans, La. Automatic expanding oil drill. 1,532,330; Apr. 7.

Moens, Neeltje L. W.-L. (See Ringeling, H. G., and Moens.)
Moller, Wilhelm, Lewistown, assignor to Easy Pan Greasing Machine Co., Philadelphia, Pa. Pan-greasing machine. 1,532,256; Apr. 7.
Mols, Emil, Halle-on-the-Saale, assignor to the Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Fungicide, insecticide, and bactericide compound. 1,532,631; Apr. 7.
Monarch Tractors Incorporated. (See Webb, Arthur B., assignor.)
Montoya, Tib, El Valle, assignor of one-half to J. C. Gallegos, Espanola, N. Mex. Wheeled cultivator. 1,532,331; Apr. 7.
Moon Brothers Manufacturing Company. (See Snell, Samuel A., assignor.)
Moore, Irving B., Watertown, Mass. Baseball game. 1,532,708; Apr. 7.
Moore, Langdon, assignor to W. P. Murphy, Chicago, Ill. Sheet-metal car-end construction. 1,532,918; Apr. 7.
Moore, Thomas B. (See Durham, Carroll E., assignor.)
Moore, William E., Beaver, Pa., assignor to Pittsburgh Research Corporation. Electric furnace. 1,532,599; Apr. 7.
Morgan Construction Company. (See Carroll, Elbert H., assignor.)
Morley Button Manufacturing Company. (See Batchelder, Edward C., assignor.)
Morrell, Albert H. (See Wishart, W., and Morrell.)
Morrill, Richard R., Palo Alto, Calif. Heating and ventilating system. 1,532,709; Apr. 7.
Morrison, Abraham L., Dubuque, Iowa. Swivel-joint coupling. 1,532,195; Apr. 7.
Morse & Burt Co. (See Morse, Raymond P., assignor.)
Morse, Raymond P., Scarsdale, assignor to Morse & Burt Co., Inc., Brooklyn, N. Y. Method and apparatus for fitting shoes. 1,532,432; Apr. 7.
Mossberg, Frank, assignor to Mossberg Pressed Steel Corporation, Attleboro, Mass. Tuft-yarn spool. 1,532,600; Apr. 7.
Mossberg Pressed Steel Corporation. (See Mossberg, Frank, assignor.)
Mowry, Edward, Rock Falls, Ill., assignor to International Harvester Company. Hayrake loader. 1,533,025; Apr. 7.
Moylan, George D., assignor to American Standard Watch Case Company, Providence, R. I. Watchcase. Des. 66,998; Apr. 7.
Moylan, George D., assignor to American Standard Watch Case Company, Providence, R. I. Watchcase. Des. 66,999; Apr. 7.
Moylan, George D., assignor to American Standard Watch Case Company, Providence, R. I. Watchcase. Des. 67,000; Apr. 7.
Muckenhirn, Charles H., Detroit, Mich. Light. 1,532,332; Apr. 7.
Mueller, Adolph, trustee. (See Mueller, Philip, assignor.)
Mueller, Albert B., assignor to A. Ehle, Chicago, Ill. Windshield. 1,532,257; Apr. 7.
Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Water-supply fixture. 1,532,433; Apr. 7.
Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Double cock. 1,532,434; Apr. 7.
Müller, Johann C. (See Halank, Gustav F., assignor.)
Müller, Maximilian, Tempelhof, near Berlin, Germany. Band brake acting in both directions of rotation. 1,532,919; Apr. 7.
Muller, Walter. (See Faber, J. P., and Muller.)
Mundell, Ralph B., Chicago, Ill. Vehicle wheel. 1,532,196; Apr. 7.
Munson, Sweney, Fowler, Colo. Tractor. 1,532,920; Apr. 7.
Müns, Ferdinand, Fechenheim-on-the-Main, Germany, assignor to Leopold Cassella & Co., Gesellschaft mit beschränkter Haftung. Process for dyeing with dyestuffs or dyestuff-producing bodies insoluble or sparingly soluble in water. 1,532,921; Apr. 7.
Murdock, James A., Tulsa, Okla. Fuel valve. 1,532,512; Apr. 7.
Murphy, Daniel F., Galveston, Tex. Propeller. 1,532,333; Apr. 7.
Murphy, George J., Buenos Aires, Argentina. Rolling mill. 1,533,026; Apr. 7.
Murphy, P. H., Company. (See Bonsall, Charles D., assignor.)
Murphy, Walter P., assignor to Union Metal Products Company, Chicago, Ill. End wall structure for railway cars. 1,532,922; Apr. 7.
Murphy, Walter P. (See Moore, Langdon, assignor.)
Murray, Walter E., Fort Dodge, Iowa, assignor, by mesne assignments, to Peoples Investment Company. Auxiliary safe and vault lock. 1,532,435; Apr. 7.
Musil, Joseph M., Cleburne, Kans. Posting tray. 1,532,436; Apr. 7.
Mutschler, William, trustee. (See Szekely, Otto E., assignor.)
Naamlooze Vennootschap: Nederlandsche Gist- en Spiritusfabriek. (See Nijk, Dirk R., assignor.)
Naamlooze Vennootschap Norit Witzuiker Maatschappij (also called Norit White Sugar Company). (See Sauer, Johan N. A., assignor.)
Nagle, Matilda, Brooklyn, N. Y. Dyeing machine. 1,532,923; Apr. 7.
National Aniline & Chemical Company. (See Young, J., and Croakman, assignors.)
National Brake & Electric Company. (See Aikman, Burton S., assignor.)
National Equipment Company. (See Bausman, Alonzo L., assignor.)
National Gauge & Equipment Company. (See Padesky, John R., assignor.)
Naugatuck Chemical Company, The. (See Cadwell, Sidney M., assignor.)
Neilegar, John B., jr., Chicago, Ill. Satchel. 1,532,710; Apr. 7.
Nelson, Gustave C., assignor to Borg & Beck Company, Moline, Ill. Vacuum feed system. 1,532,258; Apr. 7.
Nelson, Nels T., Attleboro, assignor to J. F. Sturdy's Sons Co., Attleboro Falls, Mass. Bracelet. 1,532,334; Apr. 7.
Nelson, William E., Kansas City, Mo. 1,532,924; Apr. 7.
Newcomb, Ralph W., Green Village, N. J. Controlling and temperature-comparing system. 1,532,543; Apr. 7.
Newman, A. L., Company. (See Newman, Almyr L., assignor.)
Newman, Almyr L., Warwick, R. I., assignor, by mesne assignments, to A. L. Newman Company, Cranston, R. I. Clasp for bracelets and like articles of jewelry. 1,532,632; Apr. 7.
Newman, Hugo, New York, N. Y. Attachment for cameras. 1,532,544; Apr. 7.
Newton, Donald M., Montclair, N. J., assignor to MacArthur Concrete Pile & Foundation Co., Inc., New York, N. Y. Method and apparatus for the formation of piling. 1,532,711; Apr. 7.
Nicholas, Wilbur H., Indianapolis, Ind. Dustpan. 1,532,197; Apr. 7.
Nicoll, Leonard G., London, England. Decorated or ornamental woodwork and other structural materials. 1,533,027; Apr. 7.
Nielsen, Andrew C., Chicago, Ill. Dresser lamp. 1,532,259; Apr. 7.
Nielsen, Peter T., Kolding, Denmark. Hand tool for connecting telephone and like wires to insulators. 1,532,771; Apr. 7.
Nijk, Dirk R., Leiden, assignor to Naamlooze Vennootschap: Nederlandsche Gist- en Spiritusfabriek, Delft, Netherlands. Producing nonperoxidizable ether. 1,532,772; Apr. 7.
Nilson, John L., and J. F. Prince, Chicago, Ill. Tire pump. 1,532,198; Apr. 7.
Noble, William, and W. Kennedy, Fort Dodge, Iowa. Roadway. 1,532,638; Apr. 7.
Nord, Peter, Lestock, Saskatchewan, Canada. Safety attachment for shipping platforms and the like. 1,532,335; Apr. 7.
Nordström, Ernst R. I., and E. O. Johansson, assignors of one-half to H. T. Tillquist, Stockholm, Sweden. Mounting the heating elements in electric heating apparatus. 1,532,773; Apr. 7.
Norman, John E., Leicester, England. Duplicator. 1,532,925; Apr. 7.
North Manchester Foundry Company. (See Stauffer, John, assignor.)
Noteboom, Hubert, Philadelphia, Pa. Punching die. 1,532,926; Apr. 7.
Nottage, William H., Ruislip, and T. D. Parkin, Chelmsford, England, assignors to Radio Corporation of America: Wireless-telegraph calling device. 1,532,336; Apr. 7.
Nowland, Theopolis, Newport, R. I. Safety hook. 1,532,927; Apr. 7.
O'Brien, William H., Denver, Colo. Belt. 1,532,437; Apr. 7.
O'Connell, Edward M. (See Barksdale, I. R., and O'Connell.)
O'Connor, Michael J., Bloomingdale, N. J. Muffler. 1,532,928; Apr. 7.
Ogden, J. Edward. (See Tomkinson, Charles C., assignor.)
O'Hearn, George E., assignor to O'Hearn Manufacturing Company, Gardner, Mass. Baby-carriage body. 1,532,337; Apr. 7.
O'Hearn Manufacturing Company. (See O'Hearn, George E., assignor.)
Olin, John M., H. H. Wood, and J. B. Smith, assignors to Western Cartridge Company, East Alton, Ill. Method of and apparatus for capping detonators. 1,532,929; Apr. 7.
Oliver, John R., Medfield, assignor to Reece Shoe Machinery Company, Boston, Mass. Stopping and starting mechanism for shoe stitching or other machines. 1,532,634; Apr. 7.
Olson, Ben S., St. Joseph, Mo. Paper-edging machine. 1,532,149; Apr. 7.
Olson, Harald T., Elsie, Nebr. Pipe lifter. 1,532,150; Apr. 7.
Olson, Rasmus O. (See Kittelson, Halmer C., assignor.)
O'Neill, John H., Springfield, Mo. Producing heat. 1,532,930; Apr. 7.
Onepiece Bifocal Lens Company. (See Bugbee, Lucian W., assignor.)
Onepiece Bifocal Lens Company. (See Bugbee, Lucian W., jr., assignor.)

Orchard, Herman C., assignor to Orchard Paper Company, St. Louis, Mo. Producing configured paper. 1,532,712; Apr. 7.

Orchard Paper Company. (See Orchard, Herman C., assignor.)

O'Rourke, Thomas F. (See Chalupa, E., and O'Rourke.)

Orthner, Ludwig. (See Meyer, K., and Orthner.)

Osbun, Justin E., Riverside, Calif. Ceiling ventilator. 1,532,635; Apr. 7.

Osthoff, Walter, Barmen, Germany. Cloth-singeing device. 1,532,260; Apr. 7.

Ostrander, John W., Madison, Wis. Hoist construction. 1,532,151; Apr. 7.

Ottesén, Anton J., Copenhagen, Denmark. Direct cooling of goods. 1,532,931; Apr. 7.

Otto, Erich, Stettin-Pedejuch, Germany. Flying machine. 1,532,152; Apr. 7.

Otto, Werner, Berlin, Germany. Apparatus for generating and applying vapors for hygienic or cosmetic purposes. 1,532,199; Apr. 7.

P. S. L. Company. (See Pierce, Silas A., jr., assignor.)

Packard Motor Car Company. (See Knapp, Archer L., assignor.)

Packard Motor Car Company. (See Vincent, Jesse G., assignor.)

Packard Motor Car Company. (See Woolson, Lionel M., assignor.)

Padesky, John R., assignor to National Gauge & Equipment Company, La Crosse, Wis. Pressure gauge. 1,532,932; Apr. 7.

Page, John W., Chicago, Ill. Swivel coupling. 1,532,774; Apr. 7.

Page, John W., Chicago, Ill. Excavating shovel. 1,532,775; Apr. 7.

Page, Victor W., New York, N. Y. Packing for engine crank cases. 1,532,933; Apr. 7.

Paine, Louis A., assignor to Lincoln Meter Company Limited, Toronto, Ontario, Canada. Graphic electric meter. 1,532,438; Apr. 7.

Pallenberg, Emil, Clinton, Conn. Apparatus for animal acrobats. 1,532,338; Apr. 7.

Palmer, Tom A., Akron, Ohio. Match-box-filling machine. 1,532,153; Apr. 7.

Palmgren, Philip, assignor to J. C. Culver, Yates Center, Kans. Automobile brake-operating means. 1,532,934; Apr. 7.

Paper Novelty Mfg. Co. (See Robichaud, Walter, assignor.)

Pardee, Harvey S., Chicago, Ill. Pump. 1,532,439; Apr. 7.

Parke, Edward H., Findlay, Ohio. Wheeled toy. 1,532,339; Apr. 7.

Parkin, Thomas D. (See Nottage, W. H., and Parkin.)

Parsons, George K., Detroit, Mich. Advertising device. 1,532,713; Apr. 7.

Partlow, Howard W., Utica, N. Y. Heat control for industrial ovens. 1,532,840; Apr. 7.

Partridge, Thomas O., North Sydney, New South Wales, Australia. Rotary brickmaking machine. 1,532,440; Apr. 7.

Pathe Cinema, Anciens Etablissements Pathe Freres. (See Gauriat, Pierre S., assignor.)

Patterson, Ian D., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Machine for making fibrous composition. 1,532,660; Apr. 7.

Patton, John S., University, Va. Device for electrically illuminating card cabinets. 1,532,935; Apr. 7.

Patzig, Monroe L., Des Moines, Iowa. Block for paving and the like and making the same. 1,532,636; Apr. 7.

Paul, Leon R., Chicago, Ill. Bathtub. 1,532,714; Apr. 7.

Paul, Sydney, assignor to Superior Motor Coach Body Co., Lima, Ohio. Chair. Des. 66,980; Apr. 7.

Pearson, Charles, Chicago, Ill., assignor to International Harvester Company. Mower. 1,533,028; Apr. 7.

Pearson, Charles H. (See Bold, Fredrick W., assignor.)

Pearson, Charles H., Brookline, Mass. Locking device for fuses and the like. 1,532,341; Apr. 7.

Peck, Jacob G., Portland, Oreg. Ice-cream-hardening room. 1,532,936; Apr. 7.

Pedersen, Walter B., Mount Vernon, N. Y. Golf club. 1,532,545; Apr. 7.

Peeler, Dock J., Nashville, Tenn. Piston for internal-combustion motors. 1,532,937; Apr. 7.

Peeler, Dock J., Nashville, Tenn. Piston ring. 1,532,938; Apr. 7.

Penn Spring Works Inc. (See Martin, William F., assignor.)

Penny, Frederick G., London, England. Crucible furnace. 1,532,154; Apr. 7.

Peoples Investment Company. (See Murray, Walter E., assignor.)

Pepe, Gustave A., jr., Lynchburg, Va. Stabilizer. 1,532,939; Apr. 7.

Peres, David and H. E., Buffalo, N. Y. Flag. Des. 66,981; Apr. 7.

Peres, Henrietta E. (See Peres, David and H. E.)

Perkins, Augustus T., Oak Park, assignor to Webster Mfg. Company, Chicago, Ill. Car shifter. 1,532,261; Apr. 7.

Permatite Company, The. (See Bolker, Edwin, assignor.)

Petersén, Wilhelm H., Gamla Posten, Ludvika, Sweden. Plug contact. 1,532,200; Apr. 7.

Peterson, Clarence N., Polk, Nebr. Hog waterer. 1,532,940; Apr. 7.

Petrarca, Anthony, Cleveland, Ohio. Extension table. 1,532,715; Apr. 7.

Philadelphia Storage Battery Company. (See Holland, Walter E., assignor.)

Phillips, John E., assignor to Albert Pick & Company, Chicago, Ill. Plate or similar article. Des. 66,982; Apr. 7.

Phillips, John E., assignor to Albert Pick & Company, Chicago, Ill. Plate or similar article. Des. 66,983; Apr. 7.

Pick, Albert, & Company. (See Phillips, John E., assignor.)

Pierce, George L., Brooklyn, assignor to A. G. Spalding & Bros., New York, N. Y. Caddy bag. 1,532,941; Apr. 7.

Pierce, George L., Brooklyn, assignor to A. G. Spalding & Bros., New York, N. Y. Shoe. 1,532,942; Apr. 7.

Pierce, Paul, Chicago, Ill., assignor to Pierce Wrapping Machine Co. Adjustable supporting mechanism. 1,532,201; Apr. 7.

Pierce, Silas A., jr., Pawtucket, R. I., assignor to P. S. L. Company, Attleboro, Mass. Steering wheel for automobiles. 1,532,342; Apr. 7.

Pierce Wrapping Machine Co. (See Pierce, Paul, assignor.)

Pierson, Charles A., Sharon, Pa. Truck aligning and spiking device. 1,533,071; Apr. 7.

Pigg, Joseph S., Owendale, Mich. Chalkless billiard-cue tip. 1,532,943; Apr. 7.

Pike, William A., Ottawa, Ill. Cigarette holder. 1,532,262; Apr. 7.

Pilkaer, Lars P. (See Juccarello, William E., assignor.)

Pilkington Brothers Limited. (See Le Mare, Ernest B., assignor.)

Pittsburgh Plate Glass Company. (See Geistharp, Frederick, assignor.)

Pittsburgh Research Corporation. (See Moore, William E., assignor.)

Pittsburgh Transformer Company. (See Bingay, Robert V., assignor.)

Place, Alfred G., and A. E. Jupp, Youngstown, Ohio. Mill. 1,532,716; Apr. 7.

Plummer, Frederick A., Minneapolis, Minn. Disintegrating and drying peat. 1,532,344; Apr. 7.

Polar Ware Company. (See Vollrath, Walter J., assignor.)

Poole Engineering and Machine Company. (See Davison, Clarence M., assignor.)

Pope, Joseph H., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Guard device. 1,532,546; Apr. 7.

Pösentrup, Heinrich, Munster, Germany. Railway-car driving axle. 1,532,637; Apr. 7.

Potter, Isabelle J., Birmingham, England. Shoulder-strap holder. 1,532,343; Apr. 7.

Powell, Max W., Chicago, Ill. Hoisting mechanism. 1,532,202; Apr. 7.

Powers, Frank T. (See Hassard, R. J., Spalding, and Powers.)

Powers Photo-Engraving Company. (See Hassard, R. J., Spalding, and Powers, assignors.)

Pridham, Edwin S., and P. L. Jenson, assignors to The Magnavox Company, Oakland, Calif. Telephone circuit. 1,532,513; Apr. 7.

Prince, John F. (See Nilson, J. L., and Prince.)

Privett, Joseph A., Monroe, N. C. Illuminating means for motor meters. 1,532,155; Apr. 7.

Process Engineers, Inc. (See Metcalf, Walter E., assignor.)

Producers and Refiners Corporation. (See Clark, Irwin A., assignor.)

Pruyn, John E., New York, N. Y. Piston ring. 1,532,547; Apr. 7.

Puffer, Harold R., Jefferson, Iowa. Oil-level-inspection attachment. 1,532,944; Apr. 7.

Pyrah, Horace A., Denton, England. Starting internal-combustion engines. 1,532,776; Apr. 7.

Quigle, Harry, Hastings, Nebr., assignor to Mrs. L. Quigle, Whittier, Calif. Pressure-cooker attachment. 1,532,945; Apr. 7.

Quigle, Mrs. Lucy. (See Quigle, Harry, assignor.)

Rabus, Wilhelm, Heidenheim-on-the-Brenz, Germany, assignor to American Voith Contact Company, Inc., New York, N. Y. Apparatus for feeding continuous-working wood grinders and method thereof. 1,532,946; Apr. 7.

Radio Corporation of America. (See Dowsett, Harry M., assignor.)

Radio Corporation of America. (See Nottage, W. H., and Parkin, assignors.)

Radio Corporation of America. (See Weagant, Roy A., assignor.)

Raduner & Co., A.-G. (See Schönholzer, Albert, assignor.)

Ragsdale, John P., College Park, Ga. Lock. 1,532,441; Apr. 7.

Rambo, Clyde C., et al. (See Barksdale, I. R., and O'Connell, assignors.)

Ramsey, George, Brooklyn, N. Y. Speedometer. 1,532,548; Apr. 7.

Rand, James H., North Tonawanda, N. Y. Stencil sheet. 1,532,834; Apr. 7.

Ransier, Nelson, Arlington, N. J. Safety hose clamp. 1,532,549; Apr. 7.

Ransome Concrete Machinery Company. (See Faber, J. P., and Muller, assignors.)

Ransome, Ernest L., Plainfield, N. J. Mixing and discharging concrete. 1,532,947; Apr. 7.

Rauch, George F., Pukwana, S. Dak. Electric switch. 1,532,845; Apr. 7.

Raymond Bros. Engineering Co. (See Bergman, Lars H., assignor.)

Raynes, Harry, assignor to Illinois-Pacific Glass Company, San Francisco, Calif. Plunger basin for glass-feeding boots. 1,532,514; Apr. 7.

Reddig, Charles E., Richmond Hill, assignor to Western Electric Company, Incorporated, New York, N. Y. Ironing machine. 1,532,550; Apr. 7.

Reece Button Hole Machine Company, The. (See Connors, John W., assignor.)

Reece Shoe Machinery Company. (See Oliver, John R., assignor.)

Reed, Clarence E., Houston, Tex., assignor to Reed Roller Bit Company. Rotary deep-well-drilling apparatus. 1,532,551; Apr. 7.

Reed Roller Bit Company. (See Duda, Oswald, assignor.)

Reed Roller Bit Company. (See Reed, Clarence E., assignor.)

Rees, Claude, and C. F. Hine, San Francisco, Calif. Drying apparatus. 1,532,948; Apr. 7.

Regal Rubber Co., The. (See Keiser, Charles R., assignor.)

Regener, Frank W., New York, N. Y. Air propeller. 1,532,601; Apr. 7.

Reich, Frederick, Elizabeth, N. J. Piston-ring holder. 1,532,777; Apr. 7.

Reid, Joseph S., Olean, N. Y. assignor to Clark Brothers Company. Sawmill carriage. 1,532,949; Apr. 7.

Reimherr, Adolph H., Providence, R. I. Spoon or similar article. Des. 66,984; Apr. 7.

Reiser, Oliver O., Forest Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Container. 1,532,263; Apr. 7.

Reliable Knitting Work. (See John, Elmer N., assignor.)

Reliance Company, The. (See Wilms, Gustav O., assignor.)

Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Spooler for winding spools of different lengths. 1,532,156; Apr. 7.

Rhodes, Charles J., Pledwick House, near Wakefield, England. Mechanical brake. 1,532,515; Apr. 7.

Rhyne, D. E., et al. (See Mays, James F., assignor.)

Ribaysen, Jacob, Chicago, Ill. Bracket for lighting fixtures. Des. 66,985; Apr. 7.

Rice, Joseph T., Kingston, N. Y. Steel form for and method of applying cement linings to pipe lines, tunnels, etc. 1,532,555; Apr. 7.

Rice, William C., Grand Rapids, Mich. Bumper for vehicles. 1,532,661; Apr. 7.

Rich, Byron M., Rome, N. Y. Sleigh-runner attachment for automobile. 1,532,950; Apr. 7.

Richardson Company, The. (See Reiser, Oliver O., assignor.)

Richardson, Rodney G., assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,533,079; Apr. 7.

Riedele, Philip, assignor to United States Bumper Company, Inc., Los Angeles, Calif. Bumper. 1,532,264; Apr. 7.

Riedmiller, Bernard J., Scranton, Pa. Speed-changing transmission. 1,532,778; Apr. 7.

Riley, William J. (See MacInnes, Hugh, assignor.)

Ringeling, Hermanus G., and N. L. W.-I. Moens, Amsterdam, Netherlands. Destruction of noxious insects. 1,532,157; Apr. 7.

Risser, Arthur L., assignor to U. S. Bottlers' Machinery Co., Chicago, Ill. Clutch. 1,532,662; Apr. 7.

Ritchie, Thomas E., Beverly, Mass. Tobacco-users' article. 1,532,602; Apr. 7.

Ritter, Jacob, New York, N. Y. Vanity case. Des. 66,986; Apr. 7.

Roberts, Isaiah L., Nueva Geroma, Isle of Pines, West Indies, assignor of one-half to W. C. Lichtenstein, Jersey City, N. J. Propeller. 1,532,846; Apr. 7.

Robichaud, Walter, assignor to Paper Novelty Mfg. Co., New York, N. Y. Machine for making ornaments. 1,532,265; Apr. 7.

Robinson, Charles W., and W. C. Dwyer, Auburn, N. Y., assignors to International Harvester Company, Chicago, Ill. Tractor disk harrow. 1,533,029; Apr. 7.

Roche, John. (See Darling, F., and Roche.)

Rodgers, Edward B., Hoboken, N. J., assignor to Victory Vaporizer Company, New York, N. Y. Vaporizer. 1,532,638; Apr. 7.

Rogers, Dayton A., Minneapolis, Minn. Bread toaster. 1,532,951; Apr. 7.

Rolker, Andrew H., Los Angeles, Calif. Liquid measuring and dispensing device. 1,532,779; Apr. 7.

Rolker, Edwin, assignor to The Permatite Company, Baltimore, Md. Forming a phenolic condensation product. 1,532,952; Apr. 7.

Ronning, Adolph. (See Ronning, Andrean G. and A.)

Ronning, Andrean G. and A., Minneapolis, Minn. Cutter for ensilage harvesters and the like. 1,532,266; Apr. 7.

Rose, Henry W., and J. O. Hicks, Victoria, Tex. Screw driver. 1,532,953; Apr. 7.

Rosenberg, Albert, Baltimore, Md. Vested garment. 1,532,267; Apr. 7.

Rosenthal China Corporation, The. (See Schiffner, Hans, assignor.)

Rousseau, George E. C., Oakland, Calif. Concentrator. 1,532,780; Apr. 7.

Rubag Company, The. (See Bastien, Paul, assignor.)

Rubwood, Inc. (See Atwood, H. N., and Bains, assignors.)

Rubwood, Inc. (See Atwood, Harry N., assignor.)

Ruggaber, John W., Racine, Wis., assignor to The Gilchrist Company, Newark, N. J. Drink mixer. 1,532,268; Apr. 7.

Rumpler, Andrew, Cudahy, Wis. Building wall. 1,532,954; Apr. 7.

Russell, William C., and J. F. Canady, Pendleton, Oreg.; said Russell assignor to said Canady. Lock nut. 1,532,603; Apr. 7.

Ruthenburg, Louis R., Dayton, Ohio. Lock for ignition systems and steering wheels. 1,532,347; Apr. 7.

Saart, Albert G., Attleboro, Mass., assignor to Saart Brothers Company. Compact container. 1,532,442; Apr. 7.

Saart Brothers Company. (See Saart, Albert G., assignor.)

Safion, Herman A., New York, N. Y. Lighting-fixture arm. Des. 66,987; Apr. 7.

Sammis, Albert V., assignor to Fire Gun Manufacturing Company, Inc., Huntington, N. Y. Liquid projector. 1,532,203; Apr. 7.

Sammis, Albert V., assignor to Fire Gun Manufacturing Company, Huntington, N. Y. Liquid-projecting device. 1,532,443; Apr. 7.

Sammons, Hardy G., New Orleans, La. Powder-applying brush. 1,532,955; Apr. 7.

Sandbank, Olive, now by marriage O. S. Cass, assignor of one-fourth to W. Sandbank, New York Mills, Minn. Bust-conforming brassière. 1,532,444; Apr. 7.

Sandbank, William. (See Sandbank, Olive, assignor.)

Sanders, D. Leon. (See Malone, Mackey K., assignor.)

Sanford, George H., Meadville, Pa. Airship propeller. 1,532,158; Apr. 7.

Sauer, Johan N. A., Amsterdam, Netherlands. Purifying, filtering, and separating apparatus and process. 1,532,032; Apr. 7.

Sauer, Johan N. A., Amsterdam, Netherlands. Treating liquids. 1,533,033; Apr. 7.

Sauer, Johan N. A., assignor to Naamlooze Vennootschap Norit Witsuiker Maatschappij (also called Norit White Sugar Company), Amsterdam, Netherlands. Purifying and filtering process. 1,533,080; Apr. 7.

Sauer, Johan N. A., assignor to Naamlooze Vennootschap Norit Witsuiker Maatschappij (also called Norit White Sugar Company), Amsterdam, Netherlands. Regenerating decolorizing carbon. 1,533,081; Apr. 7.

Saville, George A., jr., and P. Schmall, Lincoln, Nebr.; said Schmall assignor to said Saville, jr. Oil heater. 1,532,348; Apr. 7.

Savin, John. (See Smith, S. R., and Savin.)

Schaefer, William D., Chicago, Ill. Hair curler. 1,532,956; Apr. 7.

Scheiter, John C., Rochester, N. Y. Last. 1,532,159; Apr. 7.

Schiffner, Hans, Selb, Germany, assignor to The Rosenthal China Corporation, New York, N. Y. China plate or similar article. Des. 66,988; Apr. 7.

Schiller, William A., Anderson, Ind. Insulation-stripping machine. 1,532,717; Apr. 7.

Schlabach, Allen, Hubbard, Oreg. Portable partial-load and full-load weighing device. 1,532,835; Apr. 7.

Schmall, Peter. (See Saville, G. A., jr., and Schmall.)

Schmid, Anton. (See Dietrich, Max, assignor.)

Schmid, Ernest E., Hollis, and W. H. Schneider, Freeport, N. Y. Third-rail support and protection-board bracket. 1,532,836; Apr. 7.

Schmitz, Peter, New York, N. Y. Overflow alarm. 1,532,604; Apr. 7.

Schneer, B. L. (See Brobst, Frank J., assignor.)

Schneider & Cie. (See Methlin, Nicolas E., assignor.)

Schneider & Cie. (See Schneider, Eugène, assignor.)

Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Stopcock and shut-off cock for pressure-fluid piping. 1,532,781; Apr. 7.

Schneider, William H. (See Schmid, E. E., and Schneider.)

Schoellkopf, Jacob F., Dallas, Tex. Horse collar. 1,532,516; Apr. 7.

Schoenmehl, Harold B. (See Martus, M. L., Becker, and Schoenmehl.)

Schofield, Frederick C., assignor to Tobacco Stemming Machine Company, Lynchburg, Va. Stemming tobacco. 1,532,269; Apr. 7.

Schofield, Robert, South Dartmouth, assignor to Draper Corporation, Hopedale, Mass. Bobbin cleaner. 1,532,349; Apr. 7.

Schönholzer, Albert, Horn, Switzerland, assignor to the Firm Raduner & Co., A.-G., Horn (Ct. Thurkau), Switzerland. Imparting new effects to cotton fabrics. 1,532,446; Apr. 7.

Schooley, Claude H., Sioux City, Iowa. Fountain pen. 1,532,445; Apr. 7.

Schrader, Thomas O., Allentown, assignor to The Dent Hardware Company, Fullerton, Pa. Cooler-door-control lock. 1,532,447; Apr. 7.

Sclanders, David G., Weenen, and M. S. Sparks, Klip River, Natal, South Africa. Corn harvester. 1,533,080; Apr. 7.

Senbolt, Walter G., assignor to Illinois Glass Company, Alton, Ill. Packing case for bottles. 1,532,448; Apr. 7.

Senie, Alfred J., Granby, Quebec, Canada. Liquid-dispensing apparatus. 1,532,957; Apr. 7.

Sederholm, John E., assignor to American Hoist & Derrick Company, St. Paul, Minn. Lifting magnet. 1,532,449; Apr. 7.

Selders, Hiester, Reading, assignor to International Advertising Specialty Company, Wernersville, Pa. Paper holder. 1,532,837; Apr. 7.

Severson, Elmer, Deerfield, Wis. Chain snap lock. 1,532,450; Apr. 7.

Sexton, Corydon W., Charlotte, N. C. Heating apparatus. 1,532,958; Apr. 7.

Seymour, Benjamin F., Washington, D. C. Vehicle body suspension. 1,532,605; Apr. 7.

Seymour, John K., Elyria, Ohio. Game and toy. 1,532,160; Apr. 7.

Seys, John, Grand Rapids, Mich. Step plate. Des. 66,989; Apr. 7.

Shailer, Charles M., Milford, Conn. Toy. 1,533,034; Apr. 7.

Shanbeck, John W., Fort Wayne, Ind. Cutting means for mowing machines. 1,533,035; Apr. 7.

Shannin, Joseph M. and P. J., Norwich, Conn. Threader block. 1,533,036; Apr. 7.

Shannon, Paul, Norwich, Conn. Tension device for shuttles. 1,533,037; Apr. 7.

Shannon, Paul J. (See Shannon, Joseph M. and P. J.)

Shatto, Walter A., Millersburg, Pa. Making helical expansible reamers. 1,532,350; Apr. 7.

Shaw, Harry S., Atlantic City, N. J. Iron. 1,532,838; Apr. 7.

Shea, Daniel L., assignor, by mesne assignments, to Wagner Electric Corporation, St. Louis, Mo. Dynamo-electric machine. 1,532,351; Apr. 7.

Sheer, H. M., Company. (See Sheer, Henry M., assignor.)

Sheer, Henry M., Quincy, Ill. Oil container. 1,533,038; Apr. 7.

Sheer, Henry M., assignor to H. M. Sheer Company, Quincy, Ill. Heating system for incubators. 1,532,161; Apr. 7.

Sheppard, Samuel E., and L. W. Eberlin, assignors to Eastman Kodak Company, Rochester, N. Y. Fluorescent screen. 1,532,782; Apr. 7.

Sheppard, Samuel E., and L. W. Eberlin, assignors to Eastman Kodak Company, Rochester, N. Y. Fluorescent screen. 1,532,783; Apr. 7.

Sherman, Alvin G., assignor to Detroit Vapor Stove Company, Detroit, Mich. Stove grate and support. 1,532,839; Apr. 7.

Shield, Paul S., Cincinnati, Ohio, assignor to A. Davis, jr., Covington, Ky. Movable transmission unit. 1,532,270; Apr. 7.

Shimer, Porter W., Easton, Pa. Treatment of molten baths. 1,532,668; Apr. 7.

Shipherd, Guy D., et al. (See Arundel, Thomas E., assignor.)

Shirk, Abner, Decatur, Ill. Multipower shears. 1,533,039; Apr. 7.

Shirk, Oliver D. (See Yates, W. F., and Shirk.)

Shover, Lamar H., Milwaukee, Wis. Electric dehydrator. 1,532,718; Apr. 7.

Shull, William G. (See Currier, H. D., and Shull.)

Sibley, Robert L. (See Bedford, C. W., and Sibley.)

Sieger, John R., Minneapolis, Minn. Hobbyhorse velocipede. 1,532,204; Apr. 7.

Siemens & Halske Aktiengesellschaft. (See Flad, A., and Lubberger, assignors.)

Siemens & Halske Aktiengesellschaft. (See Kaminski, Paul, assignor.)

Silver, Herman, Minneapolis, Minn. Metal reenforced-concrete railway tie. 1,532,719; Apr. 7.

Simon, Max. (See Heusner, K., and Simon.)

Sindelar, Thomas A. (See Harting, W. C., Sindelar, and David.)

Singer, John R., Elwood, and J. F. Brice, Bluffton, Ind.; said Singer assignor to said Brice. Wrench. 1,533,040; Apr. 7.

Sipp, Grant, Paterson, N. J. Reed structure. 1,532,517; Apr. 7.

Skinner Horse-Hoof Combination Sweep Co. (See Skinner, M. T., assignor.)

Skinner, M. T., Cleburne, Tex., assignor to Skinner Horse-Hoof Combination Sweep Co. Wing-sweep attachment for plows. 1,532,556; Apr. 7.

Slama, John A., Racine, Wis. Ironing board. 1,532,840; Apr. 7.

Slater, Fred M., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Feeding mechanism for rock drills. 1,532,205; Apr. 7.

Slater, Harry R., Osawatomie, Kans. Derrick. 1,533,041; Apr. 7.

Slay, Ronald J., Hattiesburg, Miss. Manufacturing sirup. 1,532,271; Apr. 7.

Sloper, Percy, London, England. Burner for burning oil fuel. 1,533,042; Apr. 7.

Smith, A. O., Corporation. (See Andren, B. T., and Dilot, assignors.)

Smith, A. O., Corporation. (See Stresau, Richard, assignor.)

Smith, Edmund S., La Salle, assignor to The Carborundum Company, Niagara Falls, N. Y. Sifter. 1,532,720; Apr. 7.

Smith, Harold H., Woolwich, Sydney, Australia, assignor to Minerals Separation North American Corporation, New York, N. Y. Apparatus for making gas. 1,532,451; Apr. 7.

Smith, John B. (See Olin, J. M., Wood, and Smith.)

Smith, Matthew, Winokur, Ga. Spike supporter. 1,533,043; Apr. 7.

Smith, Samuel W., Fullerton, Calif. Fishhook. 1,533,044; Apr. 7.

Smith, Sidney R., London, and J. Savin, Liverpool, England, assignors to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,532,664; Apr. 7.

Snell, Samuel A., assignor to Moon Brothers Manufacturing Company, St. Louis, Mo. Hose coupling. 1,532,352; Apr. 7.

Snell, Stewart, and W. S. Bridwell, Indianapolis, Ind. Mixer. 1,532,518; Apr. 7.

Snow, Eugene A., River Forest, Ill. Socket for electric lamps. 1,532,206; Apr. 7.

Societe Chimique des Usines du Rhone. (See Altwegg, Jean, assignor.)

Societe Chimique des Usines du Rhone. (See Ledru, M. J. L., and Bachmann, assignors.)

Societe des Grands Reseaux Electriques. (See Uhry, Nelson, assignor.)

Société du Carburateur Zenith. (See Heftler, Victor R., assignor.)

Soudley, Clifford T., Newberry, S. C. Machine for re-babbitting connecting rods. 1,532,639; Apr. 7.

Soroka, Michael S., Atlanta, Ga. Heddle construction for looms. 1,532,606; Apr. 7.

Spalding, A. G., & Bros. (See Pierce, George L., assignor.)

Spalding, Amos H. (See Hassard, R. J., Spalding, and Powers.)

Spaller, George C., Cleveland, Ohio. Traffic signal. 1,532,452; Apr. 7.

Sparks, Mervyl S. (See Sclanders, D. G., and Sparks.)

Sporer, Paul, et al. (See Girard, Alfred O., assignor.)

Speedaumatic Company, The. (See Johnson, John E., assignor.)

Spence, Thomas H., Seattle, Wash., assignor to S. M. Gross, Cleveland, Ohio. Combined hot and cold water faucet. 1,532,272; Apr. 7.

Spencer Elevator Company. (See Day, Wallace E., assignor.)

Spengler, Oskar, and A. Thurm, Dessau, Anhalt, assignors to Actien Gesellschaft für Anilin Fabrikation, Berlin, Germany. Sulphur dyes. 1,532,640; Apr. 7.

Stacy, Leland J., Bloomfield, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,532,207; Apr. 7.

Staples, Arthur L., assignor to Winchester Repeating Arms Company, New Haven, Conn. Skate roll. 1,532,784; Apr. 7.

Staples, Elliot S., Iron Mountain, Mo. Adding machine. 1,533,045; Apr. 7.

Starling, Lyne. (See Yager, J. S., and Starling.)

Starr, Wyatt C., Lake Wales, Fla. Flexible-tread wheel. 1,532,273; Apr. 7.

Stauffer, John, assignor to North Manchester Foundry Company, North Manchester, Ind. Stove. 1,532,453; Apr. 7.

Stayton, Charles V. (See Stayton, Robert W., L. L., J. F., and C. V.)

Stayton, James F. (See Stayton, Robert W., L. L., J. F., and C. V.)

Stayton, Leonard L. (See Stayton, Robert W., L. L., J. F., and C. V.)

Stayton, Robert W., L. L., J. F., and C. V., Eldorado, Ohio. Subgrader. 1,532,841; Apr. 7.

Steam Pressing Iron Company. (See Clark, Frederick J., assignor.)

Steele, Lawrence C., Pittsburgh, Pa. Manufacturing sheet metal. 1,532,607; Apr. 7.

Steinle, William, administrator. (See Steinle, William J.)

Steinle, William J., deceased; W. Steinle, administrator, Flushing, N. Y., assignor to The Hartford Rubber Works Company, Hartford, Conn. Apparatus for vulcanizing tires. 1,532,274; Apr. 7.

Stern, Louis, Co. (See Valcourt, Louis E., assignor.)

Stewart, Frederick W., Oak Park, assignor to Inland Glass Company, Chicago, Ill. Mold for making glassware. 1,532,162; Apr. 7.

Stewart, Frederick W., Oak Park, assignor to Inland Glass Company, Chicago, Ill. Forming hollow glassware. 1,532,163; Apr. 7.

Stewart-Warner Speedometer Corporation. (See Whittington, Frederik G.)

Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,532,721; Apr. 7.

Stjornstrom, Otto. (See Hanson, O., and Stjornstrom.)

Stockall, Alfred H., Bath, England. Printer's galley. 1,533,046; Apr. 7.

Stollberg, Charles, assignor to American Can Company, New York, N. Y. Container. 1,532,665; Apr. 7.

Stoner, Paul, assignor to Landis Tool Company, Waynesboro, Pa. Reciprocating gearing for grinding wheel carriages. 1,533,047; Apr. 7.

Stout, Fred W. (See Coleman, P. H., and Stout.)

Stresau, Richard, Wauwatosa, assignor to A. O. Smith Corporation, Milwaukee, Wis. Uniting thick metal plates by electric welding. 1,532,842; Apr. 7.

Stromberg Motor Devices Company. (See Chandler, Milton E., assignor.)

Strongson, Herman L., Brooklyn, N. Y. Electric-lamp socket. 1,532,208; Apr. 7.

Strumpf, David L., New York, N. Y. Confection scoop. 1,532,275; Apr. 7.

Stubbs, Robert C., Dallas, Tex. Vibrating machine. 1,532,843; Apr. 7.

Sturdy's, J. F., Sons Co. (See Nelson, Nels T., assignor.)

Sturt, Alfred T., Flint, Mich., assignor to W. C. Durant, New York, N. Y. Rear axle. 1,532,557; Apr. 7.

Suchy, Robert, and J. Michel, Griesheim-on-the-Main, assignors to the Firm Chemische Fabrik Griesheim Elektron, Frankfort-on-the-Main, Germany. Refining crude arsenious oxide. 1,532,454; Apr. 7.

Suddendorf, Robert T., assignor to Witt Cornice Company, Cincinnati, Ohio. Waste receptacle. 1,532,844; Apr. 7.

Sulzer, Albert F., assignor to Eastman Kodak Company, Rochester, N. Y. Paster band for roll films. 1,532,785; Apr. 7.

Summers, Bertrand S., Port Huron, Mich. Bleaching and washing composition. 1,532,845; Apr. 7.

Sunderland, Fernando Y., Detroit, Mich. Artificial eye. 1,532,455; Apr. 7.

Sundhausen, Hermann, Bredeney-on-the-Ruhr, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Sparkless circuit connection. 1,532,786; Apr. 7.

Superior Motor Coach Body Co. (See Paul, Sydney, assignor.)

Sustarsic, Mike, and L. Florjancic, Cleveland, Ohio. Sliding and swinging window sashes. 1,533,048; Apr. 7.

Swartz, Elmer F., Perrysburg, Ohio. Stock feeder. 1,532,276; Apr. 7.

Sweet, Laurence A., Los Angeles, Calif. Radiator cap. Des. 67,001; Apr. 7.

Sweet, Laurence A., Los Angeles, Calif. Radiator cap. Des. 67,002; Apr. 7.

Sykes, Frank C., San Francisco, Calif. End clip for window shades. 1,532,519; Apr. 7.

Szekely, Otto E., Moline, Ill., assignor, by mesne assignments, to W. Mutschler, trustee, Goshen, Ind. Torque-cushioning means. 1,532,608; Apr. 7.

Taffel, Mark, London, England. Lingerie clip. Des. 66,990; Apr. 7.

Taggart, William C., Big Rapids, Mich. Liquid-dispensing device. 1,532,609; Apr. 7.

Talley, Randal E., Irwin, assignor to George J. Hagan Company, Pittsburgh, Pa. Resistance-heater support. 1,532,558; Apr. 7.

Tatem, James B. (See Keating, D. A., and Tatem.)

Tatem, James B., et al. (See Keating, D. A., and Tatem, assignors.)

Taylor, Carl C., Des Moines, Iowa. Eyeshade. 1,532,611; Apr. 7.

Taylor, Harry E., Paris, France. Ignition device for internal-combustion engines. 1,532,787; Apr. 7.

Taylor, Horace E., Ogema, Saskatchewan, Canada. Electric hair-singeing tool. 1,532,610; Apr. 7.

Taylor, Israel B., Buffalo, N. Y. Gas burner. 1,532,612; Apr. 7.

Taylor, John W., Gadsden, Ala. Tool-trimming machine. 1,532,959; Apr. 7.

Taylor, W. H., et al. (See Meredith, William, assignor.)

Teitelbaum, Boris H. (See Koretzky, H. M., and Teitelbaum.)

Tenney, Charles H. (See Burgi, Herman, assignor.)

Terriault, Joseph A. O., Ottowa, Ontario, Canada. Heater. 1,532,520; Apr. 7.

Thalhammer, Korbinian, Coon Rapids, Iowa. Draft equalizer. 1,532,164; Apr. 7.

Thomayer, George T., Albany, N. Y., assignor to Fuld and Hatch Knitting Company. Yarn-dyeing device. 1,532,559; Apr. 7.

Thompson, George K., Maplewood, N. J., assignor to American Telephone and Telegraph Company. Hand telephone. Des. 66,991; Apr. 7.

Thomson, David, London, England. Alcoholic solution of animal proteins and preparing the same. 1,532,521; Apr. 7.

Thordarson, Chester H., Chicago, Ill. Electrical condenser. 1,532,846; Apr. 7.

Thurm, Alfred. (See Spengler, O., and Thurm.)

Tiliquist, Hugo T. (See Nordström, E. R. I., and Johansson, assignors.)

Tindall, George W., assignor to C. E. Fulford Limited, Toronto, Ontario, Canada. Soap-stick holder. 1,532,165; Apr. 7.

Tissue Company, The. (See Coons, Charles H., assignor.)

Titeflex Metal Hose Co. (See Fulton, William H., assignor.)

Tobacco Stemming Machine Company. (See Schofield, Frederick C., assignor.)

Tomanek, Joseph, Truscott, Tex. Bayonet mounting for guns. 1,532,960; Apr. 7.

Tomkinson, Charles C., Plainfield, N. J., assignor to J. E. Ogden, Mountainville, N. Y. Door mechanism. 1,532,560; Apr. 7.

Trarara, Petro, Benton Harbor, Mich. Writing set. Des. 66,992; Apr. 7.

Travers, John L., assignor to Crandall Packing Company, Palmyra, N. Y. Rod and stem packing. 1,532,961; Apr. 7.

Trester, Herault A., assignor, by mesne assignments, to Koehring Company, Milwaukee, Wis. Control mechanism for mixing machines. 1,532,277; Apr. 7.

Tufford, John G., Elyria, Ohio. Rubber heel. 1,532,209; Apr. 7.

Turner Brothers Asbestos Company Limited. (See Kenyon, Percy G., assignor.)

Turner, John C., Dayton, Ohio. Flywheel and pinion construction for toys. 1,532,963; Apr. 7.

Turner, John C., Dayton, Ohio. Flywheel for toys. 1,532,962; Apr. 7.

Tyrrell, Nathan E., Kansas City, Mo. Oil burner. 1,532,847; Apr. 7.

Uhry, Nelson, assignor to Societe des Grands Reseaux Electriques, Paris, France. Arch for the electrification of railways. 1,532,278; Apr. 7.

Ullom, Homer, Lamar, Colo. Endless sickle blade. 1,532,279; Apr. 7.

Underwood Typewriter Company. (See Barker, Benjamin F., assignor.)

Underwood Typewriter Company. (See Bryant, William O., assignor.)

Underwood Typewriter Company. (See Corcoran, Cornelius B., assignor.)

Underwood Typewriter Company. (See Johnson, Arthur A., assignor.)

Underwood Typewriter Company. (See McLaughlin, John C., assignor.)

Underwood Typewriter Company. (See Stickney, Burnham C., assignor.)

Underwood Typewriter Company. (See Waldheim, John, assignor.)

Union Metal Products Company. (See Murphy, Walter P., assignor.)

United Engineering and Foundry Company. (See Johnson, Lane, assignor.)

United Shoe Machinery Corporation. (See Pope, Joseph H., assignor.)

U. S. Bottlers' Machinery Co. (See Risser, Arthur I., assignor.)

United States Bumper Co. (See Andreani, Findley E., assignor.)

United States Bumper Company. (See Riedele, Philip, assignor.)

United States Cast Iron Pipe & Foundry Company. (See Ladd, James B., assignor.)

U. S. Light & Heat Corporation. (See Engel, Frank, assignor.)

United States Smelting, Refining & Mining Company. (See Cullen, Joseph F., assignor.)

Utility Manufacturing Company. (See Hutchens, Edward, assignor.)

Valcourt, Louis E., assignor to Louis Stern Co., Providence, R. I. Bracelet hook. 1,532,613; Apr. 7.

Valguarnera, Corrado, Palermo, Italy. Radiosignaling ships during a fog. 1,532,964; Apr. 7.

Vallot, André, Levallois, France. Cap cover. 1,532,965; Apr. 7.

Van Buren, John, assignor to American Chicle Company, New York, N. Y. Labeling machine. 1,532,561; Apr. 7.

Vandervell, Charles A., Acton, England. Apparatus for varying the compression space in internal-combustion-engine cylinders. 1,532,788; Apr. 7.

Van Dyke, Gerald M., assignor of one-half to H. K. MacDougall, Tientsin, China. Clock calendar. 1,532,966; Apr. 7.

Van Etten, William V., Everett, Wash. Dirigible headlight. 1,532,280; Apr. 7.

Van Heusen, John M. (See Bacon, R. F., and Kidwell, assignors.)

Van Pelt, Eliakim M., Elizabeth, and R. H. Dixon, Newark, N. J. Coal-saving device. 1,532,967; Apr. 7.

Vanson, Mike, Plymouth, Pa. Attachment for the neckbands of shirts. 1,532,562; Apr. 7.

Van Stijn, Bernardus G., Liese, Netherlands. Fruit-sorting device. 1,532,968; Apr. 7.

Van Tilburg, Frank E., Minneapolis, Minn. Apparatus for separating composite oils into component parts. 1,532,456; Apr. 7.

Van Tine, John B., Lambertville, N. J. Submarine life saver. 1,532,281; Apr. 7.

Van Tuyl, Thomas. (See Cook, A. E., and Van Tuyl.)

Varnum, Arthur C., Southbridge, Mass. Thread-guiding device for spinning frames. 1,532,282; Apr. 7.

Verbunce, Charles E., Winnetka, Ill. Lighting globe. Des. 66,993; Apr. 7.

Victor-Dye Limited. (See De Mesa, Bertie, assignor.)

Victory Vaporiser Company. (See Rodgers, Edward B., assignor.)

Vincent, Clyde H., Oilton, Okla. Engine accelerator. 1,532,969; Apr. 7.

Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,532,283; Apr. 7.
Viola, Angelo. (See Balthasar, J., and Viola.)
Voigt Automatic Direction Signal Co. (See Voigt, Frederick E., assignor.)
Voigt, Frederick E., Los Angeles, Calif., assignor to Voigt Automatic Direction Signal Co. Electric switch. 1,532,563; Apr. 7.
Vollrath, Walter J., assignor to Polar Ware Company, Sheboygan, Wis. Scaling metal objects. 1,532,789; Apr. 7.
Von Soden-Fraunhofen, Graf Alfred, assignor to Zahnradfabrik Aktien-Gesellschaft, Friedrichshafen, Germany. Coupling. 1,532,564; Apr. 7.
Wadsworth, Arthur W., and A. P. Conant, Fort Thomas, assignors to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase appendage. Des. 66,994; Apr. 7.
Wadsworth, Arthur W., and A. P. Conant, Fort Thomas, assignors to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase. Des. 66,995; Apr. 7.
Wadsworth Watch Case Company, The. (See Wadsworth, A. W., and Conant, assignors.)
Wagner Electric Corporation. (See Shea, Daniel L., assignor.)
Wagner Electric Corporation. (See Weichsel, Hans, assignor.)
Waibel, Karl, New York, N. Y. Waterproof container. 1,532,614; Apr. 7.
Wajer, John, and O. W. Hopp, Chicago, Ill. Toy dump wagon. 1,532,666; Apr. 7.
Wakefield, Walter H. (See Lockwood, G. D., and Wakefield.)
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,533,076; Apr. 7.
Waldorf, Frederick, Erie, Pa. Writing instrument. 1,532,284; Apr. 7.
Waldron, Leonidas N., Amity, Oreg. Combination tool. 1,532,353; Apr. 7.
Walker, Edward, Grantwood, N. J. Swimming belt. 1,532,970; Apr. 7.
Wall, Agda E., Brooklyn, N. Y. Playing-card game. 1,532,722; Apr. 7.
Wallis, Guy C., Waycross, Ga. Valve and catch pocket. 1,532,971; Apr. 7.
Wallner, Lloyd H. (See Wentworth, C. H., and Wallner.)
Walton, Joseph S., Los Angeles, Calif. Revolving stool. 1,532,354; Apr. 7.
Warner Gear Company. (See White, Samuel O., assignor.)
Waschek, Frank, Hamtramck, Mich. Cigar holder. 1,533,050; Apr. 7.
Wass, Clarence W. (See De Turk, Ira F., assignor.)
Watson, Charles P., Big Pine, Calif. Percussion fuse. 1,532,355; Apr. 7.
Watson, Charles W., St. Kilda, Victoria, Australia. Machine for spacing, tensioning, and coiling material such as wire. 1,532,285; Apr. 7.
Watson, William W., Rogersville, Ala. Coin-controlled operating mechanism. 1,533,049; Apr. 7.
Weagant, Roy A., Douglas Manor, N. Y., assignor, by mesne assignments, to Radio Corporation of America. Radio signaling system. 1,532,356; Apr. 7.
Weagant, Roy A., Douglas Manor, N. Y., assignor, by mesne assignments, to Radio Corporation of America. Method and apparatus for radiosignaling. 1,532,357; Apr. 7.
Weaver, Benjamin F., jr., Palmyra, Tenn. Toothbrush. 1,532,522; Apr. 7.
Weaver, Walter E., Nacogdoches, Tex. Spring wheel. 1,532,166; Apr. 7.
Webb, Arthur B., assignor to Monarch Tractors Incorporated, Watertown, Wis. Plow. 1,532,723; Apr. 7.
Webster Mfg. Company. (See Perkins, Augustus T., assignor.)
Weed, Harry D., Syracuse, N. Y., assignor to American Chain Company, Inc. Snubber. 1,532,286; Apr. 7.
Weichsel, Hans, assignor to Wagner Electric Corporation, St. Louis, Mo, Alternating-current motor. 1,532,287; Apr. 7.
Weichsel, Hans, assignor to Wagner Electric Corporation, St. Louis, Mo. Alternating-current motor. 1,532,288; Apr. 7.
Weidemann, Reinhold, Houston, Tex. Mowing machine. 1,532,358; Apr. 7.
Weil, Josephine M., New York, N. Y. Loom for hand weaving. 1,532,848; Apr. 7.
Weiler & Company, G. m. b. H. (See Weiler, Ernst, assignor.)
Weiler, Ernst, assignor of one-half to Weiler & Co., G. m. b. H., Berlin, Germany. Pencil sharpener. 1,532,167; Apr. 7.
Weiler, Max, Elberfeld, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Pyrone dye. 1,532,790; Apr. 7.
Weinberg, Fred, Schenectady, N. Y. Detector. 1,532,523; Apr. 7.
Weinbrenner, John H., New York, N. Y. Electric scraper. 1,532,289; Apr. 7.
Weis Fibre Container Corporation, The. (See Weis, Harry C., assignor.)
Weis, Harry C., assignor to The Weis Fibre Container Corporation, Monroe, Mich. Container. 1,532,210; Apr. 7.
Welch, Walter H., Bristol, England. Rim-contracting device. 1,533,073; Apr. 7.
Welin Davit & Boat Corporation. Andrew, James D., assignor.)
Weller, Leslie N., Pineville, Ky. Billiard-table pocket. 1,533,051; Apr. 7.
Wendle, Harry C., New Paris, and M. Holsopple, Seanor, Pa. Combined circuit breaker and fuse receptacle. 1,532,524; Apr. 7.
Wentworth, Clinton H., and L. H. Wallner, Los Angeles, Calif.; said Wallner assignor to said Wentworth. Radiator. 1,532,457; Apr. 7.
Wesleck, Richard A., Toledo, Ohio. Suspenders. 1,532,211; Apr. 7.
West, Charles, et al. (See Burmeister, Paul, assignor.)
Western Cartridge Company. (See Olin, J. M., Wood, and Smith, assignors.)
Western Electric Company. (See From, Owen C., assignor.)
Western Electric Company. (See Harris, James E., assignor.)
Western Electric Company. (See Reddig, Charles E., assignor.)
Western Electric Company. (See Stacy, Leland J., assignor.)
Wheatley, Charles A., Jeffersonville, Ind. Action for player pianos. 1,533,052; Apr. 7.
Whipple, James B., Los Angeles, Calif. Cling-pit attachment for hand pitters. 1,532,458; Apr. 7.
White, Clarence B., Los Angeles, Calif. Wave motor for propelling vessels. 1,532,459; Apr. 7.
White, Samuel O., assignor to Warner Gear Company, Muncie, Ind. Brake lever. 1,532,972; Apr. 7.
Whittington, Frederik G., Evanston, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Vehicle searchlight bracket. Des. 66,996; Apr. 7.
Wico Electric Company. (See Brown, P., Hendrickson, Clark, and Louis, assignors.)
Widdowson, Walter P. (See Margetson, O., and Widdowson.)
Wilbur, Peter L., Tuckahoe, N. Y. Fire extinguisher. Des. 66,997; Apr. 7.
Willard Storage Battery Company. (See Dunsweiler, Carl J., assignor.)
Wille, Carl I., assignor to Metal Specialties Manufacturing Company, Chicago, Ill. Visor. 1,532,791; Apr. 7.
Williams, Charles E., assignor to General Motors Corporation, Detroit, Mich. Carburetor. 1,532,460; Apr. 7.
Williams, Henry W. (See Woods, Owen C., assignor.)
Williamson, Bartlett R., assignor to J. A. Williamson, San Francisco, Calif. Organized apparatus for assembling, scoring, breaking, and uniting members to form a knockdown basket. 1,532,641; Apr. 7.
Williamson, John A. (See Williamson, Bartlett R., assignor.)
Willis, Bernard D., Oak Park, assignor to Automatic Electric Company, Chicago, Ill. Semiautomatic telephone system. 1,532,849; Apr. 7.
Wills, Edwin C., East Orange, N. J. Automatic cut-off and cut-in valve. 1,532,615; Apr. 7.
Willwerscheid, Theodor R., St. Paul, Minn. Luggage carrier. 1,532,461; Apr. 7.
Wilms, Gustav O., assignor to The Reliance Company, Milwaukee, Wis. Magnetic latch mechanism. 1,532,212; Apr. 7.
Wilson Fastener Company, The. (See Clark, Emma B., assignor.)
Wilson, Grant, Walton, N. Y. Photo mount. 1,532,290; Apr. 7.
Wilson, Harold A. M. (See Cummings, J., and Wilson.)
Wilson, Robert E., Cambridge, Mass., assignor to Baltimore Gas Engineering Corporation, Baltimore, Md. Method of and apparatus for removing volatile fluids from solids and substantially nonvolatile liquids. 1,533,053; Apr. 7.
Winchester Repeating Arms Company. (See Staples, Arthur L., assignor.)
Winestock, Otto C., Perkinsville, Vt. Vehicle spring. 1,532,565; Apr. 7.
Winkelmann, Herbert A., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Renewed rubber and producing the same. 1,532,213; Apr. 7.
Winkley, Erastus E., Lynn, Mass. Equilibrating mechanism for flying machines. 1,532,616; Apr. 7.
Winterfield, Arthur, New York, N. Y. Electromedical apparatus. 1,532,463; Apr. 7.
Winterfield, Arthur, assignor to Medical Electric Apparatus Corporation, New York, N. Y. Electrical massaging instrument. 1,532,462; Apr. 7.
Wishart, William, and A. H. Morrell, assignors, by mesne assignments, to Climax Engineering Company, Clinton, Iowa. Freezing thermostat and control mechanism. 1,532,214; Apr. 7.
Witt Cornice Company. (See Suddendorf, Robert T., assignor.)
Wolfe, Harry H., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Cast side frame for car trucks. 1,532,792; Apr. 7.

Wolfson, Abraham W., Newark, N. J. Umbrella. 1,533,034; Apr. 7.
Wood, Bessie T., et al. (See Barksdale, I. R., and O'Connell, assignors.)
Wood, Henry H. (See Olin, J. M., Wood, and Smith.)
Woods, Frederick N., jr. (See Hadsel, Alvah D., assignor.)
Woods, Owen C., Waycross, assignor of one-fourth to H. W. Williams, Argyle, Ga. Boll-weevil trap. 1,532,215; Apr. 7.
Woodward, George H., San Francisco, Calif. Piston. 1,533,055; Apr. 7.
Woodward, Irving C., Syracuse, N. Y. Clutch. 1,532,464; Apr. 7.
Woodward, Irving C., Syracuse, N. Y. Differential mechanism. 1,532,465; Apr. 7.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Float-valve means. 1,532,291; Apr. 7.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,532,292; Apr. 7.
Workers Trust Company, Administrator. (See Denning, Ansel C.)
Wright, Emmett G., Seattle, Wash. Motor-vehicle light bracket. 1,532,642; Apr. 7.
Yager, Joseph S., and L. Starling, Greenville, Miss. Icescoring machine. 1,533,056; Apr. 7.
Yale & Towne Manufacturing Company, The. (See Augenbraun, Peter F., assignor.)
Yale & Towne Manufacturing Company, The. (See Ledin, Charles, assignor.)
Yanochowski, George A., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,532,216; Apr. 7.
Yanochowski, George A., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,532,217; Apr. 7.
Yard, Abram T., Maplewood, N. J. Scissors. 1,532,850; Apr. 7.
Yates, P. B., Machine Company. (See Marshall, Charles J., assignor.)
Yates, Wilber F., and O. D. Shirk, Lewiston, Idaho. Straw spreader. 1,532,350; Apr. 7.
Young, Daniel, Brooklyn, N. Y., assignor to Young Inventions, Inc. Hosiery. 1,532,724; Apr. 7.
Young, Emma N., New York, N. Y. Bodkin and fastener. 1,532,566; Apr. 7.
Young Inventions, Inc. (See Young, Daniel, assignor.)
Young, John, Caldwell, N. J., and E. G. Croakman, Buffalo, assignors to National Aniline & Chemical Company, Inc., New York, N. Y. Production of diaryl-guanidines. Re16,049; Apr. 7.
Youngberg, John, Los Angeles, Calif. Support for tailors' irons. 1,532,617; Apr. 7.
Younker, William C., and M. J. Kelly, Mason City, Iowa. Juice extractor. 1,532,525; Apr. 7.
Zach, Giovanni, Pola, Italy. Furnace grate. 1,532,526; Apr. 7.
Zahnradfabrik Aktien-Gesellschaft. (See Von Soden-Fraunhofen, Graf Alfred, assignor.)
Zent, William F. (See Houghland, Frank H., assignor.)
Zepeda, Isaias, San Antonio, Tex. Transposition device. 1,532,793; Apr. 7.
Zittel, E. B. (See Hill, Richard D., assignor.)
Zubli, Justus C., Bremerton, Wash. Printing device and type. 1,532,860; Apr. 7.
Zuccarello, William E., Longmont, assignor of one-fourth to L. P. Pilkaer, Denver, Colo. Electrically-operated safety lock for centrifugal discharging machines. 1,532,851; Apr. 7.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 7TH DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acetaldehyde, Manufacture of. M. J. L. Ledru and E. J. Bachmann. 1,532,190; Apr. 7.
Acid derivatives, Producing formic-. K. Meyer and L. Orthner. 1,532,428; Apr. 7.
Adding machine. E. S. Staples. 1,533,045; Apr. 7.
Addressing machine. H. Deutsch. 1,532,890; Apr. 7.
Adhesive binding strip for closing and reclosing packages. F. H. Houghland. 1,532,900; Apr. 7.
Advertisers, Dummy lay-out for. D. C. Carter. 1,532,379; Apr. 7.
Advertising device. G. K. Parsons. 1,532,718; Apr. 7.
Aeroplane. J. B. Immers. 1,532,902; Apr. 7.
Aeroplanes in the air from the ground or from a vessel, Arrangement for launching. N. E. Methlin. 1,532,630; Apr. 7.
Alarm: *See*—
Overflow alarm.
Alcoholic solution of animal proteins and preparing the same. D. Thomson. 1,532,521; Apr. 7.
Alkali-metal chlorides, Treatment of. J. Kersten. 1,533,009; Apr. 7.
Aminoazo compounds, Preparation of. K. Heusner and M. Simon. 1,532,627; Apr. 7.
Animal acrobats, Apparatus for. E. Pallenberg. 1,532,338; Apr. 7.
Antitheft device. F. W. G. Kammerer. 1,533,007; Apr. 7.
Armor coat. W. Bailey. 1,532,362; Apr. 7.
Arsenate of calcium and analogous elements, Making the. J. F. Cullen. 1,532,577–8; Apr. 7.
Arsenious oxide, Refining crude. R. Suchy and J. Michel. 1,532,454; Apr. 7.
Ash sifter. H. S. Earle. 1,532,390; Apr. 7.
Automobile brake-operating means. P. Palmgren. 1,532,934; Apr. 7.
Automobile bumper. J. H. Bertrand, jr. 1,532,673; Apr. 7.
Automobile bumper. J. Hayes. 1,532,487; Apr. 7.
Automobile bumpers, Display plate for. W. F. Martin. 1,533,068; Apr. 7.
Automobile bumpers, Tie-plate for. W. F. Martin. 1,533,069; Apr. 7.
Automobile clutch control. L. James. 1,532,494; Apr. 7.
Automobile dashboards, Gas indicator for. T. M. Eynon. 1,532,530; Apr. 7.
Automobile door lock. P. F. Augenbraun. 1,532,294; Apr. 7.
Automobile steering wheel. S. A. Pierce, jr. 1,532,342; Apr. 7.
Automobiles, Side closure for. J. Blackburn. 1,532,869; Apr. 7.
Automobiles, Sleigh-runner attachment for. B. M. Rich. 1,532,950; Apr. 7.
Axle, Railway-car driving. H. Pösentrup. 1,532,637; Apr. 7.
Axle, Rear. A. T. Sturt. 1,532,557; Apr. 7.
Bag: *See*—
Caddy bag.
Bait, Artificial. T. Mead. 1,533,022; Apr. 7.
Baking and cooking utensil. G. Cappi. 1,532,881; Apr. 7.
Baling machine. W. H. Martin. 1,532,194; Apr. 7.
Bank, Coin savings. J. A. Kidwell. 1,532,411–12; Apr. 7.
Bar: *See*—
Coupling tightener bar.
Basket. D. Bloom. 1,532,298; Apr. 7.
Basket, Organized apparatus for assembling, scoring, breaking, and uniting members to form a knockdown. B. R. Williamson. 1,532,641; Apr. 7.
Basket, Shipping. H. C. Link. 1,532,144; Apr. 7.
Bathtub. L. R. Paul. 1,532,714; Apr. 7.
Battery: *See*—
Dry-cell battery.
Battery container, Storage-. C. J. Dunsweiler. Des. 66,968; Apr. 7.
Battery shipping crate and stand, Combined. F. Engel. 1,532,738; Apr. 7.
Bearing. C. E. Durham. 1,532,993; Apr. 7.
Bearing. C. C. Haigler. 1,532,181; Apr. 7.
Belt. W. H. O'Brien. 1,532,487; Apr. 7.
Belt, Endless conveyer. G. Getting and A. Jonas. 1,532,807; Apr. 7.

Belt holder, Waist-. A. J. Bennett. 1,532,671; Apr. 7.
Belt, Swimming. E. Walker. 1,532,970; Apr. 7.
Beverage mixers, Top for. G. S. Bryce. 1,532,681; Apr. 7.
Billiard-cue tip, Chalkless. J. S. Piga. 1,532,943; Apr. 7.
Billiard-table pocket. L. N. Weller. 1,533,051; Apr. 7.
Bit: *See*—
Bridle bit. Drill bit.
Bleaching and washing composition, B. S. Summers. 1,532,845; Apr. 7.
Block: *See*—
Threader block.
Board: *See*—
Ironing board.
Boat. G. Csengery. 1,532,990; Apr. 7.
Boats, Engaging and disengaging gear for ships'. J. D. Andrew. 1,532,857; Apr. 7.
Bobbin cleaner. R. Schofield. 1,532,349; Apr. 7.
Bobbin-winding machine. J. D. Joyce. 1,532,409; Apr. 7.
Bodkin and fastener. E. N. Young. 1,532,566; Apr. 7.
Body brace. D. V. Cunning. 1,532,304; Apr. 7.
Boiler. R. Greenham. 1,532,990; Apr. 7.
Boilers, Water-circulation unit for. J. L. McKowen. 1,532,507; Apr. 7.
Boll-weevil trap. O. C. Woods. 1,532,215; Apr. 7.
Book end. J. Katz. Des. 66,974; Apr. 7.
Bottle-packing case. W. G. Seabold. 1,532,448; Apr. 7.
Bottles, Dispensing attachment for. G. F. Anderson. 1,532,975; Apr. 7.
Box: *See*—
Collapsible box.
Box handle. W. E. Holland. 1,532,898; Apr. 7.
Brace: *See*—
Body brace.
Bracelet. N. T. Nelson. 1,532,334; Apr. 7.
Bracelet hook. L. E. Valcourt. 1,532,613; Apr. 7.
Bracelets and like articles of jewelry, Clasp for. A. L. Newman. 1,532,632; Apr. 7.
Bracket: *See*—
Vehicle light bracket.
Brake: *See*—
Electromagnetic brake. Vehicle brake.
Mechanical brake.
Brake acting in both directions of rotation, Band. M. Müller. 1,532,919; Apr. 7.
Brake band. P. G. Kenyon. 1,532,141; Apr. 7.
Brake-beam support. B. Haskell. 1,532,626; Apr. 7.
Brake lever. S. O. White. 1,532,972; Apr. 7.
Brake mechanism, Friction. C. L. C. Magee. 1,532,629; Apr. 7.
Braking device. J. Blackburn. 1,532,868; Apr. 7.
Braking device. J. Blackburn. 1,532,870; Apr. 7.
Braking mechanism. P. Bastien. 1,532,644; Apr. 7.
Brassière. E. A Lindemann. 1,532,250; Apr. 7.
Brassière, Bust-conforming. O. Sandbank. 1,532,444; Apr. 7.
Breathing apparatus, Self-contained. A. B. Dräger. 1,532,654; Apr. 7.
Brick jointer and raker. C. N. Christensen. 1,532,380; Apr. 7.
Brickmaking machine, Rotary. T. O. Partridge. 1,532,440; Apr. 7.
Bridle bit. E. Erickson. 1,532,622; Apr. 7.
Brush. J. D. Garvey. 1,532,397; Apr. 7.
Brush, Fountain. W. Garner. 1,532,804; Apr. 7.
Brush, Powder-applying. H. G. Sammons. 1,532,955; Apr. 7.
Building, Metal. W. C. Harting, T. A. Sindelar, and C. E. David. 1,532,695; Apr. 7.
Built-up panel. H. W. Broady. 1,532,874; Apr. 7.
Bulletin-display frame. W. H. Hall. 1,532,896; Apr. 7.
Bumper. P. Riedele. 1,532,264; Apr. 7.
Burial vault. T. F. Jeter. 1,532,313; Apr. 7.
Burner: *See*—
Gas burner. Oil burner.
Burner for burning oil fuel. P. Sloper. 1,533,042; Apr. 7.
Button and tie fastener, Combined collar. C. A. Bell. 1,532,168; Apr. 7.
Buttonhole-sewing machine. J. W. Connors. 1,532,301; Apr. 7.

Cabinet for use with sound-reproducing devices. E. A. Graham. 1,532,811; Apr. 7.
Cabinet, Towel. J. N. Borroughs. 1,532,370; Apr. 7.
Cabinets, Device for electrically illuminating card. J. S. Patton. 1,532,935; Apr. 7.
Caddy bag. G. L. Pierce. 1,532,941; Apr. 7.
Calculating machine. J. F. Mayo. 1,532,832; Apr. 7.
Calendar. I. Leibowitz. 1,532,906; Apr. 7.
Calendar, Clock. G. M. Van Dyke. 1,532,966; Apr. 7.
Calendar-pad fastener. S. E. Bartold. 1,532,863; Apr. 7.
Calipers. C. L. Bausch and E. Hart. 1,532,297; Apr. 7.
Calling device. F. L. Baer. 1,532,648; Apr. 7.
Calling device, Automatic. J. G. Blessing. 1,532,674–7; Apr. 7.
Cameras, Attachment for. H. Newman. 1,532,544; Apr. 7.
Can holder. A. Major. 1,532,913; Apr. 7.
Can opener. H. Luscher. 1,532,594; Apr. 7.
Cap cover. A. Vallot. 1,532,965; Apr. 7.
Cap, Knitted. E. N. Joha. 1,532,750; Apr. 7.
Car coupling, Mining-. E. A. Cunningham. 1,532,887; Apr. 7.
Car-end construction, Sheet-metal. L. Moore. 1,532,918; Apr. 7.
Car, Railway. I. Everett and G. T. Cooke. 1,532,309; Apr. 7.
Car roof. C. D. Bonsall. 1,532,872; Apr. 7.
Car shifter. A. T. Perkins. 1,532,261; Apr. 7.
Cars, End wall structure for railway. W. P. Murphy. 1,532,922; Apr. 7.
Carbon, Regenerating decolorizing. J. N. A. Sauer. 1,532,031; Apr. 7.
Carburetor. M. G. Chandler. 1,532,229; Apr. 7.
Carburetor. V. R. Heftler. 1,532,697; Apr. 7.
Carburetor. C. E. Williams. 1,532,460; Apr. 7.
Card holder. R. N. Elliott. 1,532,127; Apr. 7.
Card support. C. W. Kress. 1,532,536; Apr. 7.
Carriage body, Baby-. G. E. O'Hearn. 1,532,837; Apr. 7.
Carrier: *See*—
Luggage carrier. Tire carrier.
Carton. A. Bienvenu. Des. 66,963; Apr. 7.
Case: *See*—
Bottle-packing case.
Casserole holder or similar article, Metal. S. W. Farber. Des. 66,969–70; Apr. 7.
Casting, Method and apparatus for centrifugal. J. B. Ladd. 1,532,537; Apr. 7.
Castings, Method and apparatus for making centrifugal. P. J. Flaherty. 1,532,690; Apr. 7.
Catch. D. D. Leidy. 1,533,017; Apr. 7.
Ceiling ventilator. J. E. Osbun. 1,532,685; Apr. 7.
Cellulose esters for dyeing, Treatment of. R. Metzger. 1,532,427; Apr. 7.
Chain snap lock. E. Severson. 1,532,450; Apr. 7.
Chair. S. Paul. Des. 66,980; Apr. 7.
Check-stub holder. M. Dysthe. 1,532,889; Apr. 7.
Cheese, Preparing. G. Meyer. Re16,089; Apr. 7.
Chloridizing volatilization process. H. R. Layng. 1,532,503; Apr. 7.
Chuck. H. R. McConnell. 1,532,328–9; Apr. 7.
Cigar-head forming plate. J. D. Madlem. 1,532,422; Apr. 7.
Cigar holder. F. Waschek. 1,533,050; Apr. 7.
Cigar-light extinguisher. O. A. R. Berger. 1,532,363; Apr. 7.
Cigarette holder. D. Collins. 1,532,732; Apr. 7.
Cigarette holder. H. H. Harnsberger. 1,532,403; Apr. 7.
Cigarette holder. W. A. Pike. 1,532,262; Apr. 7.
Cinematograph machine. J. Cummings and H. A. M. Wilson. 1,532,886; Apr. 7.
Circuit breaker and fuse receptacles, Combined. H. C. Wendle and M. Holsopple. 1,532,524; Apr. 7.
Circuit connection, Sparkless. H. Sundhaussen. 1,532,786; Apr. 7.
Clamp: *See*—
Hose clamp. Rubber-dam clamp.
Clasp: *See*—
Lingerie clasp.
Cleaner: *See*—
Bobbin cleaner. Mop cleaner.
Cloth-singeing device. W. Osthoff. 1,532,200; Apr. 7.
Cloth substitute, Making. M. A. Besso and F. P. Habicht. 1,532,648; Apr. 7.
Clothesline support, Extension. C. W. Cooper. 1,532,502; Apr. 7.
Clothespin, Safety. T. R. Mathews. 1,532,510; Apr. 7.
Clutch. E. C. Batchelder. 1,532,116; Apr. 7.
Clutch. A. I. Risser. 1,532,662; Apr. 7.
Clutch. L. C. Woodward. 1,532,464; Apr. 7.
Coal-saving device. E. M. Van Pelt and R. H. Dixon. 1,532,967; Apr. 7.
Coal treatment. R. Lessing. 1,532,826; Apr. 7.
Cock, Double. P. Mueller. 1,532,434; Apr. 7.
Coil-winding machine. A. H. Kopprasch. 1,532,187; Apr. 7.
Coke and illuminating gas, Continuous process of making. H. Burgi. 1,532,300; Apr. 7.
Collapsible box. F. M. Kaufman. 1,532,816; Apr. 7.
Colloidal suspension. J. E. Harris. 1,532,538; Apr. 7.
Commutator. E. A. Fries. 1,532,129; Apr. 7.
Compact container. A. G. Smart. 1,532,442; Apr. 7.
Compressors and the like, Control system for. B. S. Aikman. Re16,041; Apr. 7.
Concentrator. G. E. C. Rousseau. 1,532,780; Apr. 7.
Concrete and metal cross tie structure. V. C. King. 1,532,589; Apr. 7.
Concrete, Mixing and discharging. E. L. Ransome. 1,532,947; Apr. 7.
Concrete-mixing machine. J. P. Faber and W. Muller. 1,532,801; Apr. 7.
Concrete-molding apparatus. J. S. Hobson. 1,532,407; Apr. 7.
Concrete railway tie, Metal reenforced-. H. Silver. 1,532,719; Apr. 7.
Condenser, Electrical. C. H. Thordarson. 1,532,846; Apr. 7.
Condensers, Manufacture of. O. A. Berman. 1,532,364; Apr. 7.
Confections, Apparatus for coating. A. L. Bausman. 1,532,797; Apr. 7.
Container. A. H. Levy. 1,532,766; Apr. 7.
Container. J. A. Marceau. 1,532,830; Apr. 7.
Container. O. O. Reiser. 1,532,263; Apr. 7.
Container. C. Stollberg. 1,532,665; Apr. 7.
Container. H. C. Weis. 1,532,210; Apr. 7.
Controlling and temperature-comparing system. R. W. Newcomb. 1,532,543; Apr. 7.
Controlling mechanism. O. C. From. 1,532,130; Apr. 7.
Conveyer systems, Deflecting device for. F. S. Carpenter. 1,532,228; Apr. 7.
Cooker attachment, Pressure-. [illegible]uigle. 1,532,945; Apr. 7.
Cooking vessels, Strainer for. F. Gawronski. 1,532,133; Apr. 7.
Cooler-door-control lock. T. O. Schrader. 1,532,447; Apr. 7.
Cooling of goods, Direct. A. J. A. Ottesén. 1,532,931; Apr. 7.
Core-taking device, Hydraulic rotary. L. J. Black. 1,533,078; Apr. 7.
Corset. R. B. Kirby. 1,532,823; Apr. 7.
Cotton fabrics, Imparting new effects to. A. Schönholzer. 1,532,446; Apr. 7.
Coupler for masts, Guy. A. Link and L. W. Link. 1,533,019; Apr. 7.
Coupling: *See*—
Car coupling. Shaft coupling.
Flexible coupling. Spindle coupling.
Hose coupling. Swivel coupling.
Rope coupling. Swivel-joint coupling.
Coupling. M. N. Meltz. 1,532,511; Apr. 7.
Coupling. Graf A. von Soden-Fraunhofen. 1,532,564; Apr. 7.
Coupling tightener bar. P. H. Cloos, jr. 1,532,178; Apr. 7.
Crossing signal, Fog. H. A. Holm. 1,532,748; Apr. 7.
Crucible furnace. F. G. Penny. 1,532,154; Apr. 7.
Crusher: *See*—
Rock crusher.
Cue tip. A. E. Bradley. 1,532,985; Apr. 7.
Cultivator, Wheeled. T. Montoya. 1,532,331; Apr. 7.
Current-collecting apparatus. R. S. Blair. 1,532,224; Apr. 7.
Current motor, Alternating. H. Weichsel. 1,532,287–8; Apr. 7.
Curtain-rod fixture. W. W. Kosminski. 1,532,701; Apr. 7.
Cutter: *See*—
Pipe cutter.
Cutting, shortening, and shearing the loose threads of machine-made lace and all similar goods, Machine for. G. Cordier. 1,532,980; Apr. 7.
Dehydrator, Electric. L. H. Shover. 1,532,718; Apr. 7.
Derrick. H. R. Slater. 1,533,041; Apr. 7.
Detector. T. E. Arundel. 1,533,070; Apr. 7.
Detector. F. Weinberg. 1,532,528; Apr. 7.
Detonators, Method of and apparatus for capping. J. M. Olin, H. H. Wood, and J. B. Smith. 1,532,929; Apr. 7.
Diarylguanidines. J. Young and E. G. Cronkman. Re16,040; Apr. 7.
Die: *See*—
Punching die.
Differential mechanism. I. O. Woodward. 1,532,465; Apr. 7.
Dish or similar article, Metal. S. W. Farber. Des. 66,971–2; Apr. 7.
Distillation of materials, Apparatus for the. S. H. Corfield. 1,532,686; Apr. 7.
Dome light. A. L. Knapp. Des. 66,975; Apr. 7.
Door catch. J. H. Lane. 1,532,822; Apr. 7.
Doorcheck. G. Fauser. 1,532,239; Apr. 7.
Door control. L. P. Hynes. 1,532,492; Apr. 7.
Doorknob. B. Martin. Des. 66,978; Apr. 7.
Door mechanism. C. C. Tomkinson. 1,532,560; Apr. 7.
Door-operating mechanism. P. Burmeister. 1,532,171; Apr. 7.
Dovetail slots, Machine for making. J. R. Barnett. 1,532,467; Apr. 7.
Draft equalizer. K. Thalhammer. 1,532,164; Apr. 7.
Drain. J. Hirshstein. 1,532,897; Apr. 7.
Drill: *See*—
Oil drill.
Drill bit, Rock-. S. Bawden. 1,532,468; Apr. 7.

Drills, Feeding mechanism for rock. F. M. Slater. 1,532,205; Apr. 7.
Drilling apparatus, Combined percussion and rotary. J. H. Herman. 1,532,311; Apr. 7.
Drilling tool, Rotary. W. H. Brunson and C. Jamison. 1,532,371; Apr. 7.
Drink mixer. J. W. Ruggaber. 1,532,268; Apr. 7.
Dry-cell battery. H. M. Koretsky and B. H. Teitelbaum. 1,533,012; Apr. 7.
Drying apparatus. C. Bees and C. F. Hine. 1,532,948; Apr. 7.
Duplicator. J. E. Norman. 1,532,925; Apr. 7.
Dustpan. W. H. Nicholas. 1,532,197; Apr. 7.
Dye, Pyrone. M. Weiler. 1,532,790; Apr. 7.
Dyeing machine. M. Nagle. 1,532,923; Apr. 7.
Dyeing with dyestuffs or dyestuff-producing bodies insoluble or sparingly soluble in water. F. Münz. 1,532,921; Apr. 7.
Dyes, Sulphur. O. Spengler and A. Thurm. 1,532,640; Apr. 7.
Elastic-metal stringing, Controlling the elasticity of an. W. A. Larned. 1,532,703; Apr. 7.
Electric furnace. W. E. Moore. 1,532,599; Apr. 7.
Electric heater. J. L. Lawrence. 1,532,502; Apr. 7.
Electric-light bowl. J. Markel. Des. 66,977; Apr. 7.
Electric machine, Dynamo-. D. L. Shea. 1,532,351; Apr. 7.
Electric meter, Graphic. L. A. Paine. 1,532,438; Apr. 7.
Electric switch. C. E. Anderson. 1,532,855; Apr. 7.
Electric switch. G. F. Rauch. 1,532,345; Apr. 7.
Electric switch. F. E. Voigt. 1,532,563; Apr. 7.
Electrical fitting. F. E. Hartweg. 1,532,817; Apr. 7.
Electromagnetic brake. H. E. Hodgson. 1,532,138; Apr. 7.
Electromedical apparatus. A. Winterfield. 1,532,463; Apr. 7.
Elevator safety appliance. W. E. Day. 1,532,529; Apr. 7.
Elevators, Automatic brake for straight-lift. H. J. Buck. 1,532,877; Apr. 7.
Enameling furnace. A. D. Dauch. 1,532,621; Apr. 7.
End-gate construction. R. H. McIlwain. 1,532,540; Apr. 7.
Engine: *See*—
Internal-combustion engine.
Engine accelerator. C. H. Vincent. 1,532,909; Apr. 7.
Engine cylinders, Apparatus for varying the compression space in internal-combustion-. C. A. Vandervell. 1,532,788; Apr. 7.
Engines, Apparatus for boring the connecting rods and bearings of internal-combustion. M. K. Makarewics. 1,532,914; Apr. 7.
Engines, Apparatus for removing carbon from internal-combustion. P. D. Cormier. 1,532,528; Apr. 7.
Engines, Ignition device for internal-combustion. H. E. Taylor. 1,532,787; Apr. 7.
Engines, Mixer for gasoline. H. F. Mader. 1,532,770; Apr. 7.
Engines, Starting internal-combustion. H. A. Pyrah. 1,532,770; Apr. 7.
Engines, Vaporizer for internal-combustion. L. Becker. 1,532,866; Apr. 7.
Engines, Vaporizer for internal-combustion. W. L. Laudan. 1,532,248; Apr. 7.
Ether, Producing nonperoxidizable. D. R. Nijk. 1,532,772; Apr. 7.
Evaporator. W. W. Coxsens. 1,532,303; Apr. 7.
Excavating machine. W. Hebsacker. 1,532,243; Apr. 7.
Excavating shovel. J. W. Page. 1,532,775; Apr. 7.
Excavator. R. Dorward. 1,533,061; Apr. 7.
Exercising machine. H. M. Christoffersen. 1,532,474; Apr. 7.
Exhaust fire screen. C. F. S. Byrne. 1,532,473; Apr. 7.
Expansion hitch. W. P. Hunter. 1,533,006; Apr. 7.
Extensible table. N. Giard. 1,532,996; Apr. 7.
Extension table. A. Petrarca. 1,532,715; Apr. 7.
Extractor: *See*—
Juice extractor. Tar extractor.
Eye, Artificial. F. Y. Sunderland. 1,532,455; Apr. 7.
Eyeglass mounting. J. T. Laughlin. 1,532,323; Apr. 7.
Eyeshade. J. W. Finch. 1,532,480; Apr. 7.
Eyeshade. C. C. Taylor. 1,532,611; Apr. 7.
Eyeshield. E. W. Kingsbury. 1,532,317; Apr. 7.
Fabrics and the like, Treatment of. R. F. Bacon and C. H. Kidwell. 1,532,114; Apr. 7.
Fabrics, Apparatus for locating securing parts of separable fasteners to carrying. F. S. Carr. 1,532,376–7; Apr. 7.
Fan, Electric. C. O. Hall. 1,532,402; Apr. 7.
Fan, Rotary. G. C. Lewis. 1,532,827; Apr. 7.
Faucet. G. S. and L. L. Bennett. 1,533,077; Apr. 7.
Faucet, Combined hot and cold water. T. H. Spence. 1,532,272; Apr. 7.
Feeder, Stock. E. F. Swarts. 1,532,276; Apr. 7.
Fiber-beating machine. C. P. Bieber. 1,532,649; Apr. 7.
Fibrous composition, Machine for making. I. D. Patterson. 1,532,660; Apr. 7.
File, Card index, letter, and document. E. O. Haberfeld. 1,533,002; Apr. 7.
Film, Composite. J. H. Haste. 1,532,818; Apr. 7.
Film-spooling machine, Automatic. J. G. Jones and H. G. Dewey. 1,532,753; Apr. 7.
Films, Apparatus for splicing. W. Hohmann. 1,532,747; Apr. 7.
Films, Paster band for roll. A. P. Sulzer. 1,532,785; Apr. 7.
Filter, Air. I. Fleisher. 1,532,657; Apr. 7.
Fire escape. L. M. Little. 1,532,767–8; Apr. 7.
Fire extinguisher. P. L. Wilbur. Des. 66,997; Apr. 7.
Firearms, Device for regulating the rate of fire in automatic. R. Darne. 1,532,305; Apr. 7.
Firing explosives by electricity, Device for. A. Djidics. 1,532,125; Apr. 7.
Fishbook. S. W. Smith. 1,533,044; Apr. 7.
Fishing tool. R. C. Barbour. 1,532,979; Apr. 7.
Flag. D. and H. E. Perez. Des. 66,981; Apr. 7.
Flatirons, Controller for electrically-heated. E. Anthony. 1,532,219; Apr. 7.
Flexible coupling. A. Hadsel. 1,532,743; Apr. 7.
Fluids from solids and substantially nonvolatile liquids, Method and apparatus for removing volatile. R. E. Wilson. 1,533,053; Apr. 7.
Floor and laying floor. A. C. Denning. 1,533,074; Apr. 7.
Flooring, Parquetry slat. L. Lichtenfeld. 1,532,504; Apr. 7.
Flower machine, Artificial-. S. Bertona. 1,532,672; Apr. 7.
Fluid-pressure regulator. W. Long. 1,532,907; Apr. 7.
Fluid-transfer device. L. B. Lent and C. B. Kirkham. 1,532,326; Apr. 7.
Fluorescent screen. F. Balch. 1,532,796; Apr. 7.
Fluorescent screen. S. E. Sheppard and L. W. Eberlin. 1,532,782–3; Apr. 7.
Fluorescent screen and making same. F. Balch. 1,532,795; Apr. 7.
Flying machine. E. Otto. 1,532,152; Apr. 7.
Flying machines, Equilibrating mechanism for. E. E. Winkley. 1,532,616; Apr. 7.
Foods, Preserving and packing of. M. G. Mastin. 1,532,831; Apr. 7.
Form. H. E. Bilger. 1,532,355; Apr. 7.

Iron. H. S. Shaw. 1,532,888; Apr. 7.
Irons, Support for tailors'. J. Youngberg. 1,532,617; Apr. 7.
Ironing board. S. Adelson. 1,532,973; Apr. 7.
Ironing board. J. A. Slama. 1,532,840; Apr. 7.
Ironing board and ladder, Combined. H. C. Lewis. 1,532,418; Apr. 7.
Ironing board, Folding. Z. L. Hurd. 1,532,312; Apr. 7.
Ironing machine. C. E. Reddig. 1,532,550; Apr. 7.
Ironing presses or machines, Attachment for. I. R. Barksdale and E. M. O'Connell. 1,532,860; Apr. 7.
Jack: *See*—
Lifting jack.
Jar tops, Fastening device for. L. O. Culver. 1,532,585; Apr. 7.
Joint. J. W. Leslie. 1,532,825; Apr. 7.
Journal bearing, Antifriction. W. H. Millespaugh. 1,532,480; Apr. 7.
Journal boxes, Grease strainer for. F. P. Guerra. 1,532,813; Apr. 7.
Juice extractor. W. C. Younker and M. J. Kelly. 1,532,525; Apr. 7.
Key, Cotter. M. K. Malone. 1,532,148; Apr. 7.
Knife, Razor-blade. B. T. Kavanaugh. 1,532,499; Apr. 7.
Knife, Stationary. O. Kita. 1,532,413; Apr. 7.
Labeling machine. J. Van Buren. 1,532,561; Apr. 7.
Labels or the like, Machine for affixing. G. F. Halank. 1,532,895; Apr. 7.
Lace-making implement. E. M. Gourley. 1,532,810; Apr. 7.
Lamp, Dresser. A. C. Nielsen. 1,532,259; Apr. 7.
Lamp socket, Electric-. H. L. Strongson. 1,532,206; Apr. 7.
Lamps, Socket for electric. E. A. Snow. 1,532,206; Apr. 7.
Last. J. C. Schelter. 1,532,159; Apr. 7.
Last, Hinge. W. A. Krentler. 1,533,066; Apr. 7.
Latch for doors, Safety. A. C. Dohrmann. 1,532,787; Apr. 7.
Latch mechanism, Magnetic. G. O. Wilms. 1,532,212; Apr. 7.
Lathe attachment. C. Bouillon and H. R. Blakeslee. 1,532,798; Apr. 7.
Lathe, Turning and facing. W. F. Groene. Re16,038; Apr. 7.
Leader and making the same. E. R. Hewitt. 1,532,534; Apr. 7.
Lens protractor. L. W. Bugbee. 1,532,878; Apr. 7.
Lens protractor, Mirrored. L. W. Bugbee, jr. 1,532,880; Apr. 7.
Level-indicating device. F. G. Bloch. 1,532,871; Apr. 7.
Level indicator of the luminous type. A. Gage. 1,532,995; Apr. 7.
Life-preserving suit. A. Kurtis. 1,532,143; Apr. 7.
Life-saver, Submarine. J. B. Van Tine. 1,532,281; Apr. 7.
Lifter: *See*—
Pan lifter. Pipe lifter.
Lifting device. C. Haarberg. 1,533,001; Apr. 7.
Lifting jack. G. Lane. 1,532,702; Apr. 7.
Light: *See*—
Signal light.
Light. C. H. Muckenhirn. 1,532,332; Apr. 7.
Lighting-fixture arm. J. A. Boehringer. Des. 66,964–5; Apr. 7.
Lighting-fixture arm. H. A. Safion. Des. 66,987; Apr. 7.
Lighting-fixture bracket. J. Ribaysen. Des. 66,985; Apr. 7.
Lighting fixtures, Lamp husk for. J. A. Boehringer. Des. 66,966; Apr. 7.
Lighting globe. C. E. Verhunce. Des. 66,993; Apr. 7.
Lingerie clasp. E. E. Clark. 1,532,381; Apr. 7.
Lingerie clip. M. Taffel. Des. 66,990; Apr. 7.
Liquid-dispensing apparatus. A. J. Seale. 1,532,957; Apr. 7.
Liquid-dispensing device. W. C. Taggart. 1,532,600; Apr. 7.
Liquid measuring and dispensing device. A. H. Rolkjer. 1,532,779; Apr. 7.
Liquid meter. P. Bailey. 1,532,295; Apr. 7.
Liquid-projecting device. A. V. Sammis. 1,532,443; Apr. 7.
Liquid projector. A. V. Sammis. 1,532,203; Apr. 7.
Liquids, Treating. J. N. A. Sauer. 1,533,088; Apr. 7.

Lithographic printing plate and preparing the same. J. Krakes. 1,532,188; Apr. 7.
Load-carrying device, Compensating. A. E. Cook and T. Van Tuyl. 1,532,124; Apr. 7.
Loader, Hayrake. E. Mowry. 1,533,025; Apr. 7.
Lock: *See*—
Automobile door lock. Locker lock.
Chain snap lock. Nut lock.
Cooler-door-control lock. Safe and vault lock.
Lock. C. Ledin. 1,532,765; Apr. 7.
Lock. J. P. Ragsdale. 1,532,441; Apr. 7.
Lock for centrifugal discharging machines, Electrically-operated safety. W. E. Zuccarello. 1,532,851; Apr. 7.
Locker lock. E. D. Kaser. 1,532,245; Apr. 7.
Locomotive, Turbine. R. Klingelhöffer. 1,532,310; Apr. 7.
Loom for hand weaving. J. M. Well. 1,532,848; Apr. 7.
Loom picker. E. J. Gilligan. 1,532,808; Apr. 7.
Looms, Feeler mechanism for. H. A. Davis. 1,532,175; Apr. 7.
Looms, Heddle construction for. M. S. Soroka. 1,532,606; Apr. 7.
Looms, Tube frame for Axminster. G. D. Lockwood and W. H. Wakefield. 1,532,145; Apr. 7.
Lubricator. T. E. Coleman. 1,532,620; Apr. 7.
Lubricator. L. A. Godbold. 1,532,178; Apr. 7.
Lubricator for deep-well drills and the like. O. Duda. 1,532,552–4; Apr. 7.
Luggage carrier. T. R. Willwerscheid. 1,532,461; Apr. 7.
Magnesite or dolomite, Treatment of. G. S. Kilbourn. 1,532,500; Apr. 7.
Magnet, Lifting. J. E. Sederholm. 1,532,449; Apr. 7.
Magneto. P. Brown, I. E. Hendrickson, H. H. Clark, and T. G. Louis. 1,532,799; Apr. 7.
Massaging instrument, Electrical. A. Winterfield. 1,532,462; Apr. 7.
Match-box-filling machine. T. A. Palmer. 1,532,153; Apr. 7.
Match lighter. J. Fraling. 1,532,994; Apr. 7.
Mattress. E. A. Jones. 1,532,497; Apr. 7.
Measuring of weights, Method and structure for analytical. E. L. Graf. 1,532,136; Apr. 7.
Measuring pulsating pressures, Method and apparatus for. A. Levin. 1,532,705; Apr. 7.
Mechanical brake. C. J. Rhodes. 1,532,515; Apr. 7.
Metal objects, Scaling. W. J. Vollrath. 1,532,789; Apr. 7.
Metal plates by electric welding, Uniting thick. R. Stresau. 1,532,842; Apr. 7.
Metal wheel. E. D. Gillespie. 1,532,485; Apr. 7.
Meter: *See*—
Electric meter. Liquid meter.
Meters, Illuminating means for motor. J. A. Privett. 1,532,155; Apr. 7.
Milk-heating apparatus. A. O. Dahlberg. 1,532,233; Apr. 7.
Mill: *See*—
Rolling mill.
Mill. A. G. Place and A. E. Jupp. 1,532,716; Apr. 7.
Milling machine, Portable. H. W. Brewer. 1,532,650; Apr. 7.
Mixer: *See*—
Drink mixer.
Mixer. S. Snell and W. S. Bridwell. 1,532,518; Apr. 7.
Mixing machine, Control mechanism for. H. A. Trester. 1,532,277; Apr. 7.
Mold: *See*—
Ingot mold.
Mold. W. E. Nelson. 1,532,924; Apr. 7.
Molten-bath treatment. P. W. Shimer. 1,532,663; Apr. 7.
Mop cleaner. H. H. Hood. 1,532,139; Apr. 7.
Mop wringer and pail. R. Mather. 1,533,021; Apr. 7.
Mortising and shaping machine, Combined. R. L. Carter. 1,532,683; Apr. 7.
Motor: *See*—
Current motor. Hydrocarbon motor.
Motor attachment, Ford. C. W. Metz. 1,532,426; Apr. 7.
Motor for propelling vessels, Wave. C. B. White. 1,532,459; Apr. 7.
Motor, Multiple-cylinder combustion. M. Henry. 1,533,004; Apr. 7.
Motors, Device for introducing fluids into the cylinders of internal-combustion. D. M. Hepburn. 1,532,820; Apr. 7.
Mower. C. Pearson. 1,533,028; Apr. 7.
Mowing machine. R. Weidemann. 1,532,358; Apr. 7.
Mowing machines, Cutting means for. J. W. Shanbeck. 1,533,035; Apr. 7.
Muffler. M. J. O'Connor. 1,532,028; Apr. 7.
Music-roll receptacle. M. A. Andes. 1,532,466; Apr. 7.
Nail file, Finger. R. Mather. 1,533,020; Apr. 7.
Napkin-folding machine. C. H. Coons. 1,532,475; Apr. 7.
Necktie. W. K. Meyer. 1,532,598; Apr. 7.
Nozzle, Dishwasher. A. O. Girard. 1,532,809; Apr. 7.
Nozzle structure, Flow-. W. Meredith, S. A. D. Cox, and W. L. Foster. 1,532,253; Apr. 7.
Nut lock. J. V. Grand. 1,532,998; Apr. 7.
Nut lock. W. C. Russell and J. K. Canady. 1,532,603; Apr. 7.
Object-testing apparatus. J. A. Johnson. 1,532,496; Apr. 7.
Oil burner. I. J. Foltz. 1,532,393; Apr. 7.
Oil burner. J. H. and Z. B. Grades. 1,532,582; Apr. 7.
Oil burner. N. E. Tyrrell. 1,532,847; Apr. 7.
Oil-burning apparatus. F. A. Daechsel. 1,532,733; Apr. 7.
Oil container. H. M. Sheer. 1,533,038; Apr. 7.
Oil drill, Automatic expanding. D. H. Mitchell. 1,532,330; Apr. 7.
Oil heater. G. A. Saville, jr., and P. Schmall. 1,532,348; Apr. 7.
Oil in battery solutions, Providing and releasing. M. L. Martus, E. H. Becker, and H. B. Schoenmehl. 1,532,252; Apr. 7.
Oil-level-inspection attachment. H. R. Puffer. 1,532,944; Apr. 7.
Oils into component parts, Apparatus for separating composite. F. E. Van Tilburg. 1,532,456; Apr. 7.
Oils with prepared clays, Treating. I. A. Clark. 1,533,060; Apr. 7.
Operating mechanism, Coin-controlled. W. W. Watson. 1,533,049; Apr. 7.
Ore and the like, Agglomerating. N. Ahlmann. 1,532,113; Apr. 7.
Ornaments, Machine for making. W. Robichaud. 1,532,265; Apr. 7.
Ovens, Heat control for industrial. H. W. Partlow. 1,532,340; Apr. 7.
Overflow alarm. P. Schmitz. 1,532,604; Apr. 7.
Packaging device and method. C. R. Hultgren. 1,532,749; Apr. 7.
Packing for engine crank cases. V. W. Pagd. 1,532,933; Apr. 7.
Packing, Rod and stem. J. L. Travers. 1,532,961; Apr. 7.
Pad: *See*—
Seat pad.
Pan-greasing machine. W. Moller. 1,532,256; Apr. 7.
Pan lifter. H. A. Kottke. 1,532,247; Apr. 7.
Pan lifter, Bake-. H. A. Kottke. 1,532,246; Apr. 7.
Panel-manufacturing device. W. S. Kisinger. 1,532,318; Apr. 7.
Paper-edging machine. B. S. Olson. 1,532,149; Apr. 7.
Paper holder. H. Seiders. 1,532,837; Apr. 7.
Paper machines, Preventing froth on. W. E. Metcalf. 1,532,597; Apr. 7.
Paper machines, Severing mechanism for wet-. E. C. Batchelder. 1,532,117; Apr. 7.
Paper-producing configured. H. C. Orchard. 1,532,712; Apr. 7.
Paper, Treating. J. A. De Cew. 1,532,579; Apr. 7.
Parachute. O. Heinecke. 1,532,588; Apr. 7.
Pattern. H. M. Kinslow. 1,533,010; Apr. 7.
Paving and the like and making the same, Block for. M. L. Patzig. 1,532,636; Apr. 7.
Peat, Disintegrating and drying. F. A. Plummer. 1,532,344; Apr. 7.
Pen, Fountain. W. L. Hofer. 1,532,746; Apr. 7.
Pen, Fountain. C. H. Schooley. 1,532,445; Apr. 7.
Pens, Blotter attachment for fountain. A. Firpo. 1,532,240; Apr. 7.
Phenolic condensation product, Forming a. E. Rolker. 1,532,952; Apr. 7.
Photo mount. G. Wilson. 1,532,290; Apr. 7.
Photographic films, Preparing. J. H. Haste. 1,532,810; Apr. 7.
Photographic sensitizer and making same. G. O. Gutekunst. 1,532,814; Apr. 7.
Photography, Method and apparatus for producing multiple-image effects in. L. F. Douglass. 1,532,236; Apr. 7.
Pianos, Action for player. C. A. Wheatley. 1,533,052; Apr. 7.
Picker: *See*—
Loom picker.
Picker air intake. H. W. Knowlton. 1,532,415; Apr. 7.
Picker stick. D. A. Keating and J. B. Tatem. 1,532,759–62; Apr. 7.
Picture apparatus, Motion-. P. S. Gauriat. 1,532,805; Apr. 7.
Piling, Method and apparatus for the formation of. D. M. Newton. 1,532,711; Apr. 7.
Pipe: *See*—
Smoking pipe.
Pipe cutter. V. Karbowski. 1,532,315; Apr. 7.
Pipe lifter. H. T. Olson. 1,532,150; Apr. 7.
Pipe wrench. L. D. Fowler. 1,532,808; Apr. 7.
Piston. A. L. Armentrout. 1,532,293; Apr. 7.
Piston. C. R. Butler. 1,532,121; Apr. 7.
Piston. T. A. Hutsell. 1,532,491; Apr. 7.
Piston. G. H. Woodward. 1,533,055; Apr. 7.
Piston for internal-combustion motors. D. J. Peeler. 1,532,937; Apr. 7.
Piston, Internal-combustion-engine. O. Margetson and W. P. Widdowson. 1,532,915; Apr. 7.
Piston pressure in prime movers, pumps or compressors, Apparatus for indicating and registering the stroke average of the. J. Geiger. 1,532,692; Apr. 7.
Piston ring. D. J. Peeler. 1,532,938; Apr. 7.
Piston ring. J. E. Pruyn. 1,532,547; Apr. 7.
Piston-ring holder. F. Reich. 1,532,777; Apr. 7.
Pitters, Cling-pit attachment for hand. J. B. Whipple. 1,532,458; Apr. 7.
Plastic composition for articles of manufacture. W. S. Lowe. 1,532,908; Apr. 7.

Plate or similar article. J. E. Phillips. Des. 66,982–8; Apr. 7.
Plate or similar article, China. H. Schiffner. Des. 66,988; Apr. 7.
Platforms and the like, Safety attachment for shipping. P. Nord. 1,532,385; Apr. 7.
Playing device. H. R. Hart. 1,532,625; Apr. 7.
Plow. A. B. Webb. 1,532,723; Apr. 7.
Plows, Wing-sweep attachment for. M. T. Skinner. 1,532,556; Apr. 7.
Plowshares, Shipping container for. A. J. Eggerss. 1,532,894; Apr. 7.
Plug box and plug. F. P. Arrousea and W. C. Hollins. 1,532,220; Apr. 7.
Plug contact. W. H. Petersén. 1,532,200; Apr. 7.
Pneumatic conveying apparatus and the like. V. Z. Caracristi. 1,532,122; Apr. 7.
Pole and post protector. J. Dean. 1,532,734; Apr. 7.
Polish, Furniture. W. F. Hayes and J. N. Armstrong. 1,532,587; Apr. 7.
Polishing wheels, Balancing device for. F. Darling and J. Roche. 1,532,687; Apr. 7.
Posting tray. J. M. Musil. 1,532,436; Apr. 7.
Poultry, Hanger for displaying dressed. J. J. Alber and C. E. Dougherty. 1,532,974; Apr. 7.
Poultry houses and coops, Fixture for. R. L. Miller. 1,532,420; Apr. 7.
Power, Device for the application of. E. E. Leming. 1,532,191; Apr. 7.
Power discharge chute, Automatic. E. H. Lichtenberg. 1,532,249; Apr. 7.
Press: *See*—
Hydraulic press.
Presses, Pressure-relieving means for drawing. B. T. Andren and J. Dilot. 1,532,856; Apr. 7.
Pressing apparatus. F. J. Clark. 1,532,382; Apr. 7.
Pressure gauge. J. R. Padesky. 1,532,932; Apr. 7.
Pressure-indicating apparatus. M. Bouffart. 1,532,170; Apr. 7.
Printer's galley. A. H. Stockall. 1,533,046; Apr. 7.
Printing device. J. E. Johnson. 1,532,698; Apr. 7.
Printing device and type. J. C. Zuhll. 1,532,360; Apr. 7.
Printing plates, Making half-tone. R. J. Hassard, A. H. Spalding, and F. T. Powers. 1,532,696; Apr. 7.
Printing-press vibrator. A. J. Danne. 1,533,063–5; Apr. 7.
Printing type, Machine for composing and justifying lines of. A. Lubac. 1,532,909; Apr. 7.
Prism-measuring device in parallel systems. L. W. Bugbee. 1,532,879; Apr. 7.
Propeller. D. F. Murphy. 1,532,383; Apr. 7.
Propeller. I. L. Roberts. 1,532,346; Apr. 7.

Rubber-dam clamp. J. W. Ivory. 1,532,821; Apr. 7.
Rubber goods, Manufacture of. B. K. Brown. 1,532,651; Apr. 7.
Rubber, Vulcanizing. C. W. Bedford. 1,532,645; Apr. 7.
Safe and vault lock, Auxiliary. W. E. Murray. 1,532,485; Apr. 7.
Safety hook. T. Nowland. 1,532,927; Apr. 7.
Salts of the 4-hydroxy-3-acylamino-phenylarsonic acids, Preparation of alkylamine. J. Altwegg. 1,532,361; Apr. 7.
Sashes, Sliding and swinging window. M. Sustarsic and L. Florjancic. 1,533,048; Apr. 7.
Satchel. J. B. Nellegar, jr. 1,532,710; Apr. 7.
Sawmill carriage. J. S. Reid. 1,532,949; Apr. 7.
Sawmill-carriage wheel. J. Elkins. 1,532,581; Apr. 7.
Scissors. A. T. Yard. 1,532,850; Apr. 7.
Scoop, Confection. D. L. Strumpf. 1,532,275; Apr. 7.
Scouring implement. R. B. Kingman. 1,532,904; Apr. 7.
Scraper. P. Basmaison. 1,532,570; Apr. 7.
Scraper, Electric. J. H. Weinbrenner. 1,532,289; Apr. 7.
Screen: *See*—
Exhaust fire screen. Fluorescent screen.
Screens, Forming well. M. E. Layne. 1,532,592; Apr. 7.
Screw driver. H. W. Rose and J. O. Hicks. 1,532,953; Apr. 7.
Seal, Hermetic. O. H. Eliel. 1,532,287; Apr. 7.
Seam and making same, Invisibly-stitched. F. Luppino. 1,532,327; Apr. 7.
Seat pad, Ventilated. L. M. Grafe. 1,532,400; Apr. 7.
Separator. G. Lieberman. 1,533,018; Apr. 7.
Settee, Convertible table. W. T. Letts. 1,532,417; Apr. 7.
Sewage-flow regulator. H. L. McMillan. 1,532,820; Apr. 7.
Sewing machine. G. J. Kiligas. 1,532,535; Apr. 7.
Shades, End clip for window. F. C. Sykes. 1,532,519; Apr. 7.
Shaft coupling. E. Higgins. 1,532,183; Apr. 7.
Sharpener, Pencil. E. Weller. 1,532,167; Apr. 7.
Shears, Multipower. A. Shirk. 1,533,039; Apr. 7.
Sheet-metal containers, Producing and attaching closures for. C. T. Draper. 1,532,801; Apr. 7.
Sheet metal, Manufacturing. L. C. Steele. 1,532,607; Apr. 7.
Shingle fastener. H. MacInnes and W. J. Riley. 1,532,421; Apr. 7.
Shingle strips, Manufacture of. S. M. Langston. 1,532,538; Apr. 7.
Shirts, Attachment for the neckbands of. M. Vanson. 1,532,562; Apr. 7.
Shoe. G. L. Pierce. 1,532,942; Apr. 7.
Shoe parts, Apparatus for attaching. R. E. Bartels. 1,532,861; Apr. 7.
Shoe stitching or other machines, Stopping and starting mechanism for. J. R. Oliver. 1,532,834; Apr. 7.
Shoes, Fixing shank stiffeners in. R. E. Bartels. 1,532,862; Apr. 7.
Shoes, Method and apparatus for fitting. R. P. Morse. 1,532,432; Apr. 7.
Shooting apparatus. E. A. Barteski. 1,532,669; Apr. 7.
Shooting device, Self-defense. W. H. Balch. 1,532,859; Apr. 7.
Shoulder-strap holder. I. J. Potter. 1,532,343; Apr. 7.
Shovel: *See*—
Excavating shovel.
Shuttles, Tension device for. P. Shannon. 1,533,037; Apr. 7.

Sickle blade, Endless. H. Ullom. 1,532,279; Apr. 7.
Sifter. E. S. Smith. 1,532,720; Apr. 7.
Signal: *See*—
Crossing signal. Traffic signal.
Signal and signboard, Traffic. A. B. Camden. 1,532,575; Apr. 7.
Signal blade. B. F. Lollis. 1,532,828; Apr. 7.
Signal currents, Receiving weak. J. R. Carson. 1,532,172; Apr. 7.
Signal for an automobile or other vehicle and street and road purposes. H. E. and W. M. Browne. 1,532,876; Apr. 7.
Signal light. W. E. Ivie. 1,532,493; Apr. 7.
Signal means for automobiles and the like. A. P. Bamford. 1,532,221; Apr. 7.
Signaling system. L. J. Stacy. 1,532,207; Apr. 7.
Sirup, Manufacturing. R. J. Slay. 1,532,271; Apr. 7.
Skate roll. A. L. Staples. 1,532,784; Apr. 7.
Skeins or hanks in dyeing rooms, Machine for treating. B. Mayoux. 1,532,707; Apr. 7.
Ski, Water. O. Meredith. 1,533,023; Apr. 7.
Smoking pipe. O. H. Davis. 1,532,387; Apr. 7.
Smoking set and advertising device, Combination. H. C. Kittelson. 1,532,590; Apr. 7.
Snowplow, Highway. R. A. Aldinger. 1,532,567; Apr. 7.
Snubber. H. D. Weed. 1,532,286; Apr. 7.
Soap manufacture. V. H. Gottschalk. 1,532,693; Apr. 7.
Soap-stick holder. G. W. Tindall. 1,532,165; Apr. 7.
Sole, Rubber half-. C. R. Keiser. 1,533,008; Apr. 7.
Spacing, tensioning, and coiling material such as wire, Machine for. C. W. Watson. 1,532,285; Apr. 7.
Speed-changing transmission. B. J. Riedmiller. 1,532,778; Apr. 7.
Speedometer. G. Ramsey. 1,532,548; Apr. 7.
Spike supporter. M. Smith. 1,533,043; Apr. 7.
Spindle coupling, Rolling-mill. L. Johnson. 1,532,752; Apr. 7.
Spinning frames, Thread-guiding device for. A. C. Varnum. 1,532,282; Apr. 7.
Spinning wheel. H. O. Borduas. 1,532,618; Apr. 7.
Spool, Tuft-yarn. F. Mossberg. 1,532,600; Apr. 7.
Spooler for winding spools of different lengths. A. E. Rhoades. 1,532,156; Apr. 7.
Spoon or similar article. P. J. Gordon. Des. 66,973; Apr. 7.
Spoon or similar article. J. Leech. Des. 66,976; Apr. 7.
Spoon or similar article. A. H. Reimherr. Des. 66,984; Apr. 7.
Spring: *See*—
Vehicle spring.
Spring wheel. E. K. McLain. 1,532,911; Apr. 7.
Spring wheel. W. E. Weaver. 1,532,166; Apr. 7.
Stabilizer. G. A. Peple, jr. 1,532,939; Apr. 7.
Starter, Electric. C. P. Brockway. 1,533,072; Apr. 7.
Stay bolt for boilers. E. C. Dodds. 1,532,736; Apr. 7.
Steam and air heater. D. McGregor. 1,532,506; Apr. 7.
Steel form for and method of applying cement linings to pipe lines, tunnels, etc. J. T. Rice. 1,532,555; Apr. 7.
Stencil, Sheet. J. H. Rand. 1,532,834; Apr. 7.
Step plate. J. Seys. Des. 66,989; Apr. 7.
Step plate and luggage carrier, Combination. A. W. Kaufman. 1,532,756; Apr. 7.
Stool, Revolving. J. S. Walton. 1,532,354; Apr. 7.
Stopcock and shut-off cock for pressure-fluid piping. E. Schneider. 1,532,781; Apr. 7.
Stove. J. Stauffer. 1,532,453; Apr. 7.
Strainer and filter, Smoke and gas. E. Chalupa and T. F. O'Rourke. 1,532,730; Apr. 7.
Straw spreader. W. F. Yates and O. D. Shirk. 1,532,359; Apr. 7.
Stud support, Shrinkproof. G. E. Carlson. 1,532,720; Apr. 7.
Subgrader. R. W., L. L., J. F., and C. V. Stayton. 1,532,841; Apr. 7.
Subsoil packer. V. F. Lassagne. 1,533,014; Apr. 7.
Superheater. E. A. Geoghegan. 1,532,242; Apr. 7.
Supporting mechanism, Adjustable. P. Pierce. 1,532,201; Apr. 7.
Surgical device. A. H. Braecklein. 1,532,290; Apr. 7.
Suspenders. R. A. Wesleck. 1,532,211; Apr. 7.
Switch: *See*—
Electric switch.
Switch and fuse, Combined. W. G. Dexter. 1,532,235; Apr. 7.
Swivel coupling. W. H. Fulton. 1,532,895; Apr. 7.
Swivel coupling. J. W. Page. 1,532,774; Apr. 7.
Swivel-joint coupling. A. L. Morrison. 1,532,195; Apr. 7.
Syringes, Guard for hypodermic. G. N. Hein. 1,532,744; Apr. 7.
Table: *See*—
Extensible table. Glass-cutting table.
Extension table.
Tablets and the like, Sliding cover for. I. B. Casto and R. B. Hooper. 1,532,527; Apr. 7.
Tag, Identification or laundry. W. J. Humphrey. 1,532,901; Apr. 7.
Tail light and direction indicator, Combined. R. A. Guymon. 1,532,583; Apr. 7.
Tanks, Gauge attachment for fuel. I. F. De Turk. 1,532,477; Apr. 7.
Tanks, Reserve-supply-trapping means for gasoline. A. R. Adams. 1,532,882; Apr. 7.
Tar extractor. L. C. Bayles. 1,532,118; Apr. 7.
Telegraphy and telephony, Circuit arrangement for multiplex cable. H. Fassbender and E. Habann. 1,532,739; Apr. 7.
Telephone and like wires to insulators, Hand tool for connecting. P. F. Nielsen. 1,532,771; Apr. 7.
Telephone circuit. E. S. Pridham and P. L. Jensen. 1,532,513; Apr. 7.
Telephone, Hand. G. K. Thompson. Des. 66,991; Apr. 7.

Water-supply fixture. P. Mueller. 1,532,438; Apr. 7.
Waterer, Hog-. C. N. Peterson. 1,532,940; Apr. 7.
Weather strip. A. H. Kuhlmann. 1,532,321; Apr. 7.
Weighing device, Portable partial-load and full-load. A. Schlabach. 1,532,835; Apr. 7.
Welding and apparatus therefor, Supplying current for arc. H. A. Brown and A. M. Bennett. 1,532,680; Apr. 7.
Welding jig, Electric. J. W. Meadowcroft. 1,532,833; Apr. 7.
Well-drilling apparatus, Rotary deep-. C. E. Reed. 1,532,551; Apr. 7.
Wells, Pumping device for oil. J. J. Fitzpatrick. 1,532,623; Apr. 7.
Wheel: *See*—
Automobile steering wheel. Spring wheel.
Metal wheel. Tread wheel.
Sawmill-carriage wheel. Vehicle wheel.
Spinning wheel.
Wheel or like, Laminated landing. H. N. Atwood and G. B. Bains, 3d. 1,532,725; Apr. 7.
Whip-actuating device. P. B. and M. Hansen. 1,532,816; Apr. 7.
Whip-actuating device. P. O. Heller. 1,533,003; Apr. 7.
White lead, Manufacture of. G. F. Lloyd, F. B. Clapp, and F. H. Campbell. 1,532,419; Apr. 7.
Window and window frame. A. S. Campbell. 1,532,375; Apr. 7.
Window construction. A. L. Mason. 1,532,916; Apr. 7.
Window-control mechanism. A. R. Clas. 1,532,230; Apr. 7.
Window fastener, Casement-. C. H. Golladay. 1,532,997; Apr. 7.
Window frame. A. S. Campbell. 1,532,374; Apr. 7.
Window protector. P. P. Brown. 1,532,472; Apr. 7.
Window ventilator. J. S. Mackenzie. 1,532,628; Apr. 7.
Windows, Safety device for. C. H. McElroy. 1,532,769; Apr. 7.
Windshield. A. B. Mueller. 1,532,257; Apr. 7.
Wire reducing. L. G. and P. E. Breguet. 1,532,873; Apr. 7.
Wireless-telegraph apparatus for aeroplanes. H. M. Dowsett. 1,532,388; Apr. 7.
Wireless-telegraph calling device. W. H. Nottage and T. D. Parkin. 1,532,836; Apr. 7.
Wood grinders and method thereof, Apparatus for feeding continuous-working. W. Rabus. 1,532,946; Apr. 7.
Wooden tub. F. Layton. 1,533,015; Apr. 7.
Woodwork and other structural materials, Decorated or ornamental. L. G. Nicoll. 1,533,027; Apr. 7.
Woodworking machines, Electric-motor controller for. C. J. Marshall. 1,532,423; Apr. 7.
Workstand and turntable, Combination. F. J. Probst. 1,532,728; Apr. 7.
Wrench: *See*—
Pipe wrench.
Wrench. L. J. Black. 1,532,469; Apr. 7.
Wrench. J. M. Crocker. 1,532,174; Apr. 7.
Wrench. J. R. Singer and J. F. Brice. 1,533,040; Apr. 7.
Wrench for pipe or tubing. E. D. Hill. 1,532,406; Apr. 7.
Wringer. S. Leech. 1,533,016; Apr. 7.
Writing instrument. F. Waldorf. 1,532,284; Apr. 7.
Writing set. P. Trarara. Des. 66,992; Apr. 7.
Yarn-dyeing device. G. T. Thomayer. 1,532,559; Apr. 7.
Yarn, Machine for treating banks of. S. S. Lord. 1,532,420; Apr. 7.
Yarn-splicing mechanism. F. W. Brewster. 1,532,572; Apr. 7.
Yeast, Manufacture of. R. F. Bacon. 1,532,858; Apr. 7.

CLASSIFICATION OF PATENTS

ISSUED APRIL 7, 1925.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 19: 1,532,861
47: 1,533,063
2— 12: 1,532,317
1,532,480
1,532,611
42: 1,532,350
1,532,444
43: 1,532,304
46: 1,532,304
102: 1,532,267
127: 1,532,563
146: 1,532,596
172: 1,532,198
1,532,760
191: 1,532,310

Tobacco products. Valentin Blats Brewing Company. 197,200; Apr. 14; Serial No. 205,388; published Jan. 27, 1925.

CLASS 21.

Batteries and chargers. Perrine Quality Products Corp. 197,248; Apr. 14; Serial No. 204,929; published Jan. 13, 1925.
Carbons for arc lights, carbon electrodes, etc. C. Conradty. 197,278; Apr. 14; Serial No. 178,481; published Jan. 13, 1925.
Circuit breakers for motor vehicles. Nu-Idea Manufacturing Company. 197,232; Apr. 14; Serial No. 204,272; published Jan. 20, 1925.
Electric controlling devices. Marshall Electric Company. 197,136; Apr. 14; Serial No. 202,632; published Dec. 9, 1924.
Electric fixtures. Buffalo Chandelier Corporation. 197,316; Apr. 14; Serial No. 205,390; published Jan. 20, 1925.
Electric-lamp reflectors and lighting outfits, etc. Christmas-tree. Monowatt Electric Import Company. 197,276; Apr. 14; Serial No. 186,517; published Jan. 13, 1925.
Electric-light-fixture-attaching straps. Groun-Tite Fixture Strap Company. 197,270; Apr. 14; Serial No. 199,940; published Jan. 13, 1925.
Electric-lighting units. Lighting Fixture & Supply Company. 197,300–1; Apr. 14; Serial Nos. 206,088–9; published Jan. 20, 1925.
Electric running, landing, navigation, etc., lights, ignition interrupters, etc. Pioneer Instrument Company. 197,167; Apr. 14; Serial No. 188,217; published Jan. 20, 1925.

Electrical panel boards and fuse boxes. Hyser Electric Manufacturing Co. 197,153; Apr. 14; Serial No. 206,571; published Jan. 20, 1925.
Headsets, loud speakers, transformers, etc. Tower Manufacturing Corporation. 197,450; Apr. 14.
Insulator pins, Locust-wood. Williams Manufacturing Co. 197,322; Apr. 14; Serial No. 204,583; published Jan. 20, 1925.
Lamps, Automobile. Jacobs Auto Safety Lamp Co. 197,289; Apr. 14; Serial No. 189,900; published Jan. 20, 1925.
Lamps, Electrical. Bedtime Products Co. 197,267; Apr. 14; Serial No. 201,691; published Jan. 6, 1925.
Lights, Electric Automobile. McKay Manufacturing Co. 197,238; Apr. 14; Serial No. 203,528; published Jan. 20, 1925.
Panel boards, switchboards, electric switch boxes, etc. Drendell Electrical & Manufacturing Co. 197,283; Apr. 14; Serial No. 203,724; published Jan. 20, 1925.
Radio apparatus. Tridot Electric Co. 197,260; Apr. 14; Serial No. 202,530; published Jan. 13, 1925.
Radiocrystals. Foote Radio Corporation. 197,300; Apr. 14; Serial No. 205,747; published Jan. 20, 1925.
Radio head phones, loud speakers, etc. Globe Phone Manufacturing Company. 197,350; Apr. 14; Serial No. 198,943; published Jan. 20, 1925.
Radiojacks. Herbert H. Frost, Incorporated. 197,225; Apr. 14; Serial No. 205,056; published Jan. 13, 1925.
Radio parts. R. B. Radio Company. 197,266; Apr. 14; Serial No. 201,773; published Jan. 13, 1925.
Radio receiving sets. V. W. Kimball. 197,249; Apr. 14; Serial No. 205,070; published Jan. 13, 1925.
Radio receiving sets. H. Mattes. 197,320; Apr. 14; Serial No. 204,618; published Jan. 20, 1925.
Radio receiving sets and parts thereof. J. Guthrie. 197,222; Apr. 14; Serial No. 205,639; published Jan. 20, 1925.
Radio receiving sets and parts thereof. J. Guthrie. 197,312; Apr. 14; Serial No. 205,637; published Jan. 20, 1925.
Radio receiving sets and parts thereof. Radio Industries Corporation. 197,305; Apr. 14; Serial No. 205,950; published Jan. 20, 1925.
Radio sets, aerial equipment, etc. Ozarka, Incorporated. 197,250; Apr. 14; Serial No. 205,083; published Jan. 13, 1925.
Radio sets and radio apparatus. American Interstate Radio Service. 197,303; Apr. 14; Serial No. 205,975; published Jan. 20, 1925.
Radio tubes and detectors. Schickerling Products Manufacturing Company. 197,158; Apr. 14; Serial No. 200,833; published Jan. 20, 1925.
Rail bonds. Rail Welding & Bonding Company. 197,298; Apr. 14; Serial No. 168,550; published Jan. 20, 1925.
Rubber-covered wire and flexible cords. Tubular Woven Fabric Company. 197,279; Apr. 14; Serial No. 166,154; published May 29, 1923.
Sadirons, Electrical. Quality Appliances Company. 197,455; Apr. 14.
Spark plugs. Beacon Spark Plug Corporation. 197,292; Apr. 14; Serial No. 184,114; published Jan. 20, 1925.
Spark plugs. Blue Bird Motor Device Corporation. 197,280; Apr. 14; Serial No. 204,494; published Jan. 20, 1925.
Telephone instruments. Rugh and Noble. 197,354; Apr. 14; Serial No. 199,806; published Jan. 27, 1925.
Toasters, Electric. Waters-Genter Co. 197,304; Apr. 14; Serial No. 205,968; published Jan. 20, 1925.
Transformers and coils, Electrical. Sears Manufacturing Company. 197,240; Apr. 14; Serial No. 203,694; published Jan. 20, 1925.
Vacuum cleaners and parts thereof, Electric. Electric Vacuum Cleaner Company. 197,302; Apr. 14; Serial No. 205,997; published Jan. 20, 1925.
Vacuum cleaners, Electric. Vacuum Cleaner Specialty Co. 197,457; Apr. 14.
Vacuum tubes, radio receiving sets, and parts of same. Crowley Radio Corporation. 197,319; Apr. 14; Serial No. 204,760; published Jan. 20, 1925.
Wire insulation. Alpha Radio Supply Co. 197,271; Apr. 14; Serial No. 199,450; published Jan. 20, 1925.

CLASS 22.

Balls, Golf. R. Trigger. 197,386; Apr. 14; Serial No. 206,141; published Feb. 3, 1925.
Bats, Baseball. Zinn, Beck Bat Company. 197,445; Apr. 14.
Exercising device. T. W. Thackery. 197,409; Apr. 14; Serial No. 203,984; published Feb. 3, 1925.
Exercising device or toy. Reid Brothers. 197,411; Apr. 14; Serial No. 204,835; published Feb. 3, 1925.
Fishing lines. Cortland Line Co. Inc. 197,454; Apr. 14.
Game apparatus. M. G. Hilpert. 197,344; Apr. 14; Serial No. 188,906; published Jan. 27, 1925.
Golf clubs, balls, shafts, etc. L. A. Wimpfheimer. 197,326; Apr. 14; Serial No. 204,339; published Jan. 27, 1925.
Handballs, baseballs, cricket balls, etc. Game Balls Company Limited. 197,355–8; Apr. 14; Serial Nos. 199,985–8; published Jan. 27, 1925.
Toy animals. Schoen & Yondorf Co. 197,368; Apr. 14; Serial No. 198,968; published Jan. 27, 1925.

CLASS 24.

Drying racks or bars for clothes. Martcross Company. 197,463; Apr. 14.
Washboilers. Abraham & Straus, Inc. 197,461; Apr. 14.

CLASS 27.

Watches and watchcases. Dial Watch Case Company. 197,273; Apr. 14; Serial No. 196,731; published Jan. 20, 1925.

CLASS 28.

Earrings, bracelets, watch fobs, etc. Blacher Brothers. 197,264; Apr. 14; Serial No. 201,879; published Jan. 13, 1925.
Finger rings. Untermeyer, Robbins & Co. 197,459; Apr. 14.
Necklaces, Pearl or imitation-pearl. A. Rolnick. 197,220; Apr. 14; Serial No. 205,952; published Jan. 20, 1925.

Preparation for thickening, coloring, and seasoning gravy, soups, and stews. Cerebos, Limited. 208,842; Apr. 14.
Rice, prepared mustard, and tomato catchup. John Sexton and Company. 187,773; Apr. 14.
Sirup, Corn and sugar. Union Starch & Refining Company. 208,916; Apr. 14.
Sirup, Maple-sap. Vermont Maple Syrup Co. Inc. of St. Johnsbury. 209,510; Apr. 14.
Wafers, Nut. Arcadia French Pastry and Candy Mfg. Co. 206,147; Apr. 14.

CLASS 50.

Clothes racks. Levine & Solomon. 209,923; Apr. 14.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 14TH DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abbot, Charles G., Washington, D. C., assignor to General Electric Company. Compass and magnetic dip indicator. 1,533,683; Apr. 14.

Abeel, Edwin A., Berkeley, Calif. Comb. 1,533,684; Apr. 14.

Abrams, William, Chicago, Ill. Lamp base. Des. 67,003; Apr. 14.

Abrams, William, Chicago, Ill. Lamp base. Des. 67,004; Apr. 14.

Abrams, William, Chicago, Ill. Lamp base. Des. 67,005; Apr. 14.

Abrams, William, Chicago, Ill. Lamp base. Des. 67,006; Apr. 14.

Acme Knitting Machine & Needle Company. (See Murphy, G., and Simond, assignors.)

Adams, William, Akron, Ohio. Electric switch. 1,533,295; Apr. 14.

Adcock, Aubrey A., Kansas City, Mo. Oil burner. 1,533,081; Apr. 14.

Agron, Isadore. (See Provence, Joseph S., assignor.)

Alemany, Mariano, Central Hershey, Cuba. Loading and unloading kilns or stoves. 1,533,296; Apr. 14.

Alig, Elmer A., St. Joseph, Mo. Gasoline bulb. 1,533,082; Apr. 14.

Alier, Joseph, Los Angeles, Calif. Memorandum. 1,533,297; Apr. 14.

Alley, E. G. (See Duncan, Sidney M., assignor.)

Allied Packers, Incorporated. (See Hawkinson, John A, assignor.)

Allis-Chalmers Manufacturing Company. (See Jorgensen, Arthur J., assignor.)

Allis-Chalmers Manufacturing Company. (See Newhouse, Ray C., assignor.)

Allison, Gustave, Perth Amboy, N. J., assignor to Columbia Salvage Corporation, New York, N. Y. Method and apparatus for salvaging artillery ammunition. 1,433,088; Apr. 14.

Amberson, William S., Waynesboro, Pa. Grinding machine. 1,533,821; Apr. 14.

American Magnesium Corporation. (See Harvey, William G., assignor.)

American Magnesium Corporation. (See Osborne, Harold H., assignor.)

American Bosch Magneto Corporation. (See Greiff, V., and Curtis, assignors.)

American Steel and Wire Company of New Jersey, The. (See Lang, Paul, assignor.)

American Telephone and Telegraph Company. (See Blackwell, Otto B., assignor.)

American Telephone and Telegraph Company. (See Eggers, Henry C. T., assignor.)

Amsler, Walter O., Pittsburgh, Pa. Annealing furnace and leer. 1,533,298; Apr. 14.

Anderson, Philip C., Rapid City, S. Dak. Scraper. 1,533,720; Apr. 14.

Ansart, Louis L., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,533,534; Apr. 14.

Anshen, Louis J., Providence, R. I. Ornamental chain. 1,533,822; Apr. 14.

Archer, Thomas P., and E. Heintz, assignors to Ternstedt Manufacturing Company, Detroit, Mich. Window-regulator installation. 1,533,084; Apr. 14.

Armknecht, John G., Detroit, Mich. Fuel-reserve tank. 1,533,299; Apr. 14.

Armstrong, Percy A. E., Loudonville, assignor to Ludlum Steel Company, Watervliet, N. Y. Valve for internal-combustion engines. 1,533,782; Apr. 14.

Arnett, James L. Mannington, W. Va. Adjustable plastic tamping machine; 1,533,085; Apr. 14.

Arnold Electric Company. (See Pursell, Arthur T., assignor.)

Aronson, Louis V., Newark, N. J. Sparking rattle. 1,533,861; Apr. 14.

Art Lamp Manufacturing Company. (See Severus, Louis, assignor.)

Ash, Royal L., Bucyrus, Ohio, assignor of one-half to H. C. Pfund, Des Moines, Iowa. Waste-heat cooling system for periodic clay-burning kilns. 1,533,999; Apr. 14.

Atlas Powder Company. (See Grotta, Bennett, assignor.)

Atlas Powder Company. (See Shipley, S. D., and Given, assignors.)

Audibert, Marcel, Salon, France. Flower and fruit gathering pinching scissors. 1,533,535; Apr. 14.

Audiphone Company of America. (See Reynolds, De Elbert A., assignor.)

Austin Manufacturing Co. (See Wilson, F. D., and Burns, assignors.)

Averill, William H., Boston, assignor to The Carter's Ink Company, Cambridge, Mass. Inkstand. 1,533,627; Apr. 14.

Ayars, Charles H., Salem, N. J. Can-filling machine. 1,533,536; Apr. 14.

Ayers, Augustine R., Cleveland, Ohio. Locomotive construction. 1,533,902; Apr. 14.

Babin, Whitney C., Beaumont, Tex. Rotary slip. 1,533,362; Apr. 14.

Bähr, Adolph. (See Kaiser, W., and Gardels, assignors.

Bailer, Frank W., and M. Weinberg, St. Louis, Mo. Clothing-seam-pressing machine. 1,533,685; Apr. 14.

Baits, Stuart G. (See Fekete, S. L., and Baits.)

Baker, Bert C., Prairie Depot, assignor of one-third to H. Williams, one-sixth to W. C. Kinsley, and one-sixth to W. E. Orthwein, Toledo, Ohio. Laundry drier. 1,533,086; Apr. 14.

Baker, Emerson W. (See Falwell, Wray, assignor.)

Baker, Joseph, Sons and Perkins Limited. (See Prescott, W. E., and Pointon, assignors.)

Baker, R. & L., Company, The. (See Stahl, Edward J., assignor.)

Baker, Ralph, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Making decorative articles. 1,533,300; Apr. 14.

Baker, Raymond H., New York, N. Y., assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Ball-mill lining. 1,534,000; Apr. 14.

Balmer, Robert, Toronto, Ontario, Canada. Operation of refuse destructors and means for practicing same. 1,533,686; Apr. 14.

Balzer, Fritz, Moline, assignor to Troy Laundry Machinery Co., Ltd., Chicago, Ill. Washing Machine. 1,533,363; Apr. 14.

Barber-Colman Company. (See Hathaway, Edgar F., assignor.)

Barber-Colman Company. (See Peterson, Burt A., assignor.)

Barbey, Jacob W. (See Taylor, W. H., Downs, and Barbey.)

Barna, Andrew, New York, N. Y. Shoe. Des. 67,007; Apr. 14.

Barrott, George H., assignor to Barrott Stamping Company, Shelburne Falls, Mass. Charge vaporizer for manifold branches. 1,533,364; Apr. 14.

Barrott Stamping Company. See Barrott, George H., assignor.)

Bartholomew, James H. (See Donle, H. P., and Bartholomew.)

Bartlett Hayward Company, The. (See Freedenburg, Howard C., assignor.)

Bashian, Harry, Chicago, Ill. Gasoline gauge. 1,533,823; Apr. 14.

Bassett, Gerald L., assignor to The Conklin Pen Manufacturing Company, Toledo, Ohio. Magazine pencil. 1,533,087; Apr. 14.

Baskin, Benjamin, and A. Waisman, St. Louis, Mo. Underpresser. 1,533,783; Apr. 14.

Bater, Harold M., and C. A. Glentworth, Manchester, Mass. Trunk-rack bracket. 1,533,365; Apr. 14.

Bathé, Charles G., Alhambra, assignor of one-eighth to M. H. Watson, Los Angeles, and one-eighth to N. W. Wiedrick, Long Beach, Calif. Combined pleasure and fishing boat. 1,533,366; Apr. 14.

Baty, Charles, jr., Sacramento, Calif. Mechanical toy. 1,533,493; Apr. 14.

Baumann, Karl, Urmston, England, assignor to Westinghouse Electric & Manufacturing Company. Steam turbine. 1,533,156; Apr 14.

Baylis, Harry R., Seattle, Wash. Paper clip. 1,533,367; Apr. 14.

Beatty, William E., Bayside, assignor to Western Electric Company, Incorporated, New York, N. Y. Modulating method and apparatus. 1,533,157; Apr. 14.

Beaver Machine & Tool Company. (See Slade, Harold E., assignor.)

Beck Duplicator Company, The. (See Kenworthy, Charles A., assignor.)

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Spoon or similar article. Des. 67,008; Apr. 14.

Beck, Kenneth H., and E. H. Blackburn, Pittsburgh, Pa. Doorstop. 1,533,687; Apr. 14.
Becker, Ernest, Green Bay, Wis., assignor of one-half to L. F. Wilson, Chicago, Ill. Protective cage for blow-off cocks. 1,533,088; Apr. 14.
Becton, Roy C., Dyer, Tenn. Mower attachment. 1,533,721; Apr. 14.
Bedford Foundry & Machine Company. (See Sohn, Edward A., assignor.)
Belknap, Charles B., Detroit, Mich. Hydrocarbon emulsion and making same. 1,533,158; Apr. 14.
Bellows, Warren S., assignor to Walden-Worcester, Inc., Worcester, Mass. Socket wrench. 1,533,784; Apr. 14.
Bellows, Warren S., East Orange, N. J., assignor to Walden-Worcester, Inc., Worcester, Mass. Wrench construction. 1,533,785; Apr. 14.
Beloud, Leon G., San Francisco, Calif. Inner boot for automobile tires. 1,533,301; Apr. 14.
Benedict, Frank, Philadelphia, Pa., assignor to General Railway Signal Company, Gates, N. Y. Railway signaling system. 1,533,357; Apr. 14.
Benjamin, Walter R., Granite City, Ill. Foot-propelled vehicle. 1,533,824; Apr. 14.
Benner, Harry P. (See Egloff, G., and Benner.)
Bentley Motors Limited. (See Burgess, Frederick T., assignor.)
Berg, Frederick A., Chicago, Ill. Nozzle. 1,533,368; Apr. 14.
Berg, Frederick O., Spokane, Wash. Separable fastener. 1,533,581; Apr. 14.
Bergen, Harry S., Toledo, Ohio. Workholding device. 1,533,089; Apr. 14.
Berggren, August, Eagle Bend, Minn. Distributor attachment to thrashing machines. 1,533,963; Apr. 14.
Bergh, Louis T., Fairoaks, Calif. Excess-pressure attachment for clamps. 1,533,688; Apr. 14.
Berman, Meyer, New York, N. Y. Shoe lace. 1,533,964; Apr. 14.
Best, Frank E., assignor to Frank E. Best, Inc., Seattle, Wash. Post-office mail-box lock. 1,533,628; Apr. 14.
Best, Frank E., assignor to Frank E. Best, Inc., Seattle, Wash. Disappearing-anchor lock. 1,533,629; Apr. 14.
Best, Frank E., Inc. (See Best, Frank E., assignor.)
Bethlehem Steel Company. (See Dawson, Thomas C., assignor.)
Bethlehem Steel Company. (See Hummel, Howard H., assignor.)
Bethlehem Steel Company. (See Kichline, F. O., and Sloyer, assignors.)
Betts, Anson G., Kinderhook, N. Y. Making refractory articles and the like. 1,533,689; Apr. 14.
Billburg, Charles, Detroit, Mich. Tourist's kit. 1,533,494; Apr. 14.
Black, Ernest W., Spokane, Wash. Electric heater. 1,533,090; Apr. 14.
Blackburn, Edward H. (See Beck, K. H., and Blackburn.)
Blackman, Mary E., Cheney, Wash. Stitch and needle guard. 1,534,001; Apr. 14.
Blackwell, Otto B., Garden City, N. Y., assignor to American Telephone and Telegraph Company. Duplex signaling system. 1,533,091; Apr. 14.
Blackwell, Thomas M., Basic City, Va. Railway-crossing gate. 1,533,722; Apr. 14.
Blakeslee, George R., executor. (See Blakeslee, George S.)
Blakeslee, George S., deceased, Oak Park, Ill.; G. R. Blakeslee, executor. Washing machine. 1,533,159; Apr. 14.
Bliss, E. W., Company. (See Thoma, Walter, assignor.)
Blood, Bryant H., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Thread-gauge construction. 1,533,360; Apr. 14.
Blood, Harold L., Plainfield, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Switch mechanism. 1,533,370; Apr. 14.
Blunt, James G., Schenectady, N. Y. Lateral-motion appliance for locomotive driving boxes. 1,533,303; Apr. 14.
Boehringer, John A., Springfield, assignor to H. A. Safion, New York, N. Y. Pendant for lighting fixtures. Des. 67,009; Apr. 14.
Bonbright, George D. B., Rochester, N. Y. Fishhook. 1,533,092; Apr. 14.
Bongardt, Ernst, Mains-on-the-Rhine, Germany. Method and machine for mixing, conveying, and distributing concrete, mortar, and the like. 1,534,008; Apr. 14.
Bonnell, Daniel W., Philadelphia, Pa. Wing control for flying machines and safety device therefor. 1,533,786; Apr. 14.
Booth, James S., Detroit, Mich. Automobile dash and body construction. 1,533,093; Apr. 14.
Both, Tonjes A., Stratford, assignor to The Connecticut Electric Manufacturing Company, Bridgeport, Conn. Electric receptacle. 1,533,690; Apr. 14.
Both, Tonjes A., Stratford, assignor to The Connecticut Electric Manufacturing Company, Bridgeport, Conn. Socket shell or casing. 1,533,691; Apr. 14.
Bottome, Edgar M. (See Magee, W. H., and Bottome.)
Boyd, John H., Mount Vernon, N. Y. Electric-lighting apparatus for Christmas trees and the like. 1,533,371; Apr. 14.
Boye, James H., Chicago, Ill. Curtain support. 1,533,302; Apr. 14.
Bošić, Dobrivoje, Belgrade, Yugoslavia. Accelerator. 1,533,692; Apr. 14.
Bracy, August A., Detroit, Mich. Electrically-controlled print box. 1,533,583; Apr. 14.
Bradley, Alonzo B., et al. (See Richardson, H. F., and Coggeshall, assignors.)
Bradley, S. B., et al. (See Richard, H. F., and Coggeshall, assignors.)
Brandes, C., Inc. (See Brigham, Cecil E., assignor.)
Brannen, Bert, Keyser, W. Va. Journal-box lift. 1,533,965; Apr. 14.
Breese & Bettle, Inc. (See Breese, James L., jr., assignor.)
Breese, James L., jr., assignor to Breese & Bettle, Inc., Chicago, Ill. Combined house-heating and domestic-water-heating system. 1,533,630; Apr. 14.
Brenzinger, Julius, Fairfield, and P. H. Lange, assignors to The Max Ams Machine Company, Bridgeport, Conn. Ejecting mechanism for hollow bodies. 1,533,537; Apr. 14.
Brigham, Cecil E., East Orange, N. J., assignor to C. Brandes, Inc., New York, N. Y. Loud speaker. 1,533,372; Apr. 14.
Brisbois, Odilon, Chicago, Ill. Starting mechanism for automobiles. 1,533,373; April 14.
Britton, Ernest C., Schenectady, N. Y., assignor to General Electric Company. Automatic reclosing circuit-breaker system. 1,533,693; Apr. 14.
Brixey, Austin D., Greenwich, Conn., assignor to The Replitura Corporation. Projected-light picture screen. 1,533,374; Apr. 14.
Brooklyn Fibre Syndicate, Inc. (See Stella, J., and Wisser, assignors.)
Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Warp stop mechanism for looms. 1,534,002; Apr. 14.
Brown, B. E., & Co. (See Brown, Thomas H., assignor.)
Brown, Leon M., Spokane, Wash. Gradometer. 1,533,723; Apr. 14.
Brown, Raymond M. (See Lindner, Arthur, assignor.)
Brown, Thomas H., assignor to E. E. Brown & Co., Inc., Philadelphia, Pa. Core-forming apparatus. 1,533,375; Apr. 14.
Brown, William. (See Crosse, E., Brown, and Lens.)
Brownell, Frederick J., Queens, assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic telephone switch. 1,533,376; Apr. 14.
Browning, John M., Ogden, Utah. Automatic rifle. 1,533,966; Apr. 14.
Browning, John M., Ogden, Utah. Automatic rifle. 1,533,967; Apr. 14.
Browning, John M., Ogden, Utah. Automatic rifle. 1,533,968; Apr. 14.
Brownlee, James, Newark, N. J. Toy. 1,533,631; Apr. 14.
Bruback, Theodore M. (See Linaker, F. W., and Bruback.)
Bruce, Alfred W., New York, N. Y. Speed-control appliance for fluid-pressure engines. 1,533,304; Apr. 14.
Bruffee, Archer E., Portland, Oreg. Egg separator. 1,533,377; Apr. 14.
Brush Washing Machine Company, The. (See Howe, Chester C., assignor.)
Buckeye Traction Ditcher Company, The. (See Yocum, Charles F., assignor.)
Buckner, Leon, New York, N. Y. Two-part heel. 1,533,160; Apr. 14.
Buehler, Randolph J., South Bend, Ind. Valve-controlled oil burner. 1,533,094; Apr. 14.
Bulewich, Joseph, Palmer, and J. Nosarzewski, Chicopee, Mass. Automatic signaling device. 1,533,095; Apr. 14.
Bullinger, Frederic H., Yonkers, N. Y., assignor to Ward Leonard Electric Company. Resistance unit. 1,533,096; Apr. 14.
Bulova, Adolph, New York, N. Y. Tag for wrist watches. Des. 67,010; Apr. 14.
Bunkers, Joseph F., Remsen, Iowa. Swinging closure. 1,533,378; Apr. 14.
Bunte, Emil C., Portland, Oreg. Smoking appliance. 1,533,379; Apr. 14.
Burdick, Ralph M. (See Eilers, Hio P., assignor.)
Burgess, Frederick T., assignor of one-half to Bentley Motors Limited, London, England. Brake for motor vehicles. 1,534,009; Apr. 14.
Burke, William J. (See Marshall, B. A., and Burke.)
Burkhart, Jacob, Elmhurst, Pa. Combination hair comb and barrette. 1,533,380; Apr. 14.
Burn, Robert J., Croydon, near Sydney, New South Wales, Australia. Automatic resetting trolley carrier for electric street cars. 1,533,161; Apr. 14.
Burnett, William J., Thomasville, Ga. Plow. 1,533,825; Apr. 14.
Burns, Leonard S. (See Wilson, F. D., and Burns.)
Burton, Charles H., Washington, D. C. Tool for cutting tongued boarding. 1,533,805; Apr. 14.
Burton, Edward L., Sandwich, Ill. Portable drill. 1,533,381; Apr. 14.
Busha, Leon, Minneapolis, Minn. Strip shingle. 1,533,969; Apr. 14.
Butorac, Frank, Seattle, Wash. Automatic derail signal. 1,533,632; Apr. 14.
Butterfield, Daniel J., Los Angeles, Calif. Check-controlled apparatus. 1,533,538; Apr. 14.

Butterworth, Samuel D., Lansing, Mich. Doorlock. 1,533,826; Apr. 14.
Byhre, Christian, Halleck, Calif. Bevel square. 1,533,097; Apr. 14.
C. G. Haubold A. G., Firm. (See Tandel, Fritz, assignor.)
C. G. Spring & Bumper Company, The. (See Dunston, Wayne E., assignor.)
C. H. & D. Electric Company. (See Jensen, Victor G., assignor.)
Cady, Elisha J. (See Tauts, Herbert E., assignor.)
Caldwell, Frank W., Dayton, Ohio. Thrust meter. 1,533,806; Apr. 14.
Camel Company. (See Tobin, K. J., and Darrow, assignors.)
Campbell, Charles, New York, N. Y. Typewriter ribbon. 1,533,382; Apr. 14.
Campbell, Donald J., Muskegon Heights, Mich. Molding apparatus. 1,533,220; Apr. 14.
Campbell, Donald J., Muskegon Heights, Mich. Sand-molding apparatus. 1,533,221; Apr. 14.
Campbell, Donald J., Muskegon Heights, Mich. Molding-sand-handling machine. 1,533,383; Apr. 14.
Campbell, Milton D., and H. C. Heisey, assignors to The Perkins-Campbell Company, Cincinnati, Ohio. Covering for tires. 1,533,970; Apr. 14.
Canfield, Arthur J., Chicago, Ill., and E. R. Viberg, Montreal, Quebec, Canada. Metal car roof. 1,533,384; Apr. 14.
Canter, Vernon C. (See Doress, C. L., Canter, and Skoog.)
Carey, Edward L., Brooklyn, N. Y. Hurdle. 1,533,633; Apr. 14.
Carmean, James H. (See Carmean, Samuel M. and J. H.)
Carmean, Samuel M. and J. H., Kansas City, Mo. Electric heater. 1,533,098; Apr. 14.
Carr, Walter S., Dayton, Ohio. Cooling system for internal-combustion engines. 1,533,827; Apr. 14.
Carroll, Robert E., Duluth, Minn. Square-corner glue joint. 1,533,099; Apr. 14.
Carter's Ink Company, The. (See Averill, William H., assignor.)
Carufel, Louis H., Minneapolis, Minn. Stencil. 1,533,584; Apr. 14.
Carvalho, Leslie R. N., assignor to The Closure Service Company, Toledo, Ohio. Receptacle closure. 1,533,385; Apr. 14.
Cashko Machine Company. (See Schimek, Joseph F., assignor.)
Cashman, Dennis F., Dayton, Ohio. Control mechanism. 1,533,222; Apr. 14.
Castracane, Luigi, New York, N. Y. Surgical knife. 1,533,971; Apr. 14.
Catlett, John E., San Francisco, Calif. Cleaning and polishing composition. 1,533,386; Apr. 14.
Central Trading Company. (See Klingbell, Gottlieb L. E., assignor.)
Chainless Knitting Machine Corp. (See Kotkovsky, B., Luter, and Dubi, assignors.)
Chapman, Alonzo E., Los Angeles, Calif. Sustained explosion gas engine. 1,533,387; Apr. 14.
Chapman, Frank C., Modesto, Calif. Dehydrator for nuts and the like. 1,533,388; Apr. 14.
Chapman, George A., Minneapolis, Minn. Map holder. 1,533,696; Apr. 14.
Chellman, Harry R. L., Mount Oliver, Pa. Toy river boat. 1,533,634; Apr. 14.
Cheesman, Alexander, Chicago, Ill. Writing device. 1,533,162; Apr. 14.
Christianson, Andrew, Butler, Pa. Door-latching mechanism. 1,533,828; Apr. 14.
Chubb, Lewis W., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of control. 1,533,223; Apr. 14.
Chudoba, Frank F., Glastonbury, Conn., assignor by mesne assignments, to United States Hat Machinery Corporation, Richmond, Va. Felt shrinking. 1,533,848; Apr. 14.
Cincinnati Shape Company, The. (See Haselton, Robert T., assignor.)
Citizens of the United States of America. (See Tiemann, Harry D.)
Clapp, Albert L., assignor to The Flintkote Company, Boston, Mass. Waterproofed fibrous material. 1,533,100; Apr. 14.
Clark, George H., Brooklyn, N. Y. Circuit-breaking terminal. 1,533,972; Apr. 14.
Clark, Leland V. (See Wheatley, R. H., and Clark.)
Clarke, Ira M., New Martinsville, W. Va. Relish plate. Des. 67,011; Apr. 14.
Clarke-James, William H., London, England. Fitting for connecting together parts of wooden structures and the like. 1,533,724; Apr. 14.
Class, John F., Dayton, Ohio. Apparatus for generating medicinal fumes and applying the same to the body of a patient. 1,533,829; Apr. 14.
Clausen, Henry P., Mamaroneck, and C. L. Goodrum, assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,533,163; Apr. 14.
Cleveland, Henry P., New York, N. Y. Uniting pieces of certain alloys to one another or to other metals or alloys, a flux for use therein, and the product thereof. 1,533,539; Apr. 14.
Closure Service Company, The. (See Carvalho, Leslie R. N., assignor.)
Cochran, Joseph E., Chicago, Ill., assignor of one-half to E. T. Crawford, Charleston, W. Va. Molding monuments and the like from plastic material. 1,533,830; Apr. 14.
Coen Co. (See Voorheis, Joseph T., assignor.)
Coggeshall, Allan. (See Richardson, H. F., and Coggeshall.)
Coggeshall, Allan, et al. (See Richardson, H. F., and Coggeshall, assignors.)
Cohen, Samuel, and S. Kilberg, Brooklyn, N. Y. Quilted waterproof pad. 1,533,973; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric resistance furnace. 1,533,224; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Temperature regulator. 1,533,225; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Street-car heater. 1,533,226; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Street-car heater. 1,533,227; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace resistor support. 1,533,228; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric flat-iron. 1,533,229; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric soldering iron. 1,533,230; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace resistor. 1,533,231; Apr. 14.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace. 1,533,232; Apr. 14.
Colchin, Frederick J., Decatur, Ind. Doorcheck. 1,533,831; Apr. 14.
Cole, Lyndon C., O. Pabst, and C. May, Hamilton, Ohio, assignors to Niles-Bement-Pond Company, New York, N. Y. Multiple drill. 1,533,389; Apr. 14.
Coleman, Frank, Derby, England. Apparatus for heating bitumen, tar, and other substances. 1,533,390; Apr. 14.
Collins, Andrew G., Detroit, Mich. Composition for white shoe dressing. 1,533,164; Apr. 14.
Columbia Salvage Coporation. (See Allison, Gustave, assignor.)
Columbia Salvage Corporation. (See Welch, Augustine W., assignor.)
Combination Machine Company. (See Peterson, J., and Thom, assignors.)
Conant, Arthur P., Fort Thomas, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase appendage. Des. 67,012; Apr. 14.
Con-Den-Rit Radiant Log Corporation, The. (See Conroy, James P., assignor.)
Conklin Pen Manufacturing Company, The. (See Bassett, Gerald L., assignor.)
Conlan, Sidney L., and H. F. Plough, Inglewood, Calif. Green-fruit brace. 1,533,695; Apr. 14.
Conlan, Sidney L., Oakland, and H. F. Plough, Inglewood, Calif. Fruit-box brace. 1,533,696; Apr. 14.
Connecticut Electric Manufacturing Company, The. (See Both, Tonjes A., assignor.)
Connecticut Telephone & Electric Company, The. (See Donie, H. P., and Bartholomew, assignors.)
Conroy, James P., East Orange, assignor to The Con-Den-Rit Radiant Log Corporation, Perth Amboy, N. J. Radiant gas log. 1,533,391; Apr. 14.
Cook, John H., Salt Lake City, Utah. Window scaffold. 1,533,832; Apr. 14.
Corado, Edward C., Boston, Mass. Burner. 1,533,833; Apr. 14.
Corcoran, Cornelius B., assignor to Underwood Typewriter Company, New York, N. Y. Type-bar rest. 1,533,392; Apr. 14.
Corcoran, Cornelius B., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,533,585; Apr. 14.
Cordt, Hugo, assignor to Carl Lindström Aktiengesellschaft, Berlin, Germany. Printing mechanism for Thomas calculating machines having key adjustment. 1,533,393; Apr. 14.
Cornell, Chauncey A. (See Purdy, E. T., and Cornell.)
Costello, Michael, Jersey City, N. J. Fire-alarm apparatus. 1,533,394; Apr. 14.
Cox, George W., jr., assignor to National Assorting Company, Washington, D. C. Sorting machine. 1,533,697; Apr. 14.
Cox, George W., jr., assignor to National Assorting Company, Washington, D. C. Sorting machine. 1,533,698; Apr. 14.
Craigen, William G., Aberdeen, Scotland. Game. 1,533,540; Apr. 14.
Crampton, Basil R. (See Winters, A. F., and Crampton.)
Crane, Samuel G., assignor to Toledo Scale Company, Toledo, Ohio. Dashpot mounting. 1,533,101; Apr. 14.
Crawford, Ellis T. (See Cochran, Joseph E., assignor.)
Crozier, A. M., et al. (See Richardson, H. F., and Coggeshall, assignors.)

Crescio, Louis C., assignor of one-half to L. Malatesta, New York, N. Y. Multiple-standard micrometer. 1,533,787; Apr. 14.

Crichton, Leslie N., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic cut-out for electric irons. 1,533,233; Apr. 14.

Crompton & Knowles Loom Works. (See Robertson, William W., assignor.)

Cross, Milton O., Detroit, Mich. Indexing gears. 1,533,165; Apr. 14.

Cross, Robert J., Mayfield, Calif. Bookbinding. 1,533,102; Apr. 14.

Crosse, Earl, Council Bluffs, Iowa; W. Brown, Omaha, Nebr., and C. Lenz, Council Bluffs, Iowa. Shade and curtain bracket. 1,533,295; Apr. 14.

Crowell, Frank S., assignor to The Edward N. Riddle Co., Toledo, Ohio. Plate for lighting fixtures. Des. 67,013; Apr. 14.

Crowell, Frank S., assignor to The Edward N. Riddle Co., Toledo, Ohio. Lighting fixture. Des. 67,014; Apr. 14.

Culbertson, Edward A., Wichita, Kans. Pump. 1,533,103; Apr. 14.

Cullinane, William, Bristol, England. Hencoop and the like. 1,533,834; Apr. 14.

Curran, Jerome P., Toledo, Ohio. Bottle. Des. 67,015; Apr. 14.

Curran, Jerome P., Toledo, Ohio. Bottle. Des. 67,016; Apr. 14.

Curtis, Leslie F. (See Greiff, V., and Curtis.)

Curtis, Lewis B., Bridgeport, Conn. Safety device for automobiles. 1,533,635; Apr. 14.

Curtis Lighting, Incorporated. (See Pridmore, J. E. O., and McKinnie, assignors.)

Dabney, Lillian M., Kansas City, Kans. Fan. 1,533,396; Apr. 14.

Dakin, Franklin W. (See Mohr, Oscar H., assignor.)

Dakota Cooler Corporation. (See Johnson, Anton, assignor.)

Daly, Harry A., Philadelphia, Pa. Concrete step. 1,533,166; Apr. 14.

Damiano, Domenico, assignor to Damiano Tide and Stream Water Power Company, Boston, Mass. Tide-water power plant. 1,533,234; Apr. 14.

Damiano Tide and Stream Water Power Company. (See Damiano, Domenico, assignor.)

Darrow, William W. (See Tobin, K. J., and Darrow.)

Dathan, William F., Glencoe, Ill. Toy vehicle. 1,533,167; Apr. 14.

Davenport, Fred M., Los Angeles, Calif. Sash or screen lock. 1,533,725; Apr. 14.

Davidson, Eli, Chelsea, Mass. Music holder. 1,533,235; Apr. 14.

Davis, Benjamin F., Plainview, Tex. Combination lifter. 1,533,726; Apr. 14.

Davis Brake Beam Company. (See Fowler, William E., jr., assignor.)

Davis, Charles A., and H. L. McCloy, Stauffer, Pa. Cover for springs. 1,533,397; Apr. 14.

Davis, Charles H., jr., Petersburg, Va. Engine-starting system. 1,533,104; Apr. 14.

Davis, Harvey N. (See Loewenstein, L. C., and Davis.)

Davis, Selden S., South Pasadena, Calif. Valve lifter. 1,533,307; Apr. 14.

Davis, Selden S., South Pasadena, Calif. Spark plug. 1,533,308; Apr. 14.

Davis, Taube, assignor to Franklin Simon & Co., Inc., New York, N. Y. Dress. Des. 67,017; Apr. 14.

Davis, Vernon, Franklinville, N. Y. Portable saw. 1,533,974; Apr. 14.

Dawley, Clarence A., Plainfield, N. J. Separator and trap. 1,533,835; Apr. 14.

Dawson, Thomas C., assignor to Bethlehem Steel Company, Bethlehem, Pa. Locally heat-treating hardened-steel articles. 1,533,236; Apr. 14.

Day, Alfred C., Melbourne, Victoria, Australia. Electrical switch mechanism. 1,533,699; Apr. 14.

Day, Elisabeth, Chicago, Ill. Collapsible box or the like. 1,533,636; Apr. 14.

Dearsley, Irwin E., assignor to Walker Manufacturing Company, Racine, Wis. Lifting jack. 1,533,168; Apr. 14.

De Cosmo, Joseph, Neuilly sur Seine, France. Two-stroke explosion engine. 1,533,727; Apr. 14.

De Laval Separator Company, The. (See Forsberg, Erik A., assignor.)

De Laval Separator Company, The. (See Hapgood, Cyrus H., assignor.)

Demarest, Thomas W., Chicago, Ill. Journal-box lubricator. 1,533,637; Apr. 14.

Denaro, James, Cambridge, Mass. Edible container. Des. 67,018; Apr. 14.

Dene, Charles A., Lambertville, N. J. Gauge or leveling device for electric or other drills. 1,533,975; Apr. 14.

Deppeler, John H., Weehawken, assignor to Metal and Thermit Corporation, Chrome, N. J. Heater. 1,533,788; Apr. 14.

Derby, John H., New York, N. Y. Electric liquid-heating apparatus. 1,533,541; Apr. 14.

Derby, John H., New York, N. Y. Signal transmitter. 1,533,542; Apr. 14.

Derk, Joseph, Philadelphia, Pa. Table scarf. Des. 67,019; Apr. 14.

Derman, George W., and J. A. Monighan, Sacramento, Calif. Safety-lock faucet. 1,533,398; Apr. 14.

Desenne, Georges, Courbevoie, France. Automatic recorder for machine output. 1,533,586; Apr. 14.

Deutsche Telephonwerke, G. m. b. H. (See Fassbender, H., and Habann, assignors.)

Devolld, Orian F., Bartlesville, Okla. Oil pump. 1,533,976; Apr. 14.

Dibble, Carroll W., and M. Phillips, Portland, Oreg., assignors of one-fifth to J. T. Loofbourow, one-fifth to J. G. Meeks, and one-fifth to E. D. Howe. Card-registering machine. 1,533,700; Apr. 14.

Di Bernardi, John, East Lynn, Mass. Condiment holder. 1,533,582; Apr. 14.

Dinges, Carson. (See Hinkel, Hobart M., assignor.)

Dobson, John V., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Brush holder. 1,533,237; Apr. 14.

Doelle, Edward C., and E. J. Eggert, St. Paul, Minn.; said Doelle assignor to said Eggert. Water heater. 1,533,495; Apr. 14.

Doge, Fred W., Creston, Iowa. Egg carrier. 1,533,836; Apr. 14.

Dollar, Peter J., Green Bay, Wis. Headlight. 1,533,496; Apr. 14.

Donaghy, Elisabeth. (See Marty, Benjamin F., assignor.)

Donle, Harold P., and J. H. Bartholomew, assignors to The Connecticut Telephone & Electric Company, Incorporated, Meriden, Conn. Igniter governor. 1,534,003; Apr. 14.

Donner, Vyvyan E., New York, N. Y. Sign for advertising and other display. 1,533,789; Apr. 14.

D'Onofrio, Frank, Wilmington, Del. Figure toy. 1,533,543; Apr. 14.

Donohue, Robert D., New York, N. Y. Flower-wearing device. 1,533,169; Apr. 14.

Dosch, Oliver L., Elizabeth, N. J., assignor to The Singer Manufacturing Company. Power table. 1,533,170; Apr. 14.

Douglas, Elizabeth J., Crete, Nebr. Mail-delivery vehicles. 1,533,837; Apr. 14.

Douglas, John, Company, The. (See McNeil, Daniel W., assignor.)

Dowd, Andrew D., Hoboken, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. 1,533,171; Apr. 14.

Downs, Charles W. (See Taylor, W. H., Downs, and Barbey.)

Doyle, James S. (See Hedley, F., and Doyle.)

Dräger, Alexander B., Lubeck, Germany. Breathing bag for self-contained breathing apparatus. 1,533,172; Apr. 14.

Draper Corporation. (See Brown, Carl D., assignor.)

Draper Corporation. (See Rhoades, Alonso E., assignor.)

Drenk, Henry F., Riverside, N. J. Apparatus for separating and unraveling yarns of knitted fabrics. 1,533,728; Apr. 14.

Dubi, Boris. (See Kotkovsky, B., Luter, and Dubi.)

Dubilier Condenser and Radio Corporation. (See Van Deventer, Harry E., assignor.)

Duguay, William, Lowell, Mass. Padlock. 1,533,838; Apr. 14.

Dulits, Adolf, Hirschberg, assignor to "Flaka" Flaschen-Kappen-Gesellschaft, m. b. H., Berlin-Charlottenburg, Germany. Sealing cap and the manufacture thereof. Re16,042; Apr. 14.

Duncan, Sidney M., assignor of one-half to E. G. Alley, Chattanooga, Tenn. Card-oiling machine. 1,533,977; Apr. 14.

Dunham, Clayton A., Glencoe, assignor to Dunhameter Corporation, Chicago, Ill. Automobile step plate. Des. 67,020; Apr. 14.

Dunhameter Corporation. (See Dunham, Clayton A., assignor.)

Dunlap, Robert H., Washington, D. C. Transmitting power. 1,533,399; Apr. 14.

Dunston, Wayne E., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp for an automobile bumper. Des. 67,021; Apr. 14.

Durborow, William E., Columbia, Pa. Safety device for gasoline tanks. 1,533,309; Apr. 14.

Durborow, William E., Columbia, Pa. Safety device for gasoline-storage tanks. 1,533,587; Apr. 14.

Dutcher, Pierpont E., Upper Montclair, N. J. Golf club. 1,533,638; Apr. 14.

Dymock, Raymond, Hamburg, N. J. Internal brake. 1,533,790; Apr. 14.

Eaton, George H., Sheffield, assignor of one-half to Herbert Terry & Sons, Limited, Redditch, Worcestershire, England. Clearing glass windscreens and the like. 1,533,238; Apr. 14.

Eberhard Manufacturing Co., The. (See Schleicher, William A., assignor.)

Eckelman, Frederick C., New York, N. Y. Lock-controlled cut-off. 1,533,978; Apr. 14.

Economy Fuse & Manufacturing Company. (See Hartmann, Povl, assignor.)

Egeland, Rector, Chicago, Ill. Process and apparatus for cracking hydrocarbons. 1,533,839; Apr. 14.

Eggers, Henry C. T., Minneapolis, Minn., assignor to American Telephone and Telegraph Company. Electric signaling. 1,533,105; Apr. 14.

Eggert, Edward J. (See Doelle, E. C., and Eggert.)

Egloff, Gustav, and H. P. Benner, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill. Distillation apparatus. 1,533,178; Apr. 14.

Ehn, Erik W., assignor to The Timken Roller Bearing Company, Canton, Ohio. Quenching apparatus. 1,533,639; Apr. 14.

Ehrhardt, Irwin, Hermsdorf, near Berlin, assignor to Siemens & Halske, Aktiengesellschaft, Seemensstadt, near Berlin, Germany. Typeprinting telegraph. 1,533,729; Apr. 14.

Ehrhart, Raymond N., Edgewood, assignor to Elliott Company, Pittsburgh, Pa. Condenser. 1,533,840; Apr. 14.

Ehrlich, Herman, Chicago, Ill. Presser form. 1,534,013; Apr. 14.

Eilers, Hio P., assignor to R. M. Burdick, Los Angeles, Calif. Piston-lining device. 1,533,791; Apr. 14.

Electric Arc Cutting & Welding Company. (See Livermore, Henry W., assignor.)

Electrical Seal Company, The. (See Paulen, Percy H., assignor.)

Elliott Company. (See Ehrhart, Raymond N., assignor.)

Elliott Company. (See Paterno, Charles V., assignor.)

Elliott Company. (See Walker, William H., assignor.)

Ellis, Elmer E., Pomona, Calif. Tile-mounting device. 1,533,588; Apr. 14.

Engler, Richard A., New York, N. Y. Telephone transmitter. 1,533,730; Apr. 14.

English & Mersick Co., The. (See Greene, Frederick E., assignor.)

Erdosy, John, Philadelphia, Pa. Hot-air and vapor bath device. 1,533,174; Apr. 14.

Erson, Carl J., assignor of one-half to N. J. Veline, Minneapolis, Minn. Direction indicator. 1,533,841; Apr. 14.

Eschholz, Otto H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Ornamental arc welding. 1,533,239; Apr. 14.

Estate Stove Company, The. (See Kahn, Bertrand B., assignor.)

Euler, Frank M., Irvington, N. J. Spark plug. 1,533,979; Apr. 14.

Evanuk, Michael, New York, N. Y. Harrow. 1,533,701; Apr. 14.

Ewoldt, Theodore, Holstein, and J. A. Hansen, Kingsley, Iowa. Sanitary laying, setting, and hatching nest and brooding coop. 1,533,792; Apr. 14.

Fahrenwald, Frank A., Cleveland Heights, Ohio. Electric heating device. 1,533,175; Apr. 14.

Failla, Gioacchino, New York, N. Y. Stopcock. 1,533,793; Apr. 14.

Failla, Gioacchino, New York, N. Y. Process and apparatus for collecting radium emanation. 1,533,794; Apr. 14.

Falwell, Wray, assignor to E. W. Baker, Fitchburg, Mass. Air-regulating attachment for carburetors. 1,533,980; Apr. 14.

Fants, Fred C., and H. G. Hill, Port Arthur, Tex., assignors to The Texas Company, New York, N. Y. Relief valve. 1,533,640; Apr. 14.

Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Interlock device. 1,533,310; Apr. 14.

Fassbender, Heinrich, Charlottenburg, and E. Habann, assignors to Deutsche Telephonwerke, G. m. b. H., Berlin, Germany. Telephone and telegraph system with amplifiers. 1,533,842; Apr. 14.

Feiner, Israel, Brooklyn, N. Y. Automobile bumper. 1,534,010; Apr. 14.

Fekete, Stephen I., and S. G. Baits, assignors to Hudson Motor Car Company, Detroit, Mich. Transmission for automobiles. 1,533,641; Apr. 14.

Fell, Roy C., et al. (See Jungferman, Joseph, assignor.)

Ferguson, Ora A., Tulsa, Okla. Burner for gas stoves. 1,533,909; Apr. 14.

Ferlin, John J. (See Zanon, Remo C., assignor.)

Ferns Emulsifiers Ltd., The. (See Ferns, Ethel M., assignor.)

Ferns, Ethel M., assignor to The Ferns Emulsifiers Ltd., London, England. Adjustable centrifugal machine for emulsifying. 1,533,843; Apr. 14.

Feustman, Leon P., Harrison, assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Internal-combustion engine. 1,533,642; Apr. 14.

Fickert, Gustav R., Hoboken, N. J. Belt-length calculator. 1,533,981; Apr. 14.

Finn, Jos. I. (See Steele, Charles G., assignor.)

Firestone Tire and Rubber Company, The. (See Hough, William C., assignor.)

Firestone Tire and Rubber Company, The. (See Maranville, Harvey F., assignor.)

Firkins, Alonzo A., Rolfe, Iowa. Radiator protector. 1,533,982; Apr. 14.

Fisher, William G., Sunbury, Pa. Shuttle guard for looms. 1,533,400; Apr. 14.

Fitz Gibbon & Crisp, Inc. (See Herron, Joseph D., assignor.)

"Flaka" Flaschen-Kappen-Gesellschaft m. b. H. (See Dulits, Adolf, assignor.)

Flamm, John H., Baltimore, Md. Safety device. 1,533,983; Apr. 14.

Fletcher, Harvey, assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,533,311; Apr. 14.

Flintkote Company, The. (See Clapp, Albert L., assignor.)

Foans, Andrew B., New York, N. Y. Race game. 1,533,795; Apr. 14.

Fokker, Anthony H. G., Amsterdam, Netherlands. Location of benzine tanks in aeroplanes. 1,533,312; Apr. 14.

Foley, Joseph W., Los Angeles, Calif. Auto shade. 1,533,731; Apr. 14.

Folland, Henry P., and H. E. Preston, assignors to themselves and The Gloucestershire Aircraft Company, Limited, Cheltenham, England. Shock absorber suitable for use on aircraft. 1,533,844; Apr. 14.

Forbes, John S., Overbrook, Pa. Heater. 1,533,845; Apr. 14.

Forman, Paris R., Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y. Door-shoe construction. 1,533,106; Apr. 14.

Forsberg, Erik A., Stockholm, Sweden, assignor, by mesne assignments, to The De Laval Separator Company, New York, N. Y. Centrifugal separator bowl to facilitate the removal of slime therefrom. 1,533,313; Apr. 14.

Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric Products Company. Hot table. 1,533,240; Apr. 14.

Forshee, Frank F., Flint, Mich., assignor to Westinghouse Electric Products Company. Toaster heating unit. 1,533,241; Apr. 14.

Forsythe, Paul J., Eldorado, Kans. Signal. 1,533,846; Apr. 14.

Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Method and apparatus for preventing armature-coil heating. 1,533,242; Apr. 14.

Fowler, William E., jr., Mount Lebanon, assignor to Davis Brake Beam Company, Johnstown, Pa. Securing brake-beam support to trucks. 1,534,004; Apr. 14.

Fox, Daniel S., Ivoryton, Conn. Reamer. 1,533,314; Apr. 14.

Fox, William J., assignor to James R. Kendrick Co., Inc., Philadelphia, Pa. Fabric and producing same. 1,533,544; Apr. 14.

Franck, Maurice. (See Lutton, William J., assignor.)

Franklin Pottery. (See Schweiker, Roy W., assignor.)

Franklin Railway Supply Company. (See Osborne, L. E., and Lower, assignors.)

Franklin Simon & Co. (See Davis, Taube, assignor.)

Frantz, L., Oscar. (See Grant, Melville M., assignor.)

Freedenburg, Howard C., assignor to The Bartlett Hayward Company, Baltimore, Md. Charging apparatus. 1,533,847; Apr. 14.

Freeman, Lewis C. (See Schlatter, M., and Freeman.)

Fried. Krupp Aktiengesellschaft. (See Strauss, Benno, assignor.)

Fritz, Adolph H., assignor to Union Hardware Company, Torrington, Conn. Roller skate. 1,533,848; Apr. 14.

Frogge, Virgil M., Centralia, Mo. Animal trap. 1,533,589; Apr. 14.

Frood, Herbert, Sovereign Mills, Chapel-en-le-Frith, England. Laminated spring. 1,533,984; Apr. 14.

Frost, Rupert L., Cincinnati, assignor of one-half to E. P. Pinkston, Norwood, Ohio. Spray and wash rubber glove. 1,533,732; Apr. 14.

Fuhrmann, Henry W. A. (See Kane, J. I., and Fuhrmann.)

Galassi, Ernest, Brooklyn, N. Y. Bumper for motor vehicles. 1,533,985; Apr. 14.

Gale, Etta F., Toronto, Ontario, Canada. Locking device for hinges. 1,533,401; Apr. 14.

Galterio, Elia, Denver, Colo. Bandit trap. 1,533,243; Apr. 14.

Gardeia, Rudolph. (See Kaiser, W., and Gardeia.)

Gauger, Frank A., and E. W. Johnson, assignors to Milwaukee Gas Specialty Company, Milwaukee, Wis. Lighter 1,533,643; Apr. 14.

Gebhardt, George C., Milliston, Wis. Cranberry harvester. 1,533,644; Apr. 14.

Gehman, Harry, Philadelphia, Pa. Dustpan. 1,533,849; Apr. 14.

Geier, James, Troy, N. Y. Convertible level and transit. 1,533,545; Apr. 14.

Geissinger, Harry G., Detroit, Mich., assignor to Vapor Car Heating Company, Inc., Chicago, Ill. Car-heating system. 1,533,176; Apr. 14.

Gendron, Frank, Detroit, Mich. Multiple valve. 1,533,177; Apr. 14.

General Electric Company. (See Abbot, Charles G., assignor.)

General Electric Company. (See Britton, Ernest C., assignor.)

General Electric Company. (See Givens, Albert L., assignor.)

General Electric Company. (See Hall, Chester I., assignor.)

General Electric Company. (See Le Count, George E., assignor.)

General Electric Company. (See Loewenstein, L. C., and Davis, assignors.)

General Electric Company. (See Merrill, Wilbur L., assignor.)

General Electric Company. (See Warren, Henry E., assignor.)

General Railway Signal Company. (See Benedict, Frank, assignor.)
Genest, Homer A., Hartford, Conn., assignor, by mesne assignments, to United States Hat Machinery Corporation, Richmond, Va. Felt shrinking. 1,533,346; Apr. 14.
Genest, Homer A., Hartford, Conn., assignor, by mesne assignments, to United States Hat Machinery Corporation, Richmond, Va. Felt shrinking. 1,533,349; Apr. 14.
Genest, Homer A., Hartford, Conn., assignor to United States Hat Machinery Corporation, New York, N. Y. Machine for shrinking felt articles. 1,533,350; Apr. 14.
Genest, Homer A., Hartford, Conn., assignor to United States Hat Machinery Corporation, New York, N. Y. Shrinking, etc., felt articles. 1,533,351; Apr. 14.
Gentry, Jefferson F., assignor of one-sixth to N. Massa and one-sixth to A. M. Johnson, Cookeville, Tenn. Perforating attachment for printing presses. 1,533,986; Apr. 14.
Genuit, Edward H., Napoleon, Ohio. Stock feeder. 1,533,796; Apr. 14.
Gerla, Bernard, New York, N. Y. Concealed clasp. 1,533,702; Apr. 14.
Germond, Henry S., jr., Bayonne, N. J. Portable elevator. 1,533,987; Apr. 14.
Gesellschap, Charles, jr., assignor to Grassler & Gesellschap, Milwaukee, Wis. Lighting fixture. Des. 67,022; Apr. 14.
Gibson, Edgar, Bigtimber, Mont. Railway-crossing guard. 1,533,850; Apr. 14.
Gilbert, John J., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Artificial electric line. 1,533,178; Apr. 14.
Gilbert, John J., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Submarine signaling system. 1,533,645; Apr. 14.
Gillet, Alexis F., assignor to Jubilee Manufacturing Company, Omaha, Nebr. Trick match box. 1,533,402; Apr. 14.
Gillett, Charles E., assignor to Norton Company, Worcester, Mass. Grading machine. 1,534,014; Apr. 14.
Gillum, Clara P., Los Angeles, Calif. Wash cloth. 1,533,733; Apr. 14.
Ginter, Paul A., Toledo, Ohio. Bottle. Des. 67,023; Apr. 14.
Ginter, Paul A., Toledo, Ohio. Bottle. Des. 67,024; Apr. 14.
Ginter, Paul A., Toledo, Ohio. Bottle. Des. 67,025; Apr. 14.
Ginter, Paul A., Toledo, Ohio. Bottle. Des. 67,026; Apr. 14.
Giometti, Carl J., Corning, N. Y. Signal lamp. Des. 67,027; Apr. 14.
Given, Guy C. (See Shipley, S. D., and Given.)
Givens, Albert L., Fort Wayne, Ind., assignor to General Electric Company. Refrigerator. 1,533,646; Apr. 14.
Gladacres Incorporated. (See Thompson, James A., assignor.)
Glentworth, Clarence A. (See Bater, H. M., and Glentworth.)
Globe Register Co., The. (See Konerman, H. H., and Leimberger, assignors.)
Globe Register Company, The. (See Konerman, Harry H., assignor.)
Gloucestershire Aircraft Company. (See Folland, H. P., and Preston, assignors.)
Glover, James S., Elbridge, Tenn. Boll-weevil destroyer. 1,533,851; Apr. 14.
Godefroid, Armand, Berlin, Germany. Coin-assorting apparatus. 1,533,244; Apr. 14.
Godwin, Arthur M., assignor to Wolverine Bumper & Specialty Company, Grand Rapids, Mich. Bumper for vehicles. 1,533,988; Apr. 14.
Goelitz, Henry G., et al. (See Purnell, Lemuel H., assignor.)
Goff, Harold W., assignor to Western Electric Company, Incorporated, New York, N. Y. Wire switch. 1,533,179; Apr. 14.
Goldberg, Benjamin, New York, N. Y. Hat support. 1,533,403; Apr. 14.
Goldberg, Solomon H., Chicago, Ill. Machine for counting, arranging, and packaging hairpins or like articles. 1,533,180; Apr. 14.
Good, John, Garden City, assignor to Good Inventions Co., New York, N. Y. Burner carburetor combination. 1,533,107; Apr. 14.
Good Inventions Co. (See Good, John.)
Goodrich, B. F., Company, The. (See Robb, Arthur A., assignor.)
Goodrum, Charles L., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,533,181; Apr. 14.
Goodrum, Charles L., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,533,182; Apr. 14.
Goodrum, Charles L. (See Clausen, H. P., and Goodrum.)
Goodyear Tire & Rubber Company, The. (See Kilborn, Karl B., assignor.)
Götze, Otto, Messingwerk, near Eberswalde, assignor to Hirsch, Kupfer- und Messingwerke Aktien Gesellschaft, Berlin, Germany. Chill mold. 1,533,734; Apr. 14.
Gougler, Clyde J., Tulsa, Okla. Tubular-drilling-derrick assembly. 1,533,590; Apr. 14.
Graham, Kemp S., assignor to The Orinoka Mills, Philadelphia, Pa. Jacquard-card-punching machine. 1,533,852; Apr. 14.
Grant, Florence L., Chicago, Ill., assignor, by mesne assignments, to The Miller Company, Meriden, Conn. Lighting globe. Des. 67,028; Apr. 14.
Grant, Melville M., assignor of one-half to L. O. Frantz, Alliance, Ohio. Grapple. 1,533,853; Apr. 14.
Grassler & Gesellschap. (See Gesellschap, Charles, jr., assignor.)
Gray, Eugene D., Harrison, Me. Game apparatus. 1,533,854; Apr. 14.
Green, David H., San Francisco, Calif. Emergency control valve. 1,533,404; Apr. 14.
Greenabaum, Alexander L., Chicago, Ill., assignor to O. E. Jordan Company, East Chicago, Ind. Railway construction and maintenance cars. 1,533,183; Apr. 14.
Greenawalt, John E., New York, N. Y. Sintering apparatus. 1,533,108; Apr. 14.
Greenawalt, John E., New York, N. Y. Sintering apparatus. 1,533,109; Apr. 14.
Greene, Frederick E., assignor to The English & Mersick Co., New Haven, Conn. Regulator handle. Des. 67,029; Apr. 14.
Greenwood, Percy R., et al. (See Redrup, Charles B., assignor.)
Greiff, Victor, New York, N. Y., and L. F. Curtis, assignors to American Bosch Magneto Corporation, Springfield, Mass. Induction coil. 1,533,797; Apr. 14.
Grenouillon, Constance. (See Nicot, G., and Grenouillon.)
Griffin, John P., Waddington, N. Y. Kitchen utensil. 1,533,405; Apr. 14.
Grotta, Bennett, Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Device for insuring uniform pressure upon explosive charges. 1,533,406; Apr. 14.
Grotta, Bennett, Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Secondary charge for compound detonators. 1,533,798; Apr. 14.
Güntherberg, Hans, et al. (See Scheib, Georg., assignor.)
Gurney, Frederick W., assignor, by mesne assignments, to Marlin-Rockwell Corporation, Jamestown, N. Y. Bearing. 1,533,184; Apr. 14.
Gurney, Frederick W., assignor, by mesne assignments, to Marlin-Rockwell Corporation, Jamestown, N. Y. Ball-bearing separator. 1,533,185; Apr. 14.
Haas Letter Service Company, The. (See Poeppelmeier, Frank H., assignor.)
Haase, Leo G., Pasadena, Calif. Bench. Des. 67,030; Apr. 14.
Habann, Erich. (See Fassbender, H., and Habann.)
Haehn, William J., Jamestown, N. Y. Telephone cabinet. 1,533,989; Apr. 14.
Hall, Chester L., Fort Wayne, Ind., assignor to General Electric Company. Electric drive for phonographs. 1,533,647; Apr. 14.
Hall, Clarence B., Winthrop, assignor to Hall Projector Company, Inc., Boston, Mass. Motion-picture projector. 1,533,546; Apr. 14.
Hall, Harry A., assignor to Hoosier Manufacturing Company, Newcastle, Ind. Metal-table-top-stretching method and means. 1,533,591; Apr. 14.
Hall, Harvey H., Elyria, Ohio. Brooder. 1,533,186; Apr. 14.
Hall, Holmes. (See Kelly, J. G., Pringle, and Hall.)
Hall Projector Company. (See Hall, Clarence B., assignor.)
Hall, Ralph E. (See Sperr, F. W., jr., and Hall.)
Hall, Robert F., Schenectady, N. Y. Trucks for railway rolling stock. 1,533,245; Apr. 14.
Hands, Howard A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Commutator soldering iron. 1,533,246; Apr. 14.
Hands, Howard A., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric heating system. 1,533,247; Apr. 14.
Hanes, Frank D., Mullen, Nebr. Reserve oil supply for vehicle engines. 1,533,592; Apr. 14.
Hanks, George R., High Bridge, N. J., and G. V. Wood, Oakland, Calif., assignors to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Dredge bucket and lip therefor. 1,533,910; Apr. 14.
Hansen, John A. (See Ewoldt, T., and Hansen.)
Hanson, Louis H., assignor of one-half to T. E. Reasonover, Austin, Tex. Adjustable automatic valve regulator. 1,533,407; Apr. 14.
Hapgood, Cyrus H., Nutley, N. J., assignor to The De Laval Separator Company, New York, N. Y. Milking machine. 1,533,187; Apr. 14.
Hargan, Augustus D., Bayonne, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic switching device. 1,533,188; Apr. 14.
Harkin, Harry E., assignor of one-half to F. G. Krone, Ridgefield Park, N. J. Fuel heater for internal-combustion engines. 1,533,855; Apr. 14.
Harlan, Van Don, Humphrey, Ark. Cotton-cleaning machine. 1,533,593; Apr. 14.
Harrison, Andrew J. (See Newbold, H., and Harrison.)
Harrison, William H., Philadelphia, Pa. Traveling trunk. 1,533,856; Apr. 14.

Hart, Charles E., Kansas City, Mo. Auto serving set. 1,533,857; Apr. 14.
Hart, Harry S., Chicago, Ill. Selective dump car. 1,533,408; Apr. 14.
Hartline, William A., Midland, Mich. Pocket coin. Des. 67,032; Apr. 14.
Hartmann, Povl, Brooklyn, N. Y., assignor, by mesne assignments, to Economy Fuse & Manufacturing Company, Chicago, Ill. Inclosed safety switch. 1,533,315; Apr. 14.
Hartshorn, Willis N., assignor to Racine Confectioners' Machinery Co., Racine, Wis. Material working and mixing machine. 1,533,409; Apr. 14.
Harvey, William G., assignor to American Magnesium Corporation, Niagara Falls, N. Y. Electrolytic production of magnesium. 1,533,911; Apr. 14.
Harwix, Ewald, Berlin-Steglitz, Germany. Prismatic telescope. 1,533,248; Apr. 14.
Haskell, Samuel, Brooklyn, assignor to S. Robert, New York, N. Y. Doll or similar article. Des. 67,031; Apr. 14.
Hassler, Franz, Volksdorf, near Hamburg, Germany. Tanning agent. 1,533,594; Apr. 14.
Hathaway, Edgar F., Wellesley, Mass., assignor, by mesne assignments, to Barber-Colman Company, Rockford, Ill. Warp-leasing machine. 1,533,799; Apr. 14.
Hathaway, Hosea, Brookline, Mass. Slotting tool. 1,533,547; Apr. 14.
Haug, Anton J., Nashua, N. H. Pulp-screening machine. 1,533,410; Apr. 14.
Hawkinson, John A., Nashville, Tenn., assignor to Allied Packers, Incorporated, Chicago, Ill. Preparing smoked joint meats. 1,533,548; Apr. 14.
Hayes Wheel Company. (See Main, Frank L., assignor.)
Haseltine Corporation. (See Haseltine, Louis A., assignor.)
Haseltine, Louis A., Hoboken, assignor to Haseltine Corporation, Jersey City, N. J. Neutralizing capacity coupling in audions. 1,533,858; Apr. 14.
Haselton, Robert T., assignor to The Cincinnati Shaper Company, Cincinnati, Ohio. Gear casing for shapers. 1,533,548; Apr. 14.
Haselton, Robert T., assignor to The Cincinnati Shaper Company, Cincinnati, Ohio. Shaper. 1,533,549; Apr. 14.
Hasen, Paul T., et al. (See Jungferman, Joseph, assignor.)
Hedley, Frank, Yonkers, and J. S. Doyle, Mount Vernon, N. Y. Mechanically-operated multiple-unit door-control system for cars. 1,533,110; Apr. 14.
Hedley, Frank, Yonkers, and J. S. Doyle, Mount Vernon, N. Y. Combined multiple-unit car-door-control signaling and announcing system. 1,533,111; Apr. 14.
Hedley, Frank, Yonkers, and J. S. Doyle, Mount Vernon, N. Y. Control mechanism for motor-actuated doors. 1,533,112; Apr. 14.
Hellman, Howard E., and H. Scarth, Detroit, Mich. Form spacer. 1,533,411; Apr. 14.
Heintz, Ernest E. (See Archer, T. P., and Heintz.)
Heisey, Horace C. (See Campbell, M. D., and Heisey.)
Heiss, Friedrich, Munich, Germany. Device to lessen the velocity of fall of samples thrown out of flying machines. 1,533,912; Apr. 14.
Hennebohle, Frank, Chicago, Ill. Apparatus for controlling steam pressure in boilers. 1,533,800; Apr. 14.
Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Double-pendulum scale. 1,533,113; Apr. 14.
Herbst, Alma. (See Sanford, Charles F., assignor.)
Herman, Eugene H. (See Herman, John O. and E. H.)
Herman, John O. and E. H., Dillsburg, Pa. Bag holders. 1,533,114; Apr. 14.
Hermani, Henry, assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Detachable closure for display containers. 1,533,497; Apr. 14.
Herron, George A., Ottawa, Ontario, Canada. Cord holder for sadirons. 1,533,412; Apr. 14.
Herron, Joseph D., assignor to Fitz Gibbon & Crisp, Inc., Trenton, N. J. Hoisting truck. 1,533,595; Apr. 14.
Hess, Lawrence S., Middletown, N. Y. Device for oiling molded loaves. 1,533,550; Apr. 14.
Heygel, Paul R., Moresmere, N. J., assignor to H. H. Straus, New York, N. Y. Cigarette container. 1,533,413; Apr. 14.
Heylandt, Paul, Sudende, near Berlin, Germany. Apparatus for producing low temperatures. 1,533,801; Apr. 14.
Heymann, Roy D., Hartford, Conn. Bobbin. 1,533,913; Apr. 14.
Hickey, John H., San Francisco, Calif. Fuse. 1,533,498; Apr. 14.
Hiering, William C., assignor to The J. E. Mergott Co., Newark, N. J. Bag fastener. 1,533,189; Apr. 14.
Hierl, Charles, Cleveland, Ohio. Buffer for cars. 1,533,414; Apr. 14.
Hill, Howard G. (See Fants, F. C., and Hill.)
Hines, William, Washington, D. C. Spacing element for rotary indices. 1,533,735; Apr. 14.
Hinkel, Hobart M., assignor of one-fourth to C. Dinges, Springfield, Ohio. Washing machine. 1,533,596; Apr. 14.
Hirsch, Kupfer- und Messingwerke Aktien Gesellschaft. (See Götze, Otto, assignor.)
Hislop, Robert S., assignor to Racine Confectioners' Machinery Company, Racine, Wis. Depositor for plastic materials. 1,533,597; Apr. 14.
Hodge, William B., Charlotte, N. C., assignor to Parks-Cramer Company, Fitchburg, Mass. Air-conditioning system. 1,533,859; Apr. 14.
Hoffman, Jacob S., New York, N. Y. Treating fabrics and the product thereof. 1,533,598; Apr. 14.
Hoffmaster, Harry W. (See Howard, F. H., and Hoffmaster.)
Hoge, Smith A., Rices Landing, Pa. Sanitary receptacle. 1,533,860; Apr. 14.
Hohl, John, Newark, N. J. Electric socket. 1,533,415; Apr. 14.
Homan, Frank L., Omaha, Nebr. Water gauge. 1,533,551; Apr. 14.
Holbrook, David M., Portland, Oreg. Incubator tray. 1,533,499; Apr. 14.
Holchin, John M., Cleveland, Ohio. Hair-drying brush. 1,533,416; Apr. 14.
Holland, Frank J., Richmond, Ind. Game indoor golf. 1,533,417; Apr. 14.
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,533,316; Apr. 14.
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,533,317; Apr. 14.
Hoosier Manufacturing Company. (See Hall, Harry A., assignor.)
Hoover Company, The. (See Parker, Leslie M., assignor.)
Hopkins, Charles E., deceased; The Plainfield Trust Company, Plainfield, N. J., administrator. Casting apparatus and process of casting. 1,533,649; Apr. 14.
Hornbuckle, James D., sr., San Jose, Calif. Propeller. 1,533,552; Apr. 14.
Hornbuckle, James D., sr., San Jose, Calif. Aeroplane. 1,533,553; Apr. 14.
Hough, William C., Cuyahoga Falls, assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Tire-opening machine. 1,533,990; Apr. 14.
Houghton, Harold W. (See Pelton, C. B., and Houghton.)
Hovda, Olaf, Evansville, Ind. Device for demonstrating angular momentum. 1,533,500; Apr. 14.
Howard, Frank H., and H. W. Hoffmaster, assignors to Reading Chain and Block Corporation, Reading, Pa. Brake attachment for hoists. 1,533,554; Apr. 14.
Howard, Frank H., assignor to Reading Chain and Block Corporation, Reading, Pa. Hoist-cable-securing device. 1,533,555; Apr. 14.
Howard, Frank H., assignor to Reading Chain and Block Corporation, Reading, Pa. Hoist-cable-securing device. 1,533,556; Apr. 14.
Howe, Chester C., assignor, by mesne assignments, to The Brush Washing Machine Company, New Kensington, Pa. Wringer. 1,533,861; Apr. 14.
Howe, E. D., et al. (See Dibble, C. W., and Phillips, assignors.)
Hudson Motor Car Company. (See Fekete, S. I., and Baits, assignors.)
Hug, Christian J., assignor to The Hug Company, Highland, Ill. Vehicle spring. 1,533,418; Apr. 14.
Hug, Christian J., assignor to The Hug Company, Highland, Ill. Compartment dumping vehicle. 1,533,419; Apr. 14.
Hug Company, The. (See Hug, Christian J., assignor.)
Hughes, Burton S., assignor to Zaremba Company, Buffalo N. Y. Separator. 1,533,501; Apr. 14.
Hulbert, Edwin F., assignor to Pfister & Vogel Leather Company, Milwaukee, Wis. Leather press. 1,533,115; Apr. 14.
Humason Manufacturing Company, The. (See Olson, Emil A., assignor.)
Hummel, Howard H., assignor to Bethlehem Steel Company, Bethlehem, Pa. Annealing box. 1,533,249; Apr. 14.
Hummert, Robert H., assignor to The S. H. Thomson Manufacturing Company, Dayton, Ohio. Radiator cap. Des. 67,033; Apr. 14.
Humphrey, Charles F., and G. M. Jeffrey, Pasadena, Calif. Clutch lock for motor vehicles. 1,533,736; Apr. 14.
Hurd, Benjamin W., assignor to Turbine Fuel Oil Burner Co., San Francisco, Calif. Oil burner. 1,533,420; Apr. 14.
Husk, Harry M., Newburyport, Mass. Slipper. Des. 67,034; Apr. 14.
Hutchcroft, Orin L., Mediapolis, Iowa. Motor-vehicle chain tightener. 1,533,421; Apr. 14.
Hutchins, Clarence D., Windsor, England. Amusement device. 1,533,914; Apr. 14.
Hutchins, Cyrus W., Kearney, Nebr. Monument. 1,533,250; Apr. 14.
Hygrade Mechanical Toy Manufacturing Co. (See Selenkow, Jacob K., assignor.)
Hyle, Jacob A., Girard, Ill., assignor to United Railway Equipment Company, St. Louis, Mo. Steel grain car. 1,533,862; Apr. 14.
Hyman, Henry, & Co. (See Rubin, Abraham, assignor.)
Ihlenfeldt, Richard, et al. (See Scheib, George, assignor.)
Ihling, Paul J., Kalamazoo, Mich. Paste receptacle. 1,533,818; Apr. 14.
Iklé, Charles F., assignor to Iklé Frères & Co., Inc., New York, N. Y. Lace. Des. 67,035; Apr. 14.

Iklé Frères & Co. (See Iklé, Charles F., assignor.)
Ingersoll Milling Machine Company, The. (See Sproul, William C., assignor.)
Ingersoll Milling Machine Company, The. (See Johnson, John R., assignor.)
International Motor Company. (See Wirrer, Gottfried, assignor.)
International Nickel Company, The. (See Stanley, Robert C., assignor.)
International Silver Co. (See Beck, Ernest T., assignor.)
International Silver Company. (See Stark, Frederick W., assignor.)
Jackson, John E., Detroit, Mich. Motor attachment for player pianos. 1,533,915; Apr. 14.
Jacomy, Pierre, Toulouse, assignor to Société Anonyme la Chevrette, Toulouse, Haute-Garonne, France. Lever jack. 1,533,737; Apr. 14.
Jaso, Sebero, San Antonio, Tex. Belt buckle. 1,533,650; Apr. 14.
Jeffrey, Gerald M. (See Humphrey, C. F., and Jeffrey.)
Jenkins, Charles F., Washington, D. C. Web-picture-message transmission. 1,533,422; Apr. 14.
Jenks, James L., jr., Medford, Mass. Adjusting rotary spark gaps of wireless apparatus. 1,533,502; Apr. 14.
Jensen, Victor G., assignor to C. H. & D. Electric Company, Chicago, Ill. Electric iron and stand. 1,533,116; Apr. 14.
Jirasek, John, Detroit, Mich. Ear clip for eyeglasses. 1,533,190; Apr. 14.
Jobson, William P., Philadelphia, and H. S. Souder, assignors to Souderton Manufacturing Co., Souderton, Pa. Amalgamator. 1,533,557; Apr. 14.
Johnsen, Frederik A. (See Rahbek, K., and Johnsen.)
Johnson, Aaron, Corning, Mo. Stream-bed-digging device. 1,533,423; Apr. 14.
Johnson, Anton, Hunter, N. Dak., assignor to Dakota Cooler Corporation, Fairmount, Ind. Refrigerator. 1,533,863; Apr. 14.
Johnson, Arther M., et al. (See Gentry, Jefferson F., assignor.)
Johnson, Charles J., Bloomfield, N. J. Attachment for flexible-tube-making machines. 1,533,864; Apr. 14.
Johnson, Edward, North Pelham, assignor to Meinecke & Company, New York, N. Y. Adhesive plaster or tape roller. 1,533,802; Apr. 14.
Johnson, Ira K., West Caldwell, N. J. Bonding rail joint. 1,533,916; Apr. 14.
Johnson, John R., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Drum-type milling machine. 1,533,703; Apr. 14.
Johnson, John R., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Drum-type milling machine. 1,533,704; Apr. 14.
Johnson, John R., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Drum-type milling machine. 1,533,705; Apr. 14.
Johnson, Roy W. (See Gauger, F. A., and Johnson.)
Johnston, Howard H., Forest Hills Borough, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric switch. 1,533,251; Apr. 14.
Johnstone, William E., and W. A. McDougall, Kansas City, Mo.; said Johnstone assignor to said McDougall. Dirigible headlight. 1,533,424; Apr. 14.
Jones, Harry J., San Angelo, Tex. Universal joint. 1,533,425; Apr. 14.
Jones, William F., London, and A. M. Pennington, Bury, England. Apparatus for refrigerating and for manufacturing ice. 1,533,885; Apr. 14.
Jordan, O. E., Company. (See Greenabaum, Alexander L., assignor.)
Jordan, O. E., Company. (See Mann, Orville C., assignor.)
Jorgensen, Arthur J., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Crusher. 1,533,991; Apr. 14.
Joseph, Harry F., Davenport, assignor, by mesne assignments, to Micro Machine Company, Bettendorf, Iowa. Internal-grinding machine. Re16,043; Apr. 14.
Jubilee Manufacturing Company. (See Gillet, Alexis F., assignor.)
Jungferman, Joseph, Neola, assignor to P. T. Hasen, Avoca, and R. C. Fell, Perry, Iowa. Corn-planter attachment. 1,533,426; Apr. 14.
Kahn, Bertrand B., assignor to The Estate Stove Company, Hamilton, Ohio. Toaster. 1,533,117; Apr. 14.
Kaiser, Wilhelm, and R. Gardels, assignors to A. Bühr, Hamburg, Germany. Press for plastic materials. 1,533,191; Apr. 14.
Kaiser, William O., Burlington, Iowa. Bleaching process and means. 1,533,917; Apr. 14.
Kane, Joseph I., Los Angeles, and H. W. A. Fuhrmann, Alhambra, assignors, by mesne assignments, to E. J. Pineau, Los Angeles, Calif. Illuminated electric fountain. 1,533,738; Apr. 14.
Kanegafuchi Boseki Kabushiki Kwaisha. (See Naito, R., and Niwa, assignors.)
Karr, Laurence G., Long Beach, Calif. Tree holder. 1,533,739; Apr. 14.
Kartheiser, John, Aurora, Ill. Car-door-locking means. 1,533,427; Apr. 14.
Kast, Morgan D., Pendleton, Oreg. Weeder. 1,533,918; Apr. 14.
Keckler, Charles W., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,533,192; Apr. 14.
Keefer, Walter L., assignor to H. G. Wolf, Chambersburg, Pa. Hand-operated vacuum cleaner. 1,533,919; Apr. 14.
Keinath, Georg, Berlin-Charlottenburg, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Pyrometer. 1,533,740; Apr. 14.
Keithley, Frank N., Burlingame, Calif., assignor to Metal & Thermit Corporation, Chrome, N. J. Mold for welding rails and the like. 1,533,803; Apr. 14.
Kellum, Orlando E., Los Angeles, Calif. Automatic adjusting mechanism for synchronous apparatus. 1,533,319; Apr. 14.
Kelly, James G., A. L. Pringle, and H. Hall, Sedalia, Mo.; said Pringle assignor to said Kelly and Hall. Metal bearing. 1,533,118; Apr. 14.
Kelsay, Le Roy W., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone hand set. 1,533,193; Apr. 14.
Kendrick, James E., Co. (See Fox, William J., assignor.)
Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical distributing machine. 1,533,920; Apr. 14.
Kennedy, John A., Topeka, Kans. Floodgate. 1,533,921; Apr. 14.
Kenney Manufacturing Company. (See Kenney, William C., assignor.)
Kenney, William C., Cranston, R. I., assignor to Kenney Manufacturing Company. Curtain rod. Des. 67,036; Apr. 14.
Kent, Ellis C., Brooklyn, N. Y., assignor to Robert Sayre Kent, Inc. Rotary kiln. 1,533,866; Apr. 14.
Kent, Robert Sayre, Inc. (See Kent, Ellis C., assignor.)
Kenworthy, Charles A., East Orange, N. J., assignor to The Beck Duplicator Company. Spindle. 1,533,867; Apr. 14.
Kichline, Frank O., and H. W. Sloyer, Lebanon, Pa., assignors to Bethlehem Steel Company. Metallurgical process. 1,533,741; Apr. 14.
Kilberg, Samuel. (See Cohen, S., and Kilberg.)
Kilberry, George D., East Downington, Pa. Paper-machine-driving mechanism. 1,533,194; Apr. 14.
Kilborn, Karl B., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tire. Des. 67,037; Apr. 14.
Killinger, William E., Oklahoma City, Okla. Plant-shredding machine. 1,533,922; Apr. 14.
Kilpatrick, Charles H., Abingdon, Ill. Railway reflector signal. 1,533,742; Apr. 14.
Kimball, John A., Taylorville, Ill. Controlling device for headlights. 1,533,743; Apr. 14.
Kingman, Russell B., Orange, N. J. Scouring device. 1,533,868; Apr. 14.
Kinsley, Willis C., et al. (See Baker, Bert C., assignor.)
Kister, Harry, Philadelphia, Pa. Toy wagon. 1,533,651; Apr. 14.
Kittleson, Caroline T., Chicago, Ill. Child's hand bag. 1,533,428; Apr. 14.
Klingbeil, Gottlieb L. E., Omaha, Nebr., assignor to Central Trading Company, Dover, Del. Automobile spring spreader. 1,533,992; Apr. 14.
Klingbeil, Gottlieb L. E., Omaha, Nebr., assignor to Central Trading Company, Dover, Del. Spring spreader. 1,533,993; Apr. 14.
Klingbeil, Gottlieb L. E., Omaha, Nebr., assignor to Central Trading Company, Dover, Del. Spring spreader. 1,533,994; Apr. 14.
Klopp, Aaron T., Omaha, Nebr. License holder for motor vehicles. 1,533,869; Apr. 14.
Knapp, Albert S. (See Wright, G. F., and Knapp.)
Knoll, Raymond A., Carrick, Pa. Interlocking shingle. 1,533,923; Apr. 14.
Knudsen, Carl H., Brooklyn, N. Y., assignor to The Knudsen Motor Corporation, Wilmington, Del. Internal-combustion engine. 1,533,503; Apr. 14.
Knudsen Motor Corporation, The. (See Knudsen, Carl H., assignor.)
Koch, Hugo A., The Hague, assignor to Naamloose Vennootschap Ingenieursbureau "Securitas," Amsterdam, Netherlands. Coding and decoding machine. 1,533,252; Apr. 14.
Koch, Max, et al. (See Scheib, Georg, assignor.)
Koehn, John M., Buffalo, Nebr. Pipe jack. 1,533,429; Apr. 14.
Koehring Company. (See Webb, George E., assignor.)
Koehring Company. (See Robb, John F., assignor.)
Koltes, John I., Milwaukee, Wis. Sash attachment. 1,533,558; Apr. 14.
Konerman, Harry H., Newport, Ky., assignor to The Globe Register Company, Cincinnati, Ohio. Autographic register. 1,533,320; Apr. 14.
Konerman, Harry H., Newport, Ky., and R. C. Leimberger, assignors to The Globe Register Co., Cincinnati, Ohio. Attachment for manifolding typewriters. 1,533,430; Apr. 14.
Koppers Company, The. (See Sperr, F. W., jr., and Hall, assignors.)
Kotkowsky, Benjamin, Brooklyn, G. Luter, New York, and B. Dubl, Brooklyn, assignors to Chainless Knitting Machine Corp., New York, N. Y. Adjustable automatic knitting machine. 1,533,431; Apr. 14.
Kreadorn, Herman A., Seguin, Tex. Buckle strap. 1,539,924; Apr. 14.

Krone, Frederick G. (See Harkin, Harry E., assignor.)
Kuns, Joseph A., Hartford, Conn. Line clamp. 1,533,504; Apr. 14.
Kuster, Charles A., Elmhurst, assignor to Tonoh-Metal Producing Company, New York, N. Y. Bracket back for lighting fixtures. Des. 67,038; Apr. 14.
La Bombard, Leon E., and M. H. Sidebotham, assignor to Specialty Automatic Machine Company, Chelsea, Mass. Box partitioning and making the same. 1,534,003; Apr. 14.
Labombarde, Harold S., Nashua, N. H. Machine for making taped cartons. 1,534,007; Apr. 14.
La May, Frank B., assignor to La May-Smith-Walker, Inc., Rochester, N. Y. Can opener. 1,533,599; Apr. 14.
La May-Smith-Walker, Inc. (See La May, Frank B., assignor.)
Lambert, Henry L., assignor to Lambert Bros. Jewelers, Inc., New York, N. Y. Bracelet. Des. 67,039; Apr. 14.
Lambert Bros. Jewelers, Inc. (See Lambert, Henry L., assignor.)
Lane, John S., Rochester, Tex. Maize header. 1,533,925; Apr. 14.
Lang, Paul, Cleveland, Ohio, assignor to The American Steel and Wire Company of New Jersey. Hook. 1,533,995; Apr. 14.
Lange, Paul H. (See Brensinger, J., and Lange.)
Lanott, Ernest N., Sioux City, Iowa. Fence brace. 1,533,321; Apr. 14.
Lanston Monotype Machine Company. (See Pierpont, Frank H., assignor.)
Lanston Monotype Machine Company. (See Pierpont, F. H., and Tipton, assignors.)
Lanz, Firm Heinrich. (See Schroeder, Karl, assignor.)
Lapshansky, John, Nokomis, Ill. Cutter-bar jack. 1,533,559; Apr. 14.
Larson, Ludvig A., Summit, S. Dak. Internal-combustion engine. 1,533,926; Apr. 14.
Larsson, Carl G. E., Plainfield, N. J. Multiple-span bridge. 1,533,927; Apr. 14.
Lasker, William W., Brooklyn, assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York, N. Y. Cipher-cut-out mechanism. 1,533,119; Apr. 14.
Lasker, William W., Brooklyn, assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York N. Y. Means for locking and aligning type segments. 1,533,120; Apr. 14.
Lasker, William W., Brooklyn, assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York, N. Y. Nonprint mechanism of printing tabulators. 1,533,121; Apr. 14.
Leadizing Company. (See Shoemaker, Robert J., assignor.)
Lecopoulos, George, Chicopee Falls, Mass. Table article. 1,533,928; Apr. 14.
Le Count, George E., Pittsfield, Mass., assignor to General Electric Company. Prepayment electric fan. 1,533,652; Apr. 14.
Lederer, Charles, Chicago, Ill. Educational game. 1,533,122; Apr. 14.
Lederer, Sigmund L., Providence, R. I. Watch bracelet. Des. 67,040; Apr. 14.
Lee, Leif, Youngstown, Ohio, assignor to G. Mesta, Pittsburgh, Pa. Operating mechanism for pickling machines. 1,533,870; Apr. 14.
Lee, Leif, Youngstown, Ohio, assignor to G. Mesta, Pittsburgh, Pa. Operating mechanism for weight-supporting plungers. 1,533,871; Apr. 14.
Leimberger, Robert C. (See Konerman, H. H., and Leimberger.)
Lemmon, James H., Milltown, Ind., assignor to Louisville Cement Company, Louisville, Ky. Gas producer. 1,533,929; Apr. 14.
Lens, Charles. (See Crosse, E., Brown, and Lens.)
Levine, Joseph, Brooklyn, N. Y. Recording book bank. 1,533,600; Apr. 14.
Levison, William F., Cleveland, Ohio. Intake-manifold heater. 1,533,432; Apr. 14.
Lewis, Harry A., Norristown, Pa., assignor to Westinghouse Electric & Manufacturing Company. Slip regulator. 1,533,253; Apr. 14.
Lewis, Lloyd V., Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake-valve device. 1,533,322; Apr. 14.
Lewis, Oscar L., St. Louis, Mo. Tongue-cleaning device. 1,533,128; Apr. 14.
Liedel, Clarence, Maybee, Mich. Variable inductance. 1,533,930; Apr. 14.
Linaker, Frederick W., and T. M. Bruback, Dubois, Pa. Tube cleaner. 1,533,872; Apr. 14.
Linaker, Frederick W., and T. M. Bruback, Dubois, Pa. Apparatus and method of cleaning boiler tubes. 1,533,873; Apr. 14.
Linden, Svennum C., San Francisco, Calif. Multiple-exposure attachment for cameras. 1,533,433; Apr. 14.
Linder, Willis W., Salisbury, N. C. Hydraulic press for crank shafts and the like. 1,533,560; Apr. 14.
Lindner, Arthur, assignor of one-half to R. M. Brown, Newport News, Va. Record-producing device. 1,533,561; Apr. 14.
Lindsay, Joseph H., Wilmington, Del. Cutting stick. 1,533,124; Apr. 14.
Lindström, Carl, Aktiengesellschaft. (See Cordt, Hugo, assignor.)
Linstadt, Otto, Madison, Nebr. Float valve. 1,533,434; Apr. 14.
Little, George M., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric-furnace resistor. 1,533,254; Apr. 14.
Little, George M., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace. 1,533,255; Apr. 14.
Livermore, Henry W., East Orange, N. J., assignor to Electric Arc Cutting & Welding Company, New York, N. Y. Electric-arc welding and preheating handle. 1,533,874; Apr. 14.
Locke, George A. (See Rainey, P. M., and Locke.)
Loewenstein, Louis C., Lynn, and H. N. Davis, Cambridge, Mass., assignors to General Electric Company. Boiler. 1,533,706; Apr. 14.
Lokey, Milton A., Hatcher Station, Ga. Fertilizer mixer and distributor. 1,533,435; Apr. 14.
Long, Herbert C., San Francisco, Calif. Syrup can. Des. 67,041; Apr. 14.
Loofbourow, J. T., et al. (See Dibble, C. W., and Phillips, assignors.)
Lorens, William A., Hartford, Conn., assignor to United States Hat Machinery Corporation, Richmond, Va. Felt shrinking. 1,533,847; Apr. 14.
Lorraine, David G., Los Angeles, Calif. Oil and gas separator. 1,533,744; Apr. 14.
Lorraine, David G., Los Angeles, Calif. Valve. 1,533,745; Apr. 14.
Lott, Charles I., Norfolk, Va. Assembling roller bearings. 1,533,746; Apr. 14.
Lough, William D., Scott City, Kans. Adjustable well casing and sand screen. 1,533,747; Apr. 14.
Louisville Cement Company. (See Lemmon, James H., assignor.)
Lower, Nathan M. (See Osborne, L. E., and Lower.)
Lowry, Thomas K., Chicago, Ill. Dump wagon. 1,533,436; Apr. 14.
Lubowsky, Simon J., Jersey City, N. J. Producing metallic titanium or its alloys. 1,533,505; Apr. 14.
Lucas, Clarence W. (See Mueller, P., Schuermann, and Lucas.)
Lucas, Owen D. (See Martin, H. P., and Lucas.)
Ludlum Steel Company. (See Armstrong, Percy A. E., assignor.)
Lummis, Charles W., assignor to Morgan Construction Company, Worcester, Mass. Gas producer. 1,533,981; Apr. 14.
Lundins, Eric R., Richmond Hill, assignor to Western Electric Company, Incorporated, New York, N. Y. Testing system. 1,533,195; Apr. 14.
Lush, Ernest J., assignor to Technical Research Works Limited, London, England. Preparation and reactivation of metallic catalysts used in the hydrogenation of oils and like substances. 1,533,932; Apr. 14.
Lusher, Theodore A., Pittsburg, Kans. Gear wheel. 1,533,933; Apr. 14.
Luter, George. (See Kotkovsky, B., Luter, and Dubl.)
Lutton, William J., assignor of one-half to M. Franck, Paterson, N. J. Pattern mechanism for looms. 1,533,601; Apr. 14.
Lutz, Carl T., Dresden-Gruna, Germany. Implement for use in hand brickwork. 1,533,934; Apr. 14.
Lynch, Earnest E., Hilmar, and H. A. Mead, Turlock, Calif., assignors to Masterench Corporation. Wrench. 1,533,602; Apr. 14.
M. L. Experimental Limited. (See Martin, H. P., and Lucas, assignors.)
MacDonald, William A., Hartsdale, N. Y. Modulation. 1,533,653; Apr. 14.
MacFarland, Allis M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric iron. 1,533,258; Apr. 14.
Macinnes, Peter G. R., Glasgow, Scotland. Window catch. 1,533,879; Apr. 14.
Mack, John J., Salem, Mass. Wall tie. 1,533,324; Apr. 14.
Macy, Alfred J., Chicago, Ill., assignor to Macy Art Process Corporation. Educational device. 1,533,437; Apr. 14.
Macy Art Process Corporation. (See Macy, Alfred J., assignor.)
Magee, William H., and E. M. Bottome, Moundsville, W. Va. Combination serving dish. Des. 67,042; Apr. 14.
Maggi, Sabatino, Chicago, Ill. Re-forming golf balls. 1,533,563; Apr. 14.
Magnavox Company, The. (See Schoenfeld, Joseph, assignor.)
Main, Frank L., Birmingham, assignor to Hayes Wheel Company, Jackson, Mich. Vehicle wheel. 1,533,438; Apr. 14.
Mair, Alexander. (See Tomkins, E. S., and Mair.)
Maitland, Harold T., Sharon Hill, assignor to Sun Oil Company, Philadelphia, Pa. Refining mineral oil. 1,533,325; Apr. 14.
Malarkey, Huntington, Chicago, Ill. Door construction. 1,533,881; Apr. 14.
Malatesta, Louis. (See Crescio, Louis C., assignor.)
Malicki, Joseph, assignor to W. B. Templeton, Chicago, Ill. Closure fastener. 1,533,259; Apr. 14.

Malm, Frank S., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Manufacture of sponge-rubber articles. 1,533,197; Apr. 14.
Malwitz, Max H., Eau Claire, Wis. Card holder. 1,533,880; Apr. 14.
Mani, Charles Z., New York, N. Y. Clipper attachment. 1,533,564; Apr. 14.
Mann, Emma I., executrix. (See Mann, Orville C.)
Mann, Orville C., deceased, Oak Park, Ill.; Emma I. Mann, executrix, assignor to O. F. Jordan Company, East Chicago, Ind. Railway ditcher. 1,533,198; Apr. 14.
Mann, William A., Kankakee, Ill. Bow attachment for spectacles. 1,533,506; Apr. 14.
Maranville, Harvey F., assignor, by mesne assignments, to The Firestone Tire and Rubber Company, Akron, Ohio. Mandrel. 1,533,604; Apr. 14.
Marlin-Rockwell Corporation. (See Gurney, Frederick W., assignor.)
Marsh, Edward S., assignor to Taylor Instrument Companies, Rochester, N. Y. Time-controlled regulating device. 1,533,200; Apr. 14.
Marsh, Lucien A., Mill Valley, Calif. Game board. 1,533,439; Apr. 14.
Marshall, Eugene A., Richmond, and W. J. Burke, San Rafael, Calif. Removing varnish and paint. 1,533,826; Apr. 14.
Martin, Charles B., Canton, Ohio. Rubber-tube-cutting machine. 1,533,126; Apr. 14.
Martin, Helmuth P., and O. D. Lucas, Westminster, London, assignors to M. L. Experimental Limited, Westminster, England. Ammunition. 1,533,199; Apr. 14.
Martin-Harvey, Thomas, Bickley, England. Surface wiring for electricity-distributing systems. 1,533,936; Apr. 14.
Marty, Benjamin F., Friant, assignor of two-thirds to E. Donaghy, O'Neals, Calif. Pump. 1,533,440; Apr. 14.
Masbruch, Henry, Platteville, Wis. Attachments for lawn mowers. 1,533,127; Apr. 14.
Mason, Norman, et al. (See Gentry, Jefferson F., assignor.)
Masterench Corporation. (See Lynch, E. E., and Mead, assignors.)
Max Ams Machine Company, The. (See Brenzinger, J., and Lange, assignors.)
May, Carl. (See Cole, L. C., Pabst, and May.)
May, Nicolaus J., San Francisco, Calif. Puzzle. 1,533,507; Apr. 14.
Maynard, Laurier A., Detroit, Mich. Motor-operated razor. 1,533,654; Apr. 14.
McAuliffe, John C. (See Stearn, F. A., and McAuliffe.)
McCaul, Philip, Tacoma, Wash. Adjustable shelf for ovens. 1,533,256; Apr. 14.
McCauley, Ernest G., Dayton, Ohio. Synchronized control for reversible propellers and variable-incidence stabilizers. 1,533,323; Apr. 14.
McCleary, Clyde, Webb City, Okla. Casing-head latch. 1,533,875; Apr. 14.
McClevey, Norman H., Petersburg, Ind. Coal-bucket plow. 1,533,603; Apr. 14.
McCloy, Howard L. (See Davis, C. A., and McCloy.)
McColl, Henry P., Melbourne, Victoria, Australia. Electric-switch-actuating mechanism. 1,533,562; Apr. 14.
McCormick, Cyrus T., Fredericktown, Mo. Power-transmitting device. 1,533,877; Apr. 14.
McCoy, John O., Atlanta, Ga. Cotton stamper. 1,533,804; Apr. 14.
McCray, Harold E., assignor to Waterloo Gasoline Engine Company, Waterloo, Iowa. Carbureting device. 1,533,196; Apr. 14.
McDougall, William A. (See Johnstone, W. R., and McDougall.)
McErlane, David, Glasgow, Scotland. Pump for inflating pneumatic tires and the like. 1,533,876; Apr. 14.
McGee, Isham E., Starr, S. C. Agricultural implement. 1,533,878; Apr. 14.
McIsaac, Archy A., Inverness, Nova Scotia, Canada. Nonskid wheel. 1,533,935; Apr. 14.
McKinney, Robert L., Pittsburgh, Pa. Door latch. 1,533,257; Apr. 14.
McKinnie, Earl C. (See Pridmore, J. E. O., and McKinnie.)
McNeil, Daniel W., assignor to The John Douglas Company, Cincinnati, Ohio. Tank lever. 1,533,748; Apr. 14.
McNicholas, Henry J., Youngstown, Ohio. Ice-cream-filling machine. 1,533,125; Apr. 14.
Mead, Homer A. (See Lynch, E. E., and Mead.)
Meeks, J. G., et al. (See Dibble, C. W., and Phillips, assignors.)
Meinecke & Company. (See Johnson, Edward, assignor.)
Meirowsky, Oskar, Palisade, N. J. Inductance. 1,533,749; Apr. 14.
Melling, Alice M. (See Melling, George, assignor.)
Melling, George, assignor of one-half to A. M. Melling, Lansing, Mich. Finger-ring guard. 1,533,441; Apr. 14.
Mellogio Company. (See Murnan, Charles E., assignor.)
Mendler, Charles, San Francisco, Calif. Securing device. 1,533,565; Apr. 14.
Mergenthaler Linotype Company. (See Kennedy, David S., assignor.)
Mergott, J. E., Co., The. (See Hiering, William C., assignor.)
Merrill, Wilbur L., Schenectady, N. Y., assignor to General Electric Company. Segregated drive for paper machines and the like. 1,533,655; Apr. 14.
Mesta, George. (See Lee, Leif, assignor.)
Metal and Thermit Corporation. (See Deppeler, John H., assignor.)
Metal & Thermit Corporation. (See Keithley, Frank N., assignor.)
Metallurgica Bresciana Gia Tempini. (See Panigatti, Umberto, assignor.)
Metro Electrical Co. (See Moore, Edward, assignor.)
Meyer, Arthur R., and E. A. Reed, assignors, by mesne assignments, to Wilson-Jones Loose Leaf Company, Chicago, Ill. Mechanism for shifting binder posts. 1,533,442; Apr. 14.
Meyers, George W., Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y. Magnet valve. 1,533,128; Apr. 14.
Mickey, Simon P., Gering, Nebr. Machine for tendering beefsteak. 1,533,882; Apr. 14.
Micro Machine Company. (See Joseph, Harry F., assignor.)
Miller, Andrew, Newport News, Va. Pipe-bending machine. 1,533,443; Apr. 14.
Miller Company, The. (See Grant, Florence L., assignor.)
Miller, Edwin L., Kansas City, Mo. Oil burner. 1,533,129; Apr. 14.
Miller, George L., Shickshinny, Pa. Valve plunger. 1,533,883; Apr. 14.
Miller, John S., jr., Rahway, N. J. Protector for automobiles. 1,533,508; Apr. 14.
Miller, Thomas S., South Orange, N. J. Two-speed hoisting mechanism. 1,533,201; Apr. 14.
Miller, Wyman A. (See Ulrich, C. J., and Miller.)
Millispaugh, William H., assignor to The Paper and Textile Machinery Co., Sandusky, Ohio. Paper-machine drier. 1,533,130; Apr. 14.
Millispaugh, William H., assignor to Sandusky Foundry & Machine Co., Sandusky, Ohio. Centrifugal casting machine. 1,533,202; Apr. 14.
Milwaukee Gas Specialty Company. (See Gauger, F. A., and Johnson, assignors.)
Minton, Charles M., Philomath, Oreg. Flush tank. 1,533,884; Apr. 14.
Mitchell, Frank, et al. (See Redrup, Charles B., assignor.)
Mitchell, Harrison J., assignor to W. H. Payne, Seattle, Wash. Instrument for marking molding cutters or bits. 1,533,750; Apr. 14.
Mitsu Bishi Zosen Kabushiki Kaisha. (See Motora, Shintaro, assignor.)
Mogor, Sándor, West Detroit, Mich. Reflecting device for automobiles. 1,533,937; Apr. 14.
Mohr, Oscar H., assignor of one-half to F. W. Dakin, Berkeley, Calif. Floor slab for plumbing fixtures. 1,533,444; Apr. 14.
Möller, Hugo A. O., assignor to M. M. Saunders, Boston, Mass. Cutter for cheese, butter, and the like. 1,533,445; Apr. 14.
Monighan, Joseph A. (See Derman, G. W., and Monighan.)
Montgomery, Gustavus A., Titusville, Pa. Lifting device for temper screws. 1,533,751; Apr. 14.
Moore, Edward, Nutley, assignor to Metro Electrical Co. Inc., Newark, N. J. Receiving set for wireless messages. Des. 67,043. Apr. 14.
Moore, Lindley W., San Francisco, Calif. Dustpan. 1,533,938; Apr. 14.
Moore, M. H. (See Whipp, John W., assignor.)
Morgan Construction Company. (See Lummis, Charles W., assignor.)
Morgan, John S., London, England. Removing a liquid from the surface of molten metal. 1,533,885; Apr. 14.
Morin, Louis H. (See Sosa, J., and Morin).
Morrell, Glenn A., assignor to A. P. Robinson, Seattle, Wash. Fireplace damper. 1,533,752; Apr. 14.
Morrissey, John F., Antigo, Wis. Automatic self-locking differential gearing. 1,533,327; Apr. 14.
Morse, Albert W., Long Island City, N. Y. Liquid and gas mixer. 1,533,509; Apr. 14.
Motor Products Corporation, (1923). (See Pritchard, William S., assignor.)
Motora, Shintaro, Nagasaki, assignor to Mitsu Bishi Zosen Kabushiki Kaisha, Tokyo, Japan. Steadying device of the rolling of ships. 1,533,328; Apr. 14.
Mueller, Adolph, trustee. (See Mueller, P., Schuermann, and Lucas, assignors.)
Mueller, Philip, A. C. Schuermann, and C. W. Lucas, assignors to A. Mueller, trustee, Decatur, Ill. Water trap and trap connection. 1,533,886; Apr. 14.
Mugler, Casper M., Clay Center, Kans. Mail-box support. 1,533,887; Apr. 14.
Mullen, George W., Flushing, assignor to John C. Wiarda & Co., Inc., New York, N. Y. Making electrotypes. 1,533,656; Apr. 14.
Muller, Paul F. W., Hoboken, N. J. Combined flower and vanity bag. 1,533,131; Apr. 14.
Munch, Earl L., Johnson City, N. Y. Medicine dropper. 1,533,763; Apr. 14.

Murnan, Charles E., Brookline, assignor to Mellogio Company, Boston, Mass. Vanity case. 1,533,329; Apr. 14.
Murphy, Gilbert, Philadelphia, Pa., and W. A. Simond, assignors to Acme Knitting Machine & Needle Company, Franklin, N. H. Needle-latch-opening device for knitting machines. 1,533,446; Apr. 14.
Murphy, Paul B., Nyack, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,533,203; Apr. 14.
Muse, William E., Sawtelle, Calif. Unbreakable comb. 1,533,330; Apr. 14.
Myers, John S., Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Governing apparatus. 1,533,888; Apr. 14.
Naamlooze Vennootschap Ingenieursbureau "Securitas." (See Koch, Hugo A., assignor.)
Nace, William J., Los Angeles, Calif. Heat-distributing and oxidizing utensil. 1,533,510; Apr. 14.
Naito, Eyoichi, and H. Niwa, Kobe, assignors to Kanegafuchi Boseki Kabushiki Kwaisha, Tokyo-fu, Japan. Automatic filament supplier. 1,533,260; Apr. 14.
Nantes, Sofronio A., Chicago, Ill. Automobile tire. 1,533,566; Apr. 14.
Nathanson, Philip, and J. Sontag, Allentown, Pa. Shuttle guard for looms. 1,533,707; Apr. 14.
National Assorting Company. (See Cox, George W., jr., assignor.)
National Pigments & Chemical Company. (See Washburn, Willis F., assignor.)
National Pneumatic Company. (See Forman, Paris R., assignor.)
National Pneumatic Company. (See Meyers, George W., assignor.))
National Pneumatic Company. (See Rowntree, Harold, assignor.)
National Seal Company. (See O'Reilly, Peter S., assignor.)
National Steel Barrel Company, The. (See Schriner, Charles F., assignor.)
Nederlandsche Technische Handel Maatschappij "Giro." (See Otto, Wolfgang, assignor.)
Neidhart, William J., South Bend, Ind. Garden tool. 1,533,132; Apr. 14.
Nelson, Henry L., Cannon Falls, Minn. Corn-husking machine. 1,533,657; Apr. 14.
Nemets, Louis A., Omaha, Nebr. Grain-drying device. 1,533,511; Apr. 14.
Ner-A-Car Corporation. (See Neracher, Carl A., assignor.)
Neracher, Carl A., Syracuse, N. Y., assignor, by mesne assignments, to Ner-A-Car Corporation. Motor-cycle operating mechanism. 1,533,331; Apr. 14.
Newberg, Hugh W., Chester, Pa., assignor to Westinghouse Electric and Manufacturing Company. Governor-operated valve mechanism. 1,533,204; Apr. 14.
Newbold, Harry, St. Albans, and A. J. Harrison, Olton, England; said Newbold assignor to said Harrison. Eyeglasses and spectacles. 1,533,754; Apr. 14.
Newcomb, Frank H., Ashland, Mass. Whistling propeller toy. 1,533,889; Apr. 14.
Newhall, Henry B. (See Pichater, Henry W., assignor.)
Newhouse, Ray C., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Crusher. 1,533,658; Apr. 14.
New Jersey Research Company. (See Respess, William R., assignor.)
Newman, George W., assignor, by mesne assignments, to Wilson-Jones Loose Leaf Company, Chicago, Ill. Apparatus and process for electroplating metal and forming articles therefrom. 1,533,447; Apr. 14.
Newman, Ollie B., Camp Chase, Ohio. Box filler. 1,533,890; Apr. 14.
Newton, Earl W., Chicago, Ill. Plate or similar article. Des. 67,044; Apr. 14.
Nicholas Power Company. (See Vick, Frank H., assignor.)
Nickau, William V., Rahway, N. J. Valvefacing device. 1,533,133; Apr. 14.
Nicot, George, and C. Grenouillou, West Palm Beach, Fla. Sanitary fork. 1,533,939; Apr. 14.
Nicol, William C., assignor of one-half to A. G. Paschke, Everett, Wash. Trip hammer. 1,533,567; Apr. 14.
Niles-Bement-Pond Company. (See Blood, Harold L., assignor.)
Niles-Bement-Pond Company. (See Cole, L. C., Pabst, and May, assignors.)
Nilsson, Axel W., Port Washington, N. Y. Swimming device. 1,533,659; Apr. 14.
Niwa, Hidetaro. (See Naito, E., and Niwa.)
Noble, Donald, Bridgeport, Conn., assignor to The Singer Manufacturing Company. Clutch mechanism. 1,533,205; Apr. 14.
Noble, Moore, Los Angeles, Calif. Automobile top. 1,533,448; Apr. 14.
Nolan, James A., Bowerston, Ohio. Feeder and scales. 1,533,940; Apr. 14.
Nordine, Axel O., assignor to Puget Electric Welding Inc., Seattle, Wash. Trailer. 1,533,449; Apr. 14.
Norris, Almon E., Brookline, Mass. Bucket. 1,533,512; Apr. 14.
Norris, Walter C., Port Arthur, Tex. Safety coin receptacle. 1,533,382; Apr. 14.
North American Lace Company. (See Teague, Edwin D., assignor.)
Northey, John P., Toronto, Ontario, Canada. Sound-producing device. 1,534,016; Apr. 14.
Norton Company. (See Gillett, Charles E., assignor.)
Norton Company. (See Swenson, Kasper O., assignor.)
Nosarzewski, John. (See Bulewich, J., and Nosarzewski.)
Odenbrett, Frank L., Long Beach, Calif. Brake equalizer. 1,533,755; Apr. 14.
O'Flaherty, Roscoe, Lanham, Md. Vehicle wheel. 1,533,450; Apr. 14.
Oishei, John E., Buffalo, N. Y. Radiator-cap ornament. Des. 67,045; Apr. 14.
Oitto, Charles F., Nemo, S. Dak. Water pump. 1,533,338; Apr. 14.
Oles, Claude J., Unadilla, N. Y. Sink tray. 1,533,891; Apr. 14.
Oliver, Edd C., Adrian, assignor to Parker Rust Proof Company, Detroit, Mich. Electroplating rack. 1,533,805; Apr. 14.
Olson, Emil A., Plainville, assignor to The Humason Manufacturing Company, Forestville, Conn. Arm band and the like. 1,533,996; Apr. 14.
O'Reilly, Peter S., assignor to National Seal Company, Inc., Brooklyn, N. Y. Pouring spout. 1,533,134; Apr. 14.
Orinoka Mills, The. (See Graham, Kemp S., assignor.)
Orthwein, William B., et al. (See Baker, Bert C., assignor.)
Osborne, Harold H., Cleveland, Ohio, assignor to American Magnesium Corporation, Niagara Falls, N. Y. Casting freely-oxidizable metal. 1,533,892; Apr. 14.
Osborne, Lonnie B., and N. M. Lower, Bellevue, Pa., assignors to Franklin Railway Supply Company, New York, N. Y. Coupler for locomotives and tenders. 1,533,135; Apr. 14.
Otto, Wolfgang, Neumuhlen, near Kiel, Germany, assignor to Nederlandsche Technische Handel Maatschappij "Giro," 's Gravenhage, Netherlands. Gyroscopic apparatus having a means for indicating the inclined position of an airship or the like. 1,533,941; Apr. 14.
Overcash, Nellie C., Sawtelle, Calif. Bobbin support for hand knitting machines. 1,533,451; Apr. 14.
Pabst, Otto. (See Cole, L. C., Pabst, and May.)
Panigatti, Umberto, assignor to Metallurgica Bresciana Gia Tempini, Brescia, Italy. Time fuse. 1,533,756; Apr. 14.
Paper and Textile Machinery Co. (See Millispaugh, William H., assignor.)
Paper & Textile Machinery Company, The. (See Wood, Robert F., assignor.)
Parker, Leslie M., Evanston, Ill., assignor to The Hoover Company. Vacuum cleaner. 1,533,806; Apr. 14.
Parker Rust Proof Company. (See Oliver, Edd C., assignor.)
Parks-Cramer Company. (See Hodge, William B., assignor.)
Parrish, John E., Richmond, Va. Reenforced metal supporting stick. 1,533,942; Apr. 14.
Paschke, Alexander G. (See Nicol, William C., assignor.)
Paterno, Charles V., New York, N. Y., assignor, by mesne assignments, to Elliott Company, Pittsburgh, Pa. Boiler construction. 1,533,807; Apr. 14.
Pattison, Leon G. and T. G., Everett, Wash. Teetertooter. 1,533,261; Apr. 14.
Pattison, Thomas G. (See Pattison, Leon G. and T. G.)
Paulen, Percy H., assignor to The Electrical Seal Company, Cleveland, Ohio. Electrical seal. 1,533,452; Apr. 14.
Paulus, Charles L. (See Russell, H. O., and Paulus.)
Payne, William H. (See Mitchell, Harrison J., assignor.)
Paynter, William L., Newcastle-upon-Tyne, England. Side-tipping body for vehicles. 1,533,453; Apr. 14.
Peacock, Samuel, Wheeling, W. Va. Making iron and steel direct. 1,533,262; Apr. 14.
Pearce, Eugene S., Philadelphia, Pa. Signaling apparatus for railway crossings. 1,533,513; Apr. 14.
Peavey, James E., Cincinnati, Ohio. Dry-cell-battery unit. 1,533,385; Apr. 14.
Pelton, Chauncey R., and H. W. Houghton, assignors to Pelton & Crane Company, Detroit, Mich. Dental and surgical lamp. 1,533,605; Apr. 14.
Pelton & Crane Company. (See Pelton, C. R., and Houghton, assignors.)
Pennington, Alan M. (See Jones, W. F., and Pennington.)
Péres, Manuel H., San Pedro Sula, Honduras. Internal-combustion motor. 1,533,454; Apr. 14.
Perkins-Campbell Company, The. (See Campbell, M. D., and Heisey, assignors.)
Perry, Joseph, Jackman, Me. Plate lifter. 1,533,893; Apr. 14.
Perry, Ray P., Upper Montclair, N. J. Producing receptacles. 1,533,606; Apr. 14.
Peterson, Burt A., assignor, by mesne assignments, to Barber-Colman Company, Rockford, Ill. Knotter. 1,533,607; Apr. 14.
Peterson, Burt A., assignor, by mesne assignments, to Barber-Colman Company, Rockford, Ill. Knot-tying implement. 1,533,608; Apr. 14.
Peterson, Henry A., Holdrege, Nebr. Haystacker. 1,533,894; Apr. 14.

Peterson, Jonathan, Brooklyn, N. Y., and J. C. Thom, Chicago, Ill., assignors to Combination Machine Company, New York, N. Y. Packaging mechanism. 1,533,455; Apr. 14.

Petroleum Hydrogenation Company of America, Incorporated, The. (See Stevens, Elbridge W., assignor.)

Pfannenstiehl, Harry, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Printing telegraphy. 1,533,206; Apr. 14.

Pfannenstiehl, Harry, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Printing telegraphy. 1,533,207; Apr. 14.

Pfeiffer, Fred B., assignor to The Star Rubber Company, Akron, Ohio. Manufacturing tube protectors. 1,533,609; Apr. 14.

Pfister & Vogel Leather Company. (See Hulbert, Edwin F., assignor.)

Pfouts, Leroy S., Canton, Ohio. Ice-cream freezer. 1,533,708; Apr. 14.

Pfund, Hans C. (See Ash, Royal L., assignor.)

Phelps, Frank M., Usk, Wash. Holder. 1,533,136; Apr. 14.

Phillips, Marion. (See Dibble, C. W., and Phillips.)

Pierpont, Frank H., and J. E. Tipton, Horley, England, assignors to Lanston Monotype Machine Company, Philadelphia, Pa. Typographic mechanism. 1,533,456; Apr. 14.

Pierpont, Frank H., Horley, England, assignor to Lanston Monotype Machine Company, Philadelphia, Pa. Matrix-case equipment for type-casting machines. 1,533,457; Apr. 14.

Pierpont, Frank H., Horley, England, assignor to Lanston Monotype Machine Company, Philadelphia, Pa. Matrix-case equipment for typographic machines. 1,533,458; Apr. 14.

Pierpont, Frank H., Horley, England, assignor to Lanston Monotype Machine Company, Philadelphia, Pa. Typographic matric-case equipment. 1,533,459; Apr. 14.

Pineau, Eugene J. (See Kane, J. I., and Fuhrmann, assignors.)

Pines Manufacturing Company. (See Pipenhagen, Charles A., assignor.)

Pinkston, Enoch P. (See Frost, Rupert L., assignor.)

Pipenhagen, Charles A., Chicago, Ill., assignor to Pines Manufacturing Company. Shutter apparatus for radiators. 1,533,460; Apr. 14.

Pixley, Cyril F., Woolwich, London, England. Automatic control of the temperature in the water jackets of internal-combustion engines. 1,534,005; Apr. 14.

Place, George G., Chicago, Ill. Holder for smoking pipes. 1,533,610; Apr. 14.

Plainfield Trust Company, The, administrator. (See Hopkins, Charles E.)

Platt, Clarence D., Bridgeport, Conn. Inclosed switch catch. 1,533,461; Apr. 14.

Pleger, John J., Chicago, Ill. Book or pamphlet covering machine. 1,533,895; Apr. 14.

Pleister, Henry W., Westfield, N. J., assignor to H. B. Newhall. Sound amplifier. Des. 67,046; Apr. 14.

Pleister, Henry W., Westfield, N. J., assignor to H. B. Newhall. Sound amplifier. Des. 67,047; Apr. 14.

Plough, Herbert F. (See Conlan, S. L., and Plough.)

Poeppelmeier, Frank H., assignor to The Haas Letter Service Company, Dayton, Ohio. Printer's chase. 1,533,462; Apr. 14.

Pointon, John E. (See Prescott, W. E., and Pointon.)

Pope, Frederick W., Roxbury, Mass. Gas retarding and adjusting device. 1,533,896; Apr. 14.

Posner, Abraham, Brooklyn, N. Y. Shoe. Des. 67,048; Apr. 14.

Pospisil, Louis J., Spokane, Wash. Hydraulic gate. 1,533,137; Apr. 14.

Postel, Fred J., Chicago, Ill. Temperature-limiting heater. 1,533,463; Apr. 14.

Potts, James W., Gunnison, Miss. Well driver. 1,533,897; Apr. 14.

Pouchain, Adolfo, Turin, Italy. Negative electrode for electric accumulators. 1,533,568; Apr. 14.

Pouchain, Adolfo, Turin, Italy. Electric accumulator. 1,533,569; Apr. 14.

Powers Accounting Machine Corporation. (See Lasker, William W., assignor.)

Pownall, Henry D., Canton, Ohio. Refrigerating apparatus. 1,533,836; Apr. 14.

Prat, Georges J. A. L., Paris, France. Apparatus for obtaining artificial draft. 1,533,898; Apr. 14.

Pratt & Whitney Company. (See Blood, Bryant H., assignor.)

Prescott, William E., Harlesden, London, and J. E. Pointon, Peterborough, assignors to Joseph Baker, Sons and Perkins Limited, London, England. Mechanism for feeding and conveying open receptacles such as tins. 1,533,943; Apr. 14.

Preston, Henry E. (See Folland, H. P., and Preston.)

Preston, Samuel. (See Sokolof, W., and Preston.)

Pridmore, John E. O., Chicago, and E. C. McKinnie, Oak Park, assignors to Curtis Lighting, Incorporated, Chicago, Ill. Lighting fixture. 1,533,808; Apr. 14.

Pringle, Albert L. (See Kelly, J. G., Pringle, and Hall.)

Pritchard, William S., assignor by mesne assignments, to Motor Products Corporation (1923), Detroit, Mich. Tube-severing apparatus. 1,533,263; Apr. 14.

Proser, Joseph G., Chicago, Ill. Method and apparatus for controlling the transformation of fluid energy into work. 1,533,570; Apr. 14.

Prout, William E., Elrama, Pa. Drop door for dumping cars. 1,533,571; Apr. 14.

Provensne, Joseph L., assignor of one-half to I. Agron, Kansas City, Mo. Window or windshield cleaner. 1,533,944; Apr. 14.

Puget Electric Welding Inc. (See Nordine, Axel O., assignor.)

Purdy, Eva T., and C. A. Cornell, Detroit, Mich. Portable stage. 1,533,337; Apr. 14.

Purnell, Enoch, et al. (See Purnell, Lemuel H., assignor.)

Purnell, Lemuel H., Chicago, assignor of one-half to H. G. Goelitz and one-half to E. Purnell, Oak Park, Ill. Jig for making pipe elbows. 1,533,660; Apr. 14.

Pursell Arthur T., Chicago, Ill., assignor to Arnold Electric Company, Racine, Wis. Fruit-juice extractor. 1,533,208; Apr. 14.

Putt, Edward D., and W. C. Stevens, Akron, Ohio, assignors, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Machine for trimming rubber heels. 1,533,139; Apr. 14.

Pyrtle, Jack E., San Francisco, Calif., assignor to Service Products Manufacturing Co., Chicago, Ill. Fountain brush. 1,533,899; Apr. 14.

Quimby, Austin C. (See Williamson, W. P., and Quimby.)

Radu, John W., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum-tube holder. 1,533,209; Apr. 14.

Radu, John W., assignor to Westinghouse Electric Company, Incorporated, New York, N. Y. Vacuum-tube mounting. 1,533,210; Apr. 14.

Racine Confectioners' Machinery Co. (See Hartshorn, Willis N., assignor.)

Racine Confectioners' Machinery Company. (See Hislop, Robert S., assignor.)

Ragot, Charles L., New York, N. Y., assignor to Ragot Motor Corporation. Rotary engine. 1,533,514; Apr. 14.

Ragot Motor Corporation. (See Ragot, Charles L., assignor.)

Rahbek, Knud, and F. A. Johnsen, Copenhagen, Denmark. Apparatus for changing electrical variations to mechanical. 1,533,757; Apr. 14.

Rainey, Paul M., Glen Ridge, N. J., and G. A. Locke, Maspeth, assignors to Western Electric Company, Incorporated, New York, N. Y. Starting device. 1,533,211; Apr. 14.

Raybestos Company. (See Stanley, Frederick C., assignor.)

Raymond, Samuel W., Adrian, Mich. Tractor wheel shift mechanism. 1,533,809; Apr. 14.

Raynor, George J., Detroit, Mich. Fluid-operated rotary driving or driven element. 1,533,338; Apr. 14.

Reading Chain and Block Corporation. (See Howard, Frank H., assignor.)

Reading Chain and Block Corporation. (See Howard, F. H., and Hoffmaster, assignors.)

Reasonover, T. E. (See Hanson, Louis H. assignor.)

Reckart, Charles R., Brady, W. Va. Brake-band control. 1,533,945; Apr. 14.

Redrup, Charles B., Leeds, assignor to P. R. Greenwood and F. Mitchell, London, England. Piston ring. 1,533,946; Apr. 14.

Reed, Elmer A. (See Meyer, A. R., and Reed.)

Reeves, Orwell C., assignor to Toledo Scale Company, Toledo, Ohio. Platform construction. 1,533,140; Apr. 14.

Reid, Thomas A., Wilkinsburg, Pa., asignor to Westinghouse Electric & Manufacturing Company. Electric-furnace resistor. 1,533,264; Apr. 14.

Reid, Thomas A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric crucible furnace. 1,533,265; Apr. 14.

Reid, Thomas A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Double-chamber annealing furnace. 1,533,266; Apr. 14.

Reid, Thomas A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Temperature indicator and controller. 1,533,267; Apr. 14.

Reid, Thomas A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric steam boiler. 1,533,268; Apr. 14.

Reid, Thomas A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace. 1,533,269; Apr. 14.

Reid, Thomas A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Furnace terminal. 1,533,270; Apr. 14.

Reinhardt, James H., East Orange, N. J. Gas burner. 1,533,212; Apr. 14.

Remillong, Nick, Glen Ullin, N. Dak. Garment hanger. 1,533,661; Apr. 14.

Repiltura Corporation. (See Brixey, Austin D., assignor.)

Replogle, Daniel B, Berkeley, Calif. Airway-cleaning apparatus. 1,533,271; Apr. 14.

Respess, Roland B., New York, N. Y., assignor by mesne assignments, to Respro Inc., Cranston, R. I. Adhesive medical tape and making the same. 1,533,272; Apr. 14.

Respess, Roland B., New York, N. Y., assignor by mesne assignments, to Respro Inc., Cranston, R. I. Making a leather substitute. 1,533,273; Apr. 14.

Respess, William R., St. George, N. Y., assignor to New Jersey Research Company. Electrical condenser and manufacturing the same. 1,533,611; Apr. 14.

Respro Inc. (See Respess, Roland B., assignor.)

Respro Inc. (See Smith, Henry H., assignor.)

Reynolds, Charles, Nashville, Tenn., assignor to E. Reynolds. Humidor. 1,533,758; Apr. 14.

Reynolds, De Elbert A., Yonkers, assignor by mesne assignments, to Audiphone Company of America, New York, N. Y. Signaling system. 1,533,515; Apr. 14.

Reynolds, Elyma. (See Reynolds, Charles, assignor.)

Reynolds, Frederick, Walkerville-on-Tyne, assignor of one-half to The Silica Syndicate Limited, Westminster, London, England. Mercury and other vapor electric lamp. 1,533,900; Apr. 14.

Reynolds, Thomas C., Verdi, Minn. Quack-grass machine. 1,533,274; Apr. 14.

Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Clutch-controlling mechanism. 1,533,516; Apr. 14.

Richards, Robert H., Boston, Mass. Furnace. 1,533,572; Apr. 14.

Richardson, Henry F., Brooklyn, and A. Coggeshall, Pleasantville, assignors of one-fourth to H. F. Richardson, Brooklyn, one-fourth to A. Coggeshall, Pleasantville, one-sixth to S. R. Bradley, Nyack, one-sixth to A. M. Cregier, and one-sixth to A. R. Bradley, Orangeburg, N. Y. Junction box. 1,533,759; Apr. 14.

Richardson, Henry F., et al. (See Richardson, H. F., and Coggeshall, assignors.)

Ricker, Chester S., Indianapolis, Ind. Air-cooled cylinder. 1,533,810; Apr. 14.

Riddle, Edward N., Co., The. (See Crowell, Frank S., assignor.)

Ridler, Edward L., St. Paul, Minn. Floor and ceiling plate. 1,533,141; Apr. 14.

Riker, Andrew L., Fairfield, Conn. Constant-compression internal-combustion engine; 1,533,947; Apr. 14.

Robb, Arthur A., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Cushion-tire structure. 1,533,339; Apr. 14.

Robb, John F., Cleveland Heights, Ohio, assignor to Koebring Company, Milwaukee, Wis. Finishing machine. 1,533,464; Apr. 14.

Robert, Samuel. (See Haskell, Samuel, assignor.)

Roberts, Arthur, Bogue, Kans. End gate. 1,533,275; Apr. 14.

Robertson, William W., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Attaching device for yarn-tube frames. 1,533,340; Apr. 14.

Robinson, Albert P. (See Morrell, Glenn A., assignor.)

Rockwood, George I., Worcester, Mass. Alarm-controlling device for sprinkler systems and the like. 1,533,948; Apr. 14.

Rodgers, Key N., Pittsburgh, Pa. Music-sheet turner. 1,533,862; Apr. 14.

Rodler, Fred, Cincinnati, Ohio. Test molds. 1,533,341; Apr. 14.

Ronning, Adolph. (See Ronning, Andrean G. and A.)

Ronning, Andrean G. and A., Minneapolis, Minn. Ditcher. 1,533,901; Apr. 14.

Ronning, Andrean G. and A., Minneapolis, Minn. Ensilage cutter. 1,533,902; Apr. 14.

Rosenblatt, Isidor, New York, N. Y. Lighting-fixture bracket. Des. 67,050; Apr. 14.

Rosenblatt, Isidor, New York, N. Y. Chandelier or article of similar nature. Des. 67,051; Apr. 14.

Ross, Charles G., assignor of one-half to W. L. Ross, Chicago, Ill. Bumper for motor vehicles. 1,533,612; Apr. 14.

Ross, William L. (See Ross, Charles G., assignor.)

Rothenberg, David, Brooklyn, N. Y. Cap. Des. 67,049; Apr. 14.

Rowe, Frederick A., Vancouver, British Columbia, Canada. Hydraulic dredge. 1,533,485; Apr. 14.

Rowntree, Harold, Pass Christian, Miss., assignor to National Pneumatic Company, New York, N. Y. Safety control mechanism for cars. 1,533,142; Apr. 14.

Ruben, Charles, Pittsburgh, Pa. Man's neckwear. 1,533,663; Apr. 14.

Rubin, Abraham, assignor to Henry Hyman & Co., Inc., New York, N. Y. Variometer connecter. 1,533,613; Apr. 14.

Rush, Charles B., Kiefer, Okla. Oil-well barrel. 1,533,760; Apr. 14.

Russell, Herbert O., and C. L. Panlus, Dayton, Ohio. Condenser. 1,533,334; Apr. 14.

Ryba, Charles F., Beardsley, Kans. Riding attachment for grain drills. 1,533,143; Apr. 14.

Rylander Co., The. (See Rylander, Parrish H., assignor.)

Rylander, Parrish H., assignor to The Rylander Co., Austin, Tex. Seed-cotton conditioner. 1,533,903; Apr. 14.

Sachs, Solomon, New York, N. Y. Portable phonograph. 1,533,949; Apr. 14.

Safion, Herman A. (See Boehringer, John A., assignor.)

Sager, J. H., Company. (See Sager, James H., assignor.)

Sager, James H., assignor to J. H. Sager Company, Rochester, N. Y. Bumper for motor vehicles. 1,533,517; Apr. 14.

Sakss, Andrew, Bridgeport, Conn. Supporting bracket. 1,533,709; Apr. 14.

Salz, Ignats, New York, N. Y. Clip. 1,533,466; Apr. 14.

Sanchez, Jose M., Zapata, Tex. Boll-weevil machine. 1,533,276; Apr. 14.

Sandusky Foundry & Machine Co. (See Milispaugh, William H., assignor.)

Sandvoss, Willy, Frankfort-on-the-Main, Germany. Apparatus for regulating heating systems. 1,533,614; Apr. 14.

Sanford, Charles F., New Orleans, La., assignor of one-half to A. Herbst, New York, N. Y. Finger-nail cleaner. 1,533,664; Apr. 14.

Sanford, Hugh W., Knoxville, Tenn. Railway car. 1,533,761; Apr. 14.

Sanford, Hugh W., Knoxville, Tenn. Mine car. 1,533,762; Apr. 14.

Sargent, Charles E., Indianapolis, Ind. Governor for windmills. 1,533,467; Apr. 14.

Saunders, Maurice M. (See Möller, Hugo, A. O., assignor.)

Saunt, Thomas W., Leigh-on-Sea, England. Mixing valve for gases. 1,533,904; Apr. 14.

Scarth, Harold. (See Heilman, H. E., and Scarth.)

Schaffer, Jacob, assignor to Star Chandelier Company, Inc., New York, N. Y. Five-light body holder for a chandelier. Des. 67,063; Apr. 14.

Schaffer, Jacob, assignor to Star Chandelier Company, Inc., New York, N. Y. Two-light body holder for a chandelier. Des. 67,064; Apr. 14.

Scheib, Georg, assignor of one-fourth to H. Güntherberg, one-fourth to R. Ihlenfeldt, and one-fourth to M. Koch, Berlin, Germany. Method and apparatus for regulating the mixture of gases. 1,533,468; Apr. 14.

Schein, August P., Chicago, Ill. Flowerpot. 1,533,342; Apr. 14.

Schimek, Joseph F., Holden, assignor to Cashiko Machine Company, Worcester, Mass. Antifriction device for eccentric connections. 1,533,763; Apr. 14.

Schlack, Fred C., Laurel, Oreg. Autotruck. 1,533,518; Apr. 14.

Schlatter, Moses, and L. C. Freeman, Los Angeles, Calif. Bumper for vehicles. 1,533,764; Apr. 14.

Schleicher, William A., assignor to The Eberhard Manufacturing Co., Cleveland, Ohio. Door fastener. 1,533,811; Apr. 14.

Schleicher, William A., assignor to The Eberhard Manufacturing Company, Cleveland, Ohio. Bolt snap. 1,533,812; Apr. 14.

Schlich, Otto S. (See Schlich, Victor H., assignor.)

Schlich, Victor H., Southofen, Germany, assignor to O. S. Schlich, New York, N. Y. Mixing process and apparatus therefor. 1,533,950; Apr. 14.

Schmalfuss, Paul, Seiferitz, near Meerane, Germany. Apparatus for cleaning boots and shoes. 1,533,765; Apr. 14.

Schmidt, Charles R., Baltimore, Md. Water-circulating system for automobile engines. 1,533,469; Apr. 14.

Schmidt, Henry F., Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Governor. 1,533,766; Apr. 14.

Schmidt, Henry F., Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company. Governor. 1,533,767; Apr. 14.

Schmitt, Otto G., Chicago, Ill. Clothesrack. 1,533,470; Apr. 14.

Schodrowsky, Herman R., Marion Township, Saginaw County, Mich. Auto power folding tool grinder. 1,533,768; Apr. 14.

Schoenfeld, Joseph, Alameda, assignor to The Magnavox Company, San Francisco, Calif. Electric-heater casing. Des. 67,052; Apr. 14.

Schols, Maria, Leichlingen, Germany. Dyeing textile and like material. 1,533,769; Apr. 14.

Schriner, Charles F., Cleveland, Ohio, assignor to The National Steel Barrel Company. Retaining check-valve balls in pistons. 1,533,665; Apr. 14.

Schroeder, Carl E., Hoboken, N. J. Producing metals or alloys. 1,533,519; Apr. 14.

Schroeder, Karl, Dusseldorf, assignor to the Firm Heinrich Lanz, Mannheim, Germany. Apparatus for separating and binding dust or other impurities in combustion air of combustion engines. 1,533,813; Apr. 14.

Schuermann, Anton C. (See Mueller, P., Schuermann, and Lucas.)

Schurts, Ralph E., Kansas City, Mo. Nonreturn valve. 1,533,144; Apr. 14.

Schwab, James W., Gulf, assignor to Texas Gulf Sulphur Company, Bay City, Tex. Casting sulphur. 1,533,213; Apr. 14.

Schwartz, Herbert W., Chicago, Ill. Headlight. 1,533,615; Apr. 14.

Schweiker, Roy W., assignor to Franklin Pottery, Lansdale, Pa. Lighting fixture. Des. 67,053; Apr. 14.

Searl, Clinton M., assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,533,814; Apr. 14.

Searl, Clinton M., assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,533,815; Apr. 14.

Searl, Clinton M., assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,533,816; Apr. 14.

Seeger, Bernard P., San Francisco, Calif. Hose supporter. 1,533,951; Apr. 14.

Segal Metal Products Company. (See Segal, Samuel, assignor.)

Segal, Samuel, assignor to Segal Metal Products Company, Inc., New York, N. Y. Lock. 1,533,343; Apr. 14.
Selenkow, Jacob K., Brooklyn, assignor to Hygrade Mechanical Toy Manufacturing Co., Inc., Brooklyn, N. Y. Child's vehicle. 1,533,520; Apr. 14.
Service Products Manufacturing Co. (See Pyrtle, Jack E., assignor.)
Severus, Louis, assignor to Art Lamp Manufacturing Company, Chicago, Ill. Lamp base. Des. 67,054; Apr. 14.
Severus, Louis, assignor to Art Lamp Manufacturing Company, Chicago, Ill. Lamp base. Des. 67,055; Apr. 14.
Severus, Louis, assignor to Art Lamp Manufacturing Company, Chicago, Ill. Lamp base. Des. 67,056; Apr. 14.
Severus, Louis, assignor to Art Lamp Manufacturing Company, Chicago, Ill. Lamp base. Des. 67,057; Apr. 14.
Severus, Louis, assignor to Art Lamp Manufacturing Company, Chicago, Ill. Lamp base. Des. 67,058; Apr. 14.
Severus, Louis, assignor to Art Lamp Manufacturing Company, Chicago, Ill. Lamp base. Des. 67,059; Apr. 14.
Shafran, Edward M., Brooklyn, N. Y. Convertible garment. 1,533,952; Apr. 14.
Shaw, Harold N., Milwaukee, Wis. Automatic circuit maker and breaker. 1,533,770; Apr. 14.
Shepherd, William E., Huron, Ohio. Fishing device. 1,533,471; Apr. 14.
Shields, Willie A., Birmingham, Ala. Bag-mounting appliance. 1,533,666; Apr. 14.
Shipley, Stanley D., and G. C. Given, Stamford, Conn., assignors to Atlas Powder Company, Wilmington, Del. Lacquer and lacquer enamel. 1,533,616; Apr. 14.
Shine, Charles L., Philadelphia, Pa. Cylinder bearing for couplers. 1,533,472; Apr. 14.
Shoemaker, Robert J., assignor to Leadizing Company, Chicago, Ill. Metal-coating process. 1,533,473; Apr. 14.
Short, Gurney L., Angus, Minn. Animal-restraining device. 1,533,953; Apr. 14.
Shotton, John C., Lakewood, Ohio. Dental casting device and process. 1,533,474; Apr. 14.
Sidebotham, Melvin H. (See La Bombard, L. E., and Sidebotham.)
Siemens & Halske, Aktiengesellschaft. (See Ehrhardt, Erwin, assignor.)
Siemens & Halske, Aktiengesellschaft. (See Keinath, Georg, assignor.)
Silica Syndicate Limited, The. (See Reynolds, Frederick, assignor.)
Simond, Walter A. (See Murphy, G., and Simond.)
Simpson, George N., Chicago, Ill. Car dumper. 1,533,667; Apr. 14.
Singer Manufacturing Company, The. (See Dosch, Oliver L., assignor.)
Singer Manufacturing Company, The. (See Noble, Donald, assignor.)
Singleton, William H., Canton, Ohio. Ship-ventilator cowl. 1,533,344; Apr. 14.
Skiles, Hugh H., Fairmont, W. Va. Port relief arch. 1,533,954; Apr. 14.
Skoog, Robert W. (See Voress, C. L., Canter, and Skoog.)
Slade, Harold E., assignor to Beaver Machine & Tool Company, Inc., Newark, N. J. Socket plug. 1,533,771; Apr. 14.
Slepian, Joseph, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Preventing armature-coil heating. 1,533,277; Apr. 14.
Slepian, Joseph, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Plate-circuit excitation. 1,533,278; Apr. 14.
Sloan, Harold D., Colony, Wyo. Propelling toy. 1,533,772; Apr. 14.
Sloyer, Harold W. (See Kichline, F. O., and Sloyer.)
Smith, Charles A., Columbus, Ohio. Ceiling for concrete floors. 1,533,817; Apr. 14.
Smith, Harry H., Conimicut, assignor to Respro Inc., Providence, R. I. Manufacture of footwear. 1,533,668; Apr. 14.
Smith, Herbert M., Farmington, Conn., assignor to United States Hat Machinery Corporation, Richmond, Va. Felt shrinking. 1,533,345; Apr. 14.
Smith, Lou W., Chicago, Ill. Making paper-box fasteners. 1,533,352; Apr. 14.
Smith, Philip J., Saginaw, Mich. Feed conveyer for planers. 1,533,353; Apr. 14.
Smith, Sheffield, North Providence, R. I. Guard for automobiles. 1,533,214; Apr. 14.
Smith, William E., Fond du Lac, Wis. Puzzle. 1,533,145; Apr. 14.
Smoak, Elliott B., Daytona, Fla. Vehicle body for grain or stock. 1,533,475; Apr. 14.
Société Anonyme la Chevrette. (See Jacony, Pierre, assignor.)
Sohn, Edward A., assignor to Bedford Foundry & Machine Company, Bedford, Ind. Sheave. 1,533,476; Apr. 14.
Sokolof, William, and S. Preston, Brooklyn, N. Y. Liquid-level indicator. 1,533,138; Apr. 14.
Solomon, Harry, New York, N. Y. Machine for applying backs to mirrors. 1,533,669; Apr. 14.
Sontag, Jacob. (See Nathanson, P., and Sontag.)
Soss, Joseph, and L. H. Morin, New York, assignors to Soss Manufacturing Co., Brooklyn, N. Y. Die-casting machine. 1,533,617; Apr. 14.
Soss Manufacturing Co. (See Soss, J., and Morin, assignors.)
Souder, Harvey S. (See Jobson, W. P., and Souder.)
Souderton Manufacturing Co. (See Jobson, W. P., and Souder, assignors.)
Spalding, Elton W., Durango, Colo. Gear shift. 1,533,215; Apr. 14.
Specialty Automatic Machine Company. (See La Bombard, L. E., and Sidebotham, assignors.)
Sperr, Frederick W., jr., and R. E. Hall, assignors to The Koppers Company, Pittsburgh, Pa. Gas-purification process. 1,533,773; Apr. 14.
Spiller, Joseph, Seattle, Wash. Phorioscope. 1,533,573; Apr. 14.
Spindler, Walter C., Stevens Point, Wis. Game. 1,533,774; Apr. 14.
Spratling, Roper C., Opelika, Ala. Poultry-raising apparatus. 1,533,574; Apr. 14.
Sproul, William C., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Automatic work fixture. 1,533,710; Apr. 14.
Stahl, Edward J., assignor to The Baker R. & L. Company, Cleveland, Ohio. Vehicle body. 1,533,354; Apr. 14.
Stanley, Frederick C., assignor to Raybestos Company, Bridgeport, Conn. Making friction facings and product. 1,533,216; Apr. 14.
Stanley, Robert C., New Brighton, assignor to The International Nickel Company, New York, N. Y. Manufacture of alloys. 1,533,818; Apr. 14.
Star Chandelier Company. (See Schaffer, Jacob, assignor.)
Star Rubber Company, The. (See Pfeiffer, Fred B., assignor.)
Stark, Frederick W., assignor to International Silver Company, Meriden, Conn. Plate or similar article. Des. 67,060; Apr. 14.
Stauffer, Claude R. (See Stauffer, Henry M. and C. R.)
Stauffer, Henry M. and C. R., Leola, Pa. Brooder house. 1,533,905; Apr. 14.
Stearn, Franklin A., Paterson, N. J., and J. C. McAuliffe, Bronx, assignors to Western Electric Company, Incorporated, New York, N. Y. Routine test circuits for central-office senders. 1,533,477; Apr. 14.
Steele, Charles G., Berkeley, assignor, by mesne assignments, to J. I. Finn, Los Angeles, Calif. Apparatus for making metallic axles. 1,533,670; Apr. 14.
Steele, Herbert H., Syracuse, N. Y. Machine to test the teeth of spur gears. 1,533,671; Apr. 14.
Steese, Rollin C., Youngstown, Ohio. Manufacture of puddled iron. 1,533,819; Apr. 14.
Steiner, Joseph C., St. Louis, Mo. Safety device for food choppers. 1,533,217; Apr. 14.
Stella, Joseph, New York, and W. R. Wisser, assignors to Brooklyn Fibre Syndicate, Inc., Brooklyn, N. Y. Corner-fastening means for folding boxes. 1,533,478; Apr. 14.
Stevens, Elbridge W., Baltimore, Md., assignor to The Petroleum Hydrogenation Company of America, Incorporated, Wilmington, Del. Apparatus for and process of treating with high-tension currents. 1,533,711; Apr. 14.
Stevens, William C. (See Putt, E. D., and Stevens.)
Stewart, Arthur C. (See Torrance, William F., assignor.)
Stickney, Burnham C., Elisabeth, N. J. Typewriting machine. 1,533,355; Apr. 14.
Stinn, Edward L., Neola, Iowa. Valve grinder. 1,533,218; Apr. 14.
Stinson, Hugh B., Glenwood, Minn., assignor of one-half to R. M. Voorhees, Peoria, Ill. Grain-cleaning attachment for thrashing machines. 1,533,907; Apr. 14.
Stitt, James T., Nemogs, Ontario, Canada. Shears for cutting and trimming grass and hedges. 1,533,479; Apr. 14.
Stockstill, James O., Rocky Ford, Colo. Beet harvester. 1,533,672; Apr. 14.
Stone, Louis J., Hallock, Minn. Weeding attachment for cultivators. 1,533,673; Apr. 14.
Straus, Harry H. (See Heygel, Paul R., assignor.)
Strauss, Benno, Essen-Bredeney, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Steel alloy. 1,533,712; Apr. 14.
Stricker, William, Kansas City, Mo. Drier. 1,533,480; Apr. 14.
Strodel, Matthias. (See Zitterbart, Anthony, assignor.)
Stukey, Albert F., East Hollywood, Calif. Casement window. 1,533,521; Apr. 14.
Stumpf, Johann, Berlin, Germany. Locomotive with three cylinders. 1,533,146; Apr. 14.
Sturgeon, Jeremiah D., Guthrie, Okla. Electrical connection for railway rails. 1,533,279; Apr. 14.
Sugerman, Philip, New York, N. Y. Combination furniture. 1,533,219; Apr. 14.
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sun Oil Company. (See Maitland, Harold T., assignor.)
Svendsgaard, Sverre R., Tekoa, Wash. Dispensing machine. 1,533,147; Apr. 14.

Svenson, Charles W., New Britain, Conn. Speedometer. 1,533,674; Apr. 14.
Swenson, Kasper O., assignor to Norton Company, Worcester, Mass. Grading machine. 1,534,015; Apr. 14.
T. & L. Co., The. (See Tueckmantel, Hugo, assignor.)
Tadd, Roy W., Los Angeles, Calif. Adjustable diaphragm plate. 1,533,522; Apr. 14.
Tallion, George, Malone, N. Y. Journal-box jack. 1,533,280; Apr. 14.
Tandel, Fritz, assignor to the Firm C. G. Haubold A. G., Chemnitz, Saxony, Germany. Friction clutch. 1,533,955; Apr. 14.
Tappan Stove Company, The. (See Taylor, Thomas E., assignor.)
Tatny, Frank, New York, N. Y. Helicopter mechanism for flying machines. 1,533,713; Apr. 14.
Taylor, Huston, Detroit, Mich. Bumper impact bar. Des. 67,061; Apr. 14.
Taylor Instrument Companies. (See Marsh, Edward S., assignor.)
Taylor, James, jr., Worcester, Mass. Instrument for ear treatment. 1,533,618; Apr. 14.
Taylor, Thomas E., assignor to The Tappan Stove Company, Mansfield, Ohio. Stove structure. 1,533,098; Apr. 14.
Taylor-Wharton Iron and Steel Company. (See Baker, Raymond H., assignor.)
Taylor-Wharton Iron and Steel Company. (See Hanks, G. R., and Wood, assignors.)
Taylor, William H., C. W. Downs, and J. W. Barbey, Detroit, Mich. Multiple-fuse plug. 1,533,714; Apr. 14.
Tauts, Herbert E., Milwaukee, Wis., assignor to E. J. Cady, River Forest, Ill. Testing machine. 1,533,281; Apr. 14.
Teague, Edwin D., Brooklyn, N. Y., assignor to North American Lace Company, Philadelphia, Pa. Lace. Des. 67,062; Apr. 14.
Technical Research Work Limited. (See Lush, Ernest J., assignor.)
Templeton, Walter B. (See Malicki, Joseph, assignor.)
Tentobed Company. (See Whitehead, Robert R., assignor.)
Ternstedt Manufacturing Company. (See Archer, T. P., and Heintz, assignors.)
Terry, Herbert, & Sons, Limited. (See Eaton, George H., assignor.)
Texas Company, The. (See Pants, F. C., and Hill, assignors.)
Texas Gulf Sulphur Company. (See Schwab, James W., assignor.)
Thom, James C. (See Peterson, J., and Thom.)
Thoma, Walter, assignor to E. W. Bliss Company, Brooklyn, N. Y. Cup separator for feeds. 1,533,523; Apr. 14.
Thomas, Albert, Paris, France. Microphone. 1,533,675; Apr. 14.
Thomas, Horace T., Lansing, Mich. Charge-forming device for internal-combustion engines. 1,533,775; Apr. 14.
Thomas, Thomas H., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake device. 1,533,481; Apr. 14.
Thompson, James A., Rushville, Ill., assignor to Gladacres Incorporated. Latch device. 1,533,619; Apr. 14.
Thomson, S. H., Manufacturing Company, The. (See Hummert, Robert H., assignor.)
Thornton, Curtis, Versailles, Ind. Mail box. 1,533,956; Apr. 14.
Thornton, Frank, jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Protective system for heating devices. 1,533,282; Apr. 14.
Thornton, Frank, jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic thermal control system. 1,533,283; Apr. 14.
Threm, William, Cincinnati, Ohio. Combined storage battery and rectifier. 1,533,906; Apr. 14.
Tiburtius, Carl, Kiel, Germany. Transport. 1,533,776; Apr. 14.
Tiemann, Harry D., Madison, Wis., dedicated, by mesne assignments, to the citizens of the United States of America. Progressive dry kiln for lumber. 1,533,715; Apr. 14.
Timken Roller Bearing Company, The. (See Ehn, Erik W., assignor.)
Tin Decorating Company of Baltimore, The. (See Hermani, Henry, assignor.)
Tipton, Joseph E. (See Pierpont, F. H., and Tipton.)
Tobin, Kenneth J., and W. W. Darrow, assignors to Camel Company, Chicago, Ill. Side-door construction. 1,533,620; Apr. 14.
Tobin, Kenneth J., and W. W. Darrow, assignors to Camel Company, Chicago, Ill. Latching mechanism. 1,533,621; Apr. 14.
Todd, Victor H., Rainbow Lake, N. Y. Electrical measuring instrument. 1,533,356; Apr. 14.
Toledo Scale Company. (See Crane, Samuel G., assignor.)
Toledo Scale Company. (See Hess, Halvor O., assignor.)
Toledo Scale Company. (See Reeves, Orwell C., assignor.)
Tomkins, Edwin S., Hay, New South Wales, and A. Mair, Melbourne, Victoria, Australia. Folding top frame for automobiles. 1,533,148; Apr. 14.
Tonoh-Metal Producing Company. (See Kuster, Charles A., assignor.)
Toole, William H., Lockhart, Ala. Adjustable cutter head. 1,533,575; Apr. 14.
Toomey, William C., Harrisburg, Pa. Movable headlight. 1,533,957; Apr. 14.
Torrance, William F., Dalmuir, assignor of one-half to A. C. Stewart, Clydebank, Scotland. Safety device for mine cages, lifts, and the like. 1,533,576; Apr. 14.
Tromans, Thomas, Bridgeport, and E. L. Whitney, Stratford, Conn. Game. 1,533,676; Apr. 14.
Troy Laundry Machinery Co. (See Balser, Fritz, assignor.)
Tueckmantel, Hugo, assignor to The T. & L. Co. Inc., Newark, N. J. Bag-frame registering and handle connection. 1,533,149; Apr. 14.
Turbine Fuel Oil Burner Co. (See Hurd, Benjamin W., assignor.)
Turney, Eugene T., Holmes, assignor to Eugene T. Turney Laboratories, Inc., Newark, N. J. Telephone headset. 1,533,524; Apr. 14.
Turney, Eugene T., Laboratories, Inc. (See Turney, Eugene T., assignor.)
Tursky, Charles M., New York, N. Y. Air compressor. 1,533,958; Apr. 14.
Ulrich, Carl J., Lake Crystal, and W. A. Miller, Minneapolis, Minn. Machine for washing serving trays. 1,533,150; Apr. 14.
Underwood Typewriter Company. (See Ansart, Louis L., assignor.)
Underwood Typewriter Company. (See Corcoran, Cornelius B., assignor.)
Union Hardware Company. (See Fritz, Adolph H., assignor.)
United Railway Equipment Company. (See Hyle, Jacob A., assignor.)
United Shoe Machinery Corporation. (See Putt, E. D., and Stevens, assignors.)
United States Hat Machinery Corporation. (See Chudobe, Frank F., assignor.)
United States Hat Machinery Corporation. (See Genest, Homer A., assignor.)
United States Hat Machinery Corporation. (See Lorens, William A., assignor.)
United States Hat Machinery Corporation. (See Smith, Herbert M., assignor.)
Universal Oil Products Company. (See Egloff, G., and Benner, assignors.)
Vacscrub Company. (See Veal, Sidney O. U., assignor.)
Van Deventer, Harry R., New York, N. Y., assignor to Dubilier Condenser and Radio Corporation. Combination electric battery and condenser. 1,533,525; Apr. 14.
Vapor Car Heating Company. (See Geissinger, Harry G., assignor.)
Varn Buhler, John J., Detroit, Mich. Rust-removing compound. 1,533,622; Apr. 14.
Veal, Sidney O. U., Harrogate, assignor to Vacscrub Company, Limited, South Shields, England. Washing plunger. 1,533,577; Apr. 14.
Veline, Nils J. (See Erson, Carl J., assignor.)
Verville, Alfred V., Dayton, Ohio. Annular radiator mounting for airplanes. 1,533,284; Apr. 14.
Verville, Alfred V., Dayton, Ohio. Aircraft fuselage. 1,533,285; Apr. 14.
Viberg, Ernest R. (See Canfield, A. J., and Viberg.)
Vick, Frank H., assignor to Nicholas Power Company, Inc., New York, N. Y. Radially-opening fire shutter. 1,533,151; Apr. 14.
Viel, Georges, St. Etienne, France. Transmission of electric energy. 1,533,623; Apr. 14.
Vivas, Fernando S., Oakland, Calif. Water and fire proofing timber. 1,533,526; Apr. 14.
Voorhees, Elvan M. (See Stinson, Hugh B., assignor.)
Voorheis, Joseph T., Oakland, assignor to Coen Co., Inc., San Francisco, Calif. Burner head and mounting. 1,533,482; Apr. 14.
Voress, Clyde L., V. C. Canter, and R. W. Skoog, Charleston, W. Va. Process and apparatus for the recovery of gaseous vapors. 1,533,716; Apr. 14.
Voss, Jack, Boyden, Iowa. Exhaust-gas remover. 1,533,483; Apr. 14.
Vulcan Last Company, The. (See Searl, Clinton M., assignor.)
Wadell, Albert H., Newark, N. J. Piston. 1,533,152; Apr. 14.
Wadsworth Watch Case Company, The. (See Conant, Arthur P., assignor.)
Wagner, Emil, Loveland, Colo. Electric soldering device. 1,533,959; Apr. 14.
Waisman, Abraham. (See Basskin, B., and Waisman.)
Walden-Worcester, Inc. (See Bellows, Warren S., assignor.)
Walker, George W., Platteville, Wis. Animal-spraying attachment for milking machines. 1,533,578; Apr. 14.
Walker, Hobart A., jr., Maplewood, N. J. Dust collector. 1,533,777; Apr. 14.
Walker Manufacturing Company. (See Dearsley, Irwin E., assignor.)
Walker, William H., Bridgton, Me., assignor, by mesne assignments, to Elliott Company, Pittsburgh, Pa. Purifying water. 1,533,778; Apr. 14.
Waller, Warren E., Charles City, Iowa. Poultry rack. 1,533,484; Apr. 14.

Ward Leonard Electric Company. (See Bullinger, Frederic H., assignor.)
Ward, William J., San Francisco, Calif. Tobacco box. 1,533,527; Apr. 14.
Warner Gear Company. (See White, Samuel O., assignor.)
Warren Clock Company. (See Warren, Henry E., assignor.)
Warren, Henry E., Ashland, Mass., assignor to General Electric Company. Motor-operated time switch. 1,533,677; Apr. 14.
Warren, Henry E., Ashland, Mass., assignor to Warren Clock Company. Electric-clock system. 1,533,678; Apr. 14.
Washburn, Willis F., assignor to National Pigments & Chemical Company, St. Louis, Mo. Bleaching barytes. 1,533,779; Apr. 14.
Washington Steel Form Company. (See Wells, Hewitt, assignor.)
Waterbury Clock Co., The. (See Wehinger, Frederick, assignor.)
Waterloo Gasoline Engine Company. (See McCray, Harold E., assignor.)
Watson, Charles P., York, Pa. Percussion fuse. 1,534,011; Apr. 14.
Watson, Charles P., York, Pa. Percussion fuse. 1,534,012; Apr. 14.
Watson, Minnie H., et al. (See Bath6, Charles G., assignor.)
Weaver, John A., Greeley, Colo. Massage instrument. 1,533,528; Apr. 14.
Webb, George E., assignor to Koehring Company, Milwaukee, Wis. Concrete-pavement-finishing machine. 1,533,485; Apr. 14.
Webber, Joseph A., Vancouver, Wash. Log-splitting gun. 1,533,579; Apr. 14.
Webster, Ralph C., Haverhill, Mass. Traction grip for tires. 1,533,679; Apr. 14.
Wehinger, Frederick, assignor to The Waterbury Clock Co., Waterbury, Conn. Clock movement. 1,533,529; Apr. 14.
Weinberg, Max. (See Bailer, F. W., and Weinberg.)
Weinrott, Emil B., Molino, Ill. Ventilated head garment. 1,533,624; Apr. 14.
Welch, Augustine W., Philadelphia, Pa., assignor to Columbia Salvage Corporation, New York, N. Y. Method and apparatus for removing primers from artillery-cartridge casings. 1,533,486; Apr. 14.
Wells, Hewitt, assignor to Washington Steel Form Company, Washington, D. C. Form for concrete construction. 1,533,960; Apr. 14.
West, Henry, Oakland, Calif. Side-necked dropping bottle. 1,533,358; Apr. 14.
Western Electric Company. (See Beatty, William E., assignor.)
Western Electric Company. (See Brownell, Frederick J., assignor.)
Western Electric Company. (See Clausen, H. P., and Goodrum, assignors.)
Western Electric Company. (See Dowd, Andrew D., assignor.)
Western Electric Company. (See Fletcher, Harvey, assignor.)
Western Electric Company. (See Gilbert, John J., assignor.)
Western Electric Company. (See Goff, Harold W., assignor.)
Western Electric Company. (See Goodrum, Charles L., assignor.)
Western Electric Company. (See Hargan, Augustus D., assignor.)
Western Electric Company. (See Keckler, Charles W., assignor.)
Western Electric Company. (See Kelsay, Le Roy W., assignor.)
Western Electric Company. (See Lundius, Eric R., assignor.)
Western Electric Company. (See Malm, Frank S., assignor.)
Western Electric Company. (See Murphy, Paul B., assignor.)
Western Electric Company. (See Pfannenstiehl, Harry, assignor.)
Western Electric Company. (See Radu, John W., assignor.)
Western Electric Company. (See Rainey, P. M., and Locke, assignors.)
Western Electric Company. (See Stearn, F. A., and McAuliffe, assignors.)
Western Electric Company. (See Williams, Samuel B., jr., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Lewis, Lloyd V., assignor.)
Westinghouse Air Brake Company, The. (See Thomas, Thomas H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Baker, Ralph, assignor.)
Westinghouse Electric & Manufacturing Company. (See Baumann, Karl, assignor.)
Westinghouse Electric & Manufacturing Company. (See Chubb, Lewis W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Colby, Ora A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Crichton, Leslie N., assignor.)
Westinghouse Electric & Manufacturing Company. (See Dobson, John V., assignor.)
Westinghouse Electric & Manufacturing Company. (See Eschholz, Otto H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Fortescue, Charles L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hands, Howard A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Johnston, Howard H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Little, George M., assignor.)

Westinghouse Electric & Manufacturing Company. (See Woodson, James C., assignor.)
Westinghouse Electric Products Company. (See Forshee, Frank F., assignor.)
Westinghouse Electric Products Company. (See Woodson, James C., assignor.)
Wheatley, Russell H., and L. C. Clark, North Abington, Mass. Indicator. 1,533,530; Apr. 14.
Whipp, John W., assignor of one-half to M. H. Moore, Fort Worth, Tex. Knee protector. 1,533,907; Apr. 14.
White, Charles E., Moline, Ill. Harvesting machine. 1,533,359; Apr. 14.
White, Samuel O., assignor to Warner Gear Company, Muncie, Ind. Auxiliary transmission. 1,533,531; Apr. 14.
White, William L., Newburgh, N. Y. Game apparatus. 1,533,487; Apr. 14.
Whitehead, Robert R., assignor to Tentobed Company, Chicago, Ill. Camper's tent. 1,533,820; Apr. 14.
Whitney, Ernest L. (See Tromans, T., and Whitney.)
Wiarda, John C., & Co. (See Mullen, George W., assignor.)
Wickersham, Harry P., Walnut Park, Calif. Well-drilling bit. 1,533,286; Apr. 14.
Wiederhold, Oscar, Philadelphia, Pa. Electrically-actuated gauge. 1,533,680; Apr. 14.
Wiedrick, Nathaniel W., et al. (See Bath6, Charles G., assignor.)
Wilkinson, Walter, Philadelphia, Pa. Picker stick. 1,533,532; Apr. 14.
Williams, Harry, et al. (See Baker, Bert C., assignor.)
Williams, James E., Spring City, Pa. Shoe. 1,533,287; Apr. 14.
Williams, John H., West Palm Beach, Fla. Inlay vulcanizer and press. 1,533,625; Apr. 14.
Williams, Samuel B., jr., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,533,153; Apr. 14.
Williams, Samuel B., jr., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Circuit-controlling apparatus. 1,533,154; Apr. 14.
Williamson, William P., and A. C. Quimby, Ludlow, Mass. Safety device for automobiles. 1,533,717; Apr. 14.
Wilson, Emmet, Calexico, Calif. Suitcase and luggage holder. 1,533,488; Apr. 14.
Wilson, Frederick D., and L. S. Burns, Harvey, assignors, by mesne assignments, to Austin Manufacturing Co., Chicago, Ill. Transmission device. 1,533,626; Apr. 14.
Wilson-Jones Loose Leaf Company. (See Meyer, A. R., and Reed, assignors.)
Wilson-Jones Loose Leaf Company. (See Newman, George W., assignor.)
Wilson, Lydon F. (See Becker, Ernest, assignor.)
Winters, Alexander F., and B. R. Crampton, Grand Rapids, Mich. Latch. 1,533,489; Apr. 14.
Wirfs, Edward J., St. Louis, Mo. Weather strip. 1,533,490; Apr. 14.
Wirrer, Gottfried, Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Combustion chamber for oil-burning furnaces. 1,533,533; Apr. 14.
Wisser, William R. (See Stella, J., and Wisser.)
Witkus, Frank F., Newport, N. H. Tip-perforating machine. 1,533,681; Apr. 14.
Wolf, Harry G. (See Keefer, Walter L., assignor.)
Wollaston, Thomas R., Manchester, England. Device for deflecting, opening, and crushing fuel or material in a retort above a gas producer. 1,533,718; Apr. 14.
Wolter, Henry J., St. Cloud, Minn. Toy gun. 1,533,908; Apr. 14.
Wolverine Bumper & Specialty Company. (See Godwin, Arthur M., assignor.)

Wood, Gerritt V. (See Hanks, G. R., and Wood.)
Wood, Robert F., assignor to The Paper & Textile Machinery Company, Sandusky, Ohio. Casting process and apparatus. 1,533,780; Apr. 14.
Wood, William H., South Euclid, Ohio. Automobile light. 1,533,360; Apr. 14.
Woodhouse, Benjamin, Seattle, Wash. Plaster board. 1,533,580; Apr. 14.
Woodson, James C., Mansfield, Ohio, assignor to Westinghouse Electric Products Company. Electric muffle furnace. 1,533,288; Apr. 14.
Woodson, James C., Mansfield, Ohio, assignor to Westinghouse Electric Products Company. Street-car heater. 1,533,289; Apr. 14.
Woodson, James C., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric candy-warming table. 1,533,290; Apr. 14.
Woodson, James C., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Steriliser heater. 1,533,291; Apr. 14.
Woodson, James C., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrically-heated device. 1,533,292; Apr. 14.
Woodson, James C., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric heating unit. 1,533,293; Apr. 14.
Woolf, Millard O., Oatville, Kans. Intake attachment for air washers. 1,533,719; Apr. 14.
Worthington Pump and Machinery Corporation. (See Feustman, Leon P., assignor.)
Woywot, Walter J., assignor of one-half to H. Zaeseck, Chicago, Ill. Ash receiver. 1,533,682; Apr. 14.
Wright, George F., and A. S. Knapp, assignors to G. F. Wright Steel & Wire Company, Worcester, Mass. Furnace for heat treatment of metal. 1,533,491; Apr. 14.
Wright, G. F., Steel & Wire Company. (See Wright, G. F., and Knapp, assignors.)
Yocum, Charles P., assignor to The Buckeye Traction Ditcher Company, Findlay, Ohio. Rooter-tooth attachment for excavating buckets. 1,533,781; Apr. 14.
Zaeseck, Hugo. (See Woywot, Walter J., assignor.)
Zanon, Remo C., assignor of one-half to J. J. Ferlin, Modesto, Calif. Mowing attachment for tractors. 1,533,492; Apr. 14.
Zaremba Company. (See Hughes, Burton S., assignor.)
Ziegler, Robert, Chicago, Ill. Level and plumb. 1,533,961; Apr. 14.
Zinner, Edith, Miles City, Mont. Flytrap. 1,533,294; Apr. 14.
Zitterbart, Anthony, assignor to M. Strodel, Buffalo, N. Y. Window-operating mechanism. 1,533,155; Apr. 14.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 14TH DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Accelerator. D. Božić. 1,533,692; Apr. 14.
Aeroplane. J. D. Hornbuckle sr. 1,533,553; Apr. 14.
Aeroplanes, Location of benzine tanks in. A. H. G. Fokker. 1,533,312; Apr. 14.
Agricultural implement. I. E. McGee. 1,533,878; Apr. 14.
Air compressor. C. M. Tursky. 1,533,958; Apr. 14.
Air-conditioning system. W. B. Hodge. 1,533,859; Apr. 14.
Aircraft fuselage. A. V. Verville. 1,533,285; Apr. 14.
Aircraft, Shock absorber suitable for use on. H. P. Folland and H. E. Preston. 1,533,844; Apr. 14.
Airplanes, Annular radiator mounting for. A. V. Verville. 1,533,284; Apr. 14.
Airship or the like, Gyroscopic apparatus having a means for indicating the inclined position of an. W. Otto. 1,533,941; Apr. 14.
Air washers, Intake attachment for. M. O. Woolf. 1,533,719; Apr. 14.
Airway-cleaning apparatus. D. B. Replogle. 1,533,271; Apr. 14.
Alloy, Steel. B. Strauss. 1,533,712; Apr. 14.
Alloys, Manufacture of. R. C. Stanley. 1,533,818; Apr. 14.
Alloys to one another or to other metals or alloys, a flux for use therein, and the product thereof, Uniting pieces of certain. H. P. Cleveland. 1,533,539; Apr. 14.
Amalgamator. W. P. Jobson and H. S. Souder. 1,533,557; Apr. 14.
Ammunition. H. P. Martin and O. D. Lucas. 1,533,199; Apr. 14.
Ammunition, Method and apparatus for salvaging artillery. G. Allison. 1,533,088; Apr. 14.
Amusement device. C. D. Hutchins. 1,533,914; Apr. 14.
Anchor lock, Disappearing. F. E. Best. 1,533,629; Apr. 14.
Animal-restraining device. G. L. Short. 1,533,953; Apr. 14.
Animal trap. V. M. Frogge. 1,533,589; Apr. 14.
Annealing box. H. H. Hummel. 1,533,249; Apr. 14.
Annealing furnace, Double-chamber. T. A. Reid. 1,533,266; Apr. 14.
Annealing furnace or leer. W. O. Amsler. 1,533,298; Apr. 14.
Armature-coil heating, Method and apparatus for preventing. C. L. Fortescue. 1,533,242; Apr. 14.
Armature-coil heating, Preventing. J. Slepian. 1,533,277; Apr. 14.
Arm band and the like. E. A. Olson. 1,533,996; Apr. 14.
Ash receiver. W. J. Woywot. 1,533,682; Apr. 14.
Audions, Neutralizing capacity coupling in. L. A. Hazeltine. 1,533,858; Apr. 14.
Auto serving set. C. E. Hart. 1,533,857; Apr. 14.
Auto shade. J. W. Foley. 1,533,731; Apr. 14.
Autographic register. H. H. Konerman. 1,533,320; Apr. 14.
Automobile bumper. I. Feiner. 1,534,010; Apr. 14.
Automobile bumper clamp. W. E. Dunston. Des. 67,021; Apr. 14.
Automobile dash and body construction. J. S. Booth. 1,533,093; Apr. 14.
Automobile guard. S. Smith. 1,533,214; Apr. 14.
Automobile light. W. H. Wood. 1,533,360; Apr. 14.
Automobile protector. J. S. Miller, jr. 1,533,508; Apr. 14.
Automobile reflecting device. S. Mógor. 1,533,937; Apr. 14.
Automobile safety device. L. B. Curtis. 1,533,635; Apr. 14.
Automobile safety device. W. P. Williamson and A. C. Quimby. 1,533,717; Apr. 14.
Automobile spring spreader. G. L. E. Klingbeil. 1,533,992; Apr. 14.
Automobile starting mechanism. O. Brisbois. 1,533,373; Apr. 14.
Automobile step plate. C. A. Dunham. Des. 67,020; Apr. 14.
Automobile top. M. Noble. 1,533,448; Apr. 14.
Automobile transmission. S. I. Fekete and S. G. Baits. 1,533,641; Apr. 14.
Automobiles, Folding top frame for. E. S. Tomkins and A. Mair. 1,533,148; Apr. 14.
Autotruck. F. C. Schlack. 1,533,518; Apr. 14.
Axles, Apparatus for making metallic. C. G. Steele. 1,533,670; Apr. 14.
Bag: *See*—
Hand bag.
Bag fastener. W. C. Hiering. 1,533,189; Apr. 14.
Bag-frame registering and handle connection. H. Tueckmantel. 1,533,149; Apr. 14.
Bag holder. J. O. and E. H. Herman. 1,533,114; Apr. 14.
Bag-mounting appliance. W. A. Shields. 1,533,666; Apr. 14.
Ball-mill lining. R. H. Baker. 1,534,000; Apr. 14.
Bandit trap. E. Galterio. 1,533,243; Apr. 14.
Bank, Recording book. J. Levine. 1,533,600; Apr. 14.
Barytes, Bleaching. W. F. Washburn. 1,533,779; Apr. 14.
Battery and condenser, Combination electric. H. R. Van Deventer. 1,533,525; Apr. 14.
Battery and rectifier, Combined storage. W. Threm. 1,533,906; Apr. 14.
Battery unit, Dry-cell. J. E. Peavey. 1,533,335; Apr. 14.
Bearing. F. W. Gurney. 1,533,184; Apr. 14.
Bearing for couplers, Cylinder. C. L. Shine. 1,533,472; Apr. 14.
Bearing, Metal. J. G. Kelly, A. L. Pringle, and H. Hall. 1,533,118; Apr. 14.
Bearing separator, Ball. F. W. Gurney. 1,533,185; Apr. 14.
Bearings, Assembling roller. C. I. Lott. 1,533,746; Apr. 14.
Beefsteak, Machine for tendering. S. P. Mickey. 1,533,882; Apr. 14.
Belt-length calculator. G. R. Fickert. 1,533,981; Apr. 14.
Bench. L. G. Haase. Des. 67,030; Apr. 14.
Binder posts, Mechanism for shifting. A. E. Meyer and E. A. Reed. 1,533,442; Apr. 14.
Bit: *See*—
Well-drilling bit.
Bitumen, tar, and other substances, Apparatus for heating. F. Coleman. 1,533,390; Apr. 14.
Bleaching process and means. W. O. Kaiser. 1,533,917; Apr. 14.
Board: *See*—
Game board. Plaster board.
Boat, Combined pleasure and fishing. C. G. Bathé. 1,533,866; Apr. 14.
Bobbin. R. D. Heymann. 1,533,913; Apr. 14.
Boiler: *See*—
Steam boiler.
Boiler. L. C. Loewenstein and H. N. Davis. 1,533,706; Apr. 14.
Boiler construction. C. V. Paterno. 1,533,807; Apr. 14.
Boiler tubes, Apparatus and method for cleaning. F. W. Linaker and T. M. Bruback. 1,533,873; Apr. 14.
Boll-weevil destroyer. J. S. Glover. 1,533,851; Apr. 14.
Boll-weevil machine. J. M. Sanches. 1,533,276; Apr. 14.
Bolt snap. W. A. Schleicher. 1,533,812; Apr. 14.
Book or pamphlet covering machine. J. J. Pleger. 1,533,895; Apr. 14.
Bookbinding. E. J. Cross. 1,533,102; Apr. 14.
Boots and shoes. Apparatus for cleaning. P. Schmalfuss. 1,533,765; Apr. 14.
Bottle. J. P. Curran. Des. 67,015–16; Apr. 14.
Bottle. P. A. Ginter. Des. 67,023–6; Apr. 14.
Bottle, Side-necked dropping. H. West. 1,533,358; Apr. 14.
Box: *See*—
Annealing box. Match box.
Junction box. Print box.
Mail box. Tobacco box.
Box filler. O. B. Newman. 1,533,890; Apr. 14.
Box or the like, Collapsible. E. Day. 1,533,636; Apr. 14.
Box partitioning and making the same. L. E. La Bombard and M. H. Sidebotham. 1,534,006; Apr. 14.
Boxes, Corner-fastening means for folding. J. Stella and W. R. Wisser. 1,533,478; Apr. 14.
Brace: *See*—
Fence brace. Fruit-box brace.
Fruit brace.
Bracelet. H. L. Lambert. Des. 67,039; Apr. 14.
Bracelet, Watch. S. L. Lederer. Des. 67,040; Apr. 14.
Bracket: *See*—
Shade and curtain bracket. Trunk-rack bracket.
Supporting bracket.
Brake: *See*—
Internal brake. Vehicle brake.
Brake-band control. C. R. Reckart. 1,533,945; Apr. 14.
Brake device, Fluid-pressure. T. H. Thomas. 1,533,481; Apr. 14.

Brake equalizer. F. L. Odenbrett. 1,533,755; Apr. 14.
Breathing bag for self-contained breathing apparatus. A. B. Dräger. 1,533,172; Apr. 14.
Brickwork, Implement for use in hand. C. T. Lutz. 1,533,934; Apr. 14.
Bridge, Multiple-span. C. G. E. Larsson. 1,533,927; Apr. 14.
Brooder. H. H. Hall. 1,533,186; Apr. 14.
Brooder house. H. M. and C. R. Stauffer. 1,533,905; Apr. 14.
Brush, Fountain. J. E. Pyrtle. 1,533,899; Apr. 14.
Brush, Hair-drying. J. M. Holchin. 1,533,416; Apr. 14.
Brush holder. J. V. Dobson. 1,533,287; Apr. 14.
Bucket. A. E. Norris. 1,533,512; Apr. 14.
Buckle, Belt. S. Jaso. 1,533,650; Apr. 14.
Buckle strap. H. A. Krezdorn. 1,533,924; Apr. 14.
Bumper impact bar. H. Taylor, Des. 67,061; Apr. 14.
Burner: *See*—
Gas burner. Oil burner.
Burner. E. C. Corado. 1,533,833; Apr. 14.
Burner carburetor combination. J. Good. 1,533,107; Apr. 14.
Burner head and mounting. J. T. Voorheis. 1,533,482; Apr. 14.
Calculating machines having a key adjustment, Printing mechanism for Thomas. H. Cordt. 1,533,393; Apr. 14.
Cameras, Multiple-exposure attachment for. S. C. Linden. 1,533,433; Apr. 14.
Can-filling machine. C. H. Ayars. 1,533,536; Apr. 14.
Can opener. F. B. La May. 1,533,599; Apr. 14.
Candy-warming table, Electric. J. C. Woodson. 1,533,290; Apr. 14.
Cap. D. Rothenberg. Des. 67,049; Apr. 14.
Car buffer. C. Hieri. 1,533,414; Apr. 14.
Car-door control signaling and announcing system, Combined multiple-unit. F. Hedley and J. S. Doyle. 1,533,111; Apr. 14.
Car-door-locking means. J. Kartheiser. 1,533,427; Apr. 14.
Car dumper. G. N. Simpson. 1,533,667; Apr. 14.
Car heater, Street. O. A. Colby. 1,533,226–7; Apr. 14.
Car heater, Street. J. C. Woodson. 1,533,289; Apr. 14.
Car, Mine. H. W. Sanford. 1,533,762; Apr. 14.
Car, Railway. H. W. Sanford. 1,533,761; Apr. 14.
Car roof, Metal. A. J. Canfield and E. R. Viberg. 1,533,384; Apr. 14.
Car, Selective dump. H. S. Hart. 1,533,408; Apr. 14.
Car, Steel grain. J. A. Hyle. 1,533,862; Apr. 14.
Cars, Drop door for dumping. W. R. Prout. 1,533,571; Apr. 14.
Cars, Mechanically-operated multiple-unit door-control system for. F. Hedley and J. S. Doyle. 1,533,110; Apr. 14.
Cars, Safety control mechanism for. H. Rowntree. 1,533,142; Apr. 14.
Carbureting device. H. E. McCray. 1,533,196; Apr. 14.
Carburetors, Air-regulating attachment for. W. Falwell. 1,533,980; Apr. 14.
Card holder. M. H. Malwitz. 1,533,880; Apr. 14.
Card-registering machine. C. W. Dibble and M. Phillips. 1,533,700; Apr. 14.
Carrier: *See*—
Egg carrier.
Cartons, Machine for making taped. H. S. Labombarde. 1,534,007; Apr. 14.
Cartridge casings, Method and apparatus for removing primers from artillery. A. W. Welch. 1,533,486; Apr. 14.
Case: *See*—
Vanity case.
Casting apparatus and process of casting. C. E. Hopkins. 1,533,649; Apr. 14.
Casting freely-oxidizable metal. H. H. Osborne. 1,533,892; Apr. 14.
Casting machine, Centrifugal. W. H. Millspaugh. 1,533,202; Apr. 14.
Casting machine, Die. J. Soss and L. H. Morin. 1,533,617; Apr. 14.
Casting process and apparatus. R. F. Wood. 1,533,780; Apr. 14.
Catalysts used in the hydrogenation of oils and like substances, Preparation and reactivation of metallic. E. J. Lush. 1,533,932; Apr. 14.
Centrifugal machine for emulsifying, Adjustable. E. M. Ferns. 1,533,843; Apr. 14.
Chain, Ornamental. L. J. Anshen. 1,533,822; Apr. 14.
Chain tightener, Motor-vehicle. O. L. Hutchcroft; 1,533,421; Apr. 14.
Chandelier, Five-light body holder for a. J. Schaffer. Des. 67,063; Apr. 14.
Chandelier or article of similar nature. I. Rosenblatt. Des. 67,051; Apr. 14.
Chandelier, Two-light body holder for a. J. Schaffer. Des. 67,064; Apr. 14.
Charging apparatus. H. C. Freedenburg. 1,533,847; Apr. 14.
Check-controlled apparatus. D. J. Butterfield. 1,533,538; Apr. 14.
Chill mold. O. Götze. 1,533,734; Apr. 14.
Cigarette container. P. R. Heygel. 1,533,413; Apr. 14.
Cipher-cut-out mechanism. W. W. Lasker. 1,533,119; Apr. 14.
Circuit-breaker system, Automatic reclosing. E. C. Britton. 1,533,693; Apr. 14.
Circuit-breaking terminal. G. H. Clark. 1,533,972; Apr. 14.
Circuit-controlling apparatus. S. B. Williams, jr. 1,533,154; Apr. 14.
Circuit excitation, Plate. J. Slepian. 1,533,278; Apr. 14.
Circuit maker and breaker, Automatic. H. N. Shaw. 1,533,770; Apr. 14.
Circuits for central-office senders, Routine test. F. A. Stearn and J. C. McAuliffe. 1,533,477; Apr. 14.
Clamp: *See*—
Line clamp.
Clamps, Excess-pressure attachment for. L. T. Bergh. 1,533,688; Apr. 14.
Clasp: *See*—
Concealed clasp.
Cleaner: *See*—
Nail cleaner. Window or windshield cleaner.
Tube cleaner.
Vacuum cleaner.
Cleaning and polishing composition. J. E. Catlett. 1,533,386; Apr. 14.
Clip: *See*—
Paper clip.
Clip. I. Salz. 1,533,466; Apr. 14.
Clipper attachment. C. Z. Mani. 1,533,564; Apr. 14.
Clock movement. F. Webinger. 1,533,529; Apr. 14.
Clock system, Electric. H. E. Warren. 1,533,678; Apr. 14.
Closure fastener. J. Malicki. 1,533,259; Apr. 14.
Clothesrack. O. G. Schmitt. 1,533,470; Apr. 14.
Clutch-controlling mechanism. A. E. Rhoades. 1,533,516; Apr. 14.
Clutch, Friction. F. Tandel. 1,533,955; Apr. 14.
Clutch mechanism. D. Noble. 1,533,205; Apr. 14.
Cocks, Protective cage for blow-off. E. Becker. 1,533,088; Apr. 14.
Coding and decoding machine. H. A. Koch. 1,533,252; Apr. 14.
Coil, Induction. V. Greiff and L. F. Curtis. 1,533,797; Apr. 14.
Coin-assorting apparatus. A. Godefroid. 1,533,244; Apr. 14.
Coin, Pocket. W. A. Hartline. Des. 67,082; Apr. 14.
Coin receptacle, Safety. W. C. Norris. 1,533,332; Apr. 14.
Comb: *See*—
Unbreakable comb.
Comb. E. A. Abeel. 1,533,684; Apr. 14.
Comb and barrette, Combination hair. J. Burkhart. 1,533,380; Apr. 14.
Combination lifter. B. F. Davis. 1,533,726; Apr. 14.
Compass and magnetic-dip indicator. C. G. Abbot. 1,533,683; Apr. 14.
Concealed clasp. B. Gerla. 1,533,702; Apr. 14.
Concrete-construction form. H. Wells. 1,533,960; Apr. 14.
Concrete floors, Ceiling for. C. A. Smith. 1,533,817; Apr. 4.
Concrete, mortar, and the like, Method and machine for mixing, conveying, and distributing. E. Bongardt. 1,534,008; Apr. 14.
Concrete-pavement-finishing machine. G. E. Webb. 1,533,485; Apr. 14.
Concrete step. H. A. Daly. 1,533,166; Apr. 14.
Condenser. R. N. Ehrhart. 1,533,840; Apr. 14.
Condenser. H. O. Russell and C. L. Paulus. 1,533,334; Apr. 14.
Condiment holder. J. Di Bernardi. 1,533,582; Apr. 14.
Control mechanism. D. F. Cashman. 1,533,222; Apr. 14.
Control system. L. W. Chubb. 1,533,223; Apr. 14.
Core-forming apparatus. T. H. Brown. 1,533,375; Apr. 14.
Corn-husking machine. H. L. Nelson. 1,533,657; Apr. 14.
Corner glue joint, Square. R. E. Carroll. 1,533,090; Apr. 14.
Cotton-cleaning machine. V. Harlan. 1,533,593; Apr. 14.
Cotton stamper. J. O. McCoy. 1,533,804; Apr. 14.
Cowl, Ship-ventilator. W. H. Singleton. 1,533,344; Apr. 14.
Crank shafts and the like, Hydraulic press for. W. W. Linder. 1,533,560; Apr. 14.
Crucible furnace, Electric. T. A. Reid. 1,533,265; Apr. 14.
Crusher. A. J. Jorgensen. 1,533,991; Apr. 14.
Crusher. R. C. Newhouse. 1,533,658; Apr. 14.
Cultivators, Weeding attachment for. L. J. Stone. 1,533,673; Apr. 14.
Currents, Apparatus for and process of treating with high-tension. E. W. Stevens. 1,533,711; Apr. 14.
Curtain rod. W. C. Kenney. Des. 67,086; Apr. 14.
Curtain support. J. H. Boye. 1,533,308; Apr. 14.
Cut-off, Lock-controlled. F. C. Eckelman. 1,533,978; Apr. 14.
Cutter-bar jack. J. Lapshansky. 1,533,559; Apr. 14.
Cutter: *See*—
Ensilage cutter.
Cutter for cheese, butter, and the like. H. A. O. Möller. 1,533,445; Apr. 14.
Cutter head, Adjustable. W. H. Toole. 1,533,575; Apr. 14.
Cutting stick. J. H. Lindsay. 1,533,124; Apr. 14.
Cylinder, Air-cooled. C. S. Ricker. 1,533,810; Apr. 14.

Dashpot mounting. S. G. Crane. 1,533,101; Apr. 14.
Decorative articles, Making. R. Baker. 1,533,300; Apr. 14.
Dehydrator for nuts. F. C. Chapman. 1,533,388; Apr. 14.
Dental casting device and process. J. C. Shotton. 1,533,474; Apr. 14.
Derail signal, Automatic. F. Butorac. 1,533,632; Apr. 14.
Derrick assembly, Tubular-drilling. C. J. Goggler. 1,533,590; Apr. 14.
Detonators, Secondary charge for compound. B. Grotta. 1,533,798; Apr. 14.
Diaphragm plate, Adjustable. R. W. Todd. 1,533,532; Apr. 14.
Digging device, Stream-bed-. A. Johnson. 1,533,423; Apr. 14.
Direction indicator. C. J. Erson. 1,533,841; Apr. 14.
Dish, Combination serving. W. H. Magee and E. M. Bottome. Des. 67,042; Apr. 14.
Dispensing machine. S. R. Svendsgaard. 1,533,147; Apr. 14.
Display containers, Detachable closure for. H. Hermani. 1,533,497; Apr. 14.
Distillation apparatus. G. Egloff and H. P. Benner. 1,533,173; Apr. 14.
Ditcher. A. G. and A. Ronning. 1,533,901; Apr. 14.
Doll or similar article. S. Haskell. Des. 67,031; Apr. 14.
Doorcheck. F. J. Colchin. 1,533,831; Apr. 14.
Door construction. H. Malarkey. 1,533,881; Apr. 14.
Door construction, Side-. K. J. Tobin and W. W. Darrow. 1,533,620; Apr. 14.
Door fastener. W. A. Schleicher. 1,533,811; Apr. 14.
Door-latching mechanism. A. Christianson. 1,533,828; Apr. 14.
Doorlock. S. D. Butterworth. 1,533,826; Apr. 14.
Door-shoe construction. P. R. Forman. 1,533,106; Apr. 14.
Doorstop. K. H. Beck and E. H. Blackburn. 1,533,687; Apr. 14.
Doors, Control mechanism for motor-actuated. F. Hedley and J. S. Doyle. 1,533,112; Apr. 14.
Draft, Apparatus for obtaining artificial. G. J. A. L. Prat. 1,533,898; Apr. 14.
Dredge bucket and lip therefor. G. R. Hanks and G. V. Wood. 1,533,910; Apr. 14.
Dredge, Hydraulic. F. A. Rowe. 1,533,465; Apr. 14.
Dress. T. Davis. Des. 67,017; Apr. 14.
Drier: *See*—
Laundry drier. Paper-machine drier.
Drier. W. Stricker. 1,533,480; Apr. 14.
Drill: *See*—
Portable drill. Multiple drill.
Drills, Gauge or leveling device for electric or other. C. A. Dene. 1,533,975; Apr. 14.
Drills, Riding attachment for grain. C. F. Ryba. 1,533,143; Apr. 14.
Dropper: *See*—
Medicine dropper.
Dust collector. H. A. Walker, jr. 1,533,777; Apr. 14.
Dustpan. H. Gehman. 1,533,849; Apr. 14.
Dustpan. L. W. Moore. 1,533,938; Apr. 14.
Dyeing textile and like material. M. Scholz. 1,533,769; Apr. 14.
Ear treatment, Instrument for. J. Taylor, jr. 1,533,618; Apr. 14.
Eccentric connections, Antifriction device for. J. F. Schimek. 1,533,763; Apr. 14.
Edible container. J. Denaro. Des. 67,018; Apr. 14.
Educational device. A. J. Macy. 1,533,437; Apr. 14.
Educational game. C. Lederer. 1,533,122; Apr. 14.
Egg carrier. F. W. Doge. 1,533,836; Apr. 14.
Egg separator. A. E. Bruffee. 1,533,377; Apr. 14.
Electric accumulator. A. Pouchain. 1,533,569; Apr. 14.
Electric-energy transmission. G. Viel. 1,533,623; Apr. 14.
Electric furnace. O. A. Colby. 1,533,232; Apr. 14.
Electric furnace. G. M. Little. 1,533,255; Apr. 14.
Electric furnace. T. A. Reid. 1,533,269; Apr. 14.
Electric heater. E. W. Black. 1,533,090; Apr. 14.
Electric heater. S. M. and J. H. Carmean. 1,533,098; Apr. 14.
Electric iron. A. M. MacFarland. 1,533,258; Apr. 14.
Electric line, Artificial. J. J. Gilbert. 1,533,178; Apr. 14.
Electric muffle furnace. J. C. Woodson. 1,533,288; Apr. 14.
Electric receptacle. T. A. Both. 1,533,690; Apr. 14.
Electric resistance furnace. O. A. Colby. 1,533,224; Apr. 14.
Electric socket. J. Hohl. 1,533,415; Apr. 14.
Electric switch. W. Adams. 1533,295; Apr. 14.
Electric switch. H. H. Johnston. 1,533,251; Apr. 14.
Electrical condenser and manufacturing the same. W. R. Respess. 1,533,611; Apr. 14.
Electrical seal. P. H. Paulen. 1,533,452; Apr. 14.
Electrical variations to mechanical, Apparatus for changing. K. Rabbek and F. A. Johnsen. 1,533,757; Apr. 14.
Electrically-actuated gauge. O. Wiederhold. 1,533,680; Apr. 14.
Electricity-distributing systems, Surface wiring for. T. Martin-Harvey. 153,936; Apr. 14.
Electrode for electric accumulators, Negative. A. Pouchain. 1,533,568; Apr. 14.
Electrolytic production of magnesium. W. G. Harvey. 1,533,911; Apr. 14.
Electroplating metal and forming articles therefrom, Apparatus and process for. G. W. Newman. 1,533,447; Apr. 14.
Electroplating rack. E. C. Oliver. 1,533,805; Apr. 14.
Electrotypes, Making. G. W. Mullen. 1,533,656; Apr. 14.
Elevator: *See*—
Portable elevator.
End gate. A. Roberts. 1,533,275; Apr. 14.
Engine: *See*— Internal-combustion engine.
Explosion engine. Rotary engine.
Gas engine.
Engine-starting system. C. H. Davis, jr. 1,533,104; Apr. 14.
Engines, Apparatus for separating and binding dust or other impurities in combustion air of combustion. K. Schroeder. 1,533,813; Apr. 14.
Engines, Automatic control of the temperature in the water jackets of internal-combustion. C. F. Pizzey. 1,534,005; Apr. 14.
Engines, Charge-forming device for internal-combustion. H. T. Thomas. 1,533,775; Apr. 14.
Engines, Cooling system for internal-combustion. W. S. Carr. 1,533,827; Apr. 14.
Engines, Fuel heater for internal-combustion. H. E. Harkin. 1,533,855; Apr. 14.
Engines, Reserve-oil supply for vehicle. F. D. Hanes. 1,533,592; Apr. 14.
Engines, Speed-control appliance for fluid-pressure. A. W. Bruce. 1,533,304; Apr. 14.
Engines, Valve for internal-combustion. P. A. E. Armstrong. 1,533,782; Apr. 14.
Engines, Water-circulating system for automobile. C. R. Schmidt. 1,533,469; Apr. 14.
Ensilage cutter. A. G. and A. Ronning. 1,533,902; Apr. 14.
Explosion engine, Two-stroke. J. de Cosmo. 1,533,727; Apr. 14.
Eyeglasses and spectacles. H. Newbold and A. J. Harrison. 1,533,754; Apr. 14.
Eyeglasses, Ear clip for. J. Jirasek. 1,533,190; Apr. 14.
Explosive charges, Device for insuring uniform pressure upon. B. Grotta. 1,533,406; Apr. 14.
Excavating buckets, Rooter-tooth attachment for. C. F. Yocum. 1,533,781; Apr. 14.
Extractor: *See*—
Fruit-juice extractor.
Fabric and producing same. W. J. Fox. 1,533,544; Apr. 14.
Fabrics and the product thereof, Treating. J. S. Hoffman. 1,533,598; Apr. 14.
Fan. L. M. Dabney. 1,533,396; Apr. 14.
Fan, Prepayment electric. G. E. Le Count. 1,533,652; Apr. 14.
Faucet, Safety lock. G. W. Derman and J. A. Monighan. 1,533,398; Apr. 14.
Feeder and scales. J. A. Nolan. 1,533,940; Apr. 14.
Feeder, Stock. E. H. Genuit. 1,533,796; Apr. 14.
Felt articles, Machine for shrinking. H. A. Genest. 1,533,350; Apr. 14.
Felt articles, Shrinking, etc. H. A. Genest. 1,533,351; Apr. 14.
Felt shrinking. F. F. Chudoba. 1,533,348; Apr. 14.
Felt shrinking. H. A. Genest. 1,533,346; Apr. 14.
Felt shrinking. H. A. Genest. 1,533,349; Apr. 14.
Felt shrinking. W. A. Lorens. 1,533,347; Apr. 14.
Felt shrinking. H. M. Smith. 1,533,345; Apr. 14.
Fence brace. E. N. Lanott. 1,533,321; Apr. 14.
Fertilizer mixer and distributor. M. A. Lokey. 1,533,435; Apr. 14.
Filament supplier, Automatic. R. Maito and H. Niwa. 1,533,260; Apr. 14.
Finishing machine. J. F. Robb. 1,533,464; Apr. 14.
Fire-alarm apparatus. M. Costello. 1,533,394; Apr. 14.
Fire shutter, Radially-opening. F. H. Vick. 1,533,151; Apr. 14.
Fireplace damper. G. A. Morrell. 1,533,752; Apr. 14.
Fishhook. G. D. B. Bonbright. 1,533,092; Apr. 14.
Fishing device. W. E. Shepherd. 1,533,471; Apr. 14.

Windmills, Governor for. C. E. Sargent. 1,533,467; Apr. 14.
Window, Casement. A. F. Stukey. 1,533,521; Apr. 14.
Window catch. P. G. R. Macinnes. 1,533,879; Apr. 14.
Window-operating mechanism. A. Zitterbart. 1,533,155; Apr. 14.
Window or windshield cleaner. J. S. Prowense. 1,533,944; Apr. 14.
Window-regulator installation. T. P. Archer and E. E. Heintz. 1,533,084; Apr. 14.
Window scaffold. J. H. Cook. 1,533,832; Apr. 14.
Wire switch. H. W. Goff. 1,533,179; Apr. 14.
Wireless apparatus, Adjusting rotary spark gaps of. J. L. Jenks, jr. 1,533,502; Apr. 14.
Wireless messages, Receiving set for. E. Moore. Des. 67,043; Apr. 14.
Wooden structures and the like, Fitting for connecting together parts of. W. H. Clarke-James. 1,533,724; Apr. 14.
Work fixture, Automatic. W. C. Sproul. 1,533,710; Apr. 14.
Work-holding device. H. S. Bergen. 1,533,089; Apr. 14.
Wrench: *See*—
Socket wrench.
Wrench. E. E. Lynch and H. A. Mead. 1,533,602; Apr. 14.
Wrench construction. W. S. Bellows. 1,533,785; Apr. 14.
Wringer. C. C. Howe. 1,533,861; Apr. 14.
Writing device. A. Cheane. 1,533,162; Apr. 14.
Yarns of knitted fabrics, Apparatus for separating and unraveling. H. F. Drenk. 1,533,728; Apr. 14.
Yarn-tube frames, Attaching device for. W. W. Robertson. 1,533,340; Apr. 14.

CLASSIFICATION OF PATENTS

ISSUED APRIL 14, 1925.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 24: 1,533,907
96: 1,533,953
154: 1,533,663
170: 1,533,624
4— 67: 1,533,748
72: 1,533,869
163: 1,533,174
189: 1,533,801
252: 1,533,444
5— 91: 1,533,973
8— 2: 1,533,917
5: 1,533,769

Motor-fuel component, Fuel Vitalizer Co. (of California). 197,520; Apr. 21; Serial No. 205,868; published Feb. 3, 1925.
Motor-fuel ingredient. F. E. Judd. 197,554; Apr. 21; Serial No. 204,710; published Jan. 20, 1925.
Motor-fuel ingredient. Power Oil & Gas Company. 197,470; Apr. 21; Serial No. 205,490; published Jan. 13, 1925.
Ointment for treating croup, coughs, etc. Pynolene Remedy Company. 197,514; Apr. 21; Serial No. 206,256; published Feb. 3, 1925.
Ointment for treatment of tuberculosis. E. Merck. 197,568; Apr. 21; Serial No. 203,831; published Jan. 20, 1925.
Paste treatment and relief for sore feet for horses. P. Hoffer. 197,586. Apr. 21; Serial No. 206,354; published Feb. 3, 1925.
Perfume. Lionel Trading Co. 197,598; Apr. 21; Serial No. 197,752; published Jan. 13, 1925.
Perfume extracts, toilet waters, lotions, etc. M. Babani. 197,798; Apr. 21.
Perfumes. F. Wolf. 197,684; Apr. 21; Serial No. 198,924; published Jan. 27, 1925.
Pharmaceutical preparation as a mouth wash. Gedeon Richter Laboratories, Inc. 197,487; Apr. 21; Serial No. 206,237; published Jan. 13, 1925.
Pills, Headache. C. S. Littell & Co. 197,505; Apr. 21; Serial No. 205,882; published Jan. 13, 1925.
Pills, Liver. H. H. Good. 197,484; Apr. 21; Serial No. 206,348; published Feb. 3, 1925.
Pills or tablets. C. Marx. 197,497; Apr. 21; Serial No. 205,936; published Jan. 13, 1925.
Pomade. H. C. Rice. 26,287; renewed Mar. 26, 1925.
Powder for the therapy of gynecological hemorrhages. Luitpold-Werk Chemische-Pharmaceutische Fabrik. 197,501; Apr. 21; Serial No. 205,931; published Jan. 20, 1925.
Powders and rouges, Face. Remilier Co. 197,713; Apr. 21; Serial No. 207,099; published Feb. 3, 1925.
Powders and rouges, Face. V. Vivaudou, Inc. 197,513; Apr. 21; Serial No. 206,263; published Feb. 3, 1925.
Powders, face creams, toilet waters, etc., Face. J. A. Marceau, Inc. 197,498; Apr. 21; Serial No. 205,935; published Jan. 13, 1925.
Powders, Headache. Eagle Company. 197,711; Apr. 21; Serial No. 205,269; published Feb. 3, 1925.
Preparation for consumption. A. House. 197,789; Apr. 21; Serial No. 189,408; published Feb. 3, 1925.
Preparation for diseases in poultry. F. W. Falls, jr. 197,657; Apr. 21; Serial No. 200,154; published Jan. 27, 1925.
Preparation for sores, diphtheria, etc. R. C. Bayly. 197,738; Apr. 21; Serial No. 189,655; published Feb. 3, 1925.
Preparation for the treatment of burns. Mas and Georges. 197,645; Apr. 21; Serial No. 202,454; published Feb. 3, 1925.
Preparation for the treatment of coughs and inflamed condition of the throat and lungs. W. G. Holley. 197,549; Apr. 21; Serial No. 204,858; published Jan. 20, 1925.
Preparation for the treatment of goiter. H. H. Eakle. 197,575; Apr. 21; Serial No. 206,480; published Feb. 3, 1925.
Preparation for the treatment of goiter. G. D. Fryer. 197,473; Apr. 21; Serial No. 205,406; published Jan. 13, 1925.
Preparation for the treatment of pyorrhea, etc. L. N. Smith. 197,483; Apr. 21; Serial No. 204,872; published Jan. 13, 1925.
Preparation for treatment of the stomach and intestines. N. S. Applewhite. 197,577; Apr. 21; Serial No. 206,470; published Feb. 3, 1925.
Preparation to exterminate insects or pests on poultry and animals. F. W. Falls, jr. 197,655; Apr. 21; Serial No. 200,153; published Jan. 27, 1925.
Preparations for internal and external use, also shampoos, toilet cream, etc. E. C. De Witt & Co. 197,482; Apr. 21; Serial No. 204,898; published Feb. 3, 1925.
Preparations for treating textile fabrics. E. F. Houghton & Co. 197,493; Apr. 21; Serial No. 206,070; published Jan. 13, 1925.
Radiator compounds. Fleury Brothers. 197,780; Apr. 21.
Remedies. Od Chem. Company. 45,923; renewed Aug. 29, 1925.
Remedies for arteriosclerosis, etc. J. A. B. Dardignac. 197,502; Apr. 21; Serial No. 205,912; published Jan. 13, 1925.
Roach, ant, and water-bug exterminator. H. F. De Longe. 197,608; Apr. 21; Serial No. 197,262; published Aug. 26, 1924.
Rouge, face powder, and cream. La Flamme Company. 197,486; Apr. 21; Serial No. 206,245; published Jan. 13, 1925.
Rouge, lip stick, cold cream, etc. C. W. Arit. 197,556; Apr. 21; Serial No. 204,581; published Jan. 20, 1925.
Rust solvent and penetrating oil. L. G. Nicholson. 197,653; Apr. 21; Serial No. 199,848; published Jan. 13, 1925.
Salt, Granular effervescent. Emerson Drug Company. 46,450; renewed Sept. 19, 1925.
Salve for relief of infections, burns, etc. F. J. Dooley. 197,485; Apr. 21; Serial No. 206,346; published Feb. 3, 1925.
Salves and oils. E. B. Knight. 197,593; Apr. 21; Serial No. 171,579; published Aug. 26, 1924.
Soldering fluid. Flux Chemical Company. 197,566; Apr. 21; Serial No. 203,880; published Feb. 3, 1925.
Solvents for cleaning drain or waste pipes, etc. Stephenson Chemical Co. 197,667; Apr. 21; Serial No. 202,863; published Jan. 13, 1925.

Solvents in solvent mixtures including alcohol or ethyl acetate, etc. U. S. Industrial Co. 197,735; Apr. 21; Serial No. 193,433; published Feb. 3, 1925.
Sulphur and sulphur products. Colloidal Sulphur Corporation. 197,507; Apr. 21; Serial No. 205,861; published Jan. 27, 1925.
Tonic. Thorone Corporation. 197,759; Apr. 21; Serial No. 204,730; published Feb. 3, 1925.
Welding compound. J. Swanson. 197,515; Apr. 21; Serial No. 206,136; published Feb. 3, 1925.

CLASS 8.

Cigar, cigarette, and match cases. Cordova Shops, Inc. 197,738; Apr. 21; Serial No. 206,606; published Feb. 3, 1925.
Pipes, cigar and cigarette holders, Tobacco. Ben Wade. 197,680; Apr. 21; Serial No. 197,571; published Feb. 3, 1925.

CLASS 9.

Ignition pellets used with gripping devices for same. Phos A.-G. 197,647; Apr. 21; Serial No. 201,856; published Feb. 3, 1925.
Matches. M. M. Kallman. 197,714; Apr. 21; Serial No. 207,020; published Feb. 3, 1925.
Matches. Landgren & Co. 197,677; Apr. 21; Serial No. 196,961; published Feb. 3, 1925.
Powders which burn with colored flames for pyrotechnical purposes. J. C. Huthwelker. 197,718; Apr. 21; Serial No. 206,900; published Feb. 3, 1925.
Shells and wads, Shotgun. Peters Cartridge Company. 197,695; Apr. 21; Serial No. 205,708; published Feb. 3, 1925.

CLASS 10.

Land plaster. Certain-teed Products Corporation. 197,494; Apr. 21; Serial No. 205,992; published Jan. 27, 1925.

CLASS 12.

Cement and stucco, Building. Firestone Stucco Company. 197,638; Apr. 21; Serial No. 203,564; published Jan. 27, 1925.
Cement, Portland. Glens Falls Portland Cement Co. 197,616; Apr. 21; Serial No. 205,870; published Jan. 27, 1925.
Paper products. Regenstein-Veeder Company. 197,764; Apr. 21; Serial No. 204,328; published Jan. 27, 1925.
Paving materials of asphalt. United States Asphalt Refining Company. 197,589; Apr. 21; Serial No. 206,384; published Feb. 3, 1925.
Plaster. Asbestos Limited. 197,771; Apr. 21; Serial No. 205,101; published Jan. 27, 1925.
Plaster. Asbestos Limited. 197,773; Apr. 21; Serial No. 205,102; published Jan. 27, 1925.
Plastering material, Finish-coat. Ash Grove Lime and Portland Cement Company. 197,689; Apr. 21; Serial No. 203,708; published Jan. 27, 1925.
Roofing Sheet. Commercial Selling Co. 197,747; Apr. 21; Serial No. 180,525; published Jan. 8, 1924.

CLASS 13.

Bathroom fixtures. Woodward-Wanger Company. 197,600; Apr. 21; Serial No. 189,179; published Jan. 27, 1925.
Choker hooks, bull hooks, and ferrules. Mill & Mine Supply Company. 197,803; Apr. 21.
Door hangers and overhead tracking, Sliding-. Coburn Trolley Track Manufacturing Company. 197,782; Apr. 21.
Door knobs and metal pipe fittings. Dirigold Corporation. 197,736; Apr. 21; Serial No. 192,964; published Feb. 3, 1925.
Furniture slides. Berbecker & Rowland Mfg. Co. 197,594; Apr. 21; Serial No. 172,317; published Dec. 11, 1923.
Pie-juice savers. F. B. Keyes. 197,635; Apr. 21; Serial No. 203,276; published Feb. 10, 1925.
Shade rollers and fittings, Spring. Stewart Hartshorn Co. 46,050; renewed Sept. 5, 1925.
Sprinklers, Lawn. Skinner Irrigation Company. 197,627; Apr. 21; Serial No. 206,197; published Feb. 3, 1925.

CLASS 14.

Anchors. Admiral Anchor Company. 44,801; renewed July 25, 1926.
Babbitt metal. American Crucible Products Co. 197,740; Apr. 21; Serial No. 188,622; published Feb. 10, 1925.
Rail anchors and anticreepers. P & M Company. 197,774–5; Apr. 21.
Rods, wire, sheets, and castings of nonferrous metals. T. B. Conklin Brass & Copper Co. 197,682; Apr. 21; Serial No. 200,711; published Feb. 3, 1925.
Steel forgings, rail anchors, rail-anchor springs, etc. Canton Forge & Axle Company. 197,761; Apr. 21; Serial No. 204,765; published Feb. 3, 1925.

CLASS 15.

Lubricants, Spring. Gripite Company. 197,683; Apr. 21; Serial No. 197,932; published Nov. 25, 1924.
Oils, gasoline, etc., Lubricating. Tide Water Oil Company. 197,753; Apr. 21; Serial No. 152,402; published Oct. 18, 1921.

CLASS 16.

Bronzing liquid, raw linseed oil, spirits of turpentine. Owl Drug Company. 197,651; Apr. 21; Serial No. 201,098; published Feb. 3, 1925.
Carbon black. Union Power Company. 197,572; Apr. 21; Serial No. 206,500; published Feb. 10, 1924.
Paints and varnishes. Remlen & Kuhnert Co. 197,806; Apr. 21.

CLASS 19.

Automobile bumpers. American Autoparts Company. 197,710; Apr. 21; Serial No. 205,306; published Jan. 27, 1925.
Brake shafts, geared brakes, etc., Drop. Union Railway Equipment Co. 197,646; Apr. 21; Serial No. 201,866; published Jan. 27, 1925.
Carriages, Baby and doll. Robinson-Hallum Manufacturing Company. 197,544; Apr. 21; Serial No. 203,204; published Jan. 20, 1925.
Vehicles, Mirrors for motor. Kalco Stamping Company. 197,613; Apr. 21; Serial No. 205,761; published Jan. 27, 1925.

CLASS 21.

Radio receiving sets. H. T. Schiff. 197,737; Apr. 21; Serial No. 190,272; published Apr. 8, 1924.

CLASS 23.

Automobiles and autotrucks, Lubricating systems for. E. H. Haney. 197,750; Apr. 21; Serial No. 176,468; published Feb. 3, 1925.
Axes, hatchets, adzes, machetes, etc. Collins Company. 197,702; Apr. 21; Serial No. 205,514; published Feb. 3, 1925.
Churns, cow milkers, cream separators, etc. D. H. Burrell & Co. 197,783; Apr. 21.
Duplicating machines. Ditto, Incorporated. 197,480; Apr. 21; Serial No. 204,999; published Jan. 27, 1925.
Engine primers, Gas-. Stago Co. 197,478; Apr. 21; Serial No. 205,372; published Jan. 27, 1925.
Engines, coal chutes, dies, etc., Internal-combustion. Wright Machine Company. 197,530; Apr. 21; Serial No. 201,476; published Feb. 3, 1925.
Engines, Traction and internal combustion. Advance-Rumely Company. 197,785; Apr. 21.
Friction-driving and holding mechanisms. C. McPherson. 197,525; Apr. 21; Serial No. 204,106; published Jan. 27, 1925.
Fruit treating and handling machinery. Brogdex Company. 197,576; Apr. 21; Serial No. 206,474; published Feb. 10, 1925.
Gears, Timing. Dalton & Balch, Inc. 197,745; Apr. 21; Serial No. 183,557; published Feb. 10, 1925.
Grading machines, Road-. Russell Grader Manufacturing Company. 197,752; Apr. 21; Serial No. 169,085; published Feb. 6, 1928.
Knives, Machine. Simonds Saw and Steel Company. 197,551; Apr. 21; Serial No. 204,838; published Jan. 27, 1925.
Machines and tools. Nestor Manufacturing Co. 197,595; Apr. 21; Serial No. 182,479; published Jan. 27, 1925.
Mills, Cane. Buffalo Forge Company. 197,622; Apr. 21; Serial No. 205,990; published Feb. 10, 1925.
Nut-cracking tool. A. C. Guhl. 197,670; Apr. 21; Serial No. 203,567; published Jan. 27, 1925.
Oil and gas separators. Smith Separator Company. 197,762; Apr. 21; Serial No. 204,792; published Feb. 3, 1925.
Paper cups, Machines for making. American Cuptor Corporation. 197,496; Apr. 21; Serial No. 205,974; published Jan. 27, 1925.
Planters and drills, Corn. D. M. Sechler Carriage Company. 46,021; renewed Sept. 5, 1925.
Pumps and hydraulic machinery, Power. Aldrich Pump Co. 197,800; Apr. 21.
Railway-track jacks and jacks for general lifting purposes. Verona Tool Works. 197,704; Apr. 21; Serial No. 205,456; published Feb. 10, 1925.
Sewing machines. Universal Art Stitch Machine Limited. 197,726; Apr. 21; Serial No. 206,812; published Feb. 10, 1925.
Sharpeners, Knife. Ace Hardware Mfg. Corp'n. 197,620; Apr. 21; Serial No. 205,972; published Feb. 3, 1925.
Shovels. H. M. Myers Company. 46,063; renewed Sept. 5, 1925.
Straps, Pick-arm. E. H. Jacobs Manufacturing Company. 197,807; Apr. 21.
Tools and tool handles. Columbus Handle & Tool Corporation. 197,808; Apr. 21.
Valves, pumps, etc., Pump. Axelson Machine Company. 197,686; Apr. 21; Serial No. 198,978; published Feb. 3, 1925.

CLASS 25.

Locks. Triple Metals Corporation. 197,797; Apr. 21.

CLASS 26.

Dispensing machines. Arnold Electric Co. 197,779; Apr. 21.
Hydrometers, Syringe. Scranton Glass Instrument Company. 197,553; Apr. 21; Serial No. 204,790; published Jan. 27, 1925.
Paper testers, Scientific. Louis Schopper. 197,727; Apr. 21; Serial No. 206,806; published Feb. 10, 1925.

Picture films, Motion-. Ideal Films, Ltd. 197,528; Apr. 21; Serial No. 197,883; published Jan. 27, 1925.
Pictures, Moving. Rayart Pictures Corporation. 197,467; Apr. 21; Serial No. 205,550; published Feb. 3, 1925.
Pumps, etc., Self-measuring oil and grease. Bennett Injection Company. 197,533; Apr. 21; Serial No. 188,228; published Jan. 27, 1925.
Thermometer cases. Julius Schmid, Inc. 197,732; Apr. 21; Serial No. 206,642; published Feb. 10, 1925.
Weighing machines and parts thereof. E. and T. Fairbanks and Company. 197,805; Apr. 21.

CLASS 27.

Clocks. Ansonia Clock Company. 44,585; renewed July 11, 1925.

CLASS 30.

Crockery, china, and pottery. Nathan Straus & Sons, Inc. 197,685; Apr. 21; Serial No. 198,971; published Feb. 3, 1925.

CLASS 32.

Bed springs and like structures for beds. Kinney-Rome Company. 197,742; Apr. 21; Serial No. 188,016; published Feb. 3, 1925.
Furniture. Blue Ridge Hickory Furniture Company. 197,709; Apr. 21; Serial No. 205,309; published Feb. 3, 1925.
Furniture, Household. Abraham & Straus, Inc. 197,744; Apr. 21; Serial No. 186,093; published Feb. 3, 1925.
Furniture, Household. Lansburgh & Bro., Inc. 197,751; Apr. 21; Serial No. 173,897; published Feb. 3, 1925.

CLASS 33.

Glass tube. Sowrite, Inc. 197,715; Apr. 21; Serial No. 206,980; published Feb. 3, 1925.
Glassware. C. J. Dierckx. 197,731; Apr. 21; Serial No. 206,611; published Feb. 3, 1925.

CLASS 34.

Lamp shades. T. D. Whitney Company. 197,694; Apr. 21; Serial No. 205,721; published Jan. 27, 1925.
Stovepipe. Wheeling Corrugating Company. 197,784; Apr. 21; Serial No. 167,499; published Feb. 3, 1925.

CLASS 35.

Belts, Cigarette. Southern Endless Belt Company. 197,590; Apr. 21; Serial No. 205,299; published Feb. 3, 1925.
Packings for parts of machinery and mechanical devices. Greene, Tweed & Co. 197,614; Apr. 21; Serial No. 206,825; published Jan. 27, 1925.

CLASS 37.

Paper, Bond. Parker, Stone & Baird Co. 197,811; Apr. 21.
Paper, Ledger, bond, linen, bristol-board, and writing. Whiting Paper Company. 46,171; renewed Sept. 5, 1925.
Paper, Ledger, bond, linen, bristol-board, and writing. Whiting Paper Company. 46,440; renewed Sept. 19, 1925.
Paper, Wrapping. Hummel-Ross Fibre Corporation. 197,538; Apr. 21; Serial No. 197,377; published Nov. 11, 1924.
Stamping machines, Automatic. G. G. Mevi. 197,609; Apr. 21; Serial No. 198,815; published Dec. 2, 1924.

CLASS 38.

Books containing puzzles. J. E. Austrian. 197,621; Apr. 21; Serial No. 205,983; published Feb. 3, 1925.
Cards, Greeting. Rust Craft Pub. Inc. 197,625; Apr. 21; Serial No. 206,192; published Feb. 3, 1925.
Catalogues. H. & L. Epstein, Inc. 197,765; Apr. 21; Serial No. 204,956; published Feb. 3, 1925.
Comic strips. Bonnet-Brown Corporation. 197,510; Apr. 21; Serial No. 206,719; published Feb. 3, 1925.
Magazine. Bohemian Magazine Company. 197,768; Apr. 21; Serial No. 204,992; published Feb. 3, 1925.
Magazine, Bimonthly. Mattison Machine Works. 197,617; Apr. 21; Serial No. 205,938; published Feb. 3, 1925.
Magazine, Monthly. Constructive Publishing Corporation. 197,629; Apr. 21; Serial No. 206,278; published Feb. 3, 1925.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 21ST DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abbott, Henry, East Orange, N. J., assignor to The Calculagraph Company. Fastener for ink ribbons. 1,534,755; Apr. 21.
Abby, Warren L., Watsonville, Calif. Garden-hose support. 1,534,438; Apr. 21.
Acchione, Robert A., Detroit, Mich. Necktie. 1,534,347; Apr. 21.
Acchione, Robert A., Detroit, Mich. Necktie. 1,534,348; Apr. 21.
Adam, Stephen J. (See Markóczi, Emeric, and Adam.)
Adams, Charles G., Joliet, Ill. Hot-water boiler. 1,534,150; Apr. 21.
Ågren, Ivar J. E., and G. Rosenqvist, Uppsala, Sweden. Producing objects with desired outline and surface. 1,534,479; Apr. 21.
Air Reduction Company. (See Metzger, Floyd J., assignor.)
Aktiebolaget Karlstads Mekaniska Verkstad. (See Wagner, R. E., and Ullgren, assignors.)
Albrecht, John, Kewaunee, Wis. Tape-controlled measuring pump. 1,534,349; Apr. 21.
Alexanderson, Ernst F. W., Schenectady, assignor to General Electric Company, New York, N. Y. Electron-discharge device. 1,535,082; Apr. 21.
Allard, J Frank, Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,534,480; Apr. 21.
Allbin, Sim E., assignor to Mayer Life Boat Co. Inc., Seattle, Wash. Lifeboat davit. 1,534,049; Apr. 21.
Allen, Edward B., Newtou, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Machine for sewing round-eye buttonholes. 1,534,017; Apr. 21.
Allgemeine Elektricitäts-Gesellschaft. (See Lasche, Oskar, assignor.)
Allison, Henry H., deceased, Fairmont, Minn.; F. J. Brooker, administrator. Burglarproof device. 1,534,886; Apr. 21.
Allison, John J., Smethport, Pa. Conduit-making machine. 1,534,825; Apr. 21.
Allison, John J., Smethport, Pa. Conduit-making machine. 1,534,826; Apr. 21.
Alston, Oscar W., New Westminster, British Columbia, Canada. Mineral-separating machine. 1,534,481; Apr. 21.
Altgelt, Rudolph J., assignor to Oliver Chilled Plow Works, South Bend, Ind. Riding cultivator. 1,534,675; Apr. 21.
Aluminum Company of America. (See Frary, Francis C., assignor.)
Aluminum Company of America. (See Gabriel, Leo W., assignor.)
Aluminum Company of America. (See Hoopes, William, assignor.)
Aluminum Company of America. (See Hoopes, W., and Frary, assignors.)
Aluminum Company of America. (See Hoopes, W., Frary, and Edwards, assignors.)
Aluminum Company of America. (See Hoopes, W., Edwards, and Horsfield, assignors.)
American Arch Company. (See Willett, Alfred H., assignor.)
American Arch Company. (See Willett, A. H., and Martin, assignors.)
American Automatic Lock and Lift Company. (See Cane, Gordon F., assignor.)
American Can Company. (See Smith, W. A., and Widell, assignors.)
American Can Company. (See Widell, Magnus E., assignor.)
American Car and Foundry Company. (See Ames, Joseph H., assignor.)
American Car and Foundry Company. (See Folmsbee, Clyde H., assignor.)
American Car and Foundry Company. (See Hochberg, O., and Steinmeyer, assignors.)
American Car and Foundry Company. (See Johnson, Warren V., assignor.)
American Car and Foundry Company. (See Johnson, W. S., and Shaffer, assignors.)
American Car and Foundry Company. (See McBride, John J., assignor.)
American Car and Foundry Company. (See Nichols, Ralph G., assignor.)
American Car and Foundry Company. (See Ostrander, Allen E., assignor.)
American Car and Foundry Company. (See Willoughby, Victor R., assignor.)
American Foundry Equipment Company, The. (See Rich, Elmer A., jr., assignor.)
American Mine Door Co., The. (See Gurney, Albert J., assignor.)
American Radiator Company. (See Eggleston, Lewis W., assignor.)
American Sales Book Company. (See Wiswall, William J., assignor.)
American Smelting and Refining Company. (See Howard, William H., assignor.)
American Telephone and Telegraph Company. (See Hitchcock, Harry W., assignor.)
American Telephone and Telegraph Company. (See Nyquist, Harry, assignor.)
American Telephone and Telegraph Company. (See Parker, Ralzemond D., assignor.)
American Telephone and Telegraph Company. (See Potts, Louis M., assignor.)
Ames, Joseph H., assignor to American Car and Foundry Company, New York, N. Y. Traveling riveting platform. 1,534,018; Apr. 21.
Andrew, George E., Northwood, England, assignor to F. P. Limited, Jersey, Channel Islands. Manufacture of tape, cord, yarn, rope, fabric, or other material produced from fibers. 1,534,676; Apr. 21.
Andrews, Josiah S., Buffalo, N. Y. Fruit picker. 1,534,756; Apr. 21.
Andrews, Leslie G., Lincoln, Nebr. Auto signal. 1,535,014; Apr. 21.
Angier, Edward H., Framingham, Mass. Creping paper. 1,534,482; Apr. 21.
Anshen, Harold, assignor of one-half to C. F. Williamson, Trenton, N. J. Writing instrument. 1,534,629; Apr. 21.
Anson, Joseph H., assignor to A. H. Reamsbottom, South Porcupine, Ontario, Canada. Vehicle headlight. 1,534,253; Apr. 21.
Aprile, Louis, Cincinnati, Ohio. Universal square. 1,534,757; Apr. 21.
Ardern, James L. (See Latman, Charles H., assignor.)
Arkell Safety Bag Company. (See Wandel, Kurt, assignor.)
Armstrong, Orlan G., Alliance, Ohio. Heater for motor vehicles. 1,534,483; Apr. 21.
Askenasy, Paul. (See Obersohn, A., Wachtel, Sakom, and Askenasy.)
Assmann, Frank A., jr., and A. L. Kronquest, Chicago, Ill., assignors to Continental Can Company, Syracuse, N. Y. Can-body-soldering machine. 1,534,677; Apr. 21.
Associated Oil Company. (See Fowler, Henry G., assignor.)
Aste, Anthony L., Brooklyn, N. Y. Shoe-cleaning-stick container, applicator, and distributor. 1,534,827; Apr. 21.
Athey, Isaac H., assignor to Athey Truss Wheel Co., Chicago, Ill. Shoe for track-laying vehicles. 1,534,254; Apr. 21.
Athey, Isaac H., and E. W. Baily, assignors to Athey Truss Wheel Co., Chicago, Ill. Vehicle. 1,534,255; Apr. 21.
Athey Truss Wheel Co. (See Athey, Isaac H., assignor.)
Athey Truss Wheel Co. (See Athey, I. H., and Baily, assignors.)
Automatic Electric Company. (See Smith, Arthur B., assignor.)
Automatic Refrigerating Company, The. (See Lundgaard, Ivar, assignor.)
Averill, William H., Boston, assignor of one-half to A. C. Erisman, Brookline, Mass. Can opener. 1,534,484; Apr. 21.
Avery, Roger L., Chicago, Ill. School furniture. 1,534,630; Apr. 21.
Ayars Machine Company, et al. (See Steere, Clarence E., assignor.)
Babcock & Wilcox Company, The. (See Mouriam, Georges, and Sutter, assignors.)
Babitch, Abraham M. (See Short, C. R., and Babitch.)
Bachman, Walter S., Chicago, Ill. Sterilising attachment for water-supply pipes. 1,534,256; Apr. 21.

Baddiley, James, A. Shepherdson, H. Swann, J. Hill, and L. G. Lawrie, assignors to British Dyestuffs Corporation Limited, Manchester, England. Dyeing acetyl cellulose or fabrics containing the same and new products for use therein. 1,534,019; Apr. 21.
Bahsler, Eugene K., Tyngsboro, Mass. Automobile map holder. 1,534,151; Apr. 21.
Bailey, Minnita, New York, N. Y. Toothache remedy. 1,534,485; Apr. 21.
Baily, Robert W. (See Athey, I. H., and Baily.)
Baity, Delbert R., Los Angeles, Calif. Safety cigarette holder. 1,534,560; Apr. 21.
Baker, Burr, Minneapolis, Minn. Figure toy. 1,534,887; Apr. 21.
Baker, Burr, Minneapolis, Minn. Figure toy. 1,534,888; Apr. 21.
Baker, David F., Tarrytown, N. Y. Using direct blast-furnace metal for foundry castings. 1,534,561; Apr. 21.
Baker-Perkins Company. (See Tugendhat, Robert G., assignor.)
Baldwin, Hiram E., assignor to The Brown Hoisting Machinery Company, Cleveland, Ohio. Tractor bridge crane. 1,534,020; Apr. 21.
Ball, Jay O., assignor to Sidney Blumenthal & Company, Inc., New York, N. Y. Color printing. 1,534,292; Apr. 21.
Ballot, Ernest M., Paris, France. Machine for cutting a cam serving to control the front-wheel brakes of motor vehicles. 1,535,016; Apr. 21.
Balzak, Julius, Chicago, Ill. Ice-cream disher. 1,534,099; Apr. 21.
Bambenek, Joseph B., assignor to Peerless Chain Co., Winona, Minn. Chain fastener. 1,534,889; Apr. 21.
Bancroft, Roy, assignor of one-half to J. P. Gallaghan, Oakland, Calif. Braking mechanism. 1,534,293; Apr. 21.
Bang, Sören H., Copenhagen, Denmark. Self-loading firearm. 1,534,486; Apr. 21.
Banks, John D., Colwyn, Pa., assignor to Kil-Glar Company, Audubon, N. J. Glare shield for automobiles. 1,534,487; Apr. 21.
Barker, Percy E., assignor to The Van Dorn Iron Works Company, Cleveland, Ohio. Dump-truck hoisting mechanism. 1,534,294; Apr. 21.
Barker, William, jr., Troy, N. Y., assignor to Lion Collars & Shirts, Inc. Soft fold collar. 1,534,562; Apr. 21.
Barker, William, jr., Troy, N. Y., assignor to Lion Collars & Shirts, Inc. Fold collar. 1,534,563; Apr. 21.
Barks, Frank S., assignor to Lincoln Steel and Forge Company, St. Louis, Mo. Journal box. 1,535,016; Apr. 21.
Barnebey, Oscar L., Detroit, Mich. Multiple-unit hearth furnace. 1,534,488; Apr. 21.
Barnes, Chester A., Blue Grass, Iowa. Harrow scraper. 1,534,489; Apr. 21.
Barr, James A., Mount Pleasant, Tenn., assignor to The International Agricultural Corporation, New York, N. Y. Briquette of phosphate-rock material and making the same. 1,534,328; Apr. 21.
Barrielle, Paul, Apt, France. Manufacture of preserved fruits. 1,534,050; Apr. 21.
Bartholomew, Bert E., Pasadena, Calif., assignor of one-half to L. Sands, Cleveland, Ohio. Casement-window adjuster. 1,534,758; Apr. 21.
Basset, Lucien P., Paris, France. Direct reduction of ores, and particularly of iron ores. 1,534,051; Apr. 21.
Bassett, Leonard L., Sioux Falls, S. Dak. Wheel puller. 1,534,350; Apr. 21.
Bates, Eddo V., Lowell, Mass. Method and apparatus for carding fibrous material. 1,534,564; Apr. 21.
Bath, John, and R. H. C. Grunewald, Worcester, Mass., assignors to John Bath & Co. Inc. Adjustable internal gauge. 1,534,152; Apr. 21.
Bath, John, & Co., Inc. (See Bath, J., and Grunewald, assignors.)
Bauer, Wilhelm, and A. Herre, Opladen, near Cologne, assignors to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Vat dye. 1,534,351; Apr. 21.
Baumann, Frederick W., assignor to Oliver Iron & Steel Corporation, Pittsburgh, Pa. Bending machine. 1,534,890; Apr. 21.
Bax, Lionel D., Denver, Colo. Piston ring. 1,534,153; Apr. 21.
Baynard, William H., Quincy, assignor to H. H. Beckwith, Brookline, Mass. Shoe heater. 1,534,021; Apr. 21.
Beard, C. Y. (See Johnston, Frank N., assignor.)
Beardsley, Elmer O., assignor to The Beardsley & Piper Company, Chicago, Ill. Portable molding machine. 1,534,565; Apr. 21.
Beardsley, Elmer O., and W. F. Piper, assignors to The Beardsley & Piper Company, Chicago, Ill. Molding machine. 1,534,566; Apr. 21.
Beardsley & Piper Company, The. (See Beardsley, Elmer O., assignor.)
Beaumont Manufacturing Company. (See Beaumont, R. H., and Marette, assignors.)
Beaumont, R. H., Company. (See Beaumont, Robert H., assignor.)
Beaumont, R. H., Company. (See Lowenthal, Harry N., assignor.)
Beaumont, Robert H., Radnor, assignor to R. H. Beaumont Company, Philadelphia, Pa. Skip hoist. 1,534,891; Apr. 21.
Beaumont, Robert H., assignor to R. H. Beaumont Company, Philadelphia, Pa. Screen. 1,534,892; Apr. 21.
Beaumont, Robert H., Philadelphia, Pa., and H. Marette, East Orange, assignors to Beaumont Manufacturing Company, Camden, N. J. Gate for ash hoppers. 1,534,898; Apr. 21.
Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Stereotype-plate casting and finishing apparatus. 1,534,491; Apr. 21.
Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Stereotype-metal pump. 1,534,492; Apr. 21.
Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Stereotype-plate casting apparatus. 1,534,493; Apr. 21.
Beck, George C., Spokane, Wash. Ring expander. 1,534,490; Apr. 21.
Beckman, Frank E., Haverhill, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole-molding press. 1,534,052; Apr. 21.
Beckwith, Harry H. (See Baynard, William H., assignor.)
Beebe, Glenn R., Detroit, Mich. Wheeled merry-go-round. 1,534,894; Apr. 21.
Beebe, Stanley J., Union, N. Y. Pigment and making same. 1,534,678; Apr. 21.
Begtrup, Edward F., Jersey City, assignor to Metal & Thermit Corporation, Chrome, N. J. Plugging auxiliary gates of molds. 1,534,022; Apr. 21.
Behnke, Albert R., St. Paul, Minn. Electrically-operated fuel injector. 1,534,829; Apr. 21.
Behnke, Albert R., St. Paul, Minn. Automatic fan valve. 1,534,830; Apr. 21.
Belcher, Warren J., assignor to The Whitney Mfg. Co., Hartford, Conn. Power-transmission chain. 1,534,494; Apr. 21.
Belden, Clyde W., Shreveport, La., and I. B. Bussard, Charleston, W. Va., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Drawing and flattening sheet glass. 1,534,567; Apr. 21.
Benham, Edgar M., Norwood, Ohio, assignor to The Mosler Lock Company, Covington, Ky. Interchangeable combination key lock. 1,534,495; Apr. 21.
Benson, Olaf, Red Wing, Minn. Headlight mounting. 1,534,352; Apr. 21.
Bentley, James B. (See Lomax, J. A. B., Turner, and Bentley.)
Berg, Charles T., San Jose, Calif. Air cleaner for carburetor intakes. 1,534,831; Apr. 21.
Bergel, Salo, Berlin-Wilmersdorf, assignor of two-thirds to Chemische Fabrik Grünau Landshoff & Meyer, Aktiengesellschaft, Grunau, near Berlin, and C. A. F. Kahlbaum, Chemische Fabrik Gesellschaft mit beschränkter Haftung, Aldershof, near Berlin, Germany. Producing a remedy for syphilis. 1,534,832; Apr. 21.
Bergstrom, George O., assignor to Bergstrom Stove Co., Neenah, Wis. Wooden flask. 1,534,568; Apr. 21
Bergstrom Stove Co. (See Bergstrom, George O., assignor).
Bergsunds Mekaniska Verkstads Aktiebolag. (See Huss, Gustaf H., assignor.)
Bernotow, Dominik M., assignor to Bunte Brothers, Chicago, Ill. Device for regulating humidity of containers. 1,534,340; Apr. 21.
Bernotow, Dominik M., assignor to Bunte Brothers, Chicago, Ill. Device for regulating humidity of containers. 1,534,341; Apr. 21.
Bernotow, Dominick M., assignor to Bunte Brothers, Chicago, Ill. Device for regulating humidity of containers. 1,534,343; Apr. 21.
Bernson, Maurice F., Canadian, Tex., assignor, by mesne assignments, to Walker Manufacturing Company, Racine, Wis. Jack. Re16,050; Apr. 21.
Besser, Herman, Alpena, Mich. Fractured block and making the same. 1,534,353; Apr. 21.
Besser, Herman and J. H., Alpena, Mich. Mold box. 1,534,354; Apr. 21.
Besser, Jesse H. (See Besser, Herman and J. H.)
Betterley, Roy L., St. Paul, Minn. Pedestal for stands. 1,534,759; Apr. 21.
Betton, Harold E., Lynn, Mass. Coal chute. 1,534,023; Apr. 21.
Bigger, Leroy A., Oneida, N. Y. Guard. 1,534,496; Apr. 21.
Billman, Obed C., Cleveland, Ohio. Car and train-pipe coupling. 1,534,631; Apr. 21.
Biltmore Lighting Fixture Co. (See Stern, Max, assignor.)
Binks, Harry D., Oak Park, assignor to Binks Spray Equipment Co., Chicago, Ill. Liquid and air separator. 1,534,833; Apr. 21.
Binks Spray Equipment Co. (See Binks, Harry D., assignor.)
Bird-Archer Company, The. (See Lupton, Samuel J., assignor.)
Birkin and Company. (See Birkin, C. W., and Sands, assignors.)
Birkin, Charles W., and E. T. Sands, assignors to Birkin and Company, Broadway, Nottingham, England. Lace. Des. 67,065; Apr. 21.

Birkin, Charles W., and E. T. Sands, assignors to Birkin and Company, Broadway, Nottingham, England. Lace. Des. 67,066; Apr. 21.
Birkin, Charles W., and E. T. Sands, assignors to Birkin and Company, Broadway, Nottingham, England. Lace. Des. 67,067; Apr. 21.
Birkin, Charles W., and E. T. Sands, assignor to Birkin and Company, Broadway, Nottingham, England. Lace. Des. 67,068; Apr. 21.
Bishop, George D., and C. P. Hartman, Carlisle, Pa. Automatic label-pasting machine. 1,534,355; Apr. 21.
Blacher, Charles F., Barnet, assignor to Guy's Calculating Machines Limited, London, England. Calculating machine. 1,534,834; Apr. 21.
Black, Frederic M. (See Blair, Frank M., assignor.)
Blackmore, Lloyd, Highland Park, assignor to General Motors Corporation, Detroit, Mich. Vehicle bumper. 1,534,760; Apr. 21.
Blackwood, James A., Jersey City, N. J. Window-cleaner's seat. 1,534,895; Apr. 21.
Blair, Frank M., assignor of one-half to F. M. Black, Newark, Ohio. Turret-type transmission. 1,534,896; Apr. 21.
Blanchard Machine Company, The. (See Spencer, Henry K., assignor.)
Blaw, Jacob B., Atlantic City, N. J. Fire apparatus. 1,534,761; Apr. 21.
Blin, Jules A., Paris, France. Drawer-guide construction. 1,534,201; Apr. 21.
Bloomquist, Oscar E., Momence, Ill. Stove. 1,534,897; Apr. 21.
Bluemlein, Ludwig L., Hartsdale, N. Y. Water heater. 1,534,898; Apr. 21.
Blumenthal, Sidney, & Company. (See Ball, Jay O., assignor.)
Boehringer, John A., Springfield, assignor to H. A. Safion, New York, N. Y. Chandelier. Des. 67,069; Apr. 21.
Boggiano, James E., Lake Placid Club, N. Y. Pressure-reducing valve. 1,534,899; Apr. 21.
Boley, Leonard W., and J. S. Brenner, New York, N. Y. Cooking and serving utensil. 1,534,202; Apr. 21.
Bolin, Charles F., Manchester, Wyo. Ditching and grading machine. 1,534,900; Apr. 21.
Bonhôte, Gerald. (See de Montmollin, G., and Bonhôte.)
Bonthoux, Alphonse, Duck Lake, Saskatchewan, Canada. Ornamental clock. 1,534,901; Apr. 21.
Boorman, Kitchell M., New York, N. Y. Container. 1,534,497; Apr. 21.
Borne, Louis A., Milwaukee, Wis. Doorcheck. 1,534,902; Apr. 21.
Bornhauser, Otto E., and J. E. Herman, Sandusky, Ohio. Apparatus for making building blocks and the like. 1,534,154; Apr. 21.
Bostick, Heywood H., assignor to Globe Elevator Appliance Company, Fort Worth, Tex. Adjustable end thrust for elevator shafts. 1,534,762; Apr. 21.
Bostock, Francis J., and S. Bramley-Moore, Huddersfield, England. Concentric gear unit. 1,534,679; Apr. 21.
Boston Rubber Shoe Company. (See McKinnon, Allen G., assignor.)
Bosworth, George P., assignor to Hemphill Company, Central Falls, R. I. Seamless stocking and making the same. 1,534,763; Apr. 21.
Bouchard, Emile E., Burlington, Vt. Radiator and hood cover for automobiles. 1,534,903; Apr. 21.
Bouchard, Emile E., Burlington, Vt. Vehicle spring cover. 1,534,904; Apr. 21.
Bourgon, Joseph H., Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Weather-excluding means. 1,534,498; Apr. 21.
Bowen, Asa C. (See Bowen, Clifford T. and A. C.)
Bowen, Clifford T., Wellington, and A. C. Bowen, Cleveland, Ohio. License-plate holder. 1,534,905; Apr. 21.
Bowen, Hermon I. (See Shearer, Rose M., assignor.)
Boynton, Vern K., assignor to Perry & Webster, Inc., New York, N. Y. Fume control. 1,534,024; Apr. 21.
Bozie, Lena, Highgate Springs, Vt. Bread raiser. 1,534,835; Apr. 21.
Brandt, Harold J., Rochester, Mich. Disk-wheel-hub construction. 1,534,764; Apr. 21.
Braemer, William G. R., Cranston, R. I., assignor to General Fire Extinguisher Company. Drying apparatus. 1,534,499; Apr. 21.
Braemer, William G. R., Haddonfield, N. J., and J. Roberts, Providence, R. I., assignors to General Fire Extinguisher Company. Drying machine for textile materials. 1,534,500; Apr. 21.
Bramley-Moore, Swinfen. (See Bostock, F. J., and Bramley-Moore.)
Brandes, C., Inc. (See Fischer, Hermann, assignor.)
Braun, Hubert J. (See Steeple, Reginald C., assignor.)
Brede, Martin H., Minneapolis, Minn., and O. L. Longpre, Vale, S. Dak. Key-locked cap for tanks. 1,534,836; Apr. 21.
Brenner, Jacob S. (See Boley, L. W., and Brenner.)
Bridgewater, William, Doncaster, England. Boxing glove. 1,534,906; Apr. 21.
Brill, J. G., Company, The. (See Brooks, James A., assignor.)
Brill, J. G., Company, The. (See Frey, George, assignor.)
Briney, Ottis R., Pontiac, Mich. Piston structure. 1,534,765; Apr. 21.
Briney, Ottis R., Pontiac, Mich. Sealing means for pistons and the like. 1,534,766; Apr. 21.
Brinton, William C., jr., assignor to Philbrin Corporation, Kennett Square, Pa. Timer governor. 1,534,026; Apr. 21.
British Dyestuffs Corporation Limited. (See Baddiley, J., Shepherdson, Swann, Hill, and Lawrie, assignors.)
Brockman, Robert T. (See Sorum, A. E., and Brockman.)
Brockton Heel Company, Inc. (See Hanssalpakar, Edwin, assignor.)
Broecker, John P., Milwaukee, Wis. Combination implement. 1,534,907; Apr. 21.
Brogan, James A., Lawrence, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Overflow-trimming machine. 1,534,053; Apr. 21.
Brogan, James A., Lawrence, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-trimming machine. 1,534,257; Apr. 21.
Brogden, Joah, Melrose Park, assignor to David Lupton's Sons Company, Philadelphia, Pa. Sash weight. 1,534,767; Apr. 21.
Brooker, F. J., administrator. (See Allison, Henry H.)
Brooks, James A., assignor to The J. G. Brill Company, Philadelphia, Pa. Car seat. 1,534,837; Apr. 21.
Brosius, Edgar E., Pittsburgh, Pa. Blast-furnace-tapping apparatus. 1,534,838; Apr. 21.
Browder, David H., Lawrenceville, Va. Pipe reamer. 1,534,908; Apr. 21.
Brown, Alexander T., Syracuse, N. Y. Pivotal bearing. 1,534,501; Apr. 21.
Brown & Caine, Inc. (See Caine, Charles H., assignor.)
Brown, Davis, Bucyrus, Ohio. Brick machine. 1,534,768; Apr. 21.
Brown Hoisting Machinery Company, The. (See Baldwin, Hiram E., assignor.)
Brown, Jacob S., assignor of one-half to W. F. Eichenhofer, Los Angeles, Calif. Reamer. Re16,051; Apr. 21.
Browne, Ralph C., Salem, Mass. Electrical gauge. 1,534,909; Apr. 21.
Browne, Ralph C., Salem, Mass. Telephone receiver. 1,534,910; Apr. 21.
Browne, Ralph C., Salem, Mass. Telephone receiver. 1,534,911; Apr. 21.
Brownlie, Roland, Medford, Mass. Oscillation detector. 1,534,769; Apr. 21.
Bruderlein, Charles, New York, N. Y. Milk-bottle support and lock. 1,534,912; Apr. 21.
Buck, Eugene C., and C. Christiansen, Howard, S. Dak. Serum extractor. 1,534,913; Apr. 21.
Budd, Edward G., Manufacturing Company. (See Meadowcroft, Joseph W., assignor.)
Bump, George P., La Crosse, Wis. Carburetor-adjusting mechanism. 1,534,680; Apr. 21.
Bunte Brothers. (See Bernotow, Dominik M., assignor.)
Bunte Brothers. (See Perry, Ira D., assignor.)
Bunte Brothers. (See Weihmann, Henry A., assignor.)
Burke, James P., Newark, N. J. Micrometer tuning dial. 1,534,356; Apr. 21.
Burkhardt, Hans, Zollbruck, and E. Wirz, Stafa, Switzerland. Hydraulic tilting device. 1,534,439; Apr. 21.
Burnap, James M., Denver, Colo. Fluid-pressure cushioning mechanism for vehicles. 1,534,839; Apr. 21.
Burne, Edward L., Westminster, London, England. Charging secondary batteries. 1,534,026; Apr. 21.
Burnett, Ira A., Chicago, Ill. Soap-dispensing hand brush. 1,534,857; Apr. 21.
Burns, Frank A., Anaconda, Mont. Internally-armored tire. 1,534,358; Apr. 21.
Burns, Jabez, & Sons. (See Greene, Richard A., assignor.)
Burnetown, Goodman, Houston, Tex. Ash tray. Des. 67,070; Apr. 21.
Busard, Ingle B. (See Belden, C. W., and Busard.)
Butler, George H. C. (See Reeves, Alfred, assignor.)
Butler, William B., Trenton, N. J. Mold for pottery work. 1,534,155; Apr. 21.
Butterfield, Charles, assignor to The Interstate Folding Box Company, Middletown, Ohio. Paper-box-making machine. 1,534,569; Apr. 21.
Butzke, Gustav, Alplaus Road, N. Y., assignor to General Electric Company. Rotary-switch handle. 1,534,681; Apr. 21.
Byers, Horace G., Montclair, N. J., and W. B. Van Arsdel, Berlin, N. H. Manufacture of chloroform. 1,534,027; Apr. 21.
C. A. F. Kahlbaum, Chemische Fabrik Gesellschaft mit beschränkter Haftung et al. (See Bergel, Lalo, assignor.)
C. L. I. Manufacturing Company Limited, The. (See Watson, Ernest A., assignor.)
Cacciagatti, Andrew, Port Jervis, N. Y. Grapple for spearing fish. 1,534,914; Apr. 21.
Cadoret, Louis A., Pawtucket, R. I. Universal metal bobbin. 1,534,915; Apr. 21.
Cain, Joseph A. (See Flanagan, Frank J., assignor.)
Caine, Charles H., assignor to Brown & Caine, Inc., Chicago, Ill. Ignition coil. 1,534,258; Apr. 21.
Calculagraph Company, The. (See Abbott, Henry, assignor.)
Callender, Ward G., Mansfield, Ohio. Shoe cleaner. 1,534,156; Apr. 21.
Camfield, Charles W., Newkirk, Okla. Watch charm. Des. 67,071; Apr. 21.

Campbell, Earl E., assignor of one-half to H. L. Jarvis, Gillette, Wyo. Coupling. 1,534,916; Apr. 21.
Campbell, Lewis G., assignor to The Puritan Cabinet Dryer Company, Cincinnati, Ohio. Clothes drier. Re16,044; Apr. 21.
Campbell, Lorn, jr., assignor to United States Welding Company, Minneapolis, Minn. Liquid-fuel burner. 1,534,295; Apr. 21.
Cane, Gordon F., Oakland, assignor to American Automatic Lock and Lift Company, San Francisco, Calif. Foldable-bed-supporting means. 1,534,296; Apr. 21.
Carbide and Carbon Chemicals Corporation. (See Watson, Philip B., assignor.)
Carborundum Company, The. (See Martin, Harry C., assignor.)
Carey, Le Grand G., Cleveland, Ohio. Tractor vehicle. 1,534,297; Apr. 21.
Carmean, James H. (See Carmean, Samuel M. and J. H.)
Carmean, Samuel M. and J. H., Kansas City, Mo. Electric heater. 1,534,682; Apr. 21.
Carter, Edward B., assignor of one-half to A. B. Shapard and one-half to Drake Lock Nut Company, San Francisco, Calif. Glider for furniture legs and the like. 1,534,440; Apr. 21.
Case, Frank E., and A. T. Crocker, Schenectady, N. Y., assignors to General Electric Company. Mounting for switch-operating means. 1,534,683; Apr. 21.
Cashel, William W., sr., Casper, Wyo. Shock absorber. 1,534,502; Apr. 21.
Cason, Paul B. (See Riedale, P., Cason, and Herman.)
Celluloid Company, The. (See Lindsay, William G., assignor.)
Central City Chemical Co. (See Deavitt, Henry M., assignor.)
Charpillos, Firm of Albert. (See Teppet, Eugene, assignor.)
Chase, Elroy A., Northfield, Vt. Granite-working machine. 1,534,157; Apr. 21.
Chase, Elroy A., Northfield, Vt. Wheel for dressing stone. 1,534,158; Apr. 21.
Chase, Elroy A., Northfield, Vt. Sling for handling stone. 1,534,159; Apr. 21.
Chatillon, John, & Sons. (See Richardson, John W., assignor.)
Chelotti, Italo. (See Farmer, Thomas E., assignor.)
Chemische Fabrik Grünau Landshoff & Meyer Aktiengesellschaft et al. (See Bergel, Salo, assignor.)
Chicago Mill and Lumber Company. (See Walter, Harrison B., assignor.)
Chilson, Lewis S., assignor to J. M. Fisher Company, Attleboro, Mass. Pendant. 1,534,684; Apr. 21.
Christiansen, Charles. (See Buck, E. C., and Christiansen.)
Christie, Charles H. (See Troutman, F. E., and Christie.)
Claflin, Harry C., and A. Schade, Nitro, W. Va. Composition of material. 1,534,770; Apr. 21.
Clark, Warren F., Cleveland, Ohio. Water-heating device. 1,534,298; Apr. 21.
Clarke, Ernest, Redditch, England. Armband, garter, and the like. 1,534,917; Apr. 21.
Clas, Angelo R., and R. W. Randall, assignors to The Toledo Automotive Products Company, Toledo, Ohio. Brake mechanism. Re16,045; Apr. 21.
Claude, Georges, and J. M. E. de Beaufort, Boulogne-sur-Seine, France. Shaping glass tubes, more particularly tubes with rarefied gas, intended for lighting or luminous advertising. 1,534,685; Apr. 21.
Claybourn, Leslie W., Menasha, Wis. Mold support. 1,534,918; Apr. 21.
Clement, Alvah W., Cleveland, Ohio, assignor, by mesne assignments, to Ludlum Steel Co., Watervliet, N. Y. Metallic alloy. 1,534,570; Apr. 21.
Cleveland Folding Machine Co., The. (See Trautman, Walter G., assignor.)
Clevenger, Galen H., Brookline, Mass., assignor to United States Smelting, Refining & Mining Company, Portland, Me. Synthetic manufacture of cyanide. 1,534,054; Apr. 21.
Cline, Jean, Portland, Oreg. Investing destructible patterns for inlay fillings. 1,535,017; Apr. 21.
Clutts, Joshua K., Detroit, Mich. Charging device for blast furnaces. 1,534,028; Apr. 21.
Cochrane, Arthur L., Toronto, Ontario, Canada. Fastener for shoe laces and the like. 1,534,029; Apr. 21.
Coffin, Joseph G., Hempstead, assignor to General Rubber Company, New York, N. Y. Drying apparatus. 1,534,030; Apr. 21.
Cohen, Samuel, Brooklyn, N. Y. Condenser. 1,534,160; Apr. 21.
Colestock, Harry B., Plymouth, Ind. Timing synchronizer. 1,534,161; Apr. 21.
Colgan, John P., Waycross, Ga. Flap for clincher tires 1,534,686; Apr. 21.
Collier, William H., Painesville, Ohio. Machine for cutting veneer. 1,534,687; Apr. 21.
Collins, Henry G., Williamsburg, Kans. Baling machine. 1,534,350; Apr. 21.
Collins, William B., Raleigh, N. C. Electric welding device. 1,534,688; Apr. 21.
Coltrane, Vermor N., Long Beach, Calif. Sponge-holding apparatus. 1,534,300; Apr. 21.
Commonwealth Steel Company. (See Halliquist, E. G., assignor.)
Compagnie d'Applications Mecaniques. (See Rouanet, Louis, assignor.)
Conant, Arthur P., Fort Thomas, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase. Des. 67,072; Apr. 21.
Conant, George W. (See Conant, Leon B., assignor.)
Conant, Leon B., Cambridge, assignor to G. W. Conant, Bridgewater, Mass. Shoe tread. 1,534,919; Apr. 21.
Congable, Henry F., assignor to Robinson Hardware Company, Oakland, Calif. Sprinkler. 1,534,688; Apr. 21.
Conn, C. G., Limited. (See Gulick, E. J., and Hawkins, assignors.)
Connery, William M., Philadelphia, Pa. Corrugation-forming die for metal plates. 1,534,299; Apr. 21.
Conning, James, Chicago, Ill. Electric heater. 1,534,571; Apr. 21.
Conradson, Prentice, Evansville, assignor to Giddings & Lewis Machine Tool Company, Fond du Lac, Wis. Grinding machine. 1,534,301; Apr. 21.
Conradson, Prentice, Evansville, H. E. Kempton, and K. F. Gallimore, assignors to Giddings & Lewis Machine Tool Company, Fond du Lac, Wis. Grinding machine. 1,534,302; Apr. 21.
Consolidated Art Metal Foundry, Inc. (See Siptrott, Paul, assignor.)
Continental Can Company. (See Assman, F. A., jr., and Kronquest, assignors.)
Continental Cement Tile Company. (See Freund, Cheri S., assignor.)
Continental Gas Compressing Corporation. (See Schill, E., and Woidich, assignors.)
Cook, Albert S., jr. (See Howard, Hasting P., assignor.)
Cooley, Elmer C., Eastwood, N. Y. Cam-forming machine. 1,534,632; Apr. 21.
Cooper, Eugene N., Stettler, Alberta, Canada. Gate. 1,534,503; Apr. 21.
Cooper, William, Huddersfield, England. Electric heating device for burning and drying purposes. 1,534,689; Apr. 21.
Copeland, Eugene A., assignor to Hobbs Manufacturing Company, Worcester, Mass. Safety device. 1,534,360; Apr. 21.
Coradi, Oswald, Zurich, Switzerland. Electric furnace. 1,534,162; Apr. 21.
Corathwaite, E. E. (See Timmons, Ernst, assignor.)
Correll, Hugh, deceased, Canton, Ohio; J. E. Milner, administrator. Wind sign. 1,534,634; Apr. 21.
Correll, Hugh, deceased, Canton, Ohio; J. E. Milner, administrator. Wind sign. 1,534,635; Apr. 21.
Coughlin, James P., Kansas City, Mo. Radiochart. 1,534,055; Apr. 21.
Coulombe, Romeo O., New Haven, Conn. Vehicle wheel. 1,534,840; Apr. 21.
Coveleskie, Joseph, Wilkes-Barre, Pa. Knot-tying mechanism for use in warp tying. 1,534,441; Apr. 21.
Cowen, Joshua L., New York, N. Y., assignor to The Lionel Corporation. Toy train track. 1,534,303; Apr. 21.
Cox, Charles N., Oroville, Calif. Mail box. 1,534,020; Apr. 21.
Cox, William, Toronto, Ontario, Canada. Fare box. 1,534,163; Apr. 21.
Craig, Arthur A., Chicago, Ill. Window ventilator. 1,534,636; Apr. 21.
Craig, Charles F., Los Angeles, Calif. Block-making machine. 1,534,361; Apr. 21.
Crampton, Thomas S., Stemmersrun, Md. Portable rack. 1,534,504; Apr. 21.
Crawford, Emerick B., assignor to The Oven Equipment & Mfg. Co., New Haven, Conn. Baker's oven. 1,534,841; Apr. 21.
Crawford, McGregor and Canby Company, The. (See Mattern, George W., assignor.)
Creasey, Samuel E., assignor to Sidney Blumenthal & Co., Inc., New York, N. Y. Producing designs in pile fabrics. 1,534,304; Apr. 21.
Creed, Frederick G., Croydon, England. Printing apparatus suitable for printing telegraphic messages. 1,534,164; Apr. 21.
Cristiana, Severino, Milan, Italy. Heating system. 1,534,921; Apr. 21.
Crocker, Arthur T. (See Case, F. E., and Crocker.)
Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)
Crompton & Knowles Loom Works. (See Wakefield, Walter H., assignor.)
Cumfer, Donald A., Chicago, Ill. Roofing. 1,534,165; Apr. 21.
Cunningham, Lawrence. (See MacAskill, Daniel A., assignor.)
Curtis, Ross E., Lincoln, Kans. Attachment for tractors. 1,534,690; Apr. 21.
Cutler, Wallace M., assignor to The E. Horton & Son Company, Windsor Locks, Conn. Chuck. 1,534,572; Apr. 21.
Cvengros, August, Cornopolis, Pa. Flytrap. 1,534,771; Apr. 21.
Dahlberg, B. G. (See Shaw, John K., assignor.)
Dahlberg, Henry W., assignor to The Great Western Sugar Company, Denver, Colo. Palatable beet sirup and preparing the same. 1,534,166; Apr. 21.

Dailey, Everett F., assignor to Merchants Chemical Company, St. Louis, Mo. Anchoring bar for curtain stretchers. 1,534,305; Apr. 21.
Daimler-Motoren-Gesellschaft. (See Porsche, Ferdinand, assignor.)
Dalboni, Carlo. (See Marchesini, G., and Dalboni.)
Da Lee, Minton I., Oklahoma City, Okla. Tombstone. Des. 67,073; Apr. 21.
Damschke, Wilhelm A. (See Haslam, William, assignor.)
Darby, Scott R., Medford, Oreg. Speed governor for tractors. 1,534,691; Apr. 21.
Dautell, Edouard F., St. Denis, France. Mud guard for motor vehicles. 1,534,922; Apr. 21.
Davidson, William M., assignor of one-half to M. L. Johnson, Eastview, Ky. Combination tool. 1,534,923; Apr. 21.
Davis Brake Beam Company. (See Fowler, William E., jr., assignor.)
Davis Brake Beam Company. (See Haskell, Broderick, assignor.)
Davis Brake Beam Company. (See Perkins, Charles F., assignor.)
Davis, Lewis K., Washington, D. C. Endless-track vehicle. 1,534,362; Apr. 21.
Davis, William D., Little Rock, Ark. Hydro-auto-helicopter. 1,534,692; Apr. 21.
Day, John H., Des Moines, Iowa. Burglar alarm 1,534,363; Apr. 21.
Day, Thomas, Company. (See Goddard, Wilfred B., assignor.)
Dayton Engineering Laboratories Company, The. (See Schwarz, Elmer H., assignor.)
De Armond, William C., and W. R. H. Watt, Philadelphia, Pa. Carbonator and draft arm for soda water. 1,534,772; Apr. 21.
Deavitt, Henry M., assignor to Central City Chemical Co., Chicago, Ill. Composition for cleaning pipes. 1,534,167; Apr. 21.
De Beaufort, Jean M. E. (See Claude, G., and de Beaufort.)
De Bellis, Vincent, New York, N. Y. Spindle and wheel construction. 1,534,056; Apr. 21.
De Bothezat, George, and I. Eremeeff, Dayton, Ohio. Barograph. 1,534,306; Apr. 21.
Decatur, Burt W., Springfield, Mass. Axle-setting tool. 1,534,505; Apr. 21.
Degener, Gustave O., Hartford, Conn., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,534,057; Apr. 21.
Delany, Edward L., Brooklyn, N. Y. Bracket for flush tanks. 1,534,924; Apr. 21.
De la Riboisiere, Jean F. P., Washington, D. C. Fuel for internal-combustion engines. 1,534,573; Apr. 21.
De Leo, John, New York, N. Y. Candle cup for lighting fixtures. Des. 67,074; Apr. 21.
De Magnani, Yole B., Buenos Aires, Argentina. Corset. 1,534,693; Apr. 21.
Demeter, Joseph K., New York, N. Y. Waterproof shoe for use in counter construction. 1,534,925; Apr. 21.
De Montmollin, Guillaume, and G. Bonbôte, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Dyestuff. 1,534,506; Apr. 21.
Dempsey, John D., Olean, N. Y. Polishing device. 1,534,259; Apr. 21.
Denbigh, Guy, and R. Walker, Vulcan, Alberta, Canada. Plow gauge wheel. 1,534,058; Apr. 21.
Dennett, Paul A., Saco, Me. Fluid-pressure controlling device. 1,534,059; Apr. 21.
De Palma, Frank, Brooklyn, N. Y. Shaving-cream dispenser. 1,534,307; Apr. 21.
Deskins, Ballard M., Waverly, Ohio, and K. F. Deskins, Logan, W. Va. Combined waste cock and cut-off for water pipes. 1,534,694; Apr. 21.
Deskins, Kennis F. (See Deskins, Ballard M. and K. F.)
De Waltoff, Samuel A., and L. H. McDaniel, Hartford, Conn., assignors to Shimmie Auto Co., Inc. Amusement apparatus. 1,534,978; Apr. 21.
Dexter, Carl J., West Lafayette, Ind. Wall construction and building block for the same. 1,534,060; Apr. 21.
Diamond Coal Cutter Company Limited. (See Lithgoe, John, assignor.)
Dibelka, Henry G., assignor to Miller & Pardee, Inc., Chicago, Ill. Automobile signal lamp. Des. 67,075; Apr. 21.
Dibelka, Henry G., assignor to Miller & Pardee, Inc., Chicago, Ill. Automobile signal lamp. Des. 67,076; Apr. 21.
Diegel, John F. W., Manitowoc, Wis. Saw-filing machine. 1,534,637; Apr. 21.
Dietz, Martin, Brooklyn, N. Y. Arch support. 1,534,308; Apr. 21.
Dix, Henry A., & Sons Corporation. (See Frank, Fred E., assignor.)
Dobie, John E., Milo, Me. Needle. 1,534,926; Apr. 21.
Dodds, Lee L. (See Griffith, T. E., and Dodds.)
Dollinger, Lewis L., Rochester, N. Y. Air filter. 1,534,208; Apr. 21.
Donahue, Joseph F., Providence, R. I. Gem setting. 1,534,442; Apr. 21.
Donat, Joseph L., Chicago, Ill. Heat-radiating device. 1,534,168; Apr. 21.
Donat, Joseph L., Chicago, Ill. Heating device. 1,534,169; Apr. 21.
Donat, Joseph L., Chicago, Ill. Cushioned-wheel construction. 1,534,574; Apr. 21.
Donat, Joseph L., Chicago, Ill. Heating device. 1,534,575; Apr. 21.
Dorr Company, The. (See Stedman, William A., assignor.)
Dorsey, Frank M., Cleveland, Ohio, assignor to General Electric Company. Metallurgical process. 1,535,019; Apr. 21.
Dorsey, Otho J., Philadelphia, Pa. Wear-compensating device. 1,534,170; Apr. 21.
Douchet, Florimond, assignor to Forges & Ateliers de Constructions Electriques de Jeumont, Societe Anonyme, Paris, France. Electrical junction box. 1,534,695; Apr. 21.
Dow Chemical Company, The. (See Gann, John A., assignor.)
Drake Lock Nut Company, et al. (See Carter, Edward B., assignor.)
Dreisbach, Victor C. (See Martin, Archibald J., assignor.)
Dubbs, Carbon P., Wilmette, assignor to The Universal Oil Products Company, Chicago, Ill. Treating hydrocarbon oils. 1,534,927; Apr. 21.
Duff Manufacturing Company, The. (See Schwerin, Frank H., assignor.)
Dufford, John R. (See Leonhard, W. C., Dufford, and Hough.)
Dugan, James J., Wilmington, Del. Coating and alloying metals. 1,534,928; Apr. 21.
Duncan, Arthur L., Piedmont, Calif. Method of and apparatus for bisecting fruit and removing a circumferential slice therefrom. 1,534,507; Apr. 21.
Dunham, Henry V., Mount Vernon, N. Y. Manufacture of chewing gum. 1,534,929; Apr. 21.
Dunham, Henry V., Mount Vernon, N. Y. Treatment of india rubber for use in chewing gum. 1,534,930; Apr. 21.
Dunham, Henry V., Mount Vernon, N. Y. Making chewing-gum base. 1,534,931; Apr. 21.
Dunlap, Matthew E., Madison, Wis., assignor to United States of America. Shrapnel plug. 1,534,204; Apr. 21.
Dunlop Tire and Rubber Corporation of America. (See Willshaw, Harry, assignor.)
Dunn, Thomas A., Jamaica, Iowa. Combined cushion and pneumatic tire. 1,534,365; Apr. 21.
Duplex Printing Press Company. (See Bechman, Henry F., assignor.)
Dura Company, The. (See Wilson, Herbert, assignor.)
Dwight & Lloyd Sintering Company. (See Knox, John, assignor.)
Earnshaw, William B., assignor to General Motors Research Corporation, Dayton, Ohio. Valve mechanism for internal-combustion engines. 1,534,778; Apr. 21.
Earp-Thomas, Oswald C., Richmond, Va. Apparatus for testing soil or seed. 1,534,508; Apr. 21.
Eastwood, Benjamin, Company. (See Wells, William S., assignor.)
Ebert, Hugo E., Merton, Wis. Snowplow attachment. 1,534,638; Apr. 21.
Edelmann, E., & Co. (See Fogelberg, Vanus C., assignor.)
Edgren, Fred E., Chicago, Ill. Cutting or trimming device. 1,534,576; Apr. 21.
Edlund, Henry J., Burlington, Vt. Can-opening device. 1,534,932; Apr. 21.
Edmiston, Simon C., Los Angeles, Calif. Abdominal and sacroiliac support. 1,534,774; Apr. 21.
Edwards, Junius D. (See Hoopes, W., Edwards, and Horsfield.)
Edwards, Junius D. (See Hoopes, W., Frary, and Edwards.)
Eggleston, Lewis W., Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill. Damper regulator. 1,534,775; Apr. 21.
Eichenhofer, Walter F. (See Brown, Jacob S., assignor.)
Eisinga, Dirk, Seattle, Wash. Bolting-up pin. 1,534,776; Apr. 21.
Eldredge, Henry C., St. Bernard, Ohio, and C. H. Ladd, Newport, Ky. Book-cover back-shaping apparatus. 1,534,696; Apr. 21.
Elwell, Edwin L., Baltimore, Md. Machine for manufacturing crimped paper cups. 1,534,100; Apr. 21.
Ely, Bernard M., assignor to Lambert Machine Company, Marshall, Mich. Chaff remover. 1,535,018; Apr. 21.
Engl, Josef. (See Vogt, H., Engl, and Mansolle.)
Engleman, Herbert J. (See Engleman, John I. and H. J.)
Engleman, John I., Kearney, Nebr., and H. J. Engleman, Arminto, Wyo. Driving attachment for motor vehicles. 1,534,639; Apr. 21.
Eremeeff, Ivan. (See De Bothezat, George, and Eremeeff.)
Erickson, Edward, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on shoe bottoms. 1,534,061; Apr. 21.
Erisman, Arthur C. (See Averill, William H., assignor.)
Erni, Walter, and A. E. Lange, jr., Milwaukee, Wis. Combined lamp and sound reproducing device. Des. 67,077; Apr. 21.
Ernst, Emil U. G., Copenhagen, Denmark. Automatic gas regulator. 1,534,577; Apr. 21.
Evans, Howard B., Portland, Oreg. Mixing machine for concrete mixtures and the like. 1,534,366; Apr. 21.
Evers, Stephen, Freeburg, Mo. Gate. 1,534,842; Apr. 21.

Ewald, Harry, and O. Wernecke, assignors to Grimme, Natalis & Co., Aktiengesellschaft, Braunschweig, Germany. Single-tooth wheels for counting apparatus. 1,534,938; Apr. 21.

Fabricio y Díaz, Francisco, Sagua la Grande, Cuba. Apparatus for raising vehicles. 1,534,364; Apr. 21.

Falwell, Wray, Fitchburg, Mass. Valve-operating device. 1,534,509; Apr. 21.

Fanucci, Frank A., Scranton, Pa. Figure toy. 1,534,367; Apr. 21.

Farbenfabriken vorm. Friedr. Bayer and Co. (See Bauer, W., and Herre, assignors.)

Farmer, Thomas E., assignor of one-half to I. Chelotti, Stockett, Mont. Curtain holder. 1,534,448; Apr. 21.

Farnsworth, Frederick C. (See Shortt, Howard G., assignor.)

Faultless Rubber Company, The. (See Miller, Thomas W., assignor.)

Federal Phosphorus Company. (See Klugh, Bethune G., assignor.)

Feldbush, Harry, and H. Miller, Cincinnati, Ohio, assignors to Worthington Pump and Machinery Corporation, New York, N. Y. Valve. 1,534,260; Apr. 21.

Feldheym, Albert, San Francisco, Calif. Massage instrument. 1,534,444; Apr. 21.

Fellows, Howard E., Hammersmith, London, England. Ignition system for internal-combustion engines. 1,534,368; Apr. 21.

Ferrabino, Edoardo, Turin, Italy. Wire-spoke wheel. 1,534,934; Apr. 21.

Ferrette, Louis E. F., Paris, France. Air pump for safety lamps. 1,534,369; Apr. 21.

Ferrette, Louis E. F., Paris, France. Incandescent safety lamp for mines. 1,534,370; Apr. 21.

Fessenden, Reginald A., Brookline, Mass., assignor to Submarine Signal Company, Portland, Me. Eliminating disturbing energy. 1,534,205; Apr. 21.

Fickes, Josiah B., Omaha, Nebr. Dental floss-guiding means. 1,534,171; Apr. 21.

Fiechtl, Ferdinand, Cherryvale, Kans., and W. Kappelmann, St. Francois, Mo. Vertical-retort smelting furnace. 1,534,935; Apr. 21.

Field, Frank E., Somerville, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Amplifier circuit. 1,534,172; Apr. 21.

Fielding, William E., assignor to The Mattatuck Manufacturing Company, Waterbury, Conn. Chair glide. 1,534,573; Apr. 21.

Finlay, Dozier, Berkeley, assignor to The Paraffine Companies, Inc., San Francisco, Calif. Mulch. 1,534,371; Apr. 21.

Finley, Dozier, Berkeley, assignor to The Paraffine Companies, Inc., San Francisco, Calif. Mulch. 1,534,372; Apr. 21.

Fischbach, Eugène E., Hanoi, Tonkin, Indo-China. Confining and restraining device. 1,534,936; Apr. 21.

Fischer, Hermann, New York, N. Y., assignor to C. Brandes, Inc. Diaphragm for telephone receivers. 1,534,373; Apr. 21.

Fisher, J. M., Company. (See Chilson, Lewis S., assignor.)

Fisher, Leo E., Detroit, Mich. Stake or gate holder for trucks. 1,534,101; Apr. 21.

Fisher, Oscar H. (See Wans, A. H., and Fisher.)

Fisk Rubber Company, The (See Frank, Arthur A., assignor.)

Fisk Rubber Company, The. (See Lawler, Frank J., assignor.)

Fisk Rubber Company, The. (See Wiese, Edwin C., assignor.)

Fitting, George W., Millville, N. J. Fabric receiver for knitting machines. 1,534,445; Apr. 21.

Fitzgerald, Alan S., London, England, assignor to General Electric Company. Protective system. 1,534,697; Apr. 21.

Flanagan, Frank J., assignor of one-half to J. A. Cain, Fredericton, New Brunswick, Canada. Heating drum or radiator. 1,535,072; Apr. 21.

Fleckenstein, Alexius P., Ionia, assignor to Fleckenstein Visible Gasometer Co. of Michigan, Grand Rapids, Mich. Liquid-dispensing apparatus. Des. 67,078; Apr. 21.

Fleckenstein Visible Gasometer Co. of Michigan. (See Fleckenstein, Alexius P., assignor.)

Fleischmann Company, The. (See Hildebrandt, F. M., and Frey, assignors.)

Fleming, David A. (See Stapleton, Jerry, assignor.)

Flessner, Hinrich, Highland Park, Mich. Stock-watering device. 1,534,843; Apr. 21.

Flood, John A., assignor to Northwestern Reed and Rattan Company, Minneapolis, Minn. Machine for filling cushions. 1,534,062; Apr. 21.

Fogelberg, Vanus C., assignor to E. Edelmann & Co., Chicago, Ill. High-pressure lubricating apparatus. 1,534,178; Apr. 21.

Foley, Hamilton, assignor to Radium Dial Company, Pittsburgh, Pa. Luminous device. 1,534,937; Apr. 21.

Foll, John V., London, England, assignor to The Western Union Telegraph Company, New York, N. Y. Synchronous telegraph system. 1,535,073; Apr. 21.

Folmsbee, Clyde H., Bayonne, N. J., assignor to American Car and Foundry Company, New York, N. Y. Heated discharge outlet casing for tank cars. 1,534,102; Apr. 21.

Forges & Ateliers de Constructions Electriques de Jeumont, Societe Anonyme. (See Douchet, Florimond, assignor.)

Forster, Thomas E. (See Strong, H. L., and Forster.)

Foss, Benjamin F., Portland, Me. Chimney stop. 1,534,103; Apr. 21.

Foster, Angier H., Omaha, Nebr. Rate-of-climb indicator for aircraft. 1,534,206; Apr. 21.

Foster, Grover J., Sioux City, Iowa. Process and apparatus for scalding animals. 1,534,207; Apr. 21.

Foucht, Proctor D., Topeka, Kans. Chicken feeder. 1,534,375; Apr. 21.

Fournier, Louis, and G. Mang, Paris, France; said Fournier assignor to said Mang. Keyboard of calculating machines. 1,534,938; Apr. 21.

Fowler, Claude J., Yonkers, and J. Fowler, Red Creek, N. Y. Automatic damper. 1,534,845; Apr. 21.

Fowler, Claude. (See Fowler, Jefferson and C.)

Fowler, Henry G., Associated, assignor to Associated Oil Company, San Francisco, Calif. Processing hydrocarbon lubricating oils. 1,534,376; Apr. 21.

Fowler, Jefferson, Red Creek, and C. Fowler, Yonkers, N. Y. Damper. 1,534,844; Apr. 21.

Fowler, William E., jr., Mount Lebanon, assignor to Davis Brake Beam Company, Johnstown, Pa. Brake beam. 1,534,579; Apr. 21.

Fowler, William E., jr., Mount Lebanon, assignor to Davis Brake Beam Company, Johnstown, Pa. Shoe for brake-beam supports. 1,534,580; Apr. 21.

Fowler, William E., jr., Mount Lebanon, assignor to Davis Brake Beam Company, Johnstown, Pa. Shoe for brake-beam supports. 1,534,581; Apr. 21.

Fowler, William E., jr., Mount Lebanon, assignor to Davis Brake Beam Company, Johnstown, Pa. Securing brake-beam supports to trucks. 1,534,582; Apr. 21.

Fowler, William E., jr., Mount Lebanon, assignor to Davis Brake Beam Company, Johnstown, Pa. Securing brake-beam supports to trucks. 1,534,583; Apr. 21.

F. P. Limited. (See Andrew, George E., assignor.)

Frary, Francis C., Oakmont, assignor to Aluminum Company of America, Pittsburgh, Pa. Electrolytic production of aluminum. 1,534,031; Apr. 21.

Frary, Francis C. (See Hoopes, W., and Frary.)

Frary, Francis C. (See Hoopes, W., Frary, and Edwards.)

Frank, Arthur A., Milwaukee, Wis., assignor, by mesne assignments, to The Fisk Rubber Company, Chicopee Falls, Mass. Molding pneumatic casings. 1,534,777; Apr. 21.

Frank, Fred E., assignor to Henry A. Dix & Sons Corporation, New York, N. Y. Garment. 1,534,174; Apr. 21.

Frankel, Fridolf, Stockholm, Sweden. Metal sound board for pianos and the like. 1,534,309; Apr. 21.

Fraser, James M., Stafford Springs, Conn. Presser board. 1,534,510; Apr. 21.

Fraser, Thomas, and H. F. Yancey, Urbana, Ill. Separating loosely-mixed materials. 1,534,846; Apr. 21.

Frazer, Pinkney P., assignor, by mesne assignments, to E. Schaefer and D. F. Schaefer, trustees for the Multiple Molding Machine Co., St. Louis, Mo. Molding machine. 1,535,020; Apr. 21.

Frazier, Sherman W. (See McCord, A. W., and Frazier.)

Frederick, Joseph P., assignor of one-half to A. J. Lurie, Chicago, Ill. Doorlock. 1,534,584; Apr. 21.

Frederiksen, Mabel H., San Francisco, Calif. Sheathing board. 1,534,511; Apr. 21.

Freund, Cheri S., assignor to Continental Cement Tile Company, Chicago, Ill. Roof structure. 1,534,175; Apr. 21.

Frey, Charles N. (See Hildebrandt, F. M., and Frey.)

Frey, George, assignor to The J. G. Brill Company, Philadelphia, Pa. Passenger car. 1,534,847; Apr. 21.

Fridena, Daniel T., and W. E. Judd, Brockwayville, Pa. Hair curler. 1,534,063; Apr. 21.

Fritzsche, Hermann, and E. Reber, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. 1-aryl-5-pyrazolones and making same. 1,534,512; Apr. 21.

Fuge, James W., assignor to The Fuge New Way Milking Machine and Tester Company Limited, Featherston, New Zealand. Milk-sample-obtaining means for use in vacuum milking machinery. 1,534,939; Apr. 21.

Fuge New Way Milking Machine and Tester Company Limited, The. (See Fuge, James W., assignor.)

Fuller Brush Company, The. (See Lucia, Louis V., assignor.)

Fulton Company, The. (See Fulton, Weston M., assignor.)

Fulton, Weston M., assignor to The Fulton Company, Knoxville, Tenn. Gate valve. 1,534,513; Apr. 21.

Furiate, Daniel P., Toledo, assignor of one-half to G. W. Zay, Tiffin, Ohio. Window guard. 1,534,377; Apr. 21.

Furlong, Larry, Havre, Mont. Sickle-holding attachment for grinders. 1,535,021; Apr. 21.

Furste, Henry, assignor to The United States Printing and Lithographing Company, Cincinnati, Ohio. Carton. 1,534,261; Apr. 21.

Gabriel, Leo W., Badin, N. C., assignor to Aluminum Company of America, Pittsburgh, Pa. Testing molten alumina. 1,534,032; Apr. 21.

Galgoczi, Walter, Rosebush, Mich., assignor of one-third to P. Johs, East Chicago, Ind. Dining table. 1,534,848; Apr. 21.

Gallaghan, John P. (See Bancroft, Roy, assignor.)

Gallimore, Keith F. (See Conradson, P., Kempton, and Gallimore.)

Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Golf ball and making the same. 1,534,104; Apr. 21.

Gann, John A., assignor to The Dow Chemical Company, Midland, Mich. Flux for magnesium and alloys thereof. 1,534,105; Apr. 21.

Gannon, Wilfred, assignor to W. R. Tidmarsh, London, England. Starting handle for internal-combustion engines. 1,534,940; Apr. 21.

Gansert, Fred and H., jr., Syracuse, N. Y. Method of and apparatus for making paper-box caps. 1,534,698; Apr. 21.

Gansert, Herman, jr. (See Gansert, Fred and H., jr.)

Garbell, Max, assignor, by mesne assignments, to O. D. Jennings & Company, Chicago, Ill. Typewriting machine. 1,534,585; Apr. 21.

Gardner, Joseph I., Lakeside, Ariz. Clutch release. 1,534,699; Apr. 21.

Gates, Walter S., assignor to Insulating Materials Company, Detroit, Mich. Dyeing and bleaching machine. 1,534,106; Apr. 21.

Gaunt, Charles F., Birmingham, England. Holder for stropping safety-razor blades. 1,534,310; Apr. 21.

Gebers, Randolph C., Elmhurst, N. Y. Knitting apparatus. 1,534,311; Apr. 21.

Gehrung, Julien A., New York, N. Y. Automobile truck. 1,534,514; Apr. 21.

General Electric Company. (See Alexanderson, Ernst F. W., assignor.)

General Electric Company. (See Butzke, Gustav, assignor.)

General Electric Company. (See Case, F. E., and Crocker, assignors.)

General Electric Company. (See Dorsey, Frank M., assignor.)

General Electric Company. (See Fitzgerald, Alan S., assignor.)

General Electric Company. (See Hilliard, John D., assignor.)

General Electric Company. (See Junggren, Oscar, assignor.)

General Electric Company. (See Kellogg, Edward W., assignor.)

General Electric Company. (See Kellogg, E. W., and Rice, assignors.)

General Electric Company. (See Lewis, Edward H., assignor.)

General Electric Company. (See Macmillan, Campbell, assignor.)

General Electric Company. (See McDonald, Gordon R., assignor.)

General Electric Company. (See Troy, Matthew O., assignor.)

General Electric Company. (See Vernon, Harvey H., assignor.)

General Fire Extinguisher Company. (See Braemer, William G. R., assignor.)

General Fire Extinguisher Company. (See Braemer, W. G. R., and Roberts, assignors.)

General Motors Corporation. (See Blackmore, Lloyd, assignor.)

General Motors Corporation. (See Jerome, Benjamin, assignor.)

General Motors Corporation. (See Roe, Charles H., assignor.)

General Motors Research Corporation. (See Earnshaw, William B., assignor.)

General Motors Research Corporation. (See Short, C. R., and Babitch, assignors.)

General Rubber Company. (See Coffin, Joseph G., assignor.)

Germek, Andrew, Edwardsville, Pa. Car-loading means. 1,534,878; Apr. 21.

Gerrard, Alec J. (See Peacock, Samuel, assignor.)

Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Electric-switch construction. 1,534,515; Apr. 21.

Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Safety switch. 1,534,516; Apr. 21.

Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Electric safety switch. 1,534,517; Apr. 21.

Gibb, William W., Imperial, Nebr. Grain-drill attachment. 1,534,941; Apr. 21.

Gibson, Delsworth E., Dunkirk, N. Y. Fountain glove. 1,534,208; Apr. 21.

Giddings & Lewis Machine Tool Company. (See Conradson, Prentice, assignor.)

Giddings & Lewis Machine Tool Company. (See Conradson, P., Kempton, and Gallimore, assignors.)

Gilberts, Andrew, Chicago, Ill. Contact breaker. 1,534,879; Apr. 21.

Gisholt Machine Company. (See Turner, Charles A., assignor.)

Glass, Perley R., Wayland, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener-setting machine. 1,534,107; Apr. 21.

Glass, Perley R., Wayland, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener-setting machine. 1,534,108; Apr. 21.

Gleason Works. (See Slade, Leon D., assignor.)

Globe Elevator Appliance Company. (See Bostick, Heywood H., assignor.)

Glowacki, John B., Chicago, Ill. Arm rest for crutches. 1,534,209; Apr. 21.

Gobatti, Edmund F., Pueblo, Colo. Grease-cup plug. 1,534,942; Apr. 21.

Godard, Lula. (See Larrey, T., and Godard.)

Goddard, Wilfred B., assignor to Thomas Day Company, San Francisco, Calif. Electric outlet fixture. 1,534,640; Apr. 21.

Goddard, Wilfred B., assignor to Thomas Day Company, San Francisco, Calif. Lighting fixture. 1,534,641; Apr. 21.

Goeschke, Armin, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Indophenol sulphur dyestuff and making same. 1,534,518; Apr. 21.

Goff, Harold W., assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic telephone switch. 1,534,109; Apr. 21.

Goldman, Maurice A., assignor to Milford Textile Corporation, Milford, N. H. Attachment for looms. 1,534,033; Apr. 21.

Goldman, Sigmund L., Chicago, Ill. Decanting apparatus. 1,534,700; Apr. 21.

Gonzalez, Jose, Tampa, Fla. Vehicle signal. 1,534,943; Apr. 21.

Gooding, Arthur T., London, England. Combination cigarette and match case. 1,534,519; Apr. 21.

Goodman, William A., Los Angeles, Calif. Electric heater. 1,534,778; Apr. 21.

Goodrich, B. F., Company, The. (See Gammeter, John R., assignor.)

Goodrich, B. F., Company, The. (See Shook, Florain J., assignor.)

Gossett, Robert W., assignor to Manufacturers' Equipment Company, Spartanburg, S. C. Spinning-frame stopping mechanism. 1,534,262; Apr. 21.

Gossett, Robert W., assignor to Manufacturers' Equipment Company, Spartanburg, S. C. Builder mechanism. 1,534,263; Apr. 21.

Gouldbourn, Joseph, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for working uppers over lasts. 1,534,110; Apr. 21.

Goza, Jesse R., Louisville, Miss. Safety attachment for razors. 1,534,312; Apr. 21.

Graham, David M., Bordulac, N. Dak. Harvester and stacker. 1,534,111; Apr. 21.

Graham, David M., Bordulac, N. Dak., assignor to Graham-Roach Harvester and Stacker Company of North Dakota. Apparatus for cutting and stacking grain. 1,534,112; Apr. 21.

Graham-Roach Harvester and Stacker Company of North Dakota. (See Graham, David M., assignor.)

Gravell, James H., Elkins Park, Pa. Preparing metals for painting. 1,534,446; Apr. 21.

Gray, Chesleigh, Indianapolis, Ind. Cement-road-making machine. 1,534,176; Apr. 21.

Gray, Tom F., Manchester, England. Valve. 1,534,701; Apr. 21.

Great Western Sugar Company, The. (See Dahlberg, Henry W., assignor.)

Green, Charles, Brooklyn, assignor to Charles Green Company, Inc., New York, N. Y. Display card. Des. 67,079; Apr. 21.

Green, Charles, Company. (See Green, Charles, assignor.)

Greene, Richard A., Brooklyn, N. Y., assignor to J. Burns & Sons. Nut mill. Re16,046; Apr. 21.

Griffith, Thomas E., and L. L. Dodds, assignors to The W. S. Tyler Company, Cleveland, Ohio. Operating mechanism for elevator doors. 1,534,210; Apr. 21.

Grim, Edward H., Dott, W. Va. Apparatus for operating mine doors, switches, or the like. 1,534,702; Apr. 21.

Grimme, Natalis & Co., Aktiengesellschaft. (See Ewald, H., and Wernecke, assignors.)

Grossman, Samuel, assignor to D. Klebanoff and S. Grossman, New York, N. Y. Finger ring. Des. 67,080; Apr. 21.

Grossman, Samuel, assignor to D. Klebanoff and S. Grossman, New York, N. Y. Finger ring. Des. 67,081; Apr. 21.

Grossman, Samuel, et al. (See Grossman, Samuel, assignor.)

Gruber, Arthur H., Ludington, Mich. Tread for automobile tires. Des. 67,082; Apr. 21.

Gruen Watch Company, The. (See Schwettman, Harry W., assignor.)

Grunewald, Robert H. C. (See Bath, J., and Grunewald.)

Guest, Charles, Cleveland, Ohio. Roof brick. 1,534,177; Apr. 21.

Gulf Refining Company. (See McAfee, Almer M., assignor.)

Gulick, Edward J., and M. V. Hawkins, assignors to C. G. Conn, Ltd., Elkhart, Ind. Machine for forming sockets on musical instruments. 1,534,520; Apr. 21.

Gurney, Albert J., assignor to The American Mine Door Co., Canton, Ohio. Wire hanger. 1,534,703; Apr. 21.

Guy's Calculating Machines Limited. (See Blaches, Charles F., assignor.)

Haage, Frederick G., Clifton, N. J. Snap. 1,534,944; Apr. 21.

Hadaway, John B., Swampscott, and T. H. Seely, Malden, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Insole-reenforcing machine. 1,534,118; Apr. 21.

Hain, Folke B. L., Malmo, Sweden. Electric relay. 1,534,945; Apr. 21.

Halbeck, Oscar, Brooklyn, N. Y. Cleaning device. 1,534,521; Apr. 21.

Hall, Roy F., Harrisburg, Ill. Iron. 1,534,946; Apr. 21.

Halliday, Louis B., Cincinnati, Ohio. Game apparatus. 1,534,522; Apr. 21.

Hallman, Ludlow B., Dothan, Ala. Machine for destroying boll weevils. 1,534,947; Apr. 21.

Hallquist, Einar G., Edwardsville, Ill., assignor to Commonwealth Steel Company, St. Louis, Mo. Railway truck. 1,534,114; Apr. 21.

Halvorson, Cromwell A. B., jr., Lynn, Mass. Headlight. 1,534,849; Apr. 21.

Hamel, Joseph O. (See McLaughlin, J. E., and Hamel.)

Hamilton, Frank S., Boston, Mass. Dust cap for valve stems of pneumatic tires. 1,534,850; Apr. 21.

Hamilton, Thomas C., Boston, Mass. Bottle-cap puller. 1,534,211; Apr. 21.

Hammond, John H., jr., Gloucester, Mass. Receiving system for radiant energy. 1,534,704; Apr. 21.

Hammond, William H., et al. (See Lundy, John C., assignor.

Hancock, Jesse E., Du Pont, Ga. Dumping grate. 1,534,880; Apr. 21.

Hannemann, Robert H., Wausau, Wis. Air-moistening device for engines. 1,534,881; Apr. 21.

Hansalpakar, Edwin, assignor to Brockton Heel Company, Inc., Brockton, Mass. Heel-building machine. 1,534,313; Apr. 21.

Hanscom, Walter G. (See Peet, E. L., Hanscom, and Smith.)

Hansen, Abel, Metuchen, N. J. Bathtub mold. 1,534,779; Apr. 21.

Hansen, Abel, Metuchen, N. J. Apparatus for making porcelain legs. 1,534,780; Apr. 21.

Hanson, Rodney L., Dayton, Ohio, assignor, by mesne assignments, to National Sewing Machine Company, Belvidere, Ill. Tension device for sewing machines. 1,534,264; Apr. 21.

Harder, Stephen, Washington, D. C. Line-justification-indicating mechanism. 1,534,523; Apr. 21.

Harder, Stephen, Washington, D. C. Signal means for record-strip composing machines. 1,534,524; Apr. 21.

Hardy, Haslett M. (See Thiedemann, W. L., and Hardy.)

Hardy, Samuel, Hoboken, N. J., assignor to A. G. Spalding & Bros., New York, N. Y. Center strap for tennis nets. 1,534,447; Apr. 21.

Harkort, Fred, Monterey, Calif. Wave motor. 1,534,115; Apr. 21.

Harper, Martin A. J., London, England. Cinematographic apparatus. 1,534,949; Apr. 21.

Harris, Miletus B., Richmond, Va. Sash-glazing device. 1,534,705; Apr. 21.

Harrison, George D., North Attleboro, Mass., assignor to Providence Stock Company, Providence, R. I. Bracelet. 1,534,586; Apr. 21.

Harrison, William H., Philadelphia, Pa. Garment hanger. 1,534,265; Apr. 21.

Hart, Gertrude C., assignor to Protestant Women's National Civic Federation, Chicago, Ill. Badge. Des. 67,083; Apr. 21.

Hartman, Clarence P. (See Bishop, George D., and Hartman.)

Hartmann, Max, and J. Kägi, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Acylated diamine. 1,534,525; Apr. 21.

Hartogs, Jacques C., Arnhem, Netherlands. Spinning viscose. 1,534,382; Apr. 21.

Haskell, Broderick, Franklin, assignor to Davis Brake Beam Company, Johnstown, Pa. Brake-beam support. 1,534,587; Apr. 21.

Haskell, Broderick, Franklin, assignor to Davis Brake Beam Company, Johnstown, Pa. Brake-beam support. 1,534,588; Apr. 21.

Haslam, William, assignor of one-half to W. A. Damschke, South Melbourne, Australia. Disk wheel for vehicles. 1,534,383; Apr. 21.

Hawkins, Morris V. (See Gulick, E. J., and Hawkins.)

Hawkins, William W., Brooklyn, N. Y., assignor to Webster Electric Company, Racine, Wis. Ignition system. 1,534,384; Apr. 21.

Hawley, Charles G., assignor to Locomotive Firebox Company, Chicago, Ill. Locomotive boiler. 1,534,590; Apr. 21.

Hawley, Charles T. (See Smith, C., and Hawley.)

Hauser, Ernst, Schaffhausen, Switzerland. Oil container for electric apparatus. 1,534,448; Apr. 21.

Hausser, Edward S., Joliet, Ill. Electric doorknob alarm. 1,534,589; Apr. 21.

Hazel-Atlas Glass Company. (See Oliver, G. G., and Stenhouse, assignors.)

Hazel-Atlas Glass Co. (See Stenhouse, Thomas, assignor.)

Heeter, Charles M. and J. W., Butler, Pa. Control packer head. 1,534,851; Apr. 21.

Heeter, Joseph W. (See Heeter, Charles M. and J. W.)

Heintz, Leo I., assignor to Heintz Manufacturing Company, Philadelphia, Pa. Bending metal. 1,534,314; Apr. 21.

Heintz Manufacturing Company. (See Heintz, Leo I., assignor.)

Hemphill Company. (See Bosworth, George P., assignor.)

Henkel, George W., and A. B. Updike, San Francisco, Calif. Air and vapor supplying and cleaning device for engines. 1,534,385; Apr. 21.

Hepworth, John W. (See Keyser, George, assignor.)

Hercules Gas Engine Company. (See McMullen, V. E., and Woodruff, assignors.)

Hercules Match Corporation. (See Nevins, Thomas C., assignor.)

Herman, John E. (See Bornhauser, O. E., and Herman.)

Herman, Kenneth R. (See Riedele, P., Cason, and Herman.)

Hernandez, Mae, Brooklyn, N. Y. Combination corset and brassière. 1,534,950; Apr. 21.

Herre, Alfred. (See Bauer, W. and Herre.)

Herskovitz, Max, assignor to Peerless Light Company, Chicago, Ill. Electric-socket structure. 1,534,706; Apr. 21.

Herzog, Robert. (See Scheller, O., and Herzog.)

Heslewood, William R., assignor to M. and H. Piston Ring Co., Oakland, Calif. Piston ring. 1,534,286; Apr. 21.

Hess, Edward B., Manhattan Beach, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,534,116; Apr. 21.

Hess, Willis C., Detroit, Mich. Carburetor. 1,534,212; Apr. 21.

Hetherington, John, and Sons Limited. (See Horridge, James, assignor.)

Heyns, Hugo E., Chicago, Ill. Attachment for check-controlled apparatus. 1,534,117; Apr. 21.

Hickok Manufacturing Company. (See Shields, Lowell W., assignor.)

Hicks, William W. (See Kercher, A. J., and Hicks.)

Hiemer, Ferdinand, Plainfield, N. J. Internal-combustion motor. 1,534,951; Apr. 21.

Hildebrandt, Frank H., and C. N. Frey, Pittsburgh, Pa., assignors, by mesne assignments, to The Fleischmann Company. Treating and preparing yeast. 1,534,387; Apr. 21.

Hill, Guy, Washington, D. C. Variable condenser. 1,534,213; Apr. 21.

Hill, Henry C., Cincinnati, Ohio. Automobile speed controller. 1,534,526; Apr. 21.

Hill, James. (See Baddiley, J., Shepherdson, Swann, Hill, and Lawrie.)

Hilliard, John D., Schenectady, N. Y., assignor to General Electric Company. Oil switch. 1,534,707; Apr. 21.

Hitchcock, Harry W., Berkeley, Calif., assignor to American Telephone and Telegraph Company. Adjusting balance between electrical conductors or networks. 1,534,118; Apr. 21.

Hoagland, Orville, J., Peru, Ind. Fishing-rod holder. 1,534,642; Apr. 21.

Hobbs Manufacturing Company. (See Copeland, Eugene A., assignor.)

Hobday, Herbert L., and F. W. Nunn, assignors to Nunnday Proprietary Limited, Melbourne, Australia. Casting of dentures in metal. 1,534,952; Apr. 21.

Hochberg, Oscar, New York, N. Y., and J. W. Steinmeyer, East Orange, N. J., assignors to American Car and Foundry Company, St. Louis, Mo. Uncoupling device. 1,534,119; Apr. 21.

Hodges, Arthur, Baltimore, Md. Game apparatus. 1,534,591; Apr. 21.

Hoe, R., & Co. (See Roesen, Oscar, assignor.)

Hoffman, Paul, Western Springs, Ill. Railway frog. 1,534,178; Apr. 21.

Hogue, Oliver D., Brookline, Mass. Electrically-heated humidifying apparatus. 1,534,388; Apr. 21.

Hohman, Charles J., Rockaway Park, N. Y. Electric paint and varnish scraper. 1,534,953; Apr. 21.

Hoke, William E., Baltimore, Md. Glazing cast iron. 1,534,708; Apr. 21.

Holley, Earl. (See Melocke, Daniel H., assignor.)

Holoubek, Karel. (See Horak, H., and Holoubek.)

Holt, Francis A., Elmhurst, N. Y. Conducting electrolytic operations. 1,534,709; Apr. 21.

Holt, John T., Los Angeles, Calif. Bathtub mat. 1,534,214; Apr. 21.

Holtz, Emil T., Shell Lake, Wis. Gaff hook. 1,534,954; Apr. 21.

Holsapfel Albert O., New York, N. Y. Treatment of bituminous substances. 1,534,389; Apr. 21.

Hood, Frank E. (See Sammis, L. B., and Hood.)

Hood Rubber Company. (See Perrault, Joseph E., assignor.)

Hoopes, William, assignor to Aluminum Company of America, Pittsburgh, Pa. Electrolytically-refined aluminum and articles made therefrom. 1,534,315; Apr. 21.

Hoopes, William, Pittsburgh, and F. C. Frary, Oakmont, assignors to Aluminum Company of America, Pittsburgh, Pa. Refining aluminum electrolytically with fused electrolytes. 1,534,319; Apr. 21.

Hoopes, William, Pittsburgh, F. C. Frary, and J. D. Edwards, Oakmont, assignors to Aluminum Company of America, Pittsburgh, Pa. Production of metallic aluminum from impure materials. 1,534,316; Apr. 21.

Hoopes, William, Pittsburgh, F. C. Frary, and J. D. Edwards, Oakmont, assignors to Aluminum Company of America, Pittsburgh, Pa. Electrolytic production of aluminum. 1,534,317; Apr. 21.

Hoopes, William, Pittsburgh, F. C. Frary, and J. D. Edwards, Oakmont, assignors to Aluminum Company of America, Pittsburgh, Pa. Electrolytic refining of aluminum. 1,534,318; Apr. 21.

Hoopes, William, Pittsburgh, J. D. Edwards, Oakmont, Pa., and B. T. Horsfield, Badin, N. C., assignors to Aluminum Company of America, Pittsburgh, Pa. Electrolytic cell and lining the same. 1,534,322; Apr. 21.

Hoopes, William, assignor to Aluminum Company of America, Pittsburgh, Pa. Cells for electrolytic refining or separating process. 1,534,320; Apr. 21.

Hoopes, William, assignor to Aluminum Company of America, Pittsburgh, Pa. Lining cells for electrolytic refining. 1,534,321; Apr. 21.

Hopkins, Alfred T. (See Sellew, William H., and H. W., assignors.)

Hopkins, Cecil B., San Francisco, Calif. Concrete form. 1,534,215; Apr. 21.

Hopkins, Charles E., deceased, Plainfield, N. J.; The Plainfield Trust Company, administrator. Casting machine. 1,534,710; Apr. 21.

Hopkins, Robert C., Alliance, Ohio. Pickling-tank construction. 1,534,643; Apr. 21.

Horak, Henry, and K. Holoubek, New York, N. Y. Alarm device for automobiles. 1,534,955; Apr. 21.

Hornung, Anton N., Los Angeles, Calif. Latch for refrigerator doors. 1,534,216; Apr. 21.

Horridge, James, Bolton, assignor to John Hetherington and Sons Limited, Manchester, Lancaster, England. Combing machine. 1,534,781; Apr. 21.

Horridge, James, Bolton, assignor to John Hetherington and Sons Limited, Manchester, England. Machine for combing cotton, wool, and the like. 1,534,782; Apr. 21.

Horridge, James, Bolton, assignor to John Hetherington and Sons Limited, Manchester, Lancaster, England. Combing machine. 1,534,783; Apr. 21.

Horridge, James, Bolton, assignor to John Hetherington and Sons Limited, Vulcan Works, Ancoats, Manchester, England. Machine for combing cotton, wool, and the like. 1,534,784; Apr. 21.

Horsfield, Basil T. (See Hoopes, W., Edwards, and Horsfield.)

Horton, E., & Son Company, The. (See Cutler, Wallace M., assignor.)

Horton, Eugene L., San Francisco, Calif. Game. 1,534,390; Apr. 21.

Hoskin, Edmund F., assignor to William A. Spinks & Co., Chicago, Ill. Billiard table. 1,534,711; Apr. 21.

Hoskin, Edmund F., assignor to Wm. A. Spinks & Co., Chicago, Ill. Billiard table. 1,534,712; Apr. 21.

Hotter, Edward, Chicago, Ill. Die-casting machine. 1,534,266; Apr. 21.

Houck, Henry C., Seattle, Wash. Dental oven. 1,534,592; Apr. 21.

Hough, Arthur. (See Leonhard, W. C., Dufford, and Hough.)

Houghtaling, Walter A., Dunellen, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Trouble indicator for telegraph systems. 1,535,074; Apr. 21.

Houseman, Wilbur L., assignor to Standard-Trump Brothers Machine Company, Wilmington, Del. Mechanism for producing openwork on knitting machines. 1,534,785; Apr. 21.

Howard, Hasting P., deceased, Memphis, Tenn., assignor of one-half to A. S. Cook, jr., N. L. Howard, administratrix. Store furniture. 1,534,644; Apr. 21.

Howard, Nora L., administratrix. (See Howard, Hasting P.)

Howard, William H., Salt Lake City, Utah, assignor to American Smelting and Refining Company, New York, N. Y. Process of and apparatus for treating waste smelter gases. 1,534,323; Apr. 21.

Howard, William H., Salt Lake City, Utah, assignor to American Smelting and Refining Company, New York, N. Y. Discharging smelter gases. 1,534,324; Apr. 21.

Howarth, William, Rochdale, England. Endless belt. 1,534,120; Apr. 21.

Hoyt, Lester F., East Aurora, assignor to Larkin Co. Inc., Buffalo, N. Y. Liquid contact insecticide. 1,534,325; Apr. 21.

Huber, Fritz, assignor to H. Lanz, Mannheim, Baden, Germany, a copartnership. Motor-driven vehicle. 1,534,645; Apr. 21.

Hudson, Byron A., Woonsocket, R. I. Snow guard. 1,534,449; Apr. 21.

Hughes, John R., Hoboken, N. J. Toy vehicle. 1,534,956; Apr. 21.

Humphrey, Orlando O., East Leavenworth, Mo. Tobacco steaming and drying apparatus. 1,534,713; Apr. 21.

Hunter, John A., Cleveland, Ohio. Syringe. 1,534,852; Apr. 21.

Hunton, Ethel P., Los Angeles, Calif. Support for strands of hair switches. 1,534,391; Apr. 21.

Hurley, Elmer D., Sweetwater, Tex. Miter machine. 1,534,957; Apr. 21.

Hurxthal, Alpheus O., assignor to Proctor & Schwartz, Incorporated, Philadelphia, Pa. Loop drier. 1,534,853; Apr. 21.

Huss, Gustaf H., assignor to Bergsunds Mekaniska Verkstads Aktiebolag, Stockholm, Sweden. Multiple-path device. 1,534,958; Apr. 21.

Hussey, Howard E., assignor to Rotograph Motion Picture Machine Company, Milwaukee, Wis. Moving-picture projector. 1,534,326; Apr. 21.

Huston, James H. (See Weisenburger, J., and Huston.)

Hydraulic Pressed Steel Company, The. (See Krans, H. W., and Klaus, assignors.)

Imperial Glass Company. (See Oldham, Charles W., assignor.)

Indiana Equipment Corporation. (See Shadle, Clinton F., assignor.)

Ingersoll, Howard L., Pound Ridge, N. Y. Controlling mechanism for booster motors. 1,534,460; Apr. 21.

Inglis, William D., Richford, Vt. Wood steamer. 1,534,121; Apr. 21.

Insulating Materials Company. (See Gates, Walter S., assignor.)

Interstate Folding Box Company, The. (See Butterfield, Charles, assignor.)

International Agricultural Corporation, The. (See Barr, James A., assignor.)

International Couplers Company. (See White, Walter C., assignor.)

International Money Machine Company. (See Sorum, A. B., and Brockman, assignors.)

International Motor Company. (See Wirrer, Gottfried, assignor.)

International Packing Machine Company. (See Lev. Frank W., assignor.)

International Silver Co. (See Stark, Frederick W., assignor.)

Israel, Lester L., now by judicial change of name L. L. Jones, Opadell, N. J., assignor to E. J. Simon, New York, N. Y. Electrical coil apparatus. 1,534,959; Apr. 21.

Jacobs, Henry T. (See Leberman, L. L., and Jacobs.)

Jacques, George W., Stratford, Conn., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Duplex fastener-setting machine. 1,534,064; Apr. 21.

Janssen, Jean F., Levallois-Perret, France. Windshield holder. 1,534,302; Apr. 21.

Jarvis, Harper L. (See Campbell, Earl E., assignor.)

Jaso, Sebero, San Antonio, Tex. Safety attachment for razors. 1,534,786; Apr. 21.

Jenkins, Cloyed M., Dodge City, Kans. Motor-hoisting hitch. 1,535,022; Apr. 21.

Jennings, O. D., & Company. (See Garbell, Max, assignor.)

Jennings, Ode D. (See Krema, John F., assignor.)

Jerome, Benjamin, Pontiac, assignor to General Motors Corporation, Detroit, Mich. Curtain support. 1,534,714; Apr. 21.

Jerome, Benjamin, Pontiac, assignor to General Motors Corporation, Detroit, Mich. Headlamp support. 1,534,715; Apr. 21.

John, Paul. (See Gaigocsi, Walter, assignor.)

Johnson, Frederick G. L. (See Lucas, O. D., and Johnson.)

Johnson, Marshall L. (See Davidson, William M., assignor.)

Johnson, Merle, assignor to F. Walton, New York, N. Y. Statuette. Des. 67,084; Apr. 21.

Johnson, Warren V., Bloomsburg, Pa., assignor to American Car and Foundry Company, New York, N. Y. Roller-bearing journal box. 1,534,123; Apr. 21.

Johnson, William S., and J. W. Sheffer, Berwick, Pa., assignors to American Car and Foundry Company, St. Louis, Mo. Electric rivet heater. 1,534,122; Apr. 21.

Johnston, Frank N., assignor of one-half to C. Y. Beard, Cheyenne, Wyo. Automatic air-brake-control mechanism. 1,534,217; Apr. 21.

Jones & Laughlin Steel Corporation. (See Wagner, Fred W., assignor.)

Jones, Byron Q., Washington, D. C. Lock for tongs. 1,534,218; Apr. 21.

Jones, Edward T., administrator. (See Stryker, Walter W.)

Jones, Eli, Lexington, Tenn. Well strainer. 1,534,960; Apr. 21.

Jones, John W., Clifford, Ill. Automatic car coupler. 1,534,961; Apr. 21.

Jones, Lester L. (See Israel, Lester L.)

Jontz, Guy F., Clinton, Iowa. Toy. 1,534,787; Apr. 21.

Joseph, Harry F., Davenport, assignor to Micro Machine Company, Bettendorf, Iowa. Grinding. 1,534,393; Apr. 21.

Joseph, Henry, Grayling, Mich., assignor, by mesne assignments, to Tucker Rubber Corporation, Buffalo, N. Y. Rubber fabrication. 1,534,527; Apr. 21.

Josué, Erminio, Ancona, assignor to himself and L. Violini, Falconara Marittima, Italy. Briquette of charcoal and piteoal. 1,534,962; Apr. 21.

Judd, Carroll E., Zanesville, Ohio. Renewable bearing. 1,534,963; Apr. 21.

Judd, William E. (See Fridena, D. T., and Judd.)

Judelson, Louis, New York, N. Y. Washing machine. 1,534,788; Apr. 21.

Judelson, Louis, New York, N. Y. Gear. 1,534,789; Apr. 21.

Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. 1,534,716; Apr. 21.
Kägi, Johann. (See Hartmann, M., and Kägi.)
Kahle, Glen, Dallas, Tex. Well-flowing device. 1,534,717; Apr. 21.
Kahlow, Arthur, assignor to Peerless Traveling Goods Co., Mayville, Wis. Suitcase. 1,534,646; Apr. 21.
Kahnweiler, Sidney B., New York, N. Y. Animal toy. 1,534,964; Apr. 21.
Kaplan, William. (See Leviton, A., and Kaplan.)
Kappelmann, William. (See Flechti, F., and Kappelmann.)
Katona, Louis F., assignor of one-half to F. C. Wolf, Los Angeles, Calif. Bottle-washing machine. 1,534,718; Apr. 21.
Kaufman, Frank M., Philadelphia, Pa. Textile fabric. Des. 67,085; Apr. 21.
Kauter, Franz, Zurich, Switzerland. Combined rotary unit. 1,534,451; Apr. 21.
Kaya, Charles A. (See Wilhelm, J., and Kays.)
Kazienko, Julian, Rosebank, N. Y. Color-sifting machine. 1,534,394; Apr. 21.
Keeler, Andrew L. (See Morgan, C. N., and Keeler.)
Keeler, Henry C., Retsil, Wash. Lock for valves. 1,534,965; Apr. 21.
Keller, John R., Glenshaw, Pa., assignor to The Ohio Foundry & Manufacturing Co., Steubenville, Ohio. Gas heater. Des. 67,086; Apr. 21.
Kelley, Carleton H., Kalispell, Mont. Sectional mold for concrete structures. 1,535,023; Apr. 21.
Kellogg, Edward W., Schenectady, N. Y., assignor to General Electric Company. Radio receiving system. 1,534,719; Apr. 21.
Kellogg, Edward W., and C. W. Rice, Schenectady, N. Y., assignors to General Electric Company. Radio receiving system. 1,534,720; Apr. 21.
Kelly, Joseph A., Clinton, Iowa. Folding bed. 1,534,395; Apr. 21.
Kemmerling, Jacob F., Cleveland Heights, Ohio. Roofing bracket. 1,534,647; Apr. 21.
Kemp, John B., Ridgewood, N. J. Pad holder. 1,534,124; Apr. 21.
Kempton, Herbert E. (See Conradson, P., Kempton, and Gallimore.)
Kennedy, Rhesa F., Hattiesburg, Miss. Boll-weevil exterminator. 1,534,219; Apr. 21.
Kennedy, Willis P., Rogersville, Ala. Rat trap. 1,534,528; Apr. 21.
Kenney, Mary A. (See Westcott, Pling K., assignor.)
Kent, Arthur A., Ardmore, Pa. Loud speaker. 1,534,267; Apr. 21.
Kercher, Arthur J., Berkeley, Calif. Automobile radiator heater. 1,534,220; Apr. 21.
Kercher, Arthur J., Berkeley, and W. W. Hicks, San Francisco, Calif. Electric floor heater. 1,534,221; Apr. 21.
Keyser, George, assignor of one-half to J. W. Hepworth, Philadelphia, Pa. Machine for uniting looped fabrics. 1,534,452; Apr. 21.
Keystone Machine & Engineering Company. (See Watson, Harry C., assignor.)
Keystone Mfg. Co., The. (See Miller, Edwin S., assignor.)
Kilfeather, Thomas J., Brooklyn, N. Y. Window cleaner. 1,534,966; Apr. 21.
Kil-Glar Company. (See Banks, John D., assignor.)
Killen, Edward B., London, England. Rubber tire. 1,534,529; Apr. 21.
Killian, Herman. (See Peschke, C., and Killian.)
Kimura, Lawrence Y., Richmond, Calif. Drawing instrument. 1,534,396; Apr. 21.
King, Bertell W., New York, N. Y. Barge conveyer. 1,534,593; Apr. 21.
Kinney-Rome Company. (See Kinney, William H., assignor.)
Kinney, William H., assignor to Kinney-Rome Company, Chicago, Ill. Spring structure and assembling same. 1,534,268; Apr. 21.
Kite, George W., Atlantic City, N. J. Badge or similar article. Des. 67,087; Apr. 21.
Klaus, Fred R. (See Kranz, H. W., and Klaus.)
Klebanoff, David, et al. (See Grossman, Samuel, assignor.)
Klein, Max, assignor to Shapiro & Aronson, Inc., New York, N. Y. Body for lighting fixtures. Des. 67,088; Apr. 21.
Klein, Max, assignor to Shapiro & Aronson, Inc., New York, N. Y. Ceiling light. Des. 67,089; Apr. 21.
Klesler, Joseph A., Portland, Oreg. Plumb bob. 1,534,397; Apr. 21.
Klett Manufacturing Company. (See Klett, Robert E., assignor.)
Klett, Robert E., Ridgefield Park, N. J., assignor to Klett Manufacturing Company, Inc., New York, N. Y. Colorimeter. 1,535,070; Apr. 21.
Klinger, Louis, Brooklyn, N. Y. Cleaning device. 1,534,179; Apr. 21.
Klugh, Bethune G., Chicago, Ill., assignor to Federal Phosphorus Company, Birmingham, Ala. Electrode-joint compound. 1,534,269; Apr. 21.
Knap, Thomas S., assignor to The Lamson Company, Syracuse, N. Y. Conveyer system. 1,535,075; Apr. 21.
Knauer, Ernst, Los Angeles, Calif. Ore-reducing process. 1,534,648; Apr. 21.
Kniffen, John L. (See Rogers, Theron M., and Kniffen.)
Knowlton, M. D., Company. (See Ladd, James B., assignor.)
Knox, John, Perth Amboy, N. J., assignor to Dwight & Lloyd Sintering Company, New York, N. Y. Pallet for sintering machines. 1,534,398; Apr. 21.
Koch, Francis M., assignor to The Republic Stamping & Enameling Company, Canton, Ohio. Charging fork for enameling furnaces. 1,534,649; Apr. 21.
Koehring Company. (See Webb, George R., assignor.)
Kohler, Conrad, Zurich, Switzerland. Water cooler for locomotives. 1,534,453; Apr. 21.
Koken, Walter F., St. Louis, Mo. Barber's chair. 1,534,270; Apr. 21.
Koken, Walter F., St. Louis, Mo. Electrically-operated barber chair. 1,534,271; Apr. 21.
Koken, Walter F., St. Louis, Mo. Foot-rest-operating mechanism for reclining chairs. 1,534,272; Apr. 21.
Koken, Walter F., St. Louis, Mo. Hydroelectric barber chair. 1,534,790; Apr. 21.
Komarek, Gustav, Chicago, Ill., assignor, by mesne assignments, to Malcolmson Engineering and Machine Corporation, St. Louis, Mo. Drier. 1,534,180; Apr. 21.
Korczynski, Ludomir, Cracow, Poland. Sparking plug. 1,534,065; Apr. 21.
Kraft, McClellan B., Spring Grove, Pa. Flexible coupling. 1,534,399; Apr. 21.
Krainer, Samuel, Chicago, Ill. Hat lining. 1,534,181; Apr. 21.
Kranz, Harry W., and F. R. Klaus, assignors to The Hydraulic Pressed Steel Company, Cleveland, Ohio. Pickling machine. 1,535,024; Apr. 21.
Krause, Arthur R., Woodhaven, N. Y., assignor to Lion Electric Manufacturing Co., Inc. Backplate for lighting fixtures. Des. 67,090; Apr. 21.
Krause, Arthur R., Woodhaven, N. Y., assignor to Lion Electric Manufacturing Co., Inc. Backplate for lighting fixtures. Des. 67,091; Apr. 21.
Krause, Arthur R., Woodhaven, N. Y., assignor to Lion Electric Manufacturing Co., Inc. Backplate for lighting fixtures. Des. 67,092; Apr. 21.
Krema, John F., assignor to O. D. Jennings, Chicago, Ill. Vending machine. 1,534,273; Apr. 21.
Kronquest, Alfred L. (See Eastman, F. A., jr., and Kronquest.)
Krump, Nic, Chicago, Ill. Angle-iron cutter. 1,534,274; Apr. 21.
Kundig, Hans, New York, N. Y. Hydraulic steering gear. 1,534,791; Apr. 21.
Kurek, Edmund, and R. E. Pospisil, Chippewa Falls, Wis. Recovering fat and casein from cheese. 1,534,400; Apr. 21.
Kusiel, Stanley J., Holyoke, Mass. Combined stamping and counting machine. 1,534,550; Apr. 21.
Kusyk, Harry, and F. Mandsuk, assignors of one-half to P. Stacharuk, Smoky Lake, Alberta, Canada. Automatic gate. 1,534,967; Apr. 21.
Lackstrom, Albin J., Oakland, Calif. Vehicle direction indicator. 1,534,222; Apr. 21.
Ladd, Caleb H. (See Eldredge, H. C., and Ladd.)
Ladd, James B., Ardmore, Pa., assignor to M. D. Knowlton Company, Rochester, N. Y. Box-blank-forming machine. 1,534,125; Apr. 21.
Lake, Clair D., Binghamton, assignor to The Tabulating Machine Company, Endicott, N. Y. Relayless counter. 1,534,531; Apr. 21.
Lake, Clair D., Binghamton, assignor to The Tabulating Machine Company, Endicott, N. Y. Relayless counter. 1,534,532; Apr. 21.
Lambert Machine Company. (See Ely, Bernard M., assignor.)
Lamson Company, The. (See Knap, Thomas S., assignor.)
Lange, Arthur E., jr. (See Erni, W., and Lange.)
Lans, Heinrich. (See Huber, Fritz, assignor.)
La Port, George E., St. Joseph, Mo. Advertising device. 1,534,223; Apr. 21.
Lappert, Edward D., New Martinsville, W. Va. Broom. 1,534,401; Apr. 21.
Larkey, Riley E., Enid, Okla. Extracting tool. 1,534,066; Apr. 21.
Larkin Co. Inc. (See Hoyt, Lester F., assignor.)
Larrey, Teodoro, and L. Godard, Mexico, Mexico. Combined steam superheater and draft-distributing deflector. 1,534,402; Apr. 21.
Larson, Jacob H., Gresham, Oreg. Refuse-oil burner. 1,534,650; Apr. 21.
Larson, Raymond, De Kalb, Ill. Cement reenforcement. 1,534,968; Apr. 21.
Lasche, Fritz, administrator. (See Lasche, Oskar.)
Lasche, Oskar, deceased; F. Lasche, administrator, Westend, assignor to Allgemeine Elektricitäts-Gesellschaft, Berlin, Germany. Construction of elastic-fluid turbines to prevent breakage of blades due to vibrations. 1,534,721; Apr. 21.
Lasker, William W., Brooklyn, assignor to Powers Accounting Machine Corporation, New York, N. Y. Card-registration mechanism. 1,534,594; Apr. 21.
Lasker, William W., Brooklyn, assignor to Powers Accounting Machine Corporation, New York, N. Y. Pin-box construction for sorting machines. 1,534,595; Apr. 21.

Lawler, Frank J., Milwaukee, Wis., assignor, by mesne assignments, to The Fisk Rubber Company, Chicopee Falls, Mass. Stripping vulcanized material from molds. 1,534,403; Apr. 21.
Lawrence, Stephen A., Okmulgee, Okla. Fishhook. 1,534,969; Apr. 21.
Lawrie, Leslie G. (See Baddiley, J., Shepherdson, Swann, Hill, and Lawrie.)
Lee, Norman, London, England. Production of electrical oscillations by means of thermionic valves. 1,534,970; Apr. 21.
Leahy, Richard A., Bonne Terre, Mo. Concentrator construction. 1,534,224; Apr. 21.
Leathers, Ward, Haworth, N. J. Turbine-driven car and locomotive. 1,534,275; Apr. 21.
Leberman, Laurence L., and H. T. Jacobs, Meadville, Pa. Combined spinner and fly. 1,534,722; Apr. 21.
Lee, Thomas W., Batavia, Ohio. Machine for rounding gear teeth. 1,534,971; Apr. 21.
Lemieux, Frank J., Pawtucket, R. I. Pump piston. 1,534,225; Apr. 21.
Leonhard, William C., Passaic, J. B. Dufford, Paterson, and A. Hough, Summit, N. J. Bleaching sulphuric acid. 1,534,226; Apr. 21.
Lev, Frank W., assignor to International Packing Machine Company, New York, N. Y. Feeding device for wrapping machines. 1,534,596; Apr. 21.
Leviton, Adolph, and W. Kaplan, Brooklyn, N. Y. Needle-operating mechanism for knitting machines. 1,534,972; Apr. 21.
Leviton, Adolph, and W. Kaplan, Brooklyn, N. Y. Needle-operating mechanism. 1,534,973; Apr. 21.
Lewis, Archelaus, Cumberland Mills, Me. Suction box and cover therefor for use in Fourdrinier machines. 1,534,854; Apr. 21.
Lewis, Edward H., Bridgeport, Conn., assignor to General Electric Company. Sectional switch box. 1,534,723; Apr. 21.
Lewis, James P., Oakland, Calif. Building wall. 1,534,454; Apr. 21.
Libbey-Owens Sheet Glass Company, The. (See Belden, C. W., and Bunard, assignors.)
Lincoln Steel and Forge Company. (See Barks, Frank S., assignor.)
Linden, John O., Chicago, Ill. Massage device. 1,534,974; Apr. 21.
Lindfors, Victor E., Butte, Mont. Cue-tip scraper. 1,534,975; Apr. 21.
Lindsay, William G., Newark, N. J., assignor to The Celluloid Company. Composition. 1,534,661; Apr. 21.
Lion Collars & Shirts, Inc. (See Barker, William, jr., assignor.)
Lion Electric Manufacturing Co. (See Krause, Arthur R., assignor.)
Lioned Corporation, The. (See Cowen, Joshua L., assignor.)
Litchfield, George A., assignor to Litchfield Shuttle Company, Southbridge, Mass. Loom shuttle. 1,535,076; Apr. 21.
Litchfield Shuttle Company. (See Litchfield, George A., assignor.)
Lithgoe, John, assignor to Diamond Coal Cutter Company Limited, Wakefield, York, England. Rotary engine. 1,534,182; Apr. 21.
Little, Horace V. (See Little, Kneud E., assignor.)
Little, Kneud E., Tahlequah, Okla., assignor to H. V. Little, Pasadena, Calif. Drilled or bored well bucket. 1,534,455; Apr. 21.
Livergood, Gerald R., Houston, Tex. Pipe-engaging slip. 1,534,227; Apr. 21.
Livergood, Gerald R., Houston, Tex. Multiple-jaw slip for engaging pipes. 1,534,228; Apr. 21.
Livergood, Gerald R., Houston, Tex. Fishing tool. 1,534,229; Apr. 21.
Locklin, Charles R., Detroit, Mich. Windshield wiper. 1,534,276; Apr. 21.
Locomotive Firebox Company. (See Hawley, Charles G., assignor.)
Lomax, Joshua A. B., Bolton, W., and J. Turner, Chorley, and J. B. Bentley, Clayton-le-Woods, near Chorley, England. Shuttle-checking mechanism for looms. 1,534,792; Apr. 21.
Longman, Charles A., Logan, Iowa. Chain coupling. 1,534,976; Apr. 21.
Longpre, Olive L. (See Brede, M. H., and Longpre.)
Lopez, Jesus M., San Antonio, Tex. Timer. 1,534,230; Apr. 21.
Lorenz, C., Aktiengesellschaft. (See Pungs, Leo, assignor.)
Lorenz, C., Aktiengesellschaft. (See Scheller, O., and Hersog, assignors.)
Lorenz, William A., assignor to The Otaka Fabric Company, Hartford, Conn. Paper bag. 1,534,652; Apr. 21.
Loven, Carl N., Oakland, Calif. Claw-hammer nail puller. 1,534,277; Apr. 21.
Lowenthal, Harry N., assignor to R. H. Beaumont Company, Philadelphia, Pa. By-pass for feeding mechanism for crushers. 1,534,855; Apr. 21.
Lucas, Owen D., and F. G. L. Johnson, assignors to Vickers Limited, Westminster, London, England. Fuse for bombs and other missiles adapted to be dropped from aircraft. 1,534,126; Apr. 21.
Lucia, Louis V., assignor to The Fuller Brush Company, Hartford, Conn. Brush. 1,534,231; Apr. 21.
Ludlam, Malcolm C. (See McGee, Joseph W., assignor.)
Ludlum Steel Co. (See Clement, Alvah W., assignor.)
Luftig, Lena, New York, N. Y. Sleeve cuff. 1,534,597; Apr. 21.
Lumpp, Charles, Lyon, France. Hydro-extractor. 1,534,278; Apr. 21.
Lund, George D., Portland, Oreg. Four-bend wing-rail track frog. 1,534,232; Apr. 21.
Lundgaard, Ivar, assignor to The Automatic Refrigerating Company, Hartford, Conn. Heat exchanger. 1,534,794; Apr. 21.
Lundy, John C., Brantford, assignor of three-fifteenths to E. E. Slaght, three-fifteenths to S. L. Squire, Toronto, and four-fifteenths to W. H. Hammond, Brantford, Ontario, Canada. Street-sweeping machine. 1,534,233; Apr. 21.
Lupton, Samuel J., Winnipeg, Manitoba, Canada, assignor to The Bird-Archer Company. Washout plug. 1,534,793; Apr. 21.
Lupton's, David, Sons Company. (See Brogden, Joah, assignor.)
Lurie, August J. (See Frederick, Joseph P., assignor.)
Lusher, Edgar H., Portland, Oreg. Razor holder. 1,534,404; Apr. 21.
Luttman, Charles H., Newburn, assignor of one-half to J. L. Ardern, Newcastle-on-Tyne, England. Spring suspension for vehicles. 1,534,583; Apr. 21.
Lyon, George N., assignor of one-half to W. B. Sullivan, Powers, Oreg. Saw support and guide. 1,534,405; Apr. 21.
Lyon, Robert B., Buffalo, N. Y. Stretching and drying apparatus. 1,534,534; Apr. 21.
MacAskill, Daniel A., assignor of one-half to L. Cunningham, Brooklyn, N. Y. Elevator safety appliance. 1,534,291; Apr. 21.
MacDonald, William W., Chicopee, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Self-closing valve. 1,534,984; Apr. 21.
MacFarland, Allis M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Percussive welding machine. 1,534,069; Apr. 21.
MacFarland, Allis M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Percussive welding machine. 1,534,070; Apr. 21.
Mackintosh-Hemphill Company. (See Talbot, Howard H., assignor.)
Macmillan, Campbell, Schenectady, N. Y., assignor to General Electric Company. Ship propulsion. 1,534,725; Apr. 21.
Maeder, Horst. (See Wolfes, O., and Maeder.)
Magnano Corporation. (See Magnano, Sebastiano, assignor.)
Magnano, Sebastiano, Lawrence, assignor to Magnano Corporation, Essex, Mass. Harness stop and signal device for looms. 1,534,127; Apr. 21.
Maine, Hiram, Indianapolis, Ind. Wind-power engine. 1,534,799; Apr. 21.
Malcolmson Engineering and Machine Corporation. (See Komarek, Gustav, assignor.)
Malkin, Bernard A. (See Russell, A. N., Malkin, and Muir.)
Malmo, Wladyslaw, Harrison, N. J. Clothesline pulley. 1,534,800; Apr. 21.
M. and H. Piston Ring Co. (See Heslewood, William R., assignor.)
Mandsuk, Fred. (See Kusyk, H., and Mandsuk.)
Mang, Gérard. (See Fournier, L., and Mang.)
Manufactures' Equipment Company. (See Gossett, Robert W., assignor.)
Marchesini, Gaetano, New York, and C. Dalboni, Staten Island, N. Y. Capping device. 1,534,184; Apr. 21.
Marcy, Frank E., Los Angeles, Calif. Ball-rolling machine. 1,534,726; Apr. 21.
Marden, William L., assignor to Neptune Meter Company, New York, N. Y. Apparatus for measuring liquids. 1,534,128; Apr. 21.
Marden, William L., assignor to Neptune Meter Company, New York, N. Y. Sand trap and strainer. 1,534,129; Apr. 21.
Marette, Harvey. (See Beaumont, R. H., and Marette.)
Markóczi, Emeric, and S. J. Adam, assignors of one-half to F. R. Wiesner and H. Mechwart, Budapest, Hungary. Industrial utilization of strawlike materials. 1,534,286; Apr. 21.
Marsh, Edward S., assignor to Taylor Instrument Companies, Rochester, N. Y. Time-controlled valve-operating means. 1,534,985; Apr. 21.
Martin, Archibald J., assignor to V. C. Dreisbach, Philadelphia, Pa. Dispensing device. 1,534,859; Apr. 21.
Martin, Arthur, Pittsburgh, Pa. Mill for rolling tapered disks. 1,534,860; Apr. 21.
Martin, Harry C., assignor to The Carborundum Company, Niagara Falls, N. Y. Abrasive disk. 1,534,861; Apr. 21.
Martin, Harry S. (See Willett, A. H., and Martin.)
Martinek, Frank K., New York, N. Y. Automatic picot-cutting attachment. 1,535,026; Apr. 21.
Martocello, Joseph A., Philadelphia, Pa. Combined coupling and valved outlet. 1,534,406; Apr. 21.
Massolle, Joseph. (See Vogt, H., Engl, and Massolle.)
Mattatuck Manufacturing Company, The. (See Fielding, William E., assignor.)
Mattern, George W., assignor to The Crawford, McGregor and Canby Company, Dayton, Ohio. Golf club. 1,534,600; Apr. 21.

Matveyeff, Michael N., New Haven, Conn. Roller skate. 1,534,601; Apr. 21.
Mauvais, Romeo, Two Rivers, Wash. Hay conveyer. 1,534,602; Apr. 21.
Mayer, Bertram, Basel, and J. Würgler, Neuewelt, near Basel, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Anthracene derivative and making the same. 1,534,535; Apr. 21.
Mayer Life Boat Co. (See Allbin, Sim E., assignor.)
Maxeau, Julian, Elmhurst, N. Y. Rail-car motive means. 1,534,801; Apr. 21.
McAfee, Almer M., Port Arthur, Tex., assignor to Gulf Refining Company, Pittsburgh, Pa. Recovering aluminum chloride. 1,534,130; Apr. 21.
McArdle, James J., Pawtucket, R. I. Steam engine. 1,534,598; Apr. 21.
McBride, John J., Bayonne, N. J., assignor to American Car and Foundry Company, New York, N. Y. Tank-car-dome closure. 1,534,131; Apr. 21.
McClaskey, Riley, Idaho Falls, Idaho. Implement-adjusting means. 1,534,234; Apr. 21.
McClevey, Norman H., Petersburg, Ind. Coal-bucket-dumping machine. 1,534,795; Apr. 21.
McClish, Francis J., St. Louis, Mo. Image. Des. 67,093; Apr. 21.
McCollough, William A., Webster City, Iowa. Adjustable chair. 1,534,796; Apr. 21.
McCord, Arthur W., and S. W. Frazier, Washington, D. C. Coin-operated doorlock. 1,534,977; Apr. 21.
McDaniel, Leroy H. (See De Waltoff, S. A., and Daniel.)
McDonald, Gordon R., Schenectady, N. Y., assignor to General Electric Company. Automatic switching system. 1,534,724; Apr. 21.
McGee, Joseph W., Mantua, assignor to M. C. Ludlam, Woodbury, N. J. Lawn sprinkler. 1,534,979; Apr. 21.
McGough, Edward, Columbus, Ohio. Fly-paper holder. 1,534,980; Apr. 21.
McHugh, Charles A. (See McHugh, Frank H., assignor.)
McHugh, Frank H., assignor of one-half to C. A. McHugh, Philadelphia, Pa. Furnace grate. 1,534,183; Apr. 21.
McIntyre, Duncan, Gloversville, N. Y. Attachment for phonographs. 1,534,068; Apr. 21.
McKinney, Merle M., Lawrence, Kans. Door-controlling device. 1,534,981; Apr. 21.
McKinnon, Allen G., Andover, assignor to Boston Rubber Shoe Company, Malden, Mass. Composite rubber and leather material and making the same. 1,534,456; Apr. 21.
McKoy, Edwin A., and G. D. Moore, New Orleans, La. Apparatus for severing stumps. 1,534,856; Apr. 21.
McKoy, Edwin A., New Orleans, La. Planetary cutter head. 1,534,857; Apr. 21.
McKoy, Edwin A., New Orleans, La. Slitting cutter head. 1,534,858; Apr. 21.
McLaughlin, James E., and J. O. Hamel, Grandmere, Quebec, Canada. Fourdrinier type for paper-making machines. 1,534,948; Apr. 21.
McLellan, James H., Vancouver, British Columbia, Canada. Soft-drink-vending machine. 1,534,982; Apr. 21.
McLennan, James, Poland, and E. J. Pease, Niles, Ohio. Game. 1,534,599; Apr. 21.
McLeod, John, Stawell, Victoria, Australia. Apparatus for loading merchandise into vehicles. 1,534,797; Apr. 21.
McLoughlin, Francis J., Brooklyn, N. Y. Doorcheck. 1,534,235; Apr. 21.
McMaster, Harry J., Sebring, Ohio. Pencil clip. 1,534,653; Apr. 21.
McMillan, William, Belfast, Ireland. Coupling for pneumatic hose pipes. 1,534,798; Apr. 21.
McMullen, Vincent E., and W. E. Woodruff, assignors to The Hercules Gas Engine Company, Evansville, Ind. Friction-clutch pulley. 1,534,983; Apr. 21.
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Electrode-clamping device for electric welding machines. 1,534,457; Apr. 21.
Mecheisen, Maurits, Seattle, Wash. Can opener. 1,534,603; Apr. 21.
Mechwart, Hugo, et al. (See Markóczi, Emeric, and Adam, assignors.)
Mehner, Hermann, Berlin-Charlottenburg, Germany. Production of zinc in reverberatory furnaces. 1,535,026; Apr. 21.
Meloche, Daniel H., assignor to E. Holley, Detroit, Mich. Refractory-furnace lining. 1,534,237; Apr. 21.
Mercer, James D., Hugo, Colo. Liquid-measuring device. 1,534,238; Apr. 21.
Merchants Chemical Company. (See Dailey, Everett F., assignor.)
Metal & Thermit Corporation. (See Begtrup, Edward F., assignor.)
Metzger, Floyd J., New York, N. Y., assignor to Air Reduction Company, Incorporated. Illuminated instrument. 1,534,279; Apr. 21.
Meyer, Conrad M., San Francisco, Calif. Concentrator. 1,534,536; Apr. 21.
Meyer, John F., Chicago, Ill. Card-vending machine. 1,534,280; Apr. 21.
Micro Machine Company. (See Joseph, Harry F., assignor.)
Milford Textile Corporation. (See Goldman, Maurice A., assignor.)
Milk Oil Corporation, The. (See North, Charles E., assignor.)
Miller & Pardee, Inc. (See Dibelka, Henry G., assignor.)
Miller, August F., San Francisco, Calif., assignor to Schmidt Lithograph Company. Display carton. 1,535,077; Apr. 21.
Miller, Edwin E., assignor to The Keystone Mfg. Co., Buffalo, N. Y. Holder for socket-wrench sets. 1,534,537; Apr. 21.
Miller, Herman. (See Feldbush, H., and Miller.)
Miller, Louis, Brooklyn, N. Y. Banding device for automobiles. 1,534,239; Apr. 21.
Miller, Thomas S., South Orange, N. J. Cableway and operating the same. 1,534,185; Apr. 21.
Miller, Thomas W., assignor to The Faultless Rubber Company, Ashland, Ohio. Surfacing sponge rubber. Re16,047; Apr. 21.
Milner, Fred E., Blackpool, England. Lower artificial denture. 1,534,802; Apr. 21.
Milner, James E., administrator. (See Correll, Hugh.)
Mitchell Camera Co. (See Mitchell, George A., assignor.)
Mitchell, George A., assignor to Mitchell Camera Co., Los Angeles, Calif. Tripod head. 1,534,407; Apr. 21.
Moffatt, James E., assignor to Union Special Machine Company, Chicago, Ill. Differential feeding mechanism. 1,534,132; Apr. 21.
Möhl, Steffen, Copenhagen, Denmark. Underframe for vehicles of any kind. 1,534,458; Apr. 21.
Moore, Arlington, Boston, Mass. Paper container. 1,534,803; Apr. 21.
Moore, George D. (See McKoy, E. A., and Moore.)
Moore, Giles S., assignor to Trolley Shoe-Wheel Company, Indianapolis, Ind. Sleet cutter for trolley wires. 1,534,727; Apr. 21.
Morgan & Wright. (See Thompson, William, assignor.)
Morgan, Charles N., Albany, and A. L. Keeler, Troy, N. Y. Arch for boiler furnaces. 1,534,281; Apr. 21.
Morrison, Artie A., Williamsport, Pa. Adjustable reaming device. 1,535,027; Apr. 21.
Morse, Reginald A., Providence, R. I. Roller mechanism for spinning machines. 1,534,071; Apr. 21.
Mosler Lock Lock Company, The. (See Benham, Edzar M., assignor.)
Mouriam, Georges, and M. Sutter, Paris, France, assignors to The Babcock & Wilcox Company, New York, N. Y. Chain-grate stoker. 1,534,186; Apr. 21.
Muir, William P. (See Russell, A. N., Malkin, and Muir.)
Müller, Friedrich, Vienna, Austria. Internal-combustion engine. 1,534,459; Apr. 21.
Müller, Karl, Kreiensen, Germany. Cutting tool. 1,535,028; Apr. 21.
Multiple Molding Machine Co. (See Fraser, Pinkney P.)
Murch, William W., Brooklyn, N. Y. Toy. 1,535,029; Apr. 21.
Murphy, Morris J., Chicago, Ill. Base for lamps, etc. Des. 67,094; Apr. 21.
Mursch, John, Utica, N. Y. Oven for cooking stoves. 1,534,072; Apr. 21.
Murray, Thomas E., jr., Brooklyn, N. Y. Welding. 1,534,133; Apr. 21.
Murray, Thomas E., Brooklyn, N. Y. Apparatus for molding hollow articles. 1,534,134; Apr. 21.
Murray, Thomas E., jr., Brooklyn, N. Y. Axle housing. 1,534,605; Apr. 21.
Myers, Frederick, New York, N. Y. Pneumatic-tire valve. 1,534,862; Apr. 21.
Myers, Hubert A., assignor to The W. G. Nagel Electric Company, Toledo, Ohio. Clutch device. 1,534,804; Apr. 21.
Myers, Preston, Los Angeles, Calif. Vehicle traffic signal. 1,534,606; Apr. 21.
Nagel, W. C., Electric Company, The. (See Myers, Hubert A., assignor.)
National Sewing Machine Company. (See Hanson, Rodney L., assignor.)
Natoli, Giuseppe, New York, N. Y. Spark plug. 1,534,986; Apr. 21.
Nelson, Charles A. (See Tweedt, J. A. B., and Nelson.)
Nelson, Clare, Brooklyn, assignor, by mesne assignments, to C. C. Orcutt, New York, N. Y. Paper-drying machine. 1,534,460; Apr. 21.
Nelson, William E. San Antonio, Tex. Concrete building structure. 1,535,030; Apr. 21.
Neptune Meter Company. (See Marden, William L., assignor.)
Netz, George. (See Netz, Louis N. and G.)
Netz Glove & Mitten Co. (See Netz, Louis N. and G., assignors.)
Netz, Louis N. and G., assignors to Netz Glove & Mitten Co., Milwaukee, Wis. Filling for boxing gloves. 1,534,654; Apr. 21.
Nevins, Thomas A., assignor, by mesne assignments, to Hercules Match Corporation, New York, N. Y. Assembling and counting mechanism. 1,535,081; Apr. 21.
Newberry, Andrew W., executor. (See Newberry, Spencer B.)
Newberry, Spencer B., deceased; A. W. Newberry, executor, assignor to Sandusky Cement Company, Cleveland, Ohio. Cement paint. 1,534,240; Apr. 21.
New Process Multi-Castings Company. (See Wood, John E., assignor.)
Nichols, Charles E., Bellefontaine, Ohio. Stock drencher. 1,534,241; Apr. 21.

Nichols, Ralph G., Richmond Hill, assignor to American Car and Foundry Company, New York, N. Y. Self-dumping mine car. 1,534,136; Apr. 21.
Nichols, William H., Wilkinsburg, Pa. Mold. 1,534,655; Apr. 21.
Noad, William E., Jackson, Mich. Compressor. 1,534,728; Apr. 21.
Norris, Almon E., Brookline, Mass. Hoisting apparatus. 1,534,538; Apr. 21.
North, Charles E., Montclair, N. J., assignor to The Milk Oil Corporation, Wilmington, Del. Emulsifying Milk Oil. 1,534,539; Apr. 21.
Northwestern Reed and Rattan Company. (See Flood, John A., assignor.)
Nunn, Frederick W. (See Hobday, H. L., and Nunn.)
Nunndav Proprietary Limited. (See Hobday, H. L., and Nunn, assignors.)
Nyquist, Harry, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company. Neutralizing foreign interference. 1,534,073; Apr. 21.
Oberdorfer, Jonas L., Syracuse, N. Y. Lock for radiator caps. 1,534,607; Apr. 21.
Obersohn, Albert, Berlin-Charlottenburg, W. Wachtel, Berlin, D. Sakom, Wiesbaden, and P. Askenasy, Karlsruhe, Germany. Manufacture of colloidal substances in the form of small balls or grains. 1,534,729; Apr. 21.
O'Brien, James, Hutchinson, Kans. Coaster wagon. 1,534,730; Apr. 21.
O'Brien, Joseph F. (See Vanorio, Joseph, assignor.)
Ochs, George F. A., Newark, N. J. Track tool. 1,535,032; Apr. 21.
Odhner, Valentin J., Stockholm, Sweden. Calculating machine. 1,534,242; Apr. 21.
Oehm, Wilhelm, Dusseldorf, Germany. Method and device for the production of high temperatures. 1,534,243; Apr. 21.
Offield, James R., trustee. (See Ruby, George H. A., assignor.)
Ohio Body & Blower Company, The. (See Seelinger, William J., assignor.)
Ohio Foundry & Manufacturing Co., The. (See Keller, John B., assignor.)
Oldham, Charles W., assignor to Imperial Glass Company, Bellaire, Ohio. Glass dish or similar article of manufacture. Des. 67,095; Apr. 21.
Oliver Chilled Plow Works. (See Altgelt, Rudolph J., assignor.)
Oliver, George G., Wheeling, W. Va., and T. Stenhouse, Washington, Pa., assignors to Hazel-Atlas Glass Company, Wheeling, W. Va. Apparatus for annealing glassware. 1,534,863; Apr. 21.
Oliver, George G., and T. Stenhouse, Washington, Pa., assignors to The Hazel-Atlas Glass Company, Wheeling, W. Va. Apparatus for tempering glassware. 1,534,864; Apr. 21.
Oliver Iron & Steel Corporation. (See Baumann, Frederick W., assignor.)
Olsen, Tinius Testing Machine Company. (See Owens, James W., assignor.)
Orcutt, Charles C. (See Nelson, Clare, assignor.)
Ordway, Frank L., assignor to Parker Bros., Inc., Salem, Mass. Chinese tile game device. 1,534,805; Apr. 21.
O'Rear, Jim N. A., Attalla, assignor of one-third to L. B. Rainey, Gadsden, Ala. Wheel attachment for motor vehicles. 1,534,987; Apr. 21.
Oriental Silk Printing Company. (See Van Liew, Henry A., assignor.)
Ostrander, Allen E., Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Valve for tank cars. 1,534,126; Apr. 21.
Ostrander, Allen E., Ridgewood, N. J., assignor to American Car and Foundry Company, St. Louis, Mo. Tank-car valve-operating mechanism. 1,534,127; Apr. 21.
Ostrander, Allen E., Bronxville, assignor to American Car and Foundry Company, New York, N. Y. Discharge-valve mechanism. 1,534,128; Apr. 21.
Ostrander, Allen E., Bronxville, assignor to American Car and Foundry Company, New York, N. Y. Discharge-valve mechanism. 1,534,139; Apr. 21.
Otaka Fabric Company, The. (See Loreus, William A., assignor.)
O'Toole, Edward, Gary, W. Va. Mining machine. 1,534,461; Apr. 21.
O'Toole, Edward, Gary, W. Va. Mining machine. 1,534,462; Apr. 21.
O'Toole, Edward, Gary, W. Va. Longwall mining machine. 1,534,463; Apr. 21.
Ott, Alfred. (See Setter, George P., assignor.)
Oven Equipment & Mfg. Co., The. (See Crawford, Emerick B., assignor.)
Oven Equipment & Mfg. Co., The. (See Simpson, George P., assignor.)
Owen, Henry E. L., Winkfield, near Windsor, England. Engine-cooling means and weather protection for use in connection with motor road vehicles. 1,534,067; Apr. 21.
Owens, Robert S., Brooklyn, N. Y. Battery cell. 1,534,656; Apr. 21.
Owens Bottle Company, The. (See Stenhouse, T., and Soubier, assignors.)
Owens, James W., Cradock, Va., assignor to Tinius Olsen Testing Machine Company, Philadelphia, Pa. Strain gauge. 1,534,865; Apr. 21.
Packard, Granville F., Wilkinsburg, Pa. Electric motor. 1,534,282; Apr. 21.
Page, George M., assignor to Victory Equipment Corporation, Haydenville, Mass. Valve. 1,534,866; Apr. 21.
Palliscbeck, Joseph, Muscatine, Iowa. Traction shoe for vehicle wheels. 1,534,731; Apr. 21.
Palmer, William H., Montreal, Quebec, Canada. Device for guarding tellers and other custodians. 1,534,732; Apr. 21.
P & M Company, The. (See Warr, Harold G., assignor.)
Paraffine Companies, Inc., The. (See Finley, Dozier, assignor.)
Parker Bros., Inc. (See Ordway, Frank L., assignor.)
Parker, Henry C., Chicago, Ill. Carbonating a liquid. 1,534,806; Apr. 21.
Parker, Leslie M., Evanston, Ill. Flexible-post binder. 1,534,283; Apr. 21.
Parker, Ralsemond D., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Telegraphy. 1,534,074; Apr. 21.
Parrish, Washington B., Kenbridge, Va. Auxiliary handles for hoes, rakes, shovels, etc. 1,534,075; Apr. 21.
Parrott, John F., East Moline, Ill. Crank-shaft tester. 1,534,408; Apr. 21.
Paston, Daniel. Brooklyn, N. Y. Shawl or the like. Des. 67,096; Apr. 21.
Patterson, Charles S., Lancaster, Calif. Rotary tooth-brush. 1,534,657; Apr. 21.
Peacock, Samuel, Wheeling, W. Va., assignor to A. J. Gerrard, Chicago, Ill. Producing low-sulphur pig iron from high-sulphur furnace burdens. 1,534,244; Apr. 21.
Pearce, George C., Johnson City, Tenn. Direction indicator. 1,535,033; Apr. 21.
Pearson, Herman E., Wayzata, Minn. Machine for removing quack grass. 1,534,658; Apr. 21.
Pease, Edward J. (See McLennan, J., and Pease.)
Peerless Chain Co. (See Bambenek, Joseph B., assignor.)
Peerless Light Company. (See Herskovitz, Max, assignor.)
Peerless Traveling Goods Co. (See Kahlow, Arthur, assignor.)
Peet, Ed L., and W. G. Hanscom, Minneapolis, and J. C. Smith, St. Paul, Minn. Agricultural implement. 1,534,659; Apr. 21.
Pelican Well Tool and Supply Company, The. (See Stewart, Mark G., assignor.)
Pelletier, Alphonse J., Greenville, N. H. Tire-chain tool. 1,534,284; Apr. 21.
Pérez, Manuel H., San Pedro Sula, Honduras. Electric heater. 1,534,733; Apr. 21.
Perkins, Charles F., assignor to Davis Brake Beam Company, Johnstown, Pa. Brake beam. 1,534,608; Apr. 21.
Perrault, Joseph E., assignor to Hood Rubber Company, Watertown, Mass. Mold for making hard-rubber containers. 1,534,409; Apr. 21.
Perrault, Joseph E., assignor to Hood Rubber Company, Watertown, Mass. Flap cutting and building machine. 1,534,988; Apr. 21.
Perry & Webster, Inc. (See Boynton, Vern K., assignor.)
Perry, Frederick H., Beverly, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Jointing machine. 1,534,076; Apr. 21.
Perry, Ira D., assignor to Bunte Brothers, Chicago, Ill. Device for regulating humidity of containers. 1,534,339; Apr. 21.
Peschke, Carl, and H. Killian, Detroit, Mich. Smokehouse. 1,534,867; Apr. 21.
Peterson, Peter E., Salina, Kans. Door for railway cars. 1,535,034; Apr. 21.
Peugh, Ray L., Oklahoma City, Okla. Tire boot. 1,534,989; Apr. 21.
Pessaniti, Joseph, Elmsford, N. Y. Shoe with removable sole and heel. 1,534,540; Apr. 21.
Philbrin Corporation. (See Brinton, William C., jr., assignor.)
Philipp, Richard, Eisenach, Germany. Magnetic building toy. 1,535,035; Apr. 21.
Pioneer Production Company. (See Yeomans, Lucien I., assignor.)
Pitton, James G., Denver, Colo. Game board. 1,534,245; Apr. 21.
Plainfield Trust Company, The, administrator. (See Hopkins, Charles E.)
Plantureux, Raymond A. J., Paris, France. Convertible vehicle body. 1,534,410; Apr. 21.
Poetsch, Chester M., Chicago, Ill. Radiator cover. Des. 67,097; Apr. 21.
Porsche, Ferdinand, assignor to Daimler-Motoren-Gesellschaft, Stuttgart-Unterturkheim, Wurttemberg, Germany. Locking device for adjustable valves. 1,534,246; Apr. 21.
Porter, John C., Woodstown, N. J. Insect and nest destroyer. 1,534,734; Apr. 21.
Posey, Willie E., Waco, Tex. Saw gauge. 1,534,541; Apr. 21.
Pospisil, Rudolph E. (See Kurek, E., and Pospisil.)
Potato Waffles, Inc. (See Ruffner, Meyer F., assignor.)
Potter, James C., Pawtucket, R. I. Spinning machine. 1,535,036; Apr. 21.

Potter, Lyman J., San Francisco, Calif. Counterbalancing crankshafts. 1,534,411; Apr. 21.
Potts, Louis M., Baltimore, Md., assignor, by mesne assignments, to American Telephone and Telegraph Company, New York, N. Y. System of telegraphic distribution. 1,534,660; Apr. 21.
Potts, Louis M., Baltimore, Md., assignor, by mesne assignments, to American Telephone and Telegraph Company, New York, N. Y. System of telegraphic distribution. 1,534,661; Apr. 21.
Powers Accounting Machine Corporation. (See Lasker, William W., assignor.)
Pratt, Norman F., assignor to G. C. Stembridge, Jacksonville, Fla. Oil burner. 1,535,078; Apr. 21.
Prétot, Marcel, Ensisheim, Haut-Rhin, France. Internal-combustion engine. 1,535,038; Apr. 21.
Primbs, Geo., & Sons, Inc. (See Primbs, George, sr., assignor.)
Primbs, George, sr., assignor to Geo. Primbs & Sons, Inc., Pocatello, Idaho. Loose-leaf binder. 1,534,735; Apr. 21.
Pritchard, Leslie E., Niles, Ohio. Sheet-metal pipe section. 1,534,990; Apr. 21.
Proctor & Schwartz, Incorporated. (See Hurxthal, Alpheus O., assignor.)
Protestant Women's National Civic Federation. (See Hart, Gertrude C., assignor.)
Providence Stock Company. (See Harrison, George D., assignor.)
Pruyn, Samuel R., Chicago, Ill. Cigarette roller and maker. 1,534,807; Apr. 21.
Pugh, John D., Mount Washington, Baltimore, Md. Hot-metal car. 1,534,187; Apr. 21.
Punga, Leo, Berlin-Charlottenburg, assignor to C. Lorenz Aktiengesellschaft, Lorenzweg, Berlin-Tempelhof, Germany. High-frequency telephony with or without a line. 1,535,037; Apr. 21.
Puritan Cabinet Dryer Company, The. (See Campbell, Lewis G., assignor.)
Pym, Arthur F., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for smoothing shoe linings. 1,534,077; Apr. 21.
Rachlin, Max., New York, N. Y. Gutter hanger. 1,534,736; Apr. 21.
Radium Dial Company. (See Foley, Hamilton, assignor.)
Rainey, Lillus B. (See O'Bear, Jim N. A., assignor.)
Randall, Raymond W. (See Clas, A. R., and Randall.)
Reamsbottom, Alfred H. (See Anson, Joseph H., assignor.)
Rebechini, Eugene J., Chicago, Ill. Blanching machine. 1,534,188; Apr. 21.
Reber, Emil. (See Fritzsche, H., and Reber.)
Reed, Charles J., San Mateo, Calif. Process of and apparatus for heating materials. 1,534,737; Apr. 21.
Reese, Thomas D. (See Stark, H. W., and Reese.)
Reeves, Alfred, assignor of one-half to G. H. C. Butler, Birmingham, England. Vehicle lamp. 1,534,901; Apr. 21.
Reeves, Alfred, assignor of one-half to G. H. C. Butler, Birmingham, England. Lifting jack. 1,534,902; Apr. 21.
Reeves, William A. (See Tucker, O. M., and Reeves.)
Reimers, Alfred E., New York, N. Y., and C. C. Waite, Roselle Park, N. J. Electrically-heated sadiron. 1,534,542; Apr. 21.
Reinshagen, Adolf, Niederau, near Duren, Germany. Process and apparatus for operating furnaces. 1,534,993; Apr. 21.
Remington, Arthur L., assignor to Warp Compressing Machine Company, Worcester, Mass. Handling yarn and machine therefor. 1,534,412; Apr. 21.
Renner, Harold G., Detroit, Mich., Carburetor. 1,534,808; Apr. 21.
Renson, Jean, Brussels, Belgium. Apparatus for boiling and washing linen. 1,534,413; Apr. 21.
Renz, Joseph P. Brooklyn, N. Y. Machine for feeding sheet material. 1,534,464; Apr. 21.
Republic Brass Company, The. (See Richards, Peter R., assignor.)
Republic Stamping & Enameling Company, The. (See Koch, Francis M., assignor.)
Rettler, John J., Appleton, Wis. Compost-storage bin. 1,535,039; Apr. 21.
Rice, Chester W. (See Kellogg, E. W., and Rice.)
Rice, Louis W., New York, N. Y. Closure for vessels. 1,534,609; Apr. 21.
Rich, Elmer A., jr., Chicago, Ill., assignor to The American Foundry Equipment Company, New York, N. Y. Impact molding machine. 1,534,809; Apr. 21.
Richards, Peter R., assignor to The Republic Brass Company, Cleveland, Ohio. Cock for faucets with stop valves. 1,534,327; Apr. 21.
Richardson, John W., Stratford, Conn., assignor to John Chatillon & Sons, New York, N. Y. Tie for coil springs. 1,534,189; Apr. 21.
Riddle, Edward N., Company, The. (See Riddle, John K., assignor.)
Riddle, John K., assignor to The Edward N. Riddle Company, Toledo, Ohio. Lighting fixture. 1,534,662; Apr. 21.
Riedele, Philip, P. B. Cason, and K. R. Herman, assignors to United States Spring Co., Inc., Los Angeles, Calif. Spring setting and tempering apparatus. 1,534,543; Apr. 21.
Riehl, Henry E., Brooklyn, N. Y. Amusement apparatus. 1,534,285; Apr. 21.
Riehl, Henry E., Brooklyn, N. Y. Amusement apparatus. 1,535,040; Apr. 21.
Rivas, Liborio E., Santa Rita, N. Mex. Eight-wheel vehicle. 1,534,810; Apr. 21.
Rixmann, George. (See Sargent, William H., assignor.)
Roberts, Joseph. (See Braemer, W. G. E., and Roberts.)
Robertson, H. H., Company. (See Roney, William W., assignor.)
Robinson Hardware Company. (See Congable, Henry F., assignor.)
Robson, John, Waterbury, Conn., assignor to Universal Engineering Corporation, Montreal, Quebec, Canada. Vehicle brake. 1,534,544; Apr. 21.
Rocke, Edwin C., Bloomington, Ill. Safety wringer mechanism. 1,534,286; Apr. 21.
Roe, Charles H., Tarrytown, N. Y., assignor to General Motors Corporation, Detroit, Mich. Drying varnish. 1,534,738; Apr. 21.
Roesen, Isabella, executrix. (See Roesen, Oscar.)
Roesen, Oscar, Brooklyn, assignor to R. Hoe and Co., New York, N. Y. Stapling mechanism. 1,534,141; Apr. 21.
Roesen, Oscar, deceased, New York, by I. Roesen, executrix, Brooklyn; said Oscar Roesen assignor to R. Hoe & Co., New York, N. Y. Stapling and folding mechanism. 1,534,247; Apr. 21.
Rogers, John C., Bastrop, La. Vehicle wheel. 1,534,545; Apr. 21.
Rogers, Theron M., and J. L. Kniffen, Fellows, Calif. Fishing tool. 1,534,414; Apr. 21.
Rogers, Victor B., Buffalo, N. Y. Cuff link. 1,534,140; Apr. 21.
Rolfe, Charles A., St. Paul, Minn. Keyed insulating board. 1,534,142; Apr. 21.
Roney, William W., Sewickley, assignor to H. H. Robertson Company, Pittsburgh, Pa. Expansible mandrel. 1,534,868; Apr. 21.
Rorick, James G. B., and S. Ruckman, Woodlawn, Pa. Safety adjusting mechanism for automobile headlights. 1,534,809; Apr. 21.
Rosenblatt, Isidor, New York, N. Y. Lighting-fixture bracket or an article of similar nature. Des. 67,098; Apr. 21.
Rosenqvist, Gunnar. (See Ågren, I. J. E., and Rosenqvist.)
Ross, Charles G., Cleveland, Ohio, assignor of one-half to W. L. Ross, Chicago, Ill. Bumper. 1,534,248; Apr. 21.
Ross, John D., Pasadena, Calif. Sprinkler head. 1,534,546; Apr. 21.
Ross, William L. (See Ross, Charles G., assignor.)
Rothman, Louis, Brooklyn, N. Y. Adding machine. 1,534,811; Apr. 21.
Rotograph Motion Picture Machine Company. (See Hussey, Howard E., assignor.)
Rouanet, Louis, Ivry-Port, assignor to The Compagnie d'Applications Mecaniques, Paris, France. Removable wheel. 1,534,328; Apr. 21.
Royal Typewriter Company. (See Degener, Gustave O., assignor.)
Royal Typewriter Company. (See Hess, Edward B., assignor.)
Roystone, William H., New York, N. Y. Container for face powder, rouge, or the like. 1,534,870; Apr. 21.
Roystone, William H., New York, N. Y. Vanity case. 1,534,871; Apr. 21.
Roystone, William H., New York, N. Y. Vanity case. 1,534,872; Apr. 21.
Roystone, William H., New York, N. Y. Vanity case for loose powder. 1,534,873; Apr. 21.
Ruby, George H. A., Fort Dodge, Iowa, assignor to J. R. Offield, trustee, Chicago, Ill. Feeding mechanism for plaster-block machines. 1,534,610; Apr. 21.
Ruckman, Samuel. (See Rorick, J. G. B., and Ruckman.)
Ruffner, Meyer F., New York, N. Y., assignor, by mesne assignments, to Potato Waffles, Inc., Dover, Del. Vegetable-slicing machine. 1,534,078; Apr. 21.
Ruhmann, Max H., Vernon, British Columbia, Canada. Stand. 1,535,041; Apr. 21.
Rupp, Laurente, New York, N. Y. Pencil sharpener. 1,534,547; Apr. 21.
Russell, Andrew N., B. A. Maikin, and W. P. Muir, Lachine, Quebec, Canada. Electric steam generator. 1,534,079; Apr. 21.
Russell, Andrew N., Lachine, Quebec, Canada. Flow box for paper machines. 1,534,080; Apr. 21.
Russell Manufacturing Company, The. (See Zimmerer, Frederick, assignor.)
Ryon, Eppa H., Waltham, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft-detecting mechanism. 1,534,249; Apr. 21.
Sadler, Thomas D., New Orleans, La. Handsaw guide. 1,535,042; Apr. 21.
Safion, Herman A. (See Boehringer, John A., assignor.)
Sakom, Daniel. (See Obersohn, A., Wachtel, Sakom, and Askenasy.)
Sammis, Louis B., Wallace, and F. R. Hood, Burson, Calif. Grader. 1,534,663; Apr. 21.
Sandor, Benjamin, Cleveland, Ohio. Heel. 1,534,739; Apr. 21.
Sands, Edwin T. (See Birkin, C. W., and Sands.)
Sands, Louis. (See Bartholomew, Bert E., assignor.)

Sandusky Cement Company. (See Newberry, Spencer B., assignor.)
Sandusky, Joseph, New York, N. Y. Ball loop. 1,534,081; Apr. 21.
Sanford, William H., Buffalo, N. Y. Device for protecting car-axle journals. 1,534,082; Apr. 21.
Sardeson, Robert, Minneapolis, Minn. Apparatus for relining motor-vehicle brake bands. 1,534,083; Apr. 21.
Sargent, William H., Webster Groves, assignor of one-third to G. Rixmann and one-third to J. Seidel, St. Louis, Mo. Tractor. 1,534,329; Apr. 21.
Saunders, Henry J., Minneapolis, Minn. Awning. 1,534,664; Apr. 21.
Savage, Edward S., Rochester, N. Y. Safety razor. 1,534,665; Apr. 21.
Sawkins, Huntington D., Baltimore, Md. Bag-closing tool. 1,534,465; Apr. 21.
Scanlon, Stephen, New York, N. Y. Bridge piece. 1,535,043; Apr. 21.
Schade, Adelbert. (See Claflin, H. C., and Schade.)
Schaefer, Detlef F., et al., trustees. (See Fraser, Pinkney P., assignor.)
Scharl, Charles, New York, N. Y. Convertible club furniture. 1,535,044; Apr. 21.
Scheidecker, Alphonse J., Baton Rouge, La. Signaling equipment for automobiles. 1,535,045; Apr. 21.
Scheiberg, John C., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric-energy translation. 1,534,287; Apr. 21.
Scheller, Otto, Berlin-Lichterfelde-West, and R. Herzog, Berlin, assignors to C. Lorenz Aktiengesellschaft, Lorenzweg, Berlin-Tempelhof, Germany. Key connection for the wireless transmission of messages. 1,535,046; Apr. 21.
Scherer, Adolph, Philadelphia, Pa. Lamp-shade-joint construction. 1,534,466; Apr. 21.
Schill, Emil, Woodmere, N. Y., and F. Woldich, known as F. S. Woldich, Sapulpa, Okla., assignors to Continental Gas Compressing Corporation, New York, N. Y. Process of and apparatus for extracting, liquefying, and separating liquefiable constituents of gases. Re16,052; Apr. 21.
Schirmacher, George F., Waukesha, Wis. Crossing gate. 1,535,047; Apr. 21.
Schmidt, Henry F., Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company. Turbine blade. 1,534,415; Apr. 21.
Schmidt Lithograph Company. (See Miller, August F., assignor.)
Schmidt, Michael, Wauwatosa, Wis. Snow-clearing machine. 1,534,611; Apr. 21.
Schmitt, John A., assignor to The Universal Milking Machine Company, Columbus, Ohio. Pulsator for milking machines. 1,534,612; Apr. 21.
Schouboe, Carl L., Des Moines, Iowa. Highway marker. 1,534,084; Apr. 21.
Schuler, Frank M., Winona, Minn. Starch-cleaning machine. 1,534,416; Apr. 21.
Schumer, William F., Cincinnati, Ohio. Chucking mechanism. 1,535,048; Apr. 21.
Schwaerzer, Max, Brooklyn, N. Y. Detonating device. 1,534,085; Apr. 21.
Schwarz, Elmer H., Fort Lee, N. J., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Gear-shifting mechanism. 1,534,740; Apr. 21.
Schwarzkopf, Jakob, Elmshorn, Germany. Fodder from fish or train oil and emulsions thereof and preparing the same. 1,534,741; Apr. 21.
Schweikhard, George, Los Angeles, Calif. Antitheft alarm for automobiles. 1,534,666; Apr. 21.
Schwenck, Frederick W., Cincinnati, Ohio. Cruet. Des. 67,099; Apr. 21.
Schwenck, Frederick W., Cincinnati, Ohio. Bottle. Des. 67,100; Apr. 21.
Schwerin, Frank H., West View, assignor to The Duff Manufacturing Company, Pittsburgh, Pa. Ratchet jack. 1,534,613; Apr. 21.
Schwettman, Harry W., assignor to The Gruen Watch Company, Cincinnati, Ohio. Wrist-watch case. Des. 67,101; Apr. 21.
Scott, Archibald D., deceased; M. V. Scott, executrix, Jersey City, N. J., assignor to Varley Duplex Magnet Company. Winding machine. 1,534,812; Apr. 21.
Scott, Archibald D., deceased; M. V. Scott, executrix, Jersey City, N. J., assignor to Varley Duplex Magnet Company. Winding machine. 1,534,813; Apr. 21.
Scott, George M. (See Scott, Herbert H. and G. M.)
Scott, Herbert H. and G. M., London, England. Production of show cards, advertisements, signs, decorations, or the like by stenciling. Re16,048; Apr. 21.
Scott, Lewis L., St. Louis, Mo. Steam engine. 1,534,148; Apr. 21.
Scott, Mary V., executrix. (See Scott, Archibald D.)
Scott, Wirt S., Bosman, Md. Heat-saturation indicator. 1,534,874; Apr. 21.
Scriven, Edward O., assignor to Western Electric Company, Incorporated, New York, N. Y. Transformer circuits. 1,534,086; Apr. 21.
Scroggins, Oliver L., Pittsburgh, Pa. Method and means to indicate the theft of automobiles and the like. 1,534,994; Apr. 21.
Seelinger, William J., assignor to The Ohio Body & Blower Company, Cleveland, Ohio. Vehicle body construction. 1,534,814; Apr. 21.
Seely, Thomas H. (See Hadaway, J. B., and Seely.)
Seidel, Julius. (See Sargent, William H., assignor.)
Sellew, Helen W. (See Sellew, William H. and H. W.)
Sellew, William H. and H. W., Ann Arbor, assignors of one-half to A. T. Hopkins, Detroit, Mich. Portable food container. 1,534,087; Apr. 21.
Setter, George P., assignor of one-half to A. Ott, Chicago, Ill. Engine-cylinder repair method and apparatus. 1,534,815; Apr. 21.
Shadle, Clinton F., assignor, by mesne assignments, to Indiana Equipment Corporation, Indianapolis, Ind. Train-control valve construction. 1,534,330; Apr. 21.
Shaefer, Edward, et al., trustees. (See Fraser, Pinkney P., assignor.)
Shapard, Aubrey B., et al. (See Carter, Edward B., assignor.)
Shapiro & Aronson, Inc. (See Klein, Max, assignor.)
Sharp, Alexander B., Steubenville, Ohio. Gas heater. Des. 67,102; Apr. 21.
Sharpe, Edwin C., Piedmont, Calif. Coal-bunker system. 1,534,667; Apr. 21.
Shaw, John K., Minneapolis, assignor to B. G. Dahlberg, St. Paul, Minn. Wood-fiber board. 1,534,088; Apr. 21.
Shea, John J., jr., Elmhurst, N. Y. Hinge. 1,534,467; Apr. 21.
Shea, John J., jr., Elmhurst, N. Y. Joint structure. 1,534,468; Apr. 21.
Shearer, Rose M., assignor of one-half to H. I. Brown, La Pryor, Tex. Pump-rod elevator. 1,534,089; Apr. 21.
Sheara, Luther, Arbovale, W. Va. Washboard. 1,535,049; Apr. 21.
Sheffer, J. W. (See Johnson, W. S., and Sheffer.)
Shepherdson, Arnold. (See Baddiley, J., Shepherdson, Swann, Hill, and Lawrie.)
Sherman, James W., Huntington Park, Calif. Combined emergency brake and clutch release. 1,534,469; Apr. 21.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Creasing machine. 1,534,668; Apr. 21.
Shimmie Auto Co. (See De Waltoff, S. A., and Daniel, assignors.)
Shook, Florain J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Tire-making apparatus. 1,534,250; Apr. 21.
Short, Charles R., and A. M. Babitch, assignors to General Motors Research Corporation, Dayton, Ohio. Carburetor control. 1,534,742; Apr. 21.
Shortt, Howard G., assignor to F. C. Farnsworth, Norristown, Pa. Device for trapping and delivering condensates. 1,534,090; Apr. 21.
Sibley, Philip J. (See Taylor, W. A., and Sibley.)
Siday, William E., North Kensington, London, England. Disinfecting and heating air. 1,534,875; Apr. 21.
Sidney Blumenthal & Co. (See Creasey, Samuel E., assignor.)
Silva, Manuel J., Island of Hawaii, Hawaii. Harrow. 1,535,050; Apr. 21.
Simmons, Leo, Washington, D. C. Nailing block. 1,534,876; Apr. 21.
Simmons, Leo, Washington, D. C. Flushing apparatus. 1,534,877; Apr. 21.
Simon, Emil J. (See Israel, Lester L., assignor.)
Simpson, George P., assignor to The Oven Equipment & Mfg. Co., New Haven, Conn. Oven. 1,534,190; Apr. 21.
Simpson, Herbert S., Chicago, Ill. Continuous foundry-sand-mulling machine. 1,534,331; Apr. 21.
Sims, James E. (See Sims, John M., assignor.)
Sims, John M., assignor of one-half to J. E. Sims, Houston, Tex. Radiator and bathtub sling. 1,534,614; Apr. 21.
Singer Manufacturing Company, The. (See Allen, Edward B., assignor.)
Sinning, Frank R., Ramsey, Ill. Track liner. 1,534,417; Apr. 21.
Siptrott, Paul, New York, N. Y., assignor to Consolidated Art Metal Foundry, Inc. Lighting-fixture bracket. Des. 67,103; Apr. 21.
Siptrott, Paul, New York, N. Y., assignor to Consolidated Art Metal Foundry, Inc. Lighting-fixture part. Des. 67,104; Apr. 21.
Slade, Leon D., assignor to Gleason Works, Rochester, N. Y. Furnace structure. 1,534,548; Apr. 21.
Slagle, Elias E., et al. (See Lundy, John C., assignor.)
Slaten, Albert, Fargo, N. Dak. Butter chipper. 1,534,418; Apr. 21.
Slavin, John, Rochester, N. Y. Fan or blower. 1,534,743; Apr. 21.
Smith, Andrew, San Mateo, Calif. Grid-resistance panel for electric welding apparatus. 1,534,288; Apr. 21.
Smith, Anice Y., Minneapolis, Minn. Piano-keyboard card system. 1,534,669; Apr. 21.
Smith, Arthur B., Evanston, assignor to automatic Electric Company, Chicago, Ill. Automatic substation telephone circuit. 1,534,144; Apr. 21.
Smith, Arthur B., Evanston, assignor to Automatic Electric Company, Chicago, Ill. Switch-control circuit for automatic telephone systems. 1,534,549; Apr. 21.
Smith, Bella. (See Smith, Raymond, assignor.)
Smith, Charles G., Cambridge, Mass. Electric light. 1,534,251; Apr. 21.

Smith, Chetwood, Worcester, and C. T. Hawley, Holden, assignors to Stack Heater Company, Boston, Mass. Steam-water mixer; 1,535,061; Apr. 21.

Smith, George, Mullen, Nebr. Obstetrical forceps. 1,534,419; Apr. 21.

Smith, Grover D., Montclair, N. J. Folding table. 1,534,470; Apr. 21.

Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,534,550; Apr. 21.

Smith, John C. (See Peet, E. L., Hanscom, and Smith.)

Smith, J. Harley, San Francisco, Calif. Regulating valve. 1,534,420; Apr. 21.

Smith, Malcolm, Seba Beach, Alberta, Canada. Teakettle. 1,534,670; Apr. 21.

Smith, Raymond, assignor to B. Smith, New York, N. Y. Hat. 1,534,421; Apr. 21.

Smith, Sidney, Midhurst, England. Mill for grinding paints, enamels, inks, and other viscous materials. 1,535,052; Apr. 21.

Smith, Warren A., Geneva, and M. E. Widell, Maywood, Ill., assignors to American Can Company, New York, N. Y. Holding fixture for electric welding of side seams of container bodies. 1,534,422; Apr. 21.

Smith, William J., St. Paul, Minn. Heating system for electric railway cars. 1,535,079; Apr. 21.

Smith, William L., Camden, N. J. Serving dish. 1,534,471; Apr. 21.

Smoot, Charles H., Maplewood, N. J. Viscosity regulator. 1,534,091; Apr. 21.

Snyder, Herbert W., and A. J. Townsend, Lima, Ohio. Locomotive saddle structure. 1,534,423; Apr. 21.

Society of Chemical Industry in Basle. (See Fritzsche, H., and Reber, assignors.)

Society of Chemical Industry in Basle. (See Goeschke, Armin, assignor.)

Society of Chemical Industry in Basle. (See Hartmann, M., and Kägi, assignors.)

Society of Chemical Industry in Basle. (See Mayer, B., and Würgler, assignors.)

Society of Chemical Industry in Basle. (See de Montmollin, G., and Bonhôte, assignors.)

Solie, Walter H., Wilbur, Oreg. (Fruit-drying apparatus. 1,534,092; Apr. 21.

Sorensen, Nels, Traverse City, Mich. Washboard. 1,534,332; Apr. 21.

Sorum, Alexander E., and R. T. Brockman, assignors to International Money Machine Company, Terre Haute, Ind. Coin-counting device for money-paying machines. 1,534,551; Apr. 21.

Soubier, Leonard D. (See Stenhouse, T., and Soubier.)

Southwick, William S., Clinton, Mass., assignor, by mesne assignments, to Wickwire Spencer Steel Company, New York, N. Y. Apparatus for electrically welding wire fabric. 1,534,034; Apr. 21.

Spalding, A. G., & Bros. (See Hardy, Samuel, assignor.)

Spalding, A. G., & Bros. (See MacDonald, William W., assignor.)

Spalding, A. G., & Bros. (See Speedy, Alan, assignor.)

Speedy, Alan, London, England, assignor to A. G. Spalding & Bros., New York, N. Y. Golf ball. 1,535,053; Apr. 21.

Spencer, Henry K., Watertown, assignor to The Blanchard Machine Company, Cambridge, Mass. Controlling feeding mechanisms. 1,535,080; Apr. 21.

Sperry, John A., Munnsville, N. Y. Molding machine. 1,534,615; Apr. 21.

Spinks, William A., & Co. (See Hoskin, Edmund F., assignor.)

Sprada, Dominick, Buffalo, N. Y. Spark plug. 1,534,744; Apr. 21.

Sprague Canning Machinery Company et al. (See Steere, Clarence E., assignor.)

Squire, Samuel L., et al. (See Lundy, John C., assignor.)

Stack Heater Company. (See Smith, C., and Hawley, assignors.)

Stacharuk, Petro. (See Kusyk, H., and Mandzuk, assignors.)

Standard-Trump Brothers Machine Company. (See Houseman, Wilbur L., assignor.)

Standish, John F., Winthrop, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Wax pot. 1,534,093; Apr. 21.

Standish, John F., Winthrop, Mass., assignor to United Shoe Machinery Corporation, Patereon, N. J. Finishing machine. 1,534,094; Apr. 21.

Stapleton, Jerry, assignor of one-half to D. A. Fleming, Los Angeles, Calif. Keyhole plug. 1,534,745; Apr. 21.

Stark, Frederick W., assignor to International Silver Co., Meriden, Conn. Teapot or similar article. Des. 67,105; Apr. 21.

Stark, Frederick W., assignor to International Silver Co., Meriden, Conn. Teapot or similar article. Des. 67,106; Apr. 21.

Stark, Frederick W., assignor to International Silver Co., Meriden, Conn. Dish or similar article. Des. 67,107; Apr. 21.

Stark, Hugo W., and T. D. Reese, Cupertino, Calif. Shock absorber for vehicles. 1,534,424; Apr. 21.

Stead, Harold J., Geneva, N. Y. Producing finished surfaces upon glass. 1,534,671. Apr. 21.

Stedman, William A., Westport, Conn., assignor to The Dorr Company, New York, N. Y. Treatment of pulps. 1,534,145; Apr. 21.

Steeple, Reginald C., Spokane, Wash., assignor to H. J. Braun, Chicago, Ill. Candle holder or a similar article. Des. 67,108; Apr. 21.

Steere, Clarence E., Milwaukee, Wis., assignor of one-half to Sprague Canning Machinery Company, Chicago, Ill., and one-half to Ayars Machine Company, Salem, N. J. Liquid measuring and filling machine. 1,534,035; Apr. 21.

Steinberger, Arthur A., San Francisco, Calif., assignor to Steinberger Bros. Lobl Co., Inc., New York, N. Y. Glove. 1,534,616; Apr. 21.

Steinberger Bros. Lobl Co. (See Steinberger, Arthur A., assignor.)

Steinmeyer, John W. (See Hochberg, O., and Steinmeyer.)

Stembridge, Grover C. (See Pratt, Norman F., assignor.)

Stenhouse, Thomas, Washington, Pa., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Clamp for glass molds. 1,534,878; Apr. 21.

Stenhouse, Thomas, Washington, Pa., and L. D. Soubier, assignors to The Owens Bottle Company, Toledo, Ohio. Glass-forming machine. 1,534,036; Apr. 21.

Stenhouse, Thomas. (See Oliver, G. G., and Stenhouse.)

Stern, Max, assignor to Biltmore Lighting Fixture Co., Inc., Brooklyn, N. Y. Lighting-fixture bracket. Des. 67,109; Apr. 21.

Stevens, Enoch P., deceased, Chicago, Ill.; M. A. Stevens, executrix. Open-hearth-furnace roof. 1,534,472; Apr. 21.

Stevens, Mary A., executrix. (See Stevens, Enoch P.)

Stewart, Arthur J., St. Louis, Mo. Collapsible shipping crate. 1,534,672; Apr. 21.

Stewart, Mark G., assignor to The Pelican Well Tool and Supply Company, Shreveport, La. Swivel hook. 1,534,876; Apr. 21.

Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,535,054; Apr. 21.

Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,535,055; Apr. 21.

Stoebner, Emanuel. (See Stoebner, William, E., E., and D.)

Stoebner, William, E., E., and D., Tripp, S. Dak. Plant deflector. 1,534,880; Apr. 21.

Stokoe, Charles L., Wallsend-on-Tyne, England. Safety apparatus for controlling the flow of fluid in pipes. 1,534,881; Apr. 21.

Stoloff, Wolf, London, England. Educational appliance. 1,535,056; Apr. 21.

Stowell, Augustus H., Spokane, Wash. Pipe joint. 1,534,425; Apr. 21.

Streich, Frank, assignor to Union Machinery Company, Joliet, Ill. Dough-molding machine. 1,534,617; Apr. 21.

Strong, Homer L., and T. E. Forster, Wichita, Kans. Centrifugal thrashing machine. 1,534,426; Apr. 21.

Stryker, Walter W., deceased, Dayton, Ohio; E. T. Jones, administrator. Centrifugal cleaner for circulating liquids. 1,534,101; Apr. 21.

Studebaker Corporation, The. (See Bourgon, Joseph H., assignor.)

Sturges, Arthur H., Omaha, Nebr. Tubular fire escape. 1,534,833; Apr. 21.

Stutsman, Lewis E., Milton, Oreg. Conveyer system. 1,534,534; Apr. 21.

Submarine Signal Company. (See Fessenden, Reginald A., assignor.)

Sullivan, William B. (See Lyon, George N., assignor.)

Sutter, Marcel. (See Mouriam, G., and Sutter.)

Swann, Herbert. (See Baddiley, J., Shepherdson, Swann, Hill, and Lawrie.)

Swartzbaugh Manufacturing Company, The. (See Ziola, Henry A., assignor.)

Tabulating Machine Company, The. (See Lake, Clair D., assignor.)

Tackaberry, Robert D., Lewiston, Me. Automatic valve mechanism. 1,534,746; Apr. 21.

Taggart, Frank D., Wyomissing, Pa. Alloy roll steel. 1,534,473; Apr. 21.

Talbot, Howard H., Wooster, Ohio, assignor, by mesne assignments, to Mackintosh-Hemphill Company, Pittsburgh, Pa. Clutch mechanism. 1,534,882; Apr. 21.

Tarbutton, Benjamin J. (See Wise, J. A., and Tarbutton.)

Taylor, Alfred M., Erdington, Birmingham, England. Electrical-power-transmission system. 1,535,057; Apr. 21.

Taylor Instrument Companies. (See Marsh, Edward S., assignor.)

Taylor, John W., Blue Rapids, Kans. Harrow cart. 1,535,058; Apr. 21.

Taylor, Leroy B., Cleveland, Ohio. Metal window casing. 1,534,037; Apr. 21.

Taylor, William A., and P. J. Sibley, assignors to P. J. Sibley, Chicago, Ill. Vapor-treatment receptacle. 1,534,618; Apr. 21.

Teppet, Eugene, Grenoble, France, assignor to the Firm of Albert Charpilloz, Bevillard, Switzerland. Process of and composition of matter for killing plants. 1,534,280; Apr. 21.

Ter Meer, Gustav, Hanover-Linden, Germany. Outlet valve for centrifugal separators. 1,534,604; Apr. 21.

Tharaldsen, Filip, Bestum, near Christiania, Norway. Making liquid zinc from blue powder. 1,535,059; Apr. 21.

Thiedemann-Hardy Company. (See Thiedemann, William L., assignor.)

Thiedemann-Hardy Company. (See Thiedemann, W. L., and Hardy, assignors.)

Thiedemann, William L., assignor to Thiedemann-Hardy Company, Muskegon, Mich. Dental tool holder. 1,534,816; Apr. 21.

Thiedemann, William L., and H. M. Hardy, assignors to Thiedemann-Hardy Company, Muskegon, Mich. Dental tool. 1,534,817; Apr. 21.

Thomas & Betts Co., The. (See Thomas, George C., jr., assignor.)

Thomas, George C., jr., assignor to The Thomas & Betts Co., Elizabeth, N. J. Fixture stud. 1,534,146; Apr. 21.

Thompson, William, Detroit, Mich., assignor to Morgan & Wright. Tire-building tool. 1,534,088; Apr. 21.

Thurstone, Conrad, Pittsburgh, Pa. Spring suspension system for vehicles. 1,534,995; Apr. 21.

Tice, William H., Seaside, Oreg. Washer for nut locks. 1,534,427; Apr. 21.

Tidmarsh, Wilfred R. (See Gannon, Wilfred, assignor.)

Timmons, Ernest, assignor of one-half to H. E. Cornthwaite, Cicero, Ind. Pump piston. 1,534,747; Apr. 21.

Timms, Herbert B., Atlanta, Ga. Oil-dispensing device. 1534,883; Apr. 21.

Tippet, Philip V., assignor to The Vaughn Machinery Company, Cuyahoga Falls, Ohio. Wire-block-stripping mechanism. 1,534,039; Apr. 21.

Tirrill, Allen A., Pittsburgh, Pa. Connecting link. 1,535,060; Apr. 21.

Tocchio, Michele, London, England. Oven, saucepan, and the like. 1,534,748; Apr. 21.

Toledo Automotive Products Company. (See Clas, A. R., and Randall, assignors.)

Tomlinson, Eugene, Kansas City, Kans. Radiator filling and cooling cap. 1,534,428; Apr. 21.

Touchstone, Solomon G., Columbia, S. C. Tension feeler. 1,534,040; Apr. 21.

Touchstone, Solomon G., Columbia, S. C. Tension feeler. 1,534,041; Apr. 21.

Townsend, Albert J. (See Snyder, H. W., and Townsend.)

Trautman, Walter G., Cleveland Heights, assignor to The Cleveland Folding Machine Co., Cleveland, Ohio. Paper-folding machine. 1,534,884; Apr. 21.

Trautman, Walter G., Cleveland Heights, assignor to The Cleveland Folding Machine Co., Cleveland, Ohio. Paper-folding machine. 1,534,885; Apr. 21.

Tri-Ergon Limited. (See Vogt, H., Engl, and Massolle, assignors.)

Triplett, Thomas H., Patterson, N. C. Jar holder. 1,534,429; Apr. 21.

Trolley Shoe-Wheel Company. (See Moore, Giles S., assignor.)

Troutman, Frank E., and C. H. Christie, Butler, Pa. Making plate glass. 1,535,061; Apr. 21.

Troutman, Frank E., and C. H. Christie, Butler, Pa. Apparatus for making plate glass. 1,535,062; Apr. 21.

Troutman, Frank E., and C. H. Christie, Butler, Pa. Laying plate glass. 1,535,063; Apr. 21.

Troutman, Frank E., and C. H. Christie, Butler, Pa. Apparatus for laying plate glass. 1,535,064; Apr. 21.

Troy, Matthew O., Pittsfield, Mass., assignor to General Electric Company. Electrical-apparatus casing. 1,534,749; Apr. 21.

Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin E., assignor.)

Truscott, Starr, Washington, D. C. Airship-mooring mast with water tank and fire protection for airship shed. 1,534,619; Apr. 21.

Tryon, William A., Providence, R. I. Shackle. 1,534,192; Apr. 21.

Tryon, William A., Providence, R. I. Shackle. 1,534,193; Apr. 21.

Tucker, Oliver M., and W. A. Reeves, Columbus, Ohio. Interchangeable spout-aperture bushing and applying the same. 1,534,996; Apr. 21.

Tucker Rubber Corporation. (See Joseph, Henry, assignor.)

Tugendhat, Robert G., Saginaw, Mich., assignor to Baker-Perkins Company, Incorporated, White Plains, N. Y. Electrically-heated traveling ovens. 1,534,042; Apr. 21.

Turner, Charles A., Chicago, Ill., assignor to Ginkolt Machine Company, Madison, Wis. System of electric-current distribution. 1,534,235; Apr. 21.

Turner, John. (See Lomax, J. A. B., Turner, and Bentley.)

Turner, William. (See Lomax, J. A. B., Turner, and Bentley.)

Tweedt, John A. B., and C. A. Nelson, Oakland, Calif. Top. 1,535,065; Apr. 21.

Tyler, W. S., Company, The. (See Griffith, T. E., and Dodds, assignors.)

Tyner, Harold C., Culver City, Calif. Life preserver. 1,534,552; Apr. 21.

Tyson, Amos A., Albany, N. Y. Antiskidding device for automobiles. 1,534,043; Apr. 21.

Udale, Stanley M., Detroit, Mich. Vaporizer. 1,534,290; Apr. 21.

Ullgren, John D. (See Wagner, R. E., and Ullgren.)

Ulrich, Carl J., Mankato, Minn. Fruit cutter and juice extractor. 1,534,997; Apr. 21.

Underwood Typewriter Company. (See Allard, J Frank, assignor.)

Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)

Underwood Typewriter Company. (See Stickney, Burnham C., assignor.)

Union Machinery Company. (See Streich, Frank, assignor.)

Union Special Machine Company. (See Moffatt, James E., assignor.)

United Shoe Machinery Corporation. (See Beckman, Frank E., assignor.)

United Shoe Machinery Corporation. (See Brogan, James A., assignor.)

United Shoe Machinery Corporation. (See Erickson, Edward, assignor.)

United Shoe Machinery Corporation. (See Glass, Perley R., assignor.)

United Shoe Machinery Corporation. (See Gouldbourn, Joseph, assignor.)

United Shoe Machinery Corporation. (See Hadaway, J. B., and Seely, assignors.)

United Shoe Machinery Corporation. (See Jacques, George W., assignor.)

United Shoe Machinery Corporation. (See Perry, Frederick H., assignor.)

United Shoe Machinery Corporation. (See Pym, Arthur F., assignor.)

United Shoe Machinery Corporation. (See Standish, John F., assignor.)

United Shoe Machinery Corporation. (See Warren, Frank H., assignor.)

United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)

United States of America. (See Dunlap, Matthew E., assignor.)

United States Printing and Lithographing Company, The. (See Furste, Henry, assignor.)

United States Smelting Refining & Mining Company. (See Clevenger, Galen H., assignor.)

United States Spring Co. (See Riedele, P., Cason, and Herman, assignors.)

United States Welding Company. (See Campbell, Lorn, jr., assignor.)

Universal Engineering Corporation. (See Robson, John, assignor.)

Universal Milking Machine Company, The. (See Schmitt, John A., assignor.)

Universal Oil Products Company, The. (See Dubbs, Carbon P., assignor.)

Updike, Alfred B. (See Henkel, G. W., and Updike.)

Vahjen, Marie A., Guttenberg, N. J. Device for secret writing. 1,535,066; Apr. 21.

Valentine, Joseph E., Whitestone, N. Y., assignor to Valmont Manufacturing Co., Inc. Sewing machine. 1,534,818; Apr. 21.

Valmont Manufacturing Co. (See Valentine, Joseph E., assignor.)

Van Arsdel, Wallace B. (See Byers, H. G., and Van Arsdel.)

Vanderveld, Anthony, Grand Rapids, Mich. Presser-roller construction. 1,534,336; Apr. 21.

Van Dorn Iron Works Company, The. (See Barker, Percy E., assignor.)

Van Llew, Henry A., Springfield, N. J., assignor to Oriental Silk Printing Company, New York, N. Y. Ornamented fabric and producing the same. 1,534,194; Apr. 21.

Vanorio, Joseph, College Point, N. Y., assignor of one-fifth to J. F. O'Brien, West New York, N. J. Apparatus for heating water or other liquids. 1,535,081; Apr. 21.

Varley Duplex Magnet Company. (See Scott, Archibald D., assignor.)

Vaughn, Calvin W., assignor to The Vaughn Machinery Company, Cuyahoga Falls, Ohio. Wire-drawing mechanism. 1,534,998; Apr. 21.

Vaughn Machinery Company, The. (See Tippet, Philip V., assignor.)

Vaughn Machinery Company, The. (See Vaughn, Calvin W., assignor.)

Veal, Henry A., Douglas, Ga. Air-brake-pipe connection. 1,534,147; Apr. 21.

Vernon, Harvey H., Schenectady, N. Y., assignor to General Electric Company. Motor-control system. 1,534,750; Apr. 21.

Verona Tool Works. (See Wisecrantz, John S., assignor.)

Vickers Limited. (See Lucas, O. D., and Johnson, assignors.)

Victor, Alexander F., Davenport, Iowa. Crank connection for motion-picture machines. 1,534,044; Apr. 21.

Victory Equipment Corporation. (See Page, George M., assignor.)

Villemaire, Adolard, Ruskin, Fla. Motor-driven grubbing machine. 1,535,067; Apr. 21.

Violini, Lorenzo. (See Jonas, Erminio, assignor.)

Vogt, Hans, Berlin-Schoneberg, J. Engl, and J. Massolle, Grunewald, Germany, assignors to Tri-Ergon Limited, Zurich, Switzerland. Sound-translating apparatus. 1,534,148; Apr. 21.

Von Schlegell, Frederick, Chicago, Ill. Electric heating unit. 1,534,553; Apr. 21.

Von Seth, Rutger H., Stockholm, Sweden. Obtaining vanadium compounds or vanadium from pig iron containing vanadium. 1,534,819; Apr. 21.

Wachs, Murray A., Brooklyn, N. Y. Metal-binding machine. 1,535,068; Apr. 21.

Wadsworth Watch Case Company, The. (See Conant, Arthur P., assignor.)

Wagner, Fred W., assignor to Jones & Laughlin Steel Corporation, Pittsburgh, Pa. Treating waste of benzol recovery. 1,534,554; Apr. 21.

Wagner, Fred W., assignor to Jones & Laughlin Steel Corporation, Pittsburgh, Pa. Treating waste of benzol recovery. 1,534,555; Apr. 21.

Wagner, Rudolf E., Karlstad, and J. D. Ullgren, Stocksund, assignors to Aktiebolaget Karlstads Mekaniska Verkstad, Karlstad, Sweden. Apparatus for separating liquids from solid bodies mixed or suspended therein. 1,534,620; Apr. 21.

Wahl, Leo J., Sterling, Ill. Clipper. 1,534,621; Apr. 21.

Waite, Charles C. (See Reimers, A. E., and Waite.)

Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Reed holder. 1,534,252; Apr. 21.

Wachtel, Wilhelm. (See Obersohn, A., Wachtel, Sakom, and Askensay.)

Walker Manufacturing Company. (See Benson, Maurice F., assignor.)

Walker, Roy. (See Denbigh, G., and Walker.)

Walker, Thomas B., Nashville, Tenn. Tray and support therefor. 1,534,095; Apr. 21.

Wallick, Ford, Peru, Ind. Register block. 1,534,751; Apr. 21.

Walliser, Robert E., Chicago, Ill. Thread moving and controlling means for knitting machines, etc. 1,534,556; Apr. 21.

Walmsley, Joseph, St. Louis, Mo. Umbrella. 1,534,820; Apr. 21.

Walter, George E., Cates, Ind. Nonfreezing radiator. 1,534,195; Apr. 21.

Walter, Harrison B., assignor to Chicago Mill and Lumber Company, Chicago, Ill. Box. 1,534,045; Apr. 21.

Walton, Frank. (See Johnson, Merle, assignor.)

Wandel, Kurt, assignor, by mesne assignments, to Arkell Safety Bag Company, New York, N. Y. Dry crinkling paper. 1,534,622; Apr. 21.

Wans, Arthur H., and O. H. Fisher, San Francisco, Calif. Driving signal. 1,534,374; Apr. 21.

Ward, David A., Primrose, Nebr. Automobile tire chain. 1,535,071; Apr. 21.

Warp Compressing Machine Company. (See Remington, Arthur L., assignor.)

Warr, Harold G., Park Ridge, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,534,623; Apr. 21.

Warren, Frank H., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Trimming machine. 1,534,096; Apr. 21.

Waterbury Buckle Co. (See Webb, Charles M., assignor.)

Watson, Ernest A., Coventry, England, assignor to The C. L. I. Manufacturing Company Limited, Birmingham, England. Electric switch or circuit breaker. 1,534,753; Apr. 21.

Watson, Harry C., assignor to Keystone Machine & Engineering Company, Pittsburgh, Pa. Shearing device. 1,534,999; Apr. 21.

Watson, Philip B., Flushing, N. Y., assignor to Carbide and Carbon Chemicals Corporation. Production of glycol esters. 1,534,752; Apr. 21.

Watson, Robert M., Shippensville, Pa. Rear compartment for vehicles. 1,534,837; Apr. 21.

Watt, William R. H. (See De Armond, W. C., and Watt.)

Weatherwax, Earl O., San Francisco, Calif. Piston ring. 1,535,069; Apr. 21.

Webb, Charles M., assignor to Waterbury Buckle Co., Waterbury, Conn. Rustless buckle. 1,535,000; Apr. 21.

Webb, George E., Milwaukee, Wis., assignor to Koehring Company. Subgrade planer. 1,534,046; Apr. 21.

Webster Electric Company. (See Hawkins, William W., assignor.)

Weidlich Bros. Mfg. Co., The. (See Weidlich, Louis, assignor.)

Weidlich, Louis, Stratford, assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn. Electric perfumer. 1,534,624; Apr. 21.

Weihmann, Henry A., assignor to Bunte Brothers, Chicago, Ill. Template-filling machine. 1,534,338; Apr. 21.

Weihmann, Henry A., assignor to Bunte Brothers, Chicago, Ill. Device for regulating humidity of containers. 1,534,342; Apr. 21.

Weir, William W., Alameda, Calif. Electrical heating element. 1,534,673; Apr. 21.

Weisenburger, John, and J. H. Huston, Rosebud, S. Dak. Animal trap. 1,535,001; Apr. 21.

Wellman, Lester R., Chicago, Ill. Bracket back for lighting fixtures. Des. 67,110; Apr. 21.

Wells, George F., assignor to Wells Manufacturing Co., San Francisco, Calif. Waffle iron. 1,534,430; Apr. 21.

Wells, George F., San Francisco, Calif. Electric waffle iron. 1,534,431; Apr. 21.

Wells Manufacturing Co. (See Wells, George F., assignor.)

Wells, William S., Bethlehem, Pa., assignor to Benjamin Eastwood Company, Paterson, N. J. Dwell-motion mechanism. 1,534,344; Apr. 21.

Wells, William S., Bethlehem, Pa., assignor to Benjamin Eastwood Company, Paterson, N. J. Take-up mechanism for looms. 1,534,345; Apr. 21.

Werder, John F., Denver, Colo., assignor to The Zip Manufacturing Co., Denver, Colo. Abrasive compound. 1,534,196; Apr. 21.

Wernecke, Otto. (See Ewald, H., and Wernecke.)

Wershow, Jacob, New Haven, Conn. Alcohol tester. Re16,049; Apr. 21.

Westbury, William, Elmira, N. Y. Apparatus for drawing glass cylinders. 1,534,432; Apr. 21.

Westcott, Pliny K., assignor to M. A. Kenney, Brooklyn, N. Y. Vehicle landing apparatus. 1,534,754; Apr. 21.

Western Electric Company. (See Field, Frank E., assignor.)

Western Electric Company. (See Goff, Harold W., assignor.)

Western Electric Company. (See Schelleng, John C., assignor.)

Western Electric Company. (See Scriven, Edward O., assignor.)

Western Union Telegraph Company, The. (See Foll, John V., assignor.)

Western Union Telegraph Company, The. (See Houghtaling, Walter A., assignor.)

Westholm, Harold M., Independence, La. Radius rod. 1,535,002; Apr. 21.

Westinghouse Electric & Manufacturing Company. (See MacFarland, Allis M., assignor.)

Westinghouse Electric & Manufacturing Company. (See Schmidt, Henry F., assignor.)

Weston, William S., Dallas, Tex. Anticreeper for railway rails. 1,534,821; Apr. 21.

White, Charles M., Fort Dodge, Iowa. Hose reel. 1,534,433; Apr. 21.

White, Edwin C., Baltimore, Md. Mercury derivative of dibrom-fluorescein. 1,535,003; Apr. 21.

White, John S., St. Louis, Mo. Truck. 1,534,346; Apr. 21.

White, Walter C., assignor to International Couplers Company, Pittsburgh, Pa. Train-pipe coupling. 1,534,004; Apr. 21.

Whiting Mfg. Co., The. (See Belcher, Warren J., assignor.)

Wiberg, Oke S., Chicago, Ill. Window for locomotive cabs. 1,534,434; Apr. 21.

Wickwire Spencer Steel Company. (See Southwick, William S., assignor.)

Widell, Magnus E., Maywood, Ill., assignor to American Can Company, New York, N. Y. Adjustable air cushion for drawing dies. 1,534,435; Apr. 21.

Widell, Magnus E. (See Smith, W. A., and Widell.)

Wiese, Edwin C., Milwaukee, Wis., assignor, by mesne assignments, to The Fisk Rubber Company, Chicopee Falls, Mass. Coating asbestos cloth with rubber. 1,534,477; Apr. 21.

Wiesner, Felix R., et al. (See Markóczi, Emeric, and Adam, assignors.)

Wilhelm, Joseph, and C. A. Kays, McKees Rocks, Pa. Mechanical toy. 1,534,097; Apr. 21.

Wilkinson, Edwin F., Los Angeles, Calif. Bench arbor press. 1,534,436; Apr. 21.

Willett, Alfred H., West New York, N. J., assignor to American Arch Company. Arch and arch bricks. 1,534,474; Apr. 21.

Willett, Alfred H., West New York, and H. S. Martin, Ridgewood, N. J., assignors to American Arch Company. Fire brick. 1,534,475; Apr. 21.

Williams, Commodore D., Caruthersville, Mo. Self-serving table. 1,534,557; Apr. 21.

Williams, Elbert C., Dayton, Ohio. Safety belt strap. 1,534,197; Apr. 21.

Williamson, Corilla F. (See Anshen, Harold, assignor.)

Willoughby, Victor R., Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Door-latching means. 1,534,047; Apr. 21.

Willshaw, Harry, assignor to Dunlop Tire and Rubber Corporation of America, Buffalo, N. Y. Bracelet spring clamps for tube cores and manufacturing tubes. 1,534,149; Apr. 21.

Wilson, Herbert, assignor to The Dura Company, Toledo, Ohio. Dome light. Des. 67,111; Apr. 21.

Wilson, Herbert, assignor to The Dura Company, Toledo, Ohio. Corner light. Des. 67,112; Apr. 21.

Wilson, John, Crook, assignor to John Wilson and Pease and Partners Limited, Darlington, Durham, England. Manufacture of silica bricks. 1,534,199; Apr. 21.

Wilson, John, and Pease and Partners Limited. (See Wilson, John, assignor.)

Wilson, John M., San Diego, Calif. Tobacco pipe. 1,535,005; Apr. 21.

Wilson, John T., Pilot Hill, Calif. Packing ring and piston. 1,534,198; Apr. 21.

Wincrantz, John S., Wilkinsburg, assignor to Verona Tool Works, Pittsburgh, Pa. Spike puller. 1,53...

Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-lift aligning, pressing, and nailing machine. 1,534,04... Apr. 21.

Winter, Joseph W., Penfield, Pa. Dies. 1,534,822; Apr. 21.

Wirrer, Gottfried, Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Rotating poppet valve. 1,534,476; Apr. 21.

Wirz, Ernst. (See Burkhardt, H., and Wirz.)

Wise, James A., and B. J. Tarbutton, Sandersville, Ga. Air moistener for internal-combustion engines. 1,534,200; Apr. 21.

Wiswall, William J., Oakland, Calif., assignor, by mesne assignments, to American Sales Book Company, Limited, Toronto, Ontario, Canada. Manifolding book. 1,534,478; Apr. 21.

Woidich, Franz. (See Schill, E., and Woidich.)

Wolf, Frank C. (See Katona, Louis F., assignor.)

Wolfes, Otto, and H. Maeder, Darmstadt, Germany. Manufacture of D-ψ- and L-ψ-cocaine. 1,534,558; Apr. 21.

Wolff, Aaron H., New York, N. Y. Gas heater. Des. 67,113; Apr. 21.

Wood, John R., Irvington, assignor to New Process Multi-Castings Company, Newark, N. J. Making matched pattern plates. 1,534,625; Apr. 21.

Wood, Walter G., Fellsmere, Fla. Cutter attachment for plows. 1,534,098; Apr. 21.

Wood, William R., Washington, D. C. Removing liners from cylinders. 1,535,007; Apr. 21.

Woodman, George A., Chicago, Ill. Hand brake for railway cars. 1,534,626; Apr. 21.

Woodruff, Wayland E. (See McMullen, V. E., and Woodruff.)

Worthington Pump and Machinery Corporation. (See Feldbush, H., and Miller, assignors.)

Wright, Herbert L., Birmingham, England. Support for tennis and like nets. 1,534,437; Apr. 21.

Würgler, Jakob. (See Mayer, B., and Würgler.)

Yancey, Harry F. (See Fraser, T., and Yancey.)

Yant, Wilbur R., Tulsa, Okla. Paper-hanger's seam roller. 1,534,559; Apr. 21.

Yeomans, Lucien I., assignor to Pioneer Production Company, Chicago, Ill. Apparatus for applying pulverized or shredded material to the interior of tubular articles. 1,534,627; Apr. 21.

Zanetti, Giuseppe G., Milan, Italy. Demountable automobile top. 1,535,008; Apr. 21.

Zanetti, Giuseppe G., Milan, Italy. Convertible top for vehicles. 1,535,009; Apr. 21.

Zass, William B., Milwaukee, Wis. Fishing-rod handle. 1,534,674; Apr. 21.

Zay, George W. (See Furiate, Daniel P., assignor.)

Zeharie, George, Quincy, Ill. Clevis hook. 1,535,010; Apr. 21.

Zeis, George J., Buffalo, N. Y. Electric switch. 1,535,011; Apr. 21.

Zeller, Cheeman B., Wichita, Kans. Cotter-pin extractor. 1,535,012; Apr. 21.

Zillman, Ludwig A., Milwaukee, Wis. Automobile signal. 1,535,013; Apr. 21.

Zimmerer, Frederick, assignor to The Russell Manufacturing Company, Middletown, Conn. Textile fabric. Des. 67,114; Apr. 21.

Ziola, Henry A., assignor to The Swartzbaugh Manufacturing Company, Toledo, Ohio. Electric table stove. 1,534,823; Apr. 21.

Ziola, Henry A., assignor to The Swartzbaugh Manufacturing Company, Toledo, Ohio. Electric table stove. 1,534,824; Apr. 21.

Zip Manufacturing Co., The. (See Werder, John F., assignor.)

Zobe, Ludwig A., Syracuse, N. Y. Milking vessel. 1,534,628; Apr. 21.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 21ST DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abdominal and sacroiliac support. S. C. Edmiston. 1,534,774; Apr. 21.
Abrasive compound. J. F. Werder. 1,534,196; Apr. 21.
Acid, Bleaching sulphuric. W. C. Leonhard, J. R. Dufford, and A. Hough. 1,534,226; Apr. 21.
Acylated diamines. M. Hartmann and J. Kägi. 1,534,525; Apr. 21.
Adding machine. L. Rothman. 1,534,811; Apr. 21.
Adjustable chair. W. A. McCollough. 1,534,796; Apr. 21.
Advertising device. G. E. La Port. 1,534,223; Apr. 21.
Agricultural implement. E. L. Peet, W. G. Hanscom, and J. C. Smith. 1,534,659; Apr. 21.
Air-brake-control mechanism, Automatic. F. N. Johnston. 1,534,217; Apr. 21.
Aircraft, Rate-of-climb indicator for. A. H. Foster. 1,534,206; Apr. 21.
Airship-mooring mast with water tank and fire protection for airship sheds. S. Truscott. 1,534,619; Apr. 21.
Alarm: *See*—
Burglar alarm. Doorknob alarm.
Alcohol tester. J. Wershow. Re16,049; Apr. 21.
Alloy, Metallic. A. W. Clement. 1,534,570; Apr. 21.
Alloy roll steel. F. D. Taggart. 1,534,473; Apr. 21.
Alumina, Testing molten. L. W. Gabriel. 1,534,032; Apr. 21.
Aluminum and articles made therefrom, Electrolytically-refined. W. Hoopes. 1,534,315; Apr. 21.
Aluminum chloride, Recovering. A. M. McAfee. 1,534,130; Apr. 21.
Aluminum, Electrolytic production of. W. Hoopes, F. C. Frary, and J. D. Edwards. 1,534,317; Apr. 21.
Aluminum, Electrolytic refining of. W. Hoopes, F. C. Frary, and J. D. Edwards. 1,534,318; Apr. 21.
Aluminum electrolytically with fused electrolytes, Refining. W. Hoopes and F. C. Frary. 1,534,319; Apr. 21.
Aluminum from impure materials, Production of metallic. W. Hoopes, F. C. Frary, and J. D. Edwards. 1,534,316; Apr. 21.
Amusement apparatus. S. A. de Waltoff and L. H. McDaniel. 1,534,978; Apr. 21.
Amusement apparatus. H. E. Riehl. 1,534,285; Apr. 21.
Amusement apparatus. H. E. Riehl. 1,535,040; Apr. 21.
Animal trap. J. Weisenburger and J. H. Huston. 1,535,001; Apr. 21.
Anthracene derivative and making same. B. Mayer and J. Würgler. 1,534,535; Apr. 21.
Antiskidding device for automobiles. A. A. Tyson. 1,534,043; Apr. 21.
Arch and arch bricks. A. H. Willett. 1,534,474; Apr. 21.
Arch support. M. Dietz. 1,534,308; Apr. 21.
Armband, garter, and the like. E. Clarke. 1,534,917; Apr. 21.
Asbestos cloth with rubber, Coating. E. C. Wiese. 1,534,477; Apr. 21.
Ash hoppers, Gate for. R. H. Beaumont and H. Marette. 1,534,893; Apr. 21.
Assembling and counting mechanism. T. A. Nevins. 1,535,031; Apr. 21.
Auto signal. L. G. Andrews. 1,535,014; Apr. 21.
Automatic gate. H. Kuzyk and F. Mandzuk. 1,534,967; Apr. 21.
Automobile alarm device. H. Horak and K. Holoubek. 1,534,955; Apr. 21.
Automobile glare shield. J. D. Banks. 1,534,487; Apr. 21.
Automobile radiator heater. A. J. Kercher. 1,534,220; Apr. 21.
Automobile sanding device. L. Miller. 1,534,239; Apr. 21.
Automobile signal. L. A. Zillmann. 1,535,013; Apr. 21.
Automobile signal lamp. H. G. Dibelka. Des. 67,075–6; Apr. 21.
Automobile signaling equipment. A. J. Scheidecker. 1,535,045; Apr. 21.
Automobile speed controller. H. C. Hill. 1,534,526; Apr. 21.
Automobile top, Demountable. G. G. Zanetti. 1,535,008; Apr. 21.
Automobiles and the like, Method and means to indicate the theft of. O. L. Scroggins. 1,534,994; Apr. 21.
Automobiles, Antitheft alarm for. G. Schweikhard. 1,534,666; Apr. 21.
Automobiles, Radiator and hood cover for. E. E. Bouchard. 1,534,903; Apr. 21.

Awning. H. J. Saunders. 1,534,664; Apr. 21.
Axle housing. T. E. Murray, jr. 1,534,605; Apr. 21.
Axle-setting tool. B. W. Decatur. 1,534,505; Apr. 21.
Badge. G. C. Hart. Des. 67,083; Apr. 21.
Badge or similar article. G. W. Kite. Des. 67,087; Apr. 21.
Bag-closing tool. H. D. Sawkins. 1,534,465; Apr. 21.
Baling machine. H. G. Collins. 1,534,359; Apr. 21.
Ball: *See*—
Golf ball.
Ball loop. J. Sandusky. 1,534,081; Apr. 21.
Ball-rolling machine. F. E. Marcy. 1,534,726; Apr. 21.
Barber chair, Hydroelectric. W. F. Koken. 1,534,790; Apr. 21.
Barber's chair. W. F. Koken. 1,534,270; Apr. 21.
Barber's chair, Electrically-operated. W. F. Koken. 1,534,271; Apr. 21.
Barge conveyer. B. W. King. 1,534,593; Apr. 21.
Barograph. G. de Bothezat and I. Eremeeff. 1,534,306; Apr. 21.
Bathtub mat. J. T. Holt. 1,534,214; Apr. 21.
Bathtub mold. A. Hansen. 1,534,779; Apr. 21.
Batteries, Charging secondary. E. L. Burne. 1,534,026; Apr. 21.
Battery cell. R. S. Owens. 1,534,656; Apr. 21.
Bearing, Pivotal. A. T. Brown. 1,534,501; Apr. 21.
Bearing, Renewable. C. E. Judd. 1,534,963; Apr. 21.
Bed, Folding. J. A. Kelly. 1,534,895; Apr. 21.
Bed-supporting means, Foldable. G. F. Cane. 1,534,296; Apr. 21.
Belt, Endless. W. Howarth. 1,534,120; Apr. 21.
Belt strap, Safety. E. C. Williams. 1,534,197; Apr. 21.
Bench arbor press. E. F. Wilkinson. 1,534,436; Apr. 21.
Bending; machine. F. W. Baumann. 1,534,890 Apr. 21.
Benzol recovery, Treating waste of. F. W. Wagner. 1,534,554; Apr. 21.
Billiard table. E. F. Hoskin. 1,534,711–12; Apr. 21.
Bin: *See*—
Storage bin.
Binder, Flexible-post. L. M. Parker. 1,534,283; Apr. 21.
Binder, Loose-leaf. G. Primbs, sr. 1,534,735; Apr. 21.
Binding machine, Metal-. M. A. Wachs. 1,535,068; Apr. 21.
Bituminous substances, Treatment of. A. C. Holmqfel. 1,534,389; Apr. 21.
Blanching machine. E. J. Rebechini. 1,534,188; Apr. 21.
Block: *See*—

Dyeing acetyl cellulose or fabrics containing the same and new products for use therein. J. Baddiley, A. Shepherdson, H. Swann, J. Hill, and L. G. Lawrie. 1,534,019; Apr. 21.
Dyeing and bleaching machine. W. S. Gates. 1,534,106; Apr. 21.
Dyestuff. G. de Montmollin and G. Bonbôte. 1,534,506; Apr. 21.
Dyestuffs and making same, Indophenol sulphur. A. Goeschke. 1,534,518; Apr. 21.
Educational appliance. W. Stolof. 1,535,056; Apr. 21.
Electric apparatus, Oil container for. E. Hauser. 1,534,448; Apr. 21.
Electric-current distribution, System of. C. A. Turner. 1,534,335; Apr. 21.
Electric furnace. O. Ceradi. 1,534,162; Apr. 21.
Electric heater. S. M. and J. H. Cargean. 1,534,682; Apr. 21.
Electric heater. J. Conning. 1,534,571; Apr. 21.
Electric heater. W. A. Goodman. 1,534,778; Apr. 21.
Electric heater. M. E. Péres. 1,534,733; Apr. 21.
Electric light. C. G. Smith. 1,534,251; Apr. 21.
Electric motor. G. F. Packard. 1,534,282; Apr. 21.
Electric outlet fixture. W. B. Goddard. 1,534,640; Apr. 21.
Electric relay. F. B. L. Hain. 1,534,945; Apr. 21.
Electric safety switch. B. E. Getchell. 1,534,517; Apr. 21.
Electric-socket structure. M. Hershkovitz. 1,534,706; Apr. 21.
Electric switch. G. J. Zeis. 1,535,011; Apr. 21.
Electric-switch construction. B. E. Getchell. 1,534,515; Apr. 21.
Electric switch or circuit breaker. E. A. Watson. 1,534,753; Apr. 21.
Electrical-apparatus casing. M. O. Troy. 1,534,749; Apr. 21.
Electrical coil apparatus. L. L. Israel. 1,534,959; Apr. 21.
Electrical conductors or networks, Adjusting balance between. H. W. Hitchcock. 1,534,118; Apr. 21.
Electrical gauge. R. C. Browne. 1,534,909; Apr. 21.
Electrical junction box. F. Donchet. 1,534,696; Apr. 21.
Electrical oscillations by means of thermionic valves, Production of. N. Lea. 1,534,970; Apr. 21.
Electrode-clamping device for electric welding machines. J. W. Meadowcroft. 1,534,457; Apr. 21.
Electrode-joint compound. B. G. Klugh. 1,534,269; Apr. 21.
Electron-discharge device. E. F. W. Alexanderson. 1,535,082; Apr. 21.
Electrolytic cell and lining the same. W. Hoopes, J. D. Edwards, and B. T. Horsfield. 1,534,322; Apr. 21.
Electrolytic operations, Conducting. F. A. Holt. 1,534,709; Apr. 21.
Electrolytic production of aluminum. F. C. Frary. 1,534,031; Apr. 21.
Electrolytic refining, Lining cells for. W. Hoopes. 1,534,321; Apr. 21.
Electrolytic refining or separating process, Cell for. W. Hoopes. 1,534,320; Apr. 21.
Elevator: *See*—
Pump-rod elevator.
Elevator doors, Operating mechanism for. T. E. Griffith and L. L. Dodds. 1,534,210; Apr. 21.
Elevator safety appliance. D. A. MacAskill. 1,534,291; Apr. 21.
Elevator shafts, Adjustable end thrust for. H. H. Bostick. 1,534,762; Apr. 21.
Enameling furnaces, Charging fork for. F. M. Koch. 1,534,649; Apr. 21.
Energy, Eliminating disturbing. R. A. Fessenden. 1,534,205; Apr. 21.
Energy translation, Electric. J. C. Schelleng. 1,534,287; Apr. 21.
Engine: *See*—
Internal-combustion engine. Steam engine.
Rotary engine. Wind-power engine.

Engine-cooling means and weather protection for use in connection with motor road vehicles. H. E. L. Owen. 1,534,067; Apr. 21.
Engine-cylinder repair method and apparatus. G. P. Setter. 1,534,815; Apr. 21.
Engines, Air and vapor supplying and cleaning device for. G. W. Henkel and A. B. Updike. 1,534,385; Apr. 21.
Engines, Air moistener for internal-combustion. J. A. Wise and B. J. Tarbutton. 1,534,200; Apr. 21.
Engines, Air-moistening device for. E. H. Hannemann. 1,534,381; Apr. 21.
Engines, Fuel for internal-combustion. J. F. P. de la Riboisiere. 1,534,573; Apr. 21.
Engines, Ignition system for internal-combustion. H. E. Fellows. 1,534,368; Apr. 21.
Engines, Starting handle for internal-combustion. W. Gannon. 1,534,940; Apr. 21.
Engines, Valve mechanism for internal-combustion. W. B. Earnshaw. 1,534,773; Apr. 21.
Extracting tool. R. E. Larkey. 1,534,066; Apr. 21.
Extractor: *See*—
Cotter-pin extractor. Serum extractor.
Hydro-extractor.
Fabric and producing the same, Ornamented. H. A. Van Liew. 1,534,194; Apr. 21.
Fabrics, Machine for uniting looped. G. Keyser. 1,534,452; Apr. 21.
Fan or blower. J. Slavin. 1,534,743; Apr. 21.
Fare box. W. Cox. 1,534,163; Apr. 21.
Fastener-setting machine. P. R. Glass. 1,534,107–8; Apr. 21.
Fastener-setting machine, Duplex. G. W. Jacques. 1,534,064; Apr. 21.
Fat and casein from cheese, Recovering. E. Kurek and R. E. Pospisil. 1,534,400; Apr. 21.
Faucets with stop valves, Cock for. P. R. Richards. 1,534,327; Apr. 21.
Feeder, Chicken. P. D. Foucht. 1,534,375; Apr. 21.
Feeding mechanisms, Controlling. H. K. Spencer. 1,535,060; Apr. 21.
Fiber board, Wood. J. K. Shaw. 1,534,036; Apr. 21.
Filter, Air. L. L. Dollinger. 1,534,203; Apr. 21.
Finger ring. S. Grossman. Des. 67,080–1; Apr. 21.
Finishing machine. J. P. Standish. 1,534,094; Apr. 21.
Fire apparatus. L. B. Blaw. 1,534,761; Apr. 21.
Firearm, Self-loading. S. H. Bang. 1,534,486; Apr. 21.
Fire escape, Tubular. A. H. Sturges. 1,534,533; Apr. 21.
Fish, Grapple for spearing. A. Caccagatti. 1,534,914; Apr. 21.
Fishbook. S. A. Lawrence. 1,534,969; Apr. 21.
Fishing-rod handle. W. B. Zane. 1,534,674; Apr. 21.
Fishing-rod holder. O. J. Hoagland. 1,534,642; Apr. 21.
Fishing tool. G. R. Livergood. 1,534,229; Apr. 21.
Fishing tool. T. M. Rogers and J. L. Knifen. 1,534,414; Apr. 21.
Fixture stud. G. C. Thomas, jr. 1,534,146; Apr. 21.
Flap cutting and building machine. J. B. Perrault. 1,534,988; Apr. 21.
Flask: *See*—
Wooden flask.
Flask, Wooden. G. O. Bergstrom. 1,534,568; Apr. 21.
Flexible coupling. M. B. Kraft. 1,534,399; Apr. 21.
Floor heater, Electric. A. J. Kercher and W. W. Hicks. 1,534,221; Apr. 21.
Fluid in pipes, Safety apparatus for controlling the flow of. C. L. Stokoe. 1,534,881; Apr. 21.
Fluid-pressure-controlling device. P. A. Dennett. 1,534,059; Apr. 21.
Flushing apparatus. L. Simmons. 1,534,877; Apr. 21.
Fly-paper holder. E. McGough. 1,534,930; Apr. 21.
Flytrap. A. Cvengros. 1,534,771; Apr. 21.
Fodder from fish or train oil and emulsions thereof and preparing the same. J. Schwarzkopf. 1,534,741; Apr. 21.
Folding table. G. D. Smith. 1,534,470; Apr. 21.
Food container, Portable. W. H. and H. W. Sellew. 1,534,087; Apr. 21.
Forceps, Obstetrical. G. Smith. 1,534,419; Apr. 21.
Fourdrinier machines, Suction box and cover therefor for use in. A. Lewis. 1,534,854; Apr. 21.
Fractured block and making the same. H. Besser. 1,534,853; Apr. 21.
Fruit and removing a circumferential slice therefrom, Method of and apparatus for bisecting. A. L. Duncan. 1,534,507; Apr. 21.
Fruit cutter and juice extractor. C. J. Ulrich. 1,534,997; Apr. 21.
Fruit-drying apparatus. W. H. Solle. 1,534,092; Apr. 21.
Fruit picker. J. S. Andrews. 1,534,756; Apr. 21.
Fruits, Manufacture of preserved. P. Barrielle. 1,534,050; Apr. 21.
Fuel injector, Electrically-operated. A. R. Behnke. 1,534,829; Apr. 21.
Fume control. V. K. Boynton. 1,534,024; Apr. 21.
Furnace: *See*—
Electric furnace. Smelting furnace.
Hearth furnace.
Furnace lining, Refractory. D. H. Meloche. 1,534,237; Apr. 21.
Furnace roof, Open-hearth. E. P. Stevens. 1,534,472; Apr. 21.
Furnace structure. L. D. Slade. 1,534,548; Apr. 21.
Furnace tapping apparatus, Blast-. E. E. Broslus. 1,534,838; Apr. 21.
Furnaces, Arch for boiler. C. N. Morgan and A. L. Keeler. 1,534,281; Apr. 21.
Furnaces, Charging device for blast. J. K. Clutts. 1,534,028; Apr. 21.
Furnaces, Process and apparatus for. A. Reinshagen. 1,534,993; Apr. 21.
Furniture, Convertible club. C. Schari. 1,535,044; Apr. 21.
Furniture legs, Glider for. E. B. Carter. 1,534,440; Apr. 21.
Furniture, School. R. L. Avery. 1,534,630; Apr. 21.
Furniture, Store. H. P. Howard. 1,534,644; Apr. 21.
Gaff hook. E. T. Holtz. 1,534,964; Apr. 21.
Game. E. L. Horton. 1,534,390; Apr. 21.
Game. J. McLennan and E. J. Pease. 1,534,599; Apr. 21.
Game apparatus. L. B. Halliday. 1,534,522; Apr. 21.
Game apparatus. A. Hodges. 1,534,591; Apr. 21.
Game board. J. G. Pitton. 1,534,245; Apr. 21.
Game device, Chinese tile. F. L. Ordway. 1,534,805; Apr. 21.
Garment. F. E. Frank. 1,534,174; Apr. 21.
Garment hanger. W. H. Harrison. 1,534,265; Apr. 21.
Gas heater. J. R. Keller. Des. 67,086; Apr. 21.
Gas heater. A. B. Sharp. Des. 67,102; Apr. 21.
Gas heater. A. H. Wolff. Des. 67,113; Apr. 21.
Gas regulator, Automatic. E. U. G. Ernst. 1,534,577; Apr. 21.
Gases, Discharging smelter. W. H. Howard. 1,534,324; Apr. 21.
Gases, Process of and apparatus for extracting, liquefying, and separating liquefiable constituents of. E. Schill and F. Woidich. Re16,052; Apr. 21.
Gases, Process of and apparatus for treating waste smelter. W. H. Howard. 1,534,323; Apr. 21.
Gate: *See*—
Automatic gate. Crossing gate.
Gate. E. N. Cooper. 1,534,503; Apr. 21.
Gate. S. Evers. 1,534,842; Apr. 21.
Gauge: *See*—
Electrical gauge. Saw gauge.
Internal gauge. Strain gauge.
Gem setting. J. F. Donahue. 1,534,442; Apr. 21.
Gear. L. Judelson. 1,534,789; Apr. 21.
Gear-shifting mechanism. E. H. Schwars. 1,534,740; Apr. 21.
Gear teeth, Machine for rounding. T. W. Lee. 1,534,971; Apr. 21.
Gear unit, Concentric. F. J. Bostock and S. Bramley-Moore. 1,534,679; Apr. 21.
Generator: *See*—
Steam generator.
Glass, Apparatus for laying plate. F. E. Troutman and C. H. Christie. 1,534,064; Apr. 21.
Glass, Apparatus for making plate. F. E. Troutman and C. H. Christie. 1,535,062; Apr. 21.
Glass cylinders, Apparatus for drawing. W. Westbury. 1,534,432; Apr. 21.
Glass dish or similar article of manufacture. C. W. Oldham. Des. 67,095; Apr. 21.
Glass, Drawing and flattening sheet. C. W. Belden and I. B. Busard. 1,534,567; Apr. 21.
Glass-forming machine. T. Stenhouse and L. D. Boubier. 1,534,036; Apr. 21.
Glass, Laying plate. F. E. Troutman and C. H. Christie. 1,535,063; Apr. 21.
Glass, Making plate. F. E. Troutman and C. H. Christie. 1,535,061; Apr. 21.
Glass molds, Clamp for. T. Stenhouse. 1,534,878; Apr. 21.
Glass, Producing finished surfaces upon. H. J. Stead. 1,534,671; Apr. 21.
Glass tubes, more particularly tubes with rarefied gas, intended for lighting or luminous advertising, Shaping. G. Claude and J. M. E. de Beaufort. 1,534,685; Apr. 21.
Glassware, Apparatus for annealing. G. G. Oliver and T. Stenhouse. 1,534,863; Apr. 21.
Glassware, Apparatus for tempering. G. G. Oliver and T. Stenhouse. 1,534,864; Apr. 21.
Glazing cast iron. W. E. Hoke. 1,534,708; Apr. 21.
Glove. A. A. Steinberger. 1,534,616; Apr. 21.
Glove, Boxing. W. Bridge. 1,534,906; Apr. 21.
Glove, Fountain. D. E. Gibson. 1,534,208; Apr. 21.
Glycol esters, Production of. P. B. Watson. 1,534,762; Apr. 21.
Golf ball. A. Speedy. 1,535,053; Apr. 21.
Golf ball and making the same. J. R. Gammeter. 1,534,104; Apr. 21.
Golf club. G. W. Mattern. 1,534,600; Apr. 21.
Governor for tractors, Speed. S. R. Derby. 1,534,691; Apr. 21.
Grader. L. B. Sammis and F. R. Hood. 1,534,663; Apr. 21.
Grain, Apparatus for cutting and stacking. D. M. Graham. 1,534,112; Apr. 21.

Knitting machines, Mechanism for producing openwork on. W. L. Houseman. 1,534,785; Apr. 21.
Knitting machines, Needle-operating mechanism for. A. Leviton and W. Kaplan. 1,534,972; Apr. 21.
Label-pasting machine, Automatic. G. D. Bishop and C. P. Hartman. 1,534,355; Apr. 21.
Lace. C. W. Birkin and E. T. Sands. Des. 67,065–8; Apr. 21.
Laces and the like, Fastener for shoe. A. L. Cochrane. 1,534,029; Apr. 21.
Lamp and sound-reproducing device, Combined. W. Ernt and A. E. Lange, jr. Des. 67,077; Apr. 21.
Lamp for mines, Incandescent safety. L. E. F. Ferrette. 1,534,370; Apr. 21.
Lamp-shade-joint construction. A. Scherer. 1,534,466; Apr. 21.
Lamp, Vehicle. A. Reeves. 1,534,991; Apr. 21.
Lamps, Air pump for safety. L. E. F. Ferrette. 1,534,369; Apr. 21.
Lamps, etc., Base for. M. J. Murphy. Des. 67,094; Apr. 21.
Latch for refrigerator doors. A. N. Hornung. 1,534,216; Apr. 21.
Latching means, Door-. V. R. Willoughby. 1,534,047; Apr. 21.
Lawn sprinkler. J. W. McGee. 1,534,979; Apr. 21.
License plate holder. C. T. and A. C. Bowen. 1,534,905; Apr. 21.
Life preserver. H. C. Tyner. 1,534,552; Apr. 21.
Lifeboat davit. S. E. Allbin. 1,534,049; Apr. 21.
Lifting jack. A. Reeves. 1,534,992; Apr. 21.
Light: *See*—
Electric light.
Lighting fixture. W. B. Goddard. 1,534,641; Apr. 21.
Lighting fixture. J. K. Riddle. 1,534,662; Apr. 21.
Lighting-fixture backplate. A. R. Krause. Des. 67,090–2; Apr. 21.
Lighting-fixture body. M. Klein. Des. 67,088; Apr. 21.
Lighting-fixture bracket. P. Siptrott. Des. 67,103; Apr. 21.
Lighting-fixture bracket. M. Stern. Des. 67,100; Apr. 21.
Lighting-fixture bracket back. L. R. Wellman. Des. 67,110; Apr. 21.
Lighting-fixture bracket or similar article. I. Rosenblatt. Des. 67,098; Apr. 21.
Lighting-fixture candle cup. J. De Leo. Des. 67,074; Apr. 21.
Lighting-fixture part. P. Siptrott. Des. 67,104; Apr. 21.
Line-justification-indicating mechanism. S. Harder. 1,534,523; Apr. 21.
Link, Connecting. A. A. Tirrill. 1,535,060; Apr. 21.
Liquid and air separator. H. D. Binks. 1,534,833; Apr. 21.
Liquid-dispensing apparatus. A. P. Fleckenstein. Des. 67,078; Apr. 21.

Liquid-fuel burner. L. Campbell, jr. 1,534,295; Apr. 21.
Liquid measuring and filling machine. C. B. Steere. 1,534,085; Apr. 21.
Liquid-measuring device. J. D. Mercer. 1,534,238; Apr. 21.
Liquids, Centrifugal cleaner for circulating. W. W. Stryker. 1,534,191; Apr. 21.
Liquids from solid bodies mixed or suspended therein, Apparatus for separating. R. E. Wagner and J. D. Ullgren. 1,534,620; Apr. 21.
Lock: *See*—
Doorlock. Valve lock.
Lock for tongs. B. Q. Jones. 1,534,218; Apr. 21.
Lock, Interchangeable combination key. E. M. Benham. 1,534,495; Apr. 21.
Locomotive boiler. C. G. Hawley. 1,534,590; Apr. 21.
Locomotive saddle structure. H. W. Snyder and A. J. Townsend. 1,534,423; Apr. 21.
Locomotive water cooler. C. Kohler. 1,534,453; Apr. 21.
Loom attachment. M. A. Goldman. 1,534,033; Apr. 21.
Loom shuttle. G. A. Litchfield. 1,535,076; Apr. 21.
Loom take-up mechanism. W. S. Wells. 1,534,345; Apr. 21.
Looms, Harness stop and signal device for. S. Magnano. 1,534,127; Apr. 21.
Looms, Shuttle-checking mechanism for. J. A. B. Lomax, W. and J. Turner, and J. B. Bentley. 1,534,792; Apr. 21.
Loop drier. A. O. Hurxthal. 1,534,853; Apr. 21.
Loud speaker. A. A. Kent. 1,534,267; Apr. 21.
Lubricating apparatus, High-pressure. V. C. Fogelberg. 1,534,173; Apr. 21.
Luminous device. H. Foley. 1,534,937; Apr. 21.
Magnesium and alloys thereof, Flux for. J. A. Gann. 1,534,105; Apr. 21.
Mail box. C. N. Cox. 1,534,920; Apr. 21.
Mandrel, Expansible. W. W. Roney. 1,534,868; Apr. 21.
Manifolding book. W. J. Wiswall. 1,534,478; Apr. 21.
Map holder, Automobile. E. K. Bahsler. 1,534,151; Apr. 21.
Massage device. J. O. Linden. 1,534,974; Apr. 21.
Massage instrument. A. Feldheym. 1,534,444; Apr. 21.
Mat: *See*—
Bathtub mat.
Materials, Separating loosely-mixed. T. Fraser and H. F. Yancey. 1,534,846; Apr. 21.
Measuring liquids, Apparatus for. W. L. Marden. 1,534,128; Apr. 21.
Merchandise into vehicles, Apparatus for loading. J. McLeod. 1,534,797; Apr. 21.
Mercury derivative of dibrom-fluorescein. E. C. White. 1,535,003; Apr. 21.
Merry-go-round, Wheeled. G. R. Beebe. 1,534,894; Apr. 21.
Metal, Bending. L. I. Heintz. 1,534,314; Apr. 21.
Metal for foundry castings, Using direct blast-furnace. D. F. Baker. 1,534,561; Apr. 21.
Metals, Coating and alloying. J. J. Dugan. 1,534,928; Apr. 21.
Metals for painting, Preparing. J. H. Gravell. 1,534,446; Apr. 21.
Metallurgical process. F. M. Dorsey. 1,535,019; Apr. 21.
Micrometer tuning dial. J. P. Burke. 1,534,356; Apr. 21.
Milking-machine pulsator. J. A. Schmitt. 1,534,612; Apr. 21.
Milking machinery, Milk-sample-obtaining means for use in vacuum. J. W. Fuge. 1,534,039; Apr. 21.
Milking vessel. L. A. Zohe. 1,534,628; Apr. 21.
Mill: *See*—
Nut mill.
Mine doors, switches, or the like, Apparatus for operating. E. H. Grim. 1,534,702; Apr. 21.
Mineral-separating machine. O. W. Alston. 1,534,481; Apr. 21.
Mining machine. E. O'Toole. 1,534,461–3; Apr. 21.
Miter machine. E. D. Hurley. 1,534,957; Apr. 21.
Mixer: *See*—
Water mixer.
Mo'd: *See*—
Bathtub mold.
Mold. W. H. Nichols. 1,534,655; Apr. 21.
Mold box. E. and J. H. Besser. 1,534,354; Apr. 21.
Mold support. L. W. Claybourn. 1,534,918; Apr. 21.
Molds, Plugging auxiliary gates of. E. F. Begtrup. 1,534,022; Apr. 21.
Molding machine. E. O. Beardsley and W. F. Piper. 1,534,566; Apr. 21.
Molding machine. P. P. Fraser. 1,535,020; Apr. 21.
Molding machine. J. A. Sperry. 1,534,615; Apr. 21.
Molding machine, Impact. E. A. Rich, jr. 1,534,800; Apr. 21.
Molding machine, Portable. E. O. Beardsley. 1,534,565; Apr. 21.
Motion mechanism, Dwell-. W. S. Wells. 1,534,344; Apr. 21.
Motion-control system. H. H. Vernon. 1,534,750; Apr. 21.
Motor: *See*—
Electric motor. Wave motor.
Internal-combustion motor.
Mulch. D. Finley. 1,534,571–2; Apr. 21.

Musical instruments, Machine for forming sockets on. E. J. Gulick and M. V. Hawkins. 1,534,520; Apr. 21.
Nail puller, Claw-hammer. C. N. Loven. 1,534,277; Apr. 21.
Nailing block. L. Simmons. 1,534,876; Apr. 21.
Necktie. R. A. Acchione. 1,534,847–8; Apr. 21.
Needle. J. B. Doble. 1,534,926; Apr. 21.
Needle-operating mechanism. A. Leviton and W. Kaplan. 1,534,973; Apr. 21.
Neutralizing foreign interference. H. Nyquist. 1,534,078; Apr. 21.
Nut locks, Washer for. W. H. Tice. 1,534,427; Apr. 21.
Nut mill. R. A. Greene. Re16,046; Apr. 21.
Objects with desired outline and surface, Producing. I. J. E. Agren and G. Rosenqvist. 1,534,479; Apr. 21.
Oil burner. N. F. Pratt. 1,535,078; Apr. 21.
Oil-dispensing device. H. B. Timms. 1,534,883; Apr. 21.
Oil, Emulsifying milk. C. E. North. 1,534,539; Apr. 21.
Oil switch. J. D. Hilliard. 1,534,707; Apr. 21.
Oils, Processing hydrocarbon lubricating. H. G. Fowler. 1,534,876; Apr. 21.
Oils, Treating hydrocarbon. C. P. Dubbs. 1,534,927; Apr. 21.
1-aryl-5-pyrazolones and making same. H. Fritzsche and E. Reber. 1,534,512; Apr. 21.
Ore-reducing process. E. Knauer. 1,534,648; Apr. 21.
Ores, and particularly of iron ores, Direct reduction of. L. P. Basset. 1,534,051; Apr. 21.
Oscillation detector. R. Brownlie. 1,534,769; Apr. 21.
Oven. G. P. Simpson. 1,534,190; Apr. 21.
Oven, Baker's. E. B. Crawford. 1,534,841; Apr. 21.
Oven for cooking stoves. J. Murach. 1,534,072; Apr. 21.
Oven, saucepan, and the like. M. Tocchio. 1,534,748; Apr. 21.
Ovens, Electrically-heated traveling. R. G. Tugendhat. 1,534,042; Apr. 21.
Packer head, Control. C. M. and J. W. Heeter. 1,534,851; Apr. 21.
Packing ring and piston. J. T. Wilson. 1,534,198; Apr. 21.
Pad holder. J. B. Kemp. 1,534,124; Apr. 21.
Paint and varnish scraper, Electric. C. J. Hohman. 1,534,953; Apr. 21.
Paint, Cement. S. B. Newberry. 1,534,240; Apr. 21.
Paints, enamels, inks, and other viscous materials, Mill for grinding. S. Smith. 1,535,052; Apr. 21.
Paper-box caps, Method of and apparatus for making. F. Gansert and H. Gansert, jr. 1,534,698; Apr. 21.
Paper-box-making machine. C. Butterfield. 1,534,569; Apr. 21.
Paper container. A. Moore. 1,534,803; Apr. 21.
Paper, Crêping. E. H. Angier. 1,534,482; Apr. 21.
Paper cups, Machine for manufacturing crimped. E. L. Eiwell. 1,534,100; Apr. 21.
Paper, Dry crinkling. K. Wandel. 1,534,622; Apr. 21.
Paper-drying machine. C. Nelson. 1,534,460; Apr. 21.
Paper flag. W. A. Lorens. 1,534,052; Apr. 21.
Paper-folding machine. W. G. Trautman. 1,534,884–5; Apr. 21.
Paper-hanger's seam roller. W. R. Yant. 1,534,559; Apr. 21.
Paper machines, Flow box for. A. N. Russell. 1,534,080; Apr. 21.
Paper-making machine, Fourdrinier type of. J. E. McLaughlin and J. O. Hamel. 1,534,948; Apr. 21.
Path device, Multiple. G. H. Huss. 1,534,958; Apr. 21.
Pattern plates, Making matched. J. R. Wood. 1,534,625; Apr. 21.
Paying machines, Coin-counting device for money-. A. E. Sorum and E. T. Brockman. 1,534,551; Apr. 21.
Pedestal for stands. R. L. Betterley. 1,534,759; Apr. 21.
Pencil clip. H. J. McMaster. 1,534,653; Apr. 21.
Pendant. L. S. Chilson. 1,534,684; Apr. 21.
Perfumer, Electric. L. Weidlich. 1,534,624; Apr. 21.
Phonograph attachment. D. McIntyre. 1,534,068; Apr. 21.
Piano-keyboard card system. A. Y. Smith. 1,534,669; Apr. 21.
Pianos and the like, Metal sound board for. F. Frankel. 1,534,809; Apr. 21.
Picker: *See*—
Fruit picker.
Pickling machine. H. W. Krans and F. R. Klaus. 1,535,024; Apr. 21.
Pickling-tank construction. R. C. Hopkins. 1,534,643; Apr. 21.
Picot-cutting attachment, Automatic. F. K. Martinek. 1,535,025; Apr. 21.
Picture machines, Crank connection for motion. A. F. Victor. 1,534,044; Apr. 21.
Picture projector, Moving-. H. B. Hussey. 1,534,326; Apr. 21.
Pigment and making same. S. J. Beebe. 1,534,078; Apr. 21.
Pin: *See*—
Bolting-up pin.
Pipe: *See*—
Tobacco pipe.
Pipe connection, Air-brake-. H. A. Veal. 1,534,147; Apr. 21.
Pipe-engaging slip. G. R. Livergood. 1,534,227; Apr. 21.
Pipe joint. A. H. Stowell. 1,534,425; Apr. 21.

Pine, Multiple-jaw slip for engaging. G. R. Livergood. 1,534,228; Apr. 21.
Pipe reamer. D. H. Browder. 1,534,906; Apr. 21.
Pipe section, Sheet-metal. L. E. Pritchard. 1,534,990; Apr. 21.
Pipes, Sterilising attachment for water-supply. W. S. Bachman. 1,534,256; Apr. 21.
Piston, Pump. F. J. Lemieux. 1,534,225; Apr. 21.
Piston, Pump. E. Timmons. 1,534,747; Apr. 21.
Piston ring. L. D. Bax. 1,534,153; Apr. 21.
Piston ring. W. R. Heslewood. 1,534,386; Apr. 21.
Piston ring. E. O. Weatherwax. 1,535,069; Apr. 21.
Piston structure. O. E. Briney. 1,534,765; Apr. 21.
Pistons and the like, Sealing means for. O. E. Briney. 1,534,766; Apr. 21.
Planer, Subgrade. G. E. Webb. 1,534,046; Apr. 21.
Plant deflector. W., E., E., and D. Stoebner. 1,534,880; Apr. 21.
Plants, Process of and composition of matter for killing. E. Teppet. 1,534,289; Apr. 21.
Plaster-block machines, Feeding mechanism for. G. H. A. Ruby. 1,534,610; Apr. 21.
Platform, Traveling riveting. J. H. Ames. 1,534,018; Apr. 21.
Plow gauge wheel. G. Denbigh and R. Walker. 1,534,058; Apr. 21.
Plows, Cutter attachment for. W. G. Wood. 1,534,098; Apr. 21.
Plumb bob. J. A. Kiesler. 1,534,397; Apr. 21.
Polishing device. J. D. Dempsey. 1,534,259; Apr. 21.
Porcelain legs, Apparatus for making. A. Hansen. 1,534,780; Apr. 21.
Portable rack. T. S. Crampton. 1,534,504; Apr. 21.
Pot: *See*—
  Wax pot.
Pottery work, Mold for. W. B. Butler. 1,534,155; Apr. 21.
Powder, rouge, or the like, Container for face. W. H. Roystone. 1,534,870; Apr. 21.
Power-transmission system, Electrical-. A. M. Taylor. 1,535,057; Apr. 21.
Press: *See*—
  Bench arbor press. Sole-molding press.
Presser board. J. M. Fraser. 1,534,510; Apr. 21.
Presser-roller construction. A. Vanderveld. 1,534,326; Apr. 21.
Printing apparatus suitable for printing telegraphic messages. F. G. Creed. 1,534,164; Apr. 21.
Printing, Color. J. O. Ball. 1,534,292; Apr. 21.
Protective system. A. S. Fitzgerald. 1,534,897; Apr. 21.
Puller: *See*—
  Bottle-cap puller. Spike puller.
  Nail puller. Wheel puller.
Pulley, Clothesline. W. Maluss. 1,534,800; Apr. 21.
Pulley, Friction clutch. V. E. McMullen and W. E. Woodruff. 1,534,983; Apr. 21.
Pulp treatment. W. A. Stedman. 1,534,145; Apr. 21.
Pump-rod elevator. R. M. Shearer. 1,534,089; Apr. 21.
Pump, Tape-controlled measuring. J. Albrecht. 1,534,349; Apr. 21.
Rack: *See*—
  Portable rack.
Radiant energy, Receiving system for. J. H. Hammond, jr. 1,534,704; Apr. 21.
Radiator and bathtub sling. J. M. Sims. 1,534,614; Apr. 21.
Radiator caps, Lock for. J. L. Oberdorfer. 1,534,607; Apr. 21.
Radiator cover. C. M. Poetsch. Des. 67,097; Apr. 21.
Radiator filling and cooling cap. E. Tomlinson. 1,534,428; Apr. 21.
Radiator, Nonfreezing. G. E. Walter. 1,534,195; Apr. 21.
Radiochart. J. P. Coughlin. 1,534,055; Apr. 21.
Radio receiving system. E. W. Kellogg. 1,534,719; Apr. 21.
Radio receiving system. E. W. Kellogg and C. W. Rice. 1,534,720; Apr. 21.
Radius rod. H. M. Westholz. 1,535,002; Apr. 21.
Rail anchor. H. G. Warr. 1,534,623; Apr. 21.
Railway frog. P. Hoffman. 1,534,178; Apr. 21.

Shearing device. H. C. Watson. 1,534,990; Apr. 21.
Sheathing board. M. H. Frederiksen. 1,534,511; Apr. 21.
Sheet material, Machine for feeding. J. P. Rens. 1,534,464; Apr. 21.
Ship propulsion. C. Macmillan. 1,534,725; Apr. 21.
Shock absorber. W. W. Cashel, sr. 1,534,502; Apr. 21.
Shock absorber for vehicles. H. W. Stark and T. D. Reese. 1,534,424; Apr. 21.
Shoe bottoms, Machine for operating on. E. Erickson. 1,534,061; Apr. 21.
Shoe cleaner. W. G. Callender. 1,534,156; Apr. 21.
Shoe-cleaning-stick container, applicator, and distributor. A. L. Aste. 1,534,827; Apr. 21.
Shoe for use in counter construction, Waterproof. J. K. Demeter. 1,534,925; Apr. 21.
Shoe heater. W. H. Baynard. 1,534,021; Apr. 21.
Shoe linings, Machine for smoothing. A. F. Pym. 1,534,077; Apr. 21.
Shoe tread. L. B. Conant. 1,534,919; Apr. 21.
Shoe with removable sole and heel. J. Pezzaniti. 1,534,540; Apr. 21.
Show cards, advertisements, signs, decorations, or the like by stenciling, Production of. H. H. and G. M. Scott. Re16,048; Apr. 21.
Shrapnel plug. M. E. Dunlap. 1,534,204; Apr. 21.
Sign, Wind. H. Correll. 1,534,634–5; Apr. 21.
Signal: *See*—
  Automobile signal. Traffic signal.
  Driving signal. Vehicle signal.
Silica bricks, Manufacture of. J. Wilson. 1,534,199; Apr. 21.
Sintering machines, Pallet for. J. Knox. 1,534,398; Apr. 21.
Sirup and preparing the same, Palatable beet. H. W. Dahlberg. 1,534,166; Apr. 21.
Skate, Roller. M. N. Matveyeff. 1,534,601; Apr. 21.
Smelting furnace, Vertical-retort. F. Flechtl and W. Kappellmann. 1,534,935; Apr. 21.
Smokehouse. C. Peschke and H. Killian. 1,534,867; Apr. 21.
Snap. F. G. Haage. 1,534,944; Apr. 21.

Snow-clearing machine. M. Schmidt. 1,534,611; Apr. 21.
Snow guard. B. A. Hudson. 1,534,449; Apr. 21.
Snowplow attachment. H. E. Ebert. 1,534,638; Apr. 21.
Soil or seed, Apparatus for testing. O. C. Earp-Thomas. 1,534,506; Apr. 21.
Soldering machine, Can-body-. F. A. Assmann, jr., and A. L. Kronquest. 1,534,677; Apr. 21.
Sole-molding press. F. E. Beckman. 1,534,052; Apr. 21.
Sorting machines, Pin-box construction for. W. W. Lasker. 1,534,595; Apr. 21.
Sound-translating apparatus. H. Vogt, J. Engl, and J. Massolle. 1,534,148; Apr. 21.
Spark plug. G. Natoli. 1,534,986; Apr. 21.
Spark plug. D. Sprada. 1,534,744; Apr. 21. 1,534,744; Apr. 21.
Sparking plug. L. Korczynski. 1,534,065; Apr. 21.
Spike puller. J. S. Wincrants. 1,535,006; Apr. 21.
Spindle and wheel construction. V. De Bellis. 1,534,056; Apr. 21.
Spinner and fly, Combined. L. L. Leberman and H. T. Jacobs. 1,534,722; Apr. 21.
Spinning-frame stopping mechanism. R. W. Gossett. 1,534,262; Apr. 21.
Spinning machine. J. C. Potter. 1,535,036; Apr. 21.
Spinning machines, Roller mechanism for. R. A. Morse. 1,534,071; Apr. 21.
Sponge-holding apparatus. F. N. Coltrane. 1,534,300; Apr. 21.
Spring setting and tempering apparatus. P. Riedele, P. B. Cason, and K. R. Herman. 1,534,543; Apr. 21.
Spring structure and assembling same. W. H. Kinney. 1,534,268; Apr. 21.
Sprinkler: *See*—
  Lawn sprinkler.
Sprinkler. H. F. Congable. 1,534,633; Apr. 21.
Sprinkler head. J. D. Roos. 1,534,540; Apr. 21.
Square, Universal. L. Aprile. 1,534,757; Apr. 21.
Stamping and counting machine, Combined. S. J. Kustel. 1,534,530; Apr. 21.
Stand. M. H. Rubmann. 1,535,041; Apr. 21.
Stapling and folding mechanism. O. Roesen. 1,534,247; Apr. 21.
Stapling mechanism. O. Roesen. 1,534,141; Apr. 21.
Starch-cleaning machine. F. M. Schuler. 1,534,410; Apr. 21.
Statuette. M. Johnson. Des. 67,084; Apr. 21.
Steam engine. J. J. McArdle. 1,534,598; Apr. 21.
Steam engine. L. L. Scott. 1,534,143; Apr. 21.
Steam generator, Electric. A. N. Russell, B. A. Malkin, and W. P. Muir. 1,534,079; Apr. 21.
Steering gear, Hydraulic. H. Kundig. 1,534,791; Apr. 21.
Stereotype-metal pump. H. F. Bechman. 1,534,492; Apr. 21.
Stereotype-plate casting and finishing apparatus. H. F. Bechman. 1,534,491; Apr. 21.
Stereotype-plate-casting apparatus. H. F. Bechman. 1,534,493; Apr. 21.
Stock drencher. C. E. Nichols. 1,534,241; Apr. 21.
Stocking and making the same, Seamless. G. P. Bosworth. 1,534,763; Apr. 21.
Stoker, Chain-grate. G. Mourlam and M. Sutter. 1,534,186; Apr. 21.
Stone, Sling for handling. E. A. Chase. 1,534,159; Apr. 21.
Stone, Wheel for dressing. E. A. Chase. 1,534,158; Apr. 21.
Storage bin, Compost-. J. J. Rettler. 1,535,039; Apr. 21.
Stove. O. E. Bloomquist. 1,534,897; Apr. 21.
Stove, Electric table. H. A. Zioia. 1,534,823–4; Apr. 21.
Strain gauge. J. W. Owens. 1,534,865; Apr. 21.
Strap: *See*—
  Belt strap.
Strawlike materials, Industrial utilization of. E. Markóczi and S. J. Adam. 1,534,236; Apr. 21.
Stretching and drying apparatus. R. V. Lyon. 1,534,584; Apr. 21.
Stumps, Apparatus for severing. E. A. McKoy and G. D. Moore. 1,534,856; Apr. 21.
Suitcase. A. Kahlow. 1,534,646; Apr. 21.
Sulphur pig iron from high-sulphur furnace burdens, Producing low-. S. Peacock. 1,534,244; Apr. 21.
Superheater and draft-distributing deflector, Combined steam. T. Larrey and L. Godard. 1,534,402; Apr. 21.
Sweeping machine, Street-. J. C. Lundy. 1,534,283; Apr. 21.
Switch: *See*—
  Electric switch. Safety switch.
  Electric safety switch. Telephone switch.
  Oil switch.
Switch box, Sectional. E. H. Lewis. 1,534,723; Apr. 21.
Switch handle, Rotary. G. Butske. 1,534,681; Apr. 21.
Switch-operating means, Mounting for. F. E. Case and A. T. Crocker. 1,534,683; Apr. 21.
Switching system, Automatic. G. E. McDonald 1,534,724; Apr. 21.
Swivel hook. M. G. Stewart. 1,534,879; Apr. 21.
Synthetic manufacture of cyanide. G. H. Clevenger. 1,534,054; Apr. 21.
Syringe. J. A. Hunter. 1,534,852; Apr. 21.
Table: *See*—
  Billiard table. Folding table.
  Dining table. Self-serving table.
Tanks, Bracket for flush. E. L. Delany. 1,534,924; Apr. 21.
Tanks, Key-locked cap for. M. H. Brede and O. L. Longpre. 1,534,836; Apr. 21.
Tape, cord, yarn, rope, fabric, or other material produced from fibers, Manufacture of. G. E. Andrew. 1,534,676; Apr. 21.
Teakettle. M. Smith. 1,534,670; Apr. 21.
Teapot or similar article. F. W. Stark. Des. 67,106–6; Apr. 21.
Telegraph system, Synchronous. J. V. Foll. 1,535,073; Apr. 21.
Telegraph systems, Trouble indicator for. W. A. Houghtaling. 1,535,074; Apr. 21.
Telegraphic distribution system. L. M. Potts. 1,534,660–1; Apr. 21.
Telegraphy. R. D. Parker. 1,534,074; Apr. 21.
Telephone circuit, Automatic substation. A. B. Smith. 1,534,144; Apr. 21.
Telephone receiver. R. C. Browne. 1,534,910–11; Apr. 21.
Telephone-receiver diaphragm. H. Fischer. 1,534,373; Apr. 21.
Telephone switch, Automatic. H. W. Goff. 1,534,109; Apr. 21.
Telephone systems, Switch-control circuit for automatic. A. B. Smith. 1,534,549; Apr. 21.
Telephony with or without a line, High-frequency. L. Pungs. 1,535,087; Apr. 21.
Temperatures, Method and device for the production of high. W. Oehm. 1,534,243; Apr. 21.
Template-filling machine. H. A. Weihmann. 1,534,338; Apr. 21.
Tennis-net support. H. L. Wright. 1,534,437; Apr. 21.
Tennis nets, Center strap for. S. Hardy. 1,534,447; Apr. 21.
Tension feeler. S. G. Touchstone. 1,534,040–1; Apr. 21.
Textile fabric. F. M. Kaufman. Des. 67,085; Apr. 21.
Textile fabric. F. Zimmerer. Des. 67,114; Apr. 21.
Thrashing machine, Centrifugal. H. L. Strong and T. E. Forster. 1,534,426; Apr. 21.
Tilting device, Hydraulic. H. Burkhardt and R. Wirs. 1,534,439; Apr. 21.
Timer. J. M. Lopez. 1,534,280; Apr. 21.
Timer governor. W. C. Brinton, jr. 1,534,025; Apr. 21.
Timing synchroniser. H. B. Colestock. 1,534,161; Apr. 21.
Tire boot. R. L. Peugh. 1,534,989; Apr. 21.
Tire-building tool. W. Thompson. 1,534,038; Apr. 21.
Tire chain, Automobile. D. A. Ward. 1,535,071; Apr. 21.
Tire-chain tool. A. J. Pelletier. 1,534,284; Apr. 21.
Tire, Combined cushion and pneumatic. T. A. Duan. 1,534,365; Apr. 21.
Tire, Internally-armored. F. A. Burns. 1,534,358; Apr. 21.
Tire-making appliances. F. J. Shook. 1,534,250; Apr. 21.
Tire, Rubber. E. B. Killen. 1,534,529; Apr. 21.
Tire tread, Automobile. A. H. Gruber. Des. 67,082; Apr. 21.
Tire valve, Pneumatic-. F. Myers. 1,534,862; Apr. 21.
Tires, Dust cap for valve stems of pneumatic. F. S. Hamilton. 1,534,850; Apr. 21.
Tires, Flap for clincher. J. P. Colgan. 1,534,686; Apr. 21.
Tobacco pipe. J. M. Wilson. 1,535,005; Apr. 21.
Tobacco steaming and drying apparatus. O. O. Humphrey. 1,534,713; Apr. 21.
Tombstone. M. I. De Lee. Des. 67,078; Apr. 21.
Tool, Combination. W. M. Davidson. 1,534,923; Apr. 21.
Toothache remedy. M. Bailey. 1,534,485; Apr. 21.
Toothbrush, Rotary. C. S. Patterson. 1,534,857; Apr. 21.
Top. J. A. B. Tweedt and C. A. Nelson. 1,535,065; Apr. 21.
Toy. G. F. Jontz. 1,534,787; Apr. 21.
Toy. W. W. Murch. 1,535,029; Apr. 21.
Toy, Animal. S. E. Kahnweiler. 1,534,966; Apr. 21.
Toy, Figure. R. Baker. 1,534,887–9; Apr. 21.
Toy, Figure. F. A. Fanucci. 1,534,367; Apr. 21.
Toy, Magnetic building. E. Phillipp. 1,535,035; Apr. 21.
Toy, Mechanical. J. Wilhelm and C. A. Kays. 1,534,097; Apr. 21.
Toy train track. J. L. Cowen. 1,534,303; Apr. 21.
Toy vehicle. J. R. Hughes. 1,534,956; Apr. 21.
Track frog, Four-bend wing-rail. G. D. Lund. 1,534,232; Apr. 21.
Track laying vehicles, Shoe for. I. H. Athey. 1,534,254; Apr. 21.
Track liner. F. R. Sinning. 1,534,417; Apr. 21.
Track tool. G. F. A. Ochs. 1,535,032; Apr. 21.
Tractor. W. H. Sargent. 1,534,329; Apr. 21.
Tractor vehicle. L. G. Carey. 1,534,297; Apr. 21.
Tractors, Attachment for. R. E. Curtis. 1,534,690; Apr. 21.
Traffic signal, Vehicle. P. Myers. 1,534,606; Apr. 21.
Train-pipe coupling. W. C. White. 1,535,004; Apr. 21.
Transformer circuits. E. O. Scriven. 1,534,086; Apr. 21.

Transmission, Turret-type. F. M. Blair. 1,534,890; Apr. 21.
Trap: *See*—
Animal trap. Rat trap.
Trapping and delivering condensates, Device for. H. G. Shortt. 1,534,090; Apr. 21.
Tray and support therefor. T. B. Walker. 1,534,095; Apr. 21.
Tray, Ash. G. Bursetown. Des. 67,070; Apr. 21.
Trimming machine. F. H. Warren. 1,534,096; Apr. 21.
Trimming machine, Overflow-. J. A. Brogan. 1,534,053; Apr. 21.
Tripod head. G. A. Mitchell. 1,534,407; Apr. 21.
Trolley wires, Sleet cutter for. G. S. Moore. 1,534,727; Apr. 21.
Truck. J. S. White. 1,534,346; Apr. 21.
Truck, Automobile. J. A. Gehrung. 1,534,514; Apr. 21.
Truck hoisting mechanism, Dump-. P. E. Barker. 1,534,294; Apr. 21.
Truck, Railway-. E. G. Hallquist. 1,534,114; Apr. 21.
Trucks, Stake or gate holder for. L. E. Fisher. 1,534,101; Apr. 21.
Tubular articles, Apparatus for applying pulverized or shredded material to the interior of. L. I. Yeomans. 1,534,627; Apr. 21.
Turbine blade. H. F. Schmidt. 1,534,415; Apr. 21.
Turbine, Elastic-fluid. O. Junggren. 1,534,716; Apr. 21.
Turbines to prevent breakage of blades due to vibrations, Construction of elastic-fluid. O. Lasche. 1,534,721; Apr. 21.
Typewriting machine. J. F. Allard. 1,534,480; Apr. 21.
Typewriting machine. G. O. Degener. 1,534,057; Apr. 21.

Wax pot. J. F. Standish. 1,534,093; Apr. 21.
Wear-compensating device. O. J. Dorsey. 1,534,170; Apr. 21.
Weather-excluding means. J. H. Bourgon. 1,534,498; Apr. 21.
Weft-detecting mechanism. E. H. Ryon. 1,534,249; Apr. 21.
Welding. T. E. Murray, jr. 1,534,133; Apr. 21.
Welding apparatus, Grid-resistance panel for electric. A. Smith. 1,534,288; Apr. 21.
Welding device, Electric. W. B. Collins. 1,534,688; Apr. 21.
Welding machine, Percussive. A. M. MacFarland. 1,534,069–70; Apr. 21.
Welding of side seams of container bodies, Holding fixture for electric. W. A. Smith and M. E. Widell. 1,534,422; Apr. 21.
Welding wire fabric, Apparatus for electrically. W. S. Southwick. 1,534,034; Apr. 21.
Well-flowing device. G. Kahle. 1,534,717; Apr. 21.
Well strainer. E. Jones. 1,534,960; Apr. 21.
Wheel: *See*—
Plow gauge wheel. Vehicle wheel.
Removable wheel. Wire-spoke wheel.
Wheel construction, Cushioned. J. L. Donat. 1,534,574; Apr. 21.
Wheel puller. L. L. Bassett. 1,534,350; Apr. 21.
Wheels, Traction shoe for vehicle. J. Pallischeck. 1,534,731; Apr. 21.
Wind-power engine. H. Maine. 1,534,799; Apr. 21.
Windshield holder. J. F. Janssen. 1,534,892; Apr. 21.
Windshield wiper. C. R. Locklin. 1,534,276; Feb. 21.
Winding machine. A. D. Scott. 1,534,812–13; Apr. 21.
Window adjuster, Casement-. B. E. Bartholomew. 1,534,758; Apr. 21.
Window casing, Metal. L. B. Taylor. 1,534,037; Apr. 21.
Window cleaner. T. J. Kilfeather. 1,534,966; Apr. 21.
Window-cleaner's seat. J. A. Blackwood. 1,534,895; Apr. 21.

Window for locomotive cabs. O. S. Wiberg. 1,534,434; Apr. 21.
Window guard. D. P. Furiate. 1,534,877; Apr. 21.
Window ventilator. A. A. Craig. 1,534,636; Apr. 21.
Wire-block-stripping mechanism. P. V. Tippet. 1,534,039; Apr. 21.
Wire-drawing mechanism. C. W. Vaughn. 1,534,998; Apr. 21.
Wire hanger. A. J. Gurney. 1,534,703; Apr. 21.
Wire-spoke wheel. B. Ferrabino. 1,534,934; Apr. 21.
Wireless transmission of messages, Key connection for the. O. Scheller and R. Hersog. 1,535,046; Apr. 21.
Wood steamer. W. D. Inglis. 1,534,121; Apr. 21.
Wrapping-machine feeding device. F. W. Lev. 1,534,596; Apr. 21.
Wrench sets, Holder for socket-. E. S. Miller. 1,534,537; Apr. 21.
Wringer mechanism, Safety. E. C. Rocke. 1,534,286; Apr. 21.
Writing, Device for secret. M. A. Vahjen. 1,535,066; Apr. 21.
Writing instrument. H. Anshen. 1,534,629; Apr. 21.
Yarn and machine therefor, Handling. A. L. Remington. 1,534,412; Apr. 21.
Yeast, Treating and preparing. F. M. Hildebrandt and C. N. Frey. 1,534,387; Apr. 21.
Zinc from blue powder, Making liquid. F. Tharaldsen. 1,535,059; Apr. 21.
Zinc in reverberatory furnaces, Production of. H. Mehner. 1,535,026; Apr. 21.

CLASSIFICATION OF PATENTS

APRIL 21, 1925.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 7: 1,534,141
33: 1,534,048
2— 18: 1,534,654
1,534,808
25: 1,534,774
30: 1,534,900
43: 1,534,668
45: 1,534,347
116: 1,534,174
122: 1,534,597
131: 1,534,562
1,534,563
145: 1,534,348
162: 1,534,616
175: 1,534,181
197: 1,534,421
4— 68: 1,534,924
182: 1,534,618
185: 1,534,214
5— 136: 1,534,395
163: 1,534,396
369: 1,534,268
6— 5: 1,534,019
1,534,304
1,534,412
19: 1,534,106
9— 17: 1,534,552
23: 1,534,049
11— 2: 1,534,606
12— 1: 1,534,021
3: 1,534,110
20: 1,534,113
23: 1,534,068
50: 1,534,313
51: 1,534,077
67: 1,534,061
77: 1,534,094
79.5: 1,534,098
83.3: 1,534,096
88: 1,534,076
15— 11: 1,534,233
23: 1,534,657
108: 1,534,827
112: 1,534,156
127: 1,534,208
130: 1,534,300
133: 1,534,521
138: 1,534,357
145: 1,534,401
196: 1,534,231
251: 1,534,906
16— 42: 1,534,440
1,534,576
52: 1,534,235
144: 1,534,788
149: 1,534,467
218: 1,534,767
17— 15: 1,534,207
18— 2: 1,534,030
1,534,403
25: 1,534,409
42: 1,534,779
43: 1,534,149
53: 1,534,456
54: 1,534,382
56: 1,534,777
60: 1,534,368
61: 1,534,227
19— 79: 1,534,510
99: 1,534,564
116: 1,534,783
120: 1,534,782
121: 1,534,784
140: 1,534,071
20— 0.5: 1,534,108
1.01: 1,534,732
4: 1,534,511
9: 1,535,043
27: 1,535,034
53: 1,534,434
56.4: 1,534,705
71: 1,534,377

Candy, Sweets Company of America, Inc. 206,262; Apr. 28.
Canned corn. Iroquois Canning Corporation. 208,143–6; Apr. 28.
Canned corn. Iroquois Canning Corporation. 208,149; Apr. 28.
Canned pineapple. Baldwin Packers, Ltd. 203,665; Apr. 28.
Canned sardines and wheat flour. Wolff, Kirchmann & Co. 209,759; Apr. 28.
Coffee. F. Livierato. 209,795; Apr. 28.
Farm, stock, and dairy products. C. L. Freeland. 202,699; Apr. 28.
Fresh oranges. Edison Citrus Association. 205,817; Apr. 28.
Lettuce, cauliflower, and cabbage, Fresh. Zaferis Bros. & Co. 209,450; Apr. 28.
Melons, grapes, vegetables, citrous fruits, Fresh. Farmers Produce Company. 206,891; Apr. 28.
Oil, Pure salad. N. Goodman & Son. 207,867; Apr. 28.
Teas and spices. C. W. Antrim & Sons. 210,823; Apr. 28.
Walnuts and almonds. S. Fleishman. 208,340; Apr. 28.

CLASS 48.

Malt extracts. H. Altman. 208,945; Apr. 28.

CLASS 50.

Hat holders. M. S. Wilson. 208,838; Apr. 28.
Jar caps. Adams Bros. & Co. 191,247; Apr. 28.
Mattings and mats, Floor. Bennett Day Importing Company. 208,894; Apr. 28.
Rubber supporting foot pads for cabinets, etc. Taunton Rubber Company. 210,824; Apr. 28.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 28TH DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A/S Krystal. (See Isaachsen, Isak, assignor.)
Abraham, Cleatus J., and M. A. Norris, near Richmond, Ind. Oil-burning system. 1,535,195; Apr. 28.
Acosta, John W., and A. E. Baker, Philadelphia, Pa. Coal scuttle. 1,535,755; Apr. 28.
Acree, G. G., et al. (See Thomas, Martin E., assignor.)
Adams, Arthur, Baltimore, Md. Stump puller. 1,535,557; Apr. 28.
Adams, Frank A., assignor to G. F. Merrell, Incorporated, Rochester, N. Y. Machine support. 1,535,558; Apr. 28.
Adams, Walter S., assignor to The J. G. Brill Company, Philadelphia, Pa. Articulated car. 1,535,799; Apr. 28.
Aeromarine Plane and Motor Company. (See Boland, Joseph J., assignor.)
Ainsworth Manufacturing Company. (See Potter, Albert T., assignor.)
Aldeborgh, Erik H., assignor to C. E. Johansson, Inc., Poughkeepsie, N. Y. Gauge. 1,535,641; Apr. 28.
Alsatian Machine Works, Limited. (See Tunstall, Harry, assignor.)
Altgelt, Herman E. (See Altgelt, Rudolph J. and H. E.)
Altgelt, Herman E. (See Altgelt, R. J. and H. E., and Cunningham.)
Altgelt, Rudolph J. and H. E., assignors to Oliver Chilled Plow Works, South Bend, Ind. Wheeled cultivator. 1,535,887; Apr. 28.
Altgelt, Rudolph J. and H. E., assignors to Oliver Chilled Plow Works, South Bend, Ind. Wheeled cultivator. 1,535,888; Apr. 28.
Altgelt, Rudolph J. and H. E., and C. F. Cunningham, assignors to Oliver Chilled Plow Works, South Bend, Ind. Wheeled cultivator. 1,535,889; Apr. 28.
Aluminum Company of America. (See Frary, Francis C., assignor.)
Amborn, Elmer, Bangor, Wis. Poultry feeder. 1,535,890; Apr. 28.
American Aluminum Ware Co. (See Boyles, Ralph E., assignor.)
American Dressler Tunnel Kilns, Inc. (See Meehan, Paul A., assignor.)
American Fabrics Company, The. (See Hodgkins, Albert A., assignor.)
American Foundry Equipment Company, The. (See Moore, Raymond H., assignor.)
American Foundry Equipment Company, The. (See Rich, Elmer A., jr., assignor.)
American Radiator Company. (See Redpath, R. L., and Bliss, assignors.)
American Ring Company. (See Swick, Charles P., assignor.)
American Safety Device Company. (See Johnston, Frank B., assignor.)
American Smelting and Refining Company. (See Stannard, B. C., and Haffey, assignors.)
American Steel Foundries. (See Ernst, Fritz E., assignor.)
American Steel Foundries. (See Hedgcock, William C., assignor.)
American Steel Foundries. (See Jones, Ap Trevor, assignor.)
American Telephone and Telegraph Company. (See Cory, Samuel I., assignor.)
American Telephone and Telegraph Company. (See Percival, Harry S., assignor.)
American Telephone and Telegraph Company. (See Toomey, John F., assignor.)
Amies, Joseph H., Philadelphia, Pa. Preparing a cementitious composition. 1,535,445; Apr. 28.
Anderson, Charles, Astoria, N. Y. Splash-preventing attachment for motor vehicles. 1,535,444; Apr. 28.
Anderson, John E., Moline, Ill. Exerciser. 1,535,391; Apr. 28.
Anderson, Martin E., Denver, Colo. Air cleaner. 1,535,800; Apr. 28.
Anderson, Philip C., Rapid City, S. Dak. Scraper. 1,535,283; Apr. 28.
Andreini, Corrado, Grosseto, Italy. Windmill. 1,535,517; Apr. 28.
Andrews, Charles W. (See Brassert, H. A., and Andrews.)
Angle, Glenn D., Detroit, Mich. Manifold arrangement for multiple-cylinder engines. 1,535,084; Apr. 28.
Anker-Werke Aktiengesellschaft. (See Henning, Albert, assignor.)

Aptowicz, Leon, Yonkers, N. Y. Hoople toy. 1,535,144; Apr. 28.
Arbon, Paul, Tulsa, Okla. Drilling jar. 1,535,083; Apr. 28.
Archer, Thomas P. (See Edgar, F. M., and Archer.)
Armknecht, John G., Detroit, Mich. Fuel-reserve tank. 1,535,642; Apr. 28.
Armstrong-Blum Manufacturing Company, The. (See Blum, George J., assignor.)
Armstrong, William E. (See Koehnline, I. J., and Armstrong.)
Arndt, Franklin B., assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio. Direct-draft mechanism for road graders. 1,535,891; Apr. 28.
Ash, Charles S., Hagerstown, Md. Wheel rim. 1,535,196; Apr. 28.
Asher, Blaine, Spencer, Iowa. Oil strainer. 1,535,801; Apr. 28.
Ashton, William S., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Protecting device for mixing mills and the like. 1,535,392; Apr. 28.
Astrom, John, assignor to Fort Wayne Engineering & Manufacturing Co., Fort Wayne, Ind. Pump. 1,535,643; Apr. 28.
Astrom, John, Fort Wayne, Ind. Pump valve. 1,535,644; Apr. 28.
Atkins, Charles H., Palmer, Mass. Flushometer. 1,535,562; Apr. 28.
Atwood, Eugene, assignor to Atwood Machine Company, Stonington, Conn. Spinning and twisting spindle. 1,535,645; Apr. 28.
Atwood, James T., Rockford, Ill. Door buffer. 1,535,446; Apr. 28.
Atwood Machine Company. (See Atwood, Eugene, assignor.)
Augur-Perry Company, The. (See Perry, William E., assignor.)
Austin, Albert L., Cleveland, Ohio. Rectal dilator and irrigator. 1,535,756; Apr. 28.
Austin, Frederick H., Greeneville, Tenn. Ice-cutting machine. 1,535,892; Apr. 28.
Auto Turn Company. (See Iseman, Richard B., assignor.)
Automatic Recording Safe Company, The. (See Fisher, Charles, assignor.)
Autopoint Manufacturing Company. (See Keenan, Charles R., assignor.)
Autopoint Manufacturing Company. (See Pomeroy, Irving L., assignor.)
Avery, Clarence W., assignor to Ford Motor Company, Detroit, Mich. Machine for forming artificial leather or the like. 1,535,447; Apr. 28.
Babcock & Wilcox Company, The. (See Savoye, Charles U., assignor.)
Bach, Neils P., Millburn, N. J., assignor, by mesne assignments, to Thermokept Corporation. Continuous cooker. 1,535,197; Apr. 28.
Baker, Arthur E. (See Acosta, J. W., and Baker.)
Baker, Harry T., assignor of one-half to E. C. Taylor, Los Angeles, Calif. Portable scaffold. 1,535,978; Apr. 28.
Baker, John A. (See Hear, Thomas, assignor.)
Baker-Perkins Company. (See Reese, Louis C., assignor.)
Baker, Randall B., Watertown, assignor to The Holtzer-Cabot Electric Company, Roxbury, Mass. Telephone headset. 1,535,284; Apr. 28.
Balcom, George W. (See Gates, M. S., Balcom, and Roberson.)
Ballbach, Alfred C., Detroit, Mich. Doorlock. 1,535,396; Apr. 28.
Bamberger, Henry, assignor to Newark Watch Case Material Company, Newark, N. J. Watch holder. 1,535,085; Apr. 28.
Bamberger, Henry, assignor of one-half to A. Milne, Newark, N. J. Phonograph needle. 1,535,285; Apr. 28.
Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Sundae-cup-forming machine. 1,535,757; Apr. 28.
Barlow, Benjamin F., Travis, Tex. Shock absorber. 1,535,086; Apr. 28.
Barnes, Heffren, New York, N. Y. Golf club. 1,535,707; Apr. 28.
Barnett, Carleton E., Cambridge, Mass. Apparatus for collecting sap from trees. 1,535,087; Apr. 28.

Barnhart, Joseph R., assignor to W. M. Scott, Cleveland, Ohio. Rectifier. 1,535,088; Apr. 28.
Barrett, Colin D., Providence, R. I., assignor to Farber Brothers, New York, N. Y. Metal border strip for articles of hollow silverware. Des. 67,115; Apr. 28.
Barros, Emanuel M., Stamford, N. Y. Combination tail light, signal, and license-plate holder. 1,535,089; Apr. 28.
Barrows, Grace A., administratrix. (See Barrows, Robert Y.)
Barrows, Robert Y., deceased, by G. A. Barrows, administratrix, Rutherford, N. J. Phonograph cabinet. Des. 67,116; Apr. 28.
Bates, Jacob B., assignor of one-half to W. N. Bradford, Cambridge, Ohio. Balance escapement. 1,535,286; Apr. 28.
Baumann, Jules, Humboldt, Ariz. Gravity wheel. 1,535,090; Apr. 28.
Bautzner Industriewerk, A. G. (See Bornschein, Georg, assignor.)
Baxter, Harold G., Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Push-button switch. 1,535,559; Apr. 28.
Bay State Optical Company. (See Jones, Percival W., assignor.)
Bayer, Gaudenz, and C. Hochhers, assignors to the Firm Gebrüder, Bayer, Augsburg, Germany. Refrigerating apparatus. 1,535,758; Apr. 28.
Bayles, Ernest A., Helsby, assignor to British Insulated & Helsby Cables Limited, Prescot, England. Manufacture of electric cables. 1,535,711; Apr. 28.
Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Rotation for rock drills. 1,535,198; Apr. 28.
Baynard, William H., Boston, and F. W. Eager, assignors to H. H. Beckwith, Brookline, Mass. Shoe heater. 1,535,304; Apr. 28.
Beans, John F., Canton, and A. J. Mercier, assignors to The Beans Spring Company, Massillon, Ohio. Machine for bending bumper brackets. 1,535,759; Apr. 28.
Beans Spring Company, The. (See Beans, J. F., and Mercier, assignors.)
Beard, Elmer E., Port Angeles, Wash. Stereotype mold. 1,535,091; Apr. 28.
Beaumont, R. H., Company. (See Hale, William E., assignor.)
Becker, Allen J., Upper Montclair, N. J. Truck. 1,535,712; Apr. 28.
Bechtold, Reuben E., Fort Wayne, Ind., assignor to The Signaphore Company. Vehicle traffic-signal housing. Des. 67,117; Apr. 28.
Bechtold, Reuben E., Fort Wayne, Ind., assignor to The Signaphore Company. Casing for a signal lamp. Des. 67,118; Apr. 28.
Beckwith, Harry H. (See Baynard, W. H., and Eager, assignors.)
Beeler, Esten B., Chicago, Ill. Automatic humidifier. 1,535,287; Apr. 28.
Beilman, William E., Buffalo, N. Y. Water heater. 1,535,288; Apr. 28.
Belcher, Mark, Daisetta, Tex. Pump valve. 1,535,893; Apr. 28.
Belden, Nadine, Oakland, Calif. Folding brace. 1,535,713; Apr. 28.
Belin, Edouard, Paris, France. Method of and apparatus for synchronization. 1,535,979; Apr. 28.
Bell, Robert B., Miami, Fla. Brake. 1,535,092; Apr. 28.
Bendixen, Victor F., Chicago, Ill. Multiple casting. 1,535,802; Apr. 28.
Benedict, Hershel A., East Orange, and E. M. Moller, Jersey City, N. J. Grinding machine. 1,535,563; Apr. 28.
Benjamin, Bert R., Oak Park, Ill., assignor to International Harvester Company. Seat spring. 1,535,803; Apr. 28.
Benner, Harry P. (See Egloff, G., and Benner.)
Benner, Raymond C., Fremont, Ohio, assignor to National Carbon Company, Inc. Protected bobbin and making the same. 1,535,093; Apr. 28.
Bennet, Jules A. R., Lund, Sweden. Copying lathe. 1,535,708; Apr. 28.
Bergman, Lars H., assignor to Raymond Bros. Engineering Co., Chicago, Ill. Drying apparatus. 1,535,804; Apr. 28.
Bernhard, Harry I. (See Kelly, William J., assignor.)
Bessom, Earl A., assignor to The Wheeler-Schebler Carburetor Co., Indianapolis, Ind. Carburetor. 1,536,042; Apr. 28.
Bessom, Earl A., assignor to The Wheeler-Schebler Carburetor Co., Indianapolis, Ind. Carburetor. 1,536,043; Apr. 28.
Bethel, Claude, Wilkinsburg, and E. Tidlund, Pittsburgh, Pa., assignors to Westinghouse Electric & Manufacturing Company. Bearing housing. 1,535,560; Apr. 28.
Biddle, Reuben T., Philadelphia, Pa. Side illuminating device for vehicles. 1,535,894; Apr. 28.
Bilimeyer, Fayette A., Washington, D. C. Motion toy. 1,535,564; Apr. 28.
Bingay, Robert V., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Transformer. 1,535,094; Apr. 28.
Bishop, Joseph W., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Lug-cutting machine. 1,535,805; Apr. 28.
Bishop, William K., Binghamton, assignor to The Brewer-Titchener Corporation, Cortland, N. Y. Light for vehicle curtains. 1,536,037; Apr. 28.
Bishop, William K., Binghamton, assignor to The Brewer-Titchener Corporation, Cortland, N. Y. Uniting complementary frame members. 1,536,038; Apr. 28.
Bitman, Joseph, Denver, Colo. Emergency supply tank for automobiles. 1,535,565; Apr. 28.
Bliffert, Walter J., Milwaukee, Wis. Air and fuel heater. 1,535,095; Apr. 28.
Bliss, Sherwood C. (See Redpath, R. L., and Bliss.)
Bloch, Samson F., assignor to M. H. Oppenheimer & Co., Inc., New York, N. Y. Cotton fabric. Des. 67,119; Apr. 28.
Blum, George J., assignor to The Armstrong-Blum Manufacturing Company, Chicago, Ill. Hack-saw blade. 1,535,096; Apr. 28.
Blume, Conway M., Orange, Tex. Tree surgery. 1,535,806; Apr. 28.
Blume, Louis P., Pittsfield, Mass., assignor to General Electric Company. Switch. 1,535,807; Apr. 28.
Black, Homer, et al. (See Modlin, Thomas B., assignor.)
Blackmore, Dawson J., Cincinnati, Ohio. Card-table cover. 1,535,895; Apr. 28.
Blanning, Edwin J. (See Jones, G. J., and Blanning.)
Bocick, John, Chicago, Ill. Swimming glove. 1,535,896; Apr. 28.
Boland, Joseph J., Rahway, N. J., assignor to Aeromarine Plane and Motor Company. Clutch transmission. 1,535,566; Apr. 28.
Bolinder, Erik A., Stockholm, Sweden. Jointing shells of barrels and casks or parts thereof. 1,535,518; Apr. 28.
Bond, Frank A., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Vehicle bumper. 1,535,145; Apr. 28.
Booge, James E., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacture of lithopone. 1,535,760; Apr. 28.
Boord, Willa, Houston, Tex. Water bottle. 1,535,448; Apr. 28.
Booth, Levis M., Plainfield, N. J. Coagulant for purifying water and purifying water therewith. 1,535,709; Apr. 28.
Borden Company, The. (See Mitton, William E., assignor.)
Boren, Earl E. (See Rodman H., and Boren.)
Bornschein, Georg, assignor to Bautzner Industriewerk A. G., Bautzen, Germany. Wetting device for rotary rubber-printing machines. 1,535,567; Apr. 28.
Bornschein, Georg, assignor to Bautzner Industriewerk A. G., Bautzen, Germany. Feed gear for the cylinders of printing machines. 1,535,568; Apr. 28.
Bostock, William F., South Braintree, Mass. Ornamented shoe upper. 1,535,646; Apr. 28.
Boustead, Charles A. (See Fulton, I., and Boustead.)
Bowdoin, Harry L., assignor to Cone Company of America, Long Island City, N. Y. Apparatus for the manufacture of ice-cream cones. 1,535,897; Apr. 28.
Boyles, Ralph R., St. Paul, Minn., assignor to American Aluminum Ware Co. Sink strainer. 1,535,761; Apr. 28.
Bracco, Frederick, Lyndhurst, N. J. Propeller. 1,535,808; Apr. 28.
Bradford, W. N. (See Bates, Jacob B., assignor.)
Bradley, John F. (See Garrity, J. J., and Bradley.)
Bradley, John T., Tutuila, Samoa. No-capacity control for condensers. 1,536,039; Apr. 28.
Brandes, C., Inc. (See Moss, David H., assignor.)
Brandon, Harold L. (See Harrington, Arthur G., assignor.)
Brandt, Max, Los Angeles, Calif. Washing machine. 1,535,809; Apr. 28.
Brassert, Herman A., Chicago, Ill., and C. W. Andrews, Duluth, Minn. Heating gaseous fluids. 1,535,146; Apr. 28.
Breiding, Albert W., Sterling, Ill. Oil burner. 1,535,710; Apr. 28.
Breitenstein, Arthur L., Akron, Ohio. Scissors sharpener. 1,535,895; Apr. 28.
Brejska, Anthony C., assignor of one-half to L. Horley, Cleveland, Ohio. Wheel-removing device. 1,535,762; Apr. 28.
Brennan, Joseph B., Orange, N. J. Cord-tire stock and making same. 1,535,647; Apr. 28.
Brewer-Titchener Corporation, The. (See Bishop, William K., assignor.)
Brey, John, Hancock, Mich. Glare screen. 1,535,810; Apr. 28.
Briggs, Charles H., Minneapolis, Minn. Device for freeing gluten from starch. 1,535,811; Apr. 28.
Briggs Manufacturing Company. (See Maise, Herman C., assignor.)
Brill, J. G., Company, The. (See Adams, Walter S., assignor.)
Brill, J. G., Company, The. (See Latshaw, Elmer, assignor.)
British Insulated & Helsby Cables Limited. (See Bayles, Ernest A., assignor.)
Brommer, John F., New York, N. Y. Removable side window for automobiles. 1,535,648; Apr. 28.

Bronder, Gaston A., deceased, Brooklyn; L. R. Bronder, administratrix, assignor of one-half to T. Costigan, New York, N. Y. Power declinkering apparatus for gas generators. 1,535,649; Apr. 28.
Bronder, Lucia R., administratrix. (See Bronder, Gaston A.)
Brown, Clarence O. (See Walker, H. B., and Brown.)
Brown Company. (See Richter, G. A., and Van Arsdel, assignors.)
Brown, Lucius A., assignor to The M. M. Johnson Company, Clay Center, Nebr. Incubator heater. 1,535,097; Apr. 28.
Brunswick-Balke-Collender Company, The. (See Bishop, Joseph W., assignor.)
Bryant, Elmer J., assignor to The Taft-Pierce Manufacturing Company, Woonsocket, R. I. Clamp block. 1,535,570; Apr. 28.
Buchanan, James R., Sylva, N. C. Control mechanism. 1,535,569; Apr. 28.
Buckeye Steel Castings Company, The. (See Stertzbach, Harry W., assignor.)
Buckeye Steel Castings Company, The. (See Whitridge, John C., assignor.)
Buckeye Steel Castings Company, The. (See Whitridge, J. C., Johnson, and Wolfe, assignors.)
Buckingham, Earle, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Thread gauge. 1,535,098; Apr. 28.
Buehler, Christian, Luxemburg, Mo. Flag holder for automobiles. 1,535,896; Apr. 28.
Buffington, Harry C., assignor to Weaver Manufacturing Company, Springfield, Ill. Towing pole. 1,535,897; Apr. 28.
Burch Plow Works Co., The. (See Kime, Charles G., assignor.)
Burdick, Ralph M., Los Angeles, Calif. Piston. 1,535,571; Apr. 28.
Burke, Lot F., Schenectady, N. Y. Bicycle gearing. 1,535,714; Apr. 28.
Burns, Samuel J., Vinita, Okla. Valve-testing device. 1,535,099; Apr. 28.
Burtchby, Ethel D., Tulsa, Okla. Combined corset anchor and hose supporter. 1,535,650; Apr. 28.
Burton, Nelson S., Ardmore, Okla. Rotary well drill. 1,535,572; Apr. 28.
Burwell, Arthur W., Poughkeepsie, N. Y. Producing chromic-acid solutions. 1,535,100; Apr. 28.
Butterworth, H. W., & Sons Company. (See France, Thomas W., assignor.)
Cain, Thomas P., Wichita, Kans. Housing for tappet and rocker arms for internal-combustion engines. 1,535,449; Apr. 28.
Caldwell, Edwd. F., & Co. (See Tisley, Arthur J., assignor.)
Call, Emory O. (See McDonald, P., and Call.)
Callery, William S., Wheatland, Calif. Portable door-lock. 1,535,289; Apr. 28.
Calorizing Company, The. (See Stairs, James A., assignor.)
Camfield, Russell W., Berkeley, and E. G. Danielson, San Francisco, Calif. Variometer. 1,535,364; Apr. 28.
Camp, Ray M., Daytona, Fla. Rheostat. 1,535,898; Apr. 28.
Campas, Vincent, Paso Robles, Calif. Wheel gauge. 1,535,574; Apr. 28.
Campbell, Nelson I., and A. M. Herbeman, Los Angeles, Calif. Marking guide. 1,535,980; Apr. 28.
Candee, L., & Company. (See Patten, Ernest L., assignor.)
Canfield, Albert H., Bridgeport, Conn. Producing tank balls. 1,535,715; Apr. 28.
Cannon, John J., Leicester, England. Yarn-winding machine. 1,535,575; Apr. 28.
Cardini, Ettore, Omegna, Italy. Box for toys. 1,535,519; Apr. 28.
Carlson, Burton G. (See Trundle, G. T., jr., and Carlson.)
Carmany, Charles A., Schaefferstown, Pa. Music stand. 1,535,812; Apr. 28.
Carnahan, Frank C., Brazil, Ind. Screen plate for clay machines. 1,535,290; Apr. 28.
Caron, Napoleon, Nashua, N. H. Loom shuttle-thread guide. 1,535,900; Apr. 28.
Carr Fastener Company. (See Carr, Fred S., assignor.)
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,535,981; Apr. 28.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,535,982; Apr. 28.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,535,983; Apr. 28.
Carver, Charles B., Elk Rapids, Mich. Demountable rim. 1,535,398; Apr. 28.
Cary Manufacturing Co. (See Cary, Spencer C., assignor.)
Cary, Spencer C., assignor to Cary Manufacturing Co., Brooklyn, N. Y. Implement for applying and fastening package binders. 1,535,716; Apr. 28.
Case, Minnie E., Pratt, Kans. Doll. Des. 67,120; Apr. 28.
Cassell, Osborne C., Winchester, Va., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Protector mechanism for looms. 1,535,291; Apr. 28.
Certain-teed Products Corporation. (See Miller, John E., assignor.)
Chambers, Peter. (See Fisher, W. H., and Chambers.)
Chandler, Homer P., assignor to The Ohio Brass Company, Mansfield, Ohio. Current-collecting device. 1,535,984; Apr. 28.
Chandler, Wallace L., East Lansing, Mich. Iodine and making the same. 1,535,450; Apr. 28.
Charles, George H., assignor to United Alloy Steel Corporation, Canton, Ohio. Resistant-surface alloy of iron. 1,535,763; Apr. 28.
Charles, George H., assignor to United Alloy Steel Corporation, Canton, Ohio. Resistant-surface alloy of iron. 1,535,764; Apr. 28.
Chisholm, Allen E., and S. Murray, Portland, Oreg.; said Murray assignor to said Chisholm. Oil burner. 1,535,575; Apr. 28.
Chrisman, Albert M., and J. B. Wells, Pacifico, Calif. Automatic oil and gas separating pump. 1,535,651; Apr. 28.
Christian, Herbert W., Detroit, Mich. Electric time switch. 1,535,101; Apr. 28.
Christians, Christian, Wilmersdorf, near Berlin, Germany. Device for utilising the heat contained in the fuel residues of furnaces. 1,535,765; Apr. 28.
Chubb, Lewis W. (See Fortescue, C. L., Chubb, and Slepian.)
Cincinnati Butchers' Supply Company, The. (See Schmidt, Oscar C., assignor.)
Clark, George B., Pittsburgh, Pa. Gauge cock. 1,535,576; Apr. 28.
Clark, Paul L., Denver, Colo. Projection screen. 1,535,985; Apr. 28.
Clark, Walter, Toronto, Ontario, Canada. Electric heater. 1,535,901; Apr. 28.
Clas, Angelo E., Toledo, Ohio, assignor to The Toledo Automotive Products Company. Window-control mechanism. 1,535,986; Apr. 28.
Clas, Angelo E., Toledo, Ohio, assignor to The Toledo Automotive Products Company. Window-control mechanism. 1,535,987; Apr. 28.
Clas, Angelo E., Toledo, Ohio, assignor to The Toledo Automotive Products Company. Window-control mechanism. 1,535,988; Apr. 28.
Clas, Angelo E., Toledo, Ohio, assignor to The Toledo Automotive Products Company. Window-control means. 1,535,989; Apr. 28.
Clawson, Monroe S., Upper Montclair, N. J. Mold with means for scoring castings. 1,535,292; Apr. 28.
Clement, John S., Company. (See Millholland, James H., assignor.)
Clements, George P., et al. (See Jaeger, Henry G., assignor.)
Clements, Clarence W., assignor to Crankless Engine Company, Jacksonville, Fla. Spray valve. 1,535,902; Apr. 28.
Cleveland, James G., and H. L. Keller, Arnold, Pa. Window-glass apparatus. 1,535,717; Apr. 28.
Cleave, Arthur H. W., Ottawa, Ontario, Canada. Apparatus for the electrolytic deposition of metals. 1,535,577; Apr. 28.
Coates, Ray G., Pasadena, Calif., assignor to Valley Mould and Iron Corporation, Sharpesville, Pa. Ingot mold and making same. 1,535,199; Apr. 28.
Cohen, Samuel, Brooklyn, N. Y. Electrical connecter. 1,535,451; Apr. 28.
Cohn, Arnold, New York, N. Y. Necktie box. 1,535,102; Apr. 28.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Cord support. 1,535,578; Apr. 28.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Vertical oven. 1,535,579; Apr. 28.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Toaster. 1,535,580; Apr. 28.
Cole, William P., Coalinga, Calif. Shock absorber. 1,535,103; Apr. 28.
Colella, Louis A., and S. Zeff, Detroit, Mich. Nonskid gripping member. 1,535,200; Apr. 28.
Collier, William H., Painesville, Ohio. Lathe-knife-grinding machine. 1,535,813; Apr. 28.
Collin, Adolphe, Ougree, and D. Jeunehomme, Jemeppe, Belgium. Pouring ladle. 1,535,201; Apr. 28.
Collins, Coy C., Hillsboro, N. C. Shaft coupling. 1,535,293; Apr. 28.
Collins, Harry E., Allentown, Pa., assignor to Fuller-Lehigh Company. Pulverised-fuel burner. 1,535,903; Apr. 28.
Collins, Thomas S., West Union, W. Va. Pipe coupling. 1,535,294; Apr. 28.
Colpitts, Fawcett H., assignor to Hydro Vacuum Elevator Company, Denver, Colo. Apparatus for lifting water, grain, or the like. 1,535,147; Apr. 28.
Commercial Electrolytic Corporation. (See Laughlin, Robert, assignor.)
Comant, Arthur P., Fort Thomas, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase appendage. Des. 67,121; Apr. 28.
Concealed Door Check Company. (See Eastman, Floyd K., assignor.)
Cone Company of America. (See Bowdoin, Harry L., assignor.)
Connery, William M., Philadelphia, Pa. Corrugation-forming dies for metal plates. 1,535,295; Apr. 28.
Conlin, Frederick. (See Jackson, D. D., Sears, and Conlin.)

Conlin, Frederick, Westfield, N. J., assignor to J. T. Pratt, New York; D. D. Jackson, Brooklyn, N. Y.; and J. D. Sears, Bloomfield, N. J., joint trustees constituting a New York trust estate. Removing slag and neutralising fumes arising in treatment of molten metals. 1,535,202; Apr. 28.

Connors, John W., Dedham, assignor to The Reece Button Hole Company, Boston, Mass. Buttonhole-sewing machine. 1,535,399; Apr. 28.

Conradson, Prentice, Evansville, assignor to Giddings & Lewis Machine Tool Company, Fond du Lac, Wis. Grinding machine. 1,535,452; Apr. 28.

Consolidated Paper and Box Manufacturing Company. (See Kusterer, Aloysius J., assignor.)

Cook, Cleo B., East Cleveland, assignor to The Elwell-Parker Electric Company, Cleveland, Ohio. Method and apparatus for handling freight. 1,535,203; Apr. 28.

Cook, Joel R., Lakewood, assignor to The Domestic Electric Company, Cleveland, Ohio. Centrifugal motor switch. 1,535,766; Apr. 28.

Cooper, Simon, New York, N. Y., assignor, by mesne assignments, to The Guardian Savings and Trust Company, Cleveland, Ohio. Box-forming machine. 1,535,453; Apr. 28.

Cornelissen, William. (See Hays, H. R., and Cornelissen.)

Corning Glass Works. (See McCauley, George V., assignor.)

Cory, Samuel I., Elmhurst, N. Y., assignor to American Telephone and Telegraph Company. Preventing electrical interference. 1,535,104; Apr. 28.

Costigan, Thomas. (See Brender, Gaston A., assignor.)

Cota, Daniel E., Waltham, Mass. Traffic signal. 1,535,105; Apr. 28.

Counts, Charles E. (See White, G., and Counts.)

Crane & Sompany. (See Sammet, Charles F., assignee.)

Crankless Engine Company. (See Clements, Clarence W., assignor.)

Crell, Albert P., assignor of one-half to W. S. Daniels, Grand Rapids, Mich. Apparatus for forming and cooling leaf springs and the like. 1,535,454; Apr. 28.

Cremean, William F., Toledo, Ohio. Car-door mechanism. 1,535,514; Apr. 28.

Crispen, Clarence C., Harrisburg, Pa. Elevator for stairways. 1,535,106; Apr. 28.

Croll, Paul C., Pubelo, Colo. Mold for wall construction. 1,535,296; Apr. 28.

Crom, John M., Wilmette, Ill. Cement-placing machinery. 1,535,991; Apr. 28.

Crompton & Knowles Loom Works. (See Cassell, Osborne C., assignor.)

Crompton & Knowles Loom Works. (See Wakefield, Walter H., assignor.)

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Plate for lighting fixtures. Des. 67,122; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Plate for lighting fixtures. Des. 67,123; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Wall plate for lighting fixtures. Des. 67,124; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Lighting-fixture bracket back. Des. 67,125; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Wall plate for lighting fixtures. Des. 67,126; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Lighting-fixture bracket back. Des. 67,127; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Ceiling light for lighting fixtures. Des. 67,128; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Bracket back for lighting fixtures. Des. 67,129; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Arm for lighting fixtures. Des. 67,130; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Ceiling light for lighting fixtures. Des. 67,131; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Bracket back for lighting fixtures. Des. 67,132; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Canopy for lighting fixtures. Des. 67,133; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Canopy for lighting fixtures. Des. 67,134; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Ceiling light for lighting fixtures. Des. 67,135; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Bracket back for lighting fixtures. Des. 67,136; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Frame for lighting fixtures. Des. 67,137; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Body for lighting fixtures. Des. 67,138; Apr. 28.

Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Body for lighting fixtures. Des. 67,179; Apr. 28.

Crowell, Rufus, Winchester, Mass. Method and apparatus for forming tubing electrolytically. 1,535,400; Apr. 28.

Crown Cork and Seal Company, The. (See Harms, Oscar J., assignor.)

Cunningham, Charles F. (See Altgelt, R. J. and H. R., and Cunningham.)

Cunningham, Frank L., Calgary, Alberta, Canada. Mop-cloth holder. 1,535,767; Apr. 28.

Cunningham, Walter T., Wichita, Kans. Oil burner. 1,535,815; Apr. 28.

Curtiss Aeroplane & Motor Company. (See Gilmore, William L., assignor.)

Curtiss Aeroplane and Motor Company. (See Langfelder, John P., assignor.)

Cuveiller, Léonce E., Montreal, Quebec, Canada. Advertising device. 1,535,521; Apr. 28.

Cvitkovich, John, Gary, Ind. Automatic film indicator and operator's warner. 1,535,520; Apr. 28.

Cyclops Steel Company. (See Evans, Charles T., assignor.)

Czarnyszka, Albert, Milwaukee, Wis. Shade and curtain fixture. 1,535,107; Apr. 28.

Dabney, Lillian M., Kansas City, Kans. Marking gauge. 1,535,816; Apr. 28.

Dahl, Sten T., Stockholm, assignor to O. Kullberg-Mayer, Katrineholm, Sweden. Carbon electrode for vacuum lightning conductors. 1,535,108; Apr. 28.

Daimler-Motoren-Gesellschaft. (See Klaamm, Hanns, assignor.)

Daniels, Addison L., Sioux City, Iowa. Radiator cooler. 1,535,904; Apr. 28.

Daniels, William S. (See Crell, Albert P., assignor.)

Danielson, Ernest O. (See Cantfield, E. W., and Danielson.)

Dann, Ernest G., Chicago, Ill. Spring-bar bumper and support. 1,535,581; Apr. 28.

Dapron, Joseph M., St. Louis, Mo. Air-brake equipment. 1,535,455 Apr. 28.

Darrah, William A., assignor to The Ekco Engineering Company, Chicago, Ill. Apparatus for mixing bread. 1,535,204; Apr. 28.

Darrah, William A., assignor to The Ekco Engineering Company, Chicago, Ill. Mixing dough and apparatus therefor. 1,535,205; Apr. 28.

Darrell, John J., assignor of one-half to E. M. Farnham, Oakland, Calif. Theft-indicating device. 1,535,582; Apr. 28.

Dashew, Jacob, Baltimore, Md. Cutting and weighing machine. 1,535,905; Apr. 28.

Davidson, Elias, Grantsburg, Wis. Harmonica holder. 1,535,206; Apr. 28.

Davies, Caleb, jr., Poland, Ohio. Manufacture of iron. 1,535,109; Apr. 28.

Davies, William R. (See Thomas, H. S., and Davies.)

Davis, Howard C., Elisabeth, N. J., assignor to Kow & Davis, Engineers, Inc., New York, N. Y. Feed-water grease-extractor apparatus. 1,535,768; Apr. 28.

Davis, Taube, assignor to Franklin Simon & Co. Inc., New York, N. Y. Coat. Des. 67,139; Apr. 28.

Davoll, Harley J., Lincoln, Nebr. Battery holddown. 1,535,906; Apr. 28.

Deere and Company. (See Wilson, Frederick D., assignor.)

Deffenbaugh, Chester S., Oroville, Calif. Camp stove. 1,535,652; Apr. 28.

Degler, William W., Davis, W. Va. Pivoted swing hanger. 1,535,718; Apr. 28.

De Hart, Joseph B., Lethbridge, Alberta, Canada. Shot-firing device. 1,535,148; Apr. 28.

De Mailly, Henry A. (See Carugnani, Mario, assignor.)

Desautels, Charles H. (See Taylor, E. C., and Desautels.)

Desautels, Charles H., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Air and water injector. 1,535,401; Apr. 28.

Deshler, Franklin J., Santa Ana, Calif. Rafter-cut-marking tool. 1,535,907; Apr. 28.

Det Norske Aktieselskab for Elektrokemisk Industri. (See Rawnar, Oystein, assignor.)

Dexter Company, The. (See George, William H., assignor.)

Diamond Power Specialty Corporation. (See Rawson, Grant L., assignor.)

Dickerson, Orman W., Oklahoma City, Okla. Casing device. 1,535,297; Apr. 28.

Dictaphone Corporation. (See Roberts, Henry P., assignor.)

Diederich, William H. (See Hines, Ernest, assignor.)

Dionne, Charles, Lowell, Mass. Liquid-supply device for toilet purposes. 1,535,817; Apr. 28.

Doan, Gilbert E., assignor to Rail Welding and Bonding Company, Cleveland, Ohio. Welding electrode. 1,535,365; Apr. 28.

Dobson, Gail B., Los Angeles, Calif. Valve-stem silencer. 1,535,583; Apr. 28.

Doherty Research Company. (See Wright, Carl J., assignor.)

Dohrmann, Fred, New York, N. Y. Self-oiler. 1,535,110; Apr. 28.

Dolan, Frank J., Brooklyn, assignor to J. M. Price, New York, N. Y. Tubular box. 1,535,522; Apr. 28.

Dolan, John A., Hempstead, N. Y. Smoker's receptacle. 1,535,908; Apr. 28.

Domestic Electric Company, The. (See Cook, Joel R., assignor.)

Dorey, George B., assignor to Enterprise Railway Equipment Company, Chicago, Ill. Door-locking mechanism. 1,535,111; Apr. 28.

Dorf, John T., Dundalk, Md. Shoe. 1,535,207; Apr. 28.

Dorfman, Leo, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Mold for resistance-coil supports. 1,535,584; Apr. 28.

Dostal, Joseph L., assignor to E. Holley, Detroit, Mich. Automatic application of lampblack to metal molds. 1,535,149; Apr. 28.

Doughty, Ivan N., assignor to Western Brick Company, Danville, Ill. Face-brick-sanding machine. 1,535,402; Apr. 28.

Drabinsky, John A., Camden, N. J. Rocker for chairs. 1,535,298; Apr. 28.

Draper Corporation. (See Leonard, Harry A., assignor.)

Draper Corporation. (See Payne, Charlie A., assignor.)

Draper Corporation. (See Rhoades, Alonzo E., assignor.)

Dreaman, Homer H., Connersville, Ind., assignor to Undertakers' Supply Company, Chicago, Ill. Body lifter. 1,535,208; Apr. 28.

Dubbs, Carbon P., Wilmette, assignor to Universal Oil Products Company, Chicago, Ill. Expansion joint. 1,535,209; Apr. 28.

Duke, Homer E., Markleville, and G. W. Pierce, Anderson, Ind. Filtering apparatus. 1,535,113; Apr. 28.

Du Pont, E. I., de Nemours & Company. (See Boone, James E., assignor.)

Du Pont, E. I., de Nemours & Company. (See Pitman, Earle C., assignor.)

Dupont, Jean G., Chicago, Ill. Nursing-bottle cover. Des. 67,140; Apr. 28.

Dupree, Thomas B., and H. P. Rhodes, Houston, Tex.; said Rhodes assignor to said Dupree. Packing. 1,535,456; Apr. 28.

Durbin, Vernon, Newton, assignor to The Holtzer-Cabot Electric Company, Roxbury, Mass. Headband for telephone sets. 1,535,299; Apr. 28.

Durfree Company, Inc., The. (See Jacobsen, Oystein, assignor.)

Dyer, Clarence J. L., Kisbey, Saskatchewan, Canada. Windmill head. 1,535,585; Apr. 28.

Dyer, Harry W., East Orange, N. J. Exit-door lock. 1,535,210; Apr. 28.

Eager, Frederick W. (See Baynard, W. H., and Eager.)

Easterday, Sidney H. (See Hopkins, T. O., and Easterday.)

Eastman, Floyd K., assignor to Concealed Door Chest Company, Kokomo, Ind. Vehicle doorcheck. 1,535,113; Apr. 28.

Eberle, John C., jr., Haddon Heights, N. J. Skate clamp. 1,535,909; Apr. 28.

Edgestone Manufacturing Co. (See Johnson, William W., jr., assignor.)

Edgar, Frank M., and T. P. Archer, assignors to Terrstedt Manufacturing Company, Detroit, Mich. Lock. 1,535,150; Apr. 28.

Edmunds, Levi E., Philadelphia, Pa. Flanged sprocket wheel. 1,535,114; Apr. 28.

Edwards, Edwin L., assignor to Edwards X-Ray Corporation, Indianapolis, Ind. Protector for X-ray tubes. 1,535,366; Apr. 28.

Edwards X-Ray Corporation. (See Edwards, Edwin L., assignor.)

Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Treating acid-sludge oils. 1,535,213; Apr. 28.

Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Producing lampblack. 1,535,214; Apr. 28.

Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Treating acid-sludge oils. 1,535,656; Apr. 28.

Egloff, Gustav, and H. P. Benner, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill. Hydrocarbon-oil treatment. 1,535,953; Apr. 28.

Egloff, Gustav, and H. P. Benner, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill. Treating petroleum oil. 1,535,654; Apr. 28.

Egloff, Gustav, and H. P. Benner, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill. Apparatus for treating oil. 1,535,655; Apr. 28.

Egloff, Gustav, and H. P. Benner, assignors to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating oil. 1,535,211; Apr. 28.

Egloff, Gustav, and H. P. Benner, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill. Plug cock. 1,535,212; Apr. 28.

Ehlig, Harry, Pearl River, assignor to George R. Swart & Company, Inc., New York, N. Y. Sheet feeder. 1,535,215; Apr. 28.

Ehlig, Harry, Pearl River, assignor to George R. Swart & Company, Inc., New York, N. Y. Folding and slitting machine. 1,535,216; Apr. 28.

Ehlig, Harry, Pearl River, assignor to George R. Swart & Company, Inc., New York, N. Y. Sheet feeder. 1,535,217; Apr. 28.

Ehrentraut, Charles, et al. (See Greenway, Marriett, assignor.)

Ehret, Cornelius D. (See McCan, David G., assignor.)

Ekco Engineering Company, The. (See Darrah, William A., assignor.)

Electric Machinery Mfg. Company. (See Hibbard, Truman, assignor.)

Electric Tachometer Corporation, The. (See Koif, Petrus van S., assignor.)

Electric Oil Syndicate. (See Morris, William L., assignor.)

Ellis, Horace B., Meadville, Pa. Sectional-window-screen lock. 1,535,818; Apr. 28.

Ellis, James O. (See Larsen, P. L., and Ellis.)

Ellison, Edward H., Jamestown, N. Y. Window closer. 1,535,403; Apr. 28.

Elwell-Parker Electric Company, The. (See Cook, Cleo B., assignor.)

Emmet, William L. R., Schenectady, N. Y., assignor to General Electric Company. Cooler and separator. 1,535,819; Apr. 28.

Emmett, Milton W. (See Marinos, John, assignor.)

Emsley, Orville H., Pasadena, Calif. Producing power from fuel. 1,535,657; Apr. 28.

Enterprise Railway Equipment Company. (See Dorey, George B., assignor.)

Epke, Martin C. (See Hoxie, V., and Epke.)

Ernold, Elmer A., Philadelphia, Pa., assignor to Wirt Company, Portland, Me. Portable electric-light fixture. 1,535,658; Apr. 28.

Ernst, Harry J., assignor to the D. T. Williams Valve Company, Cincinnati, Ohio. Valve. 1,535,405; Apr. 28.

Ernst, Fritz B., assignor to American Steel Foundries, Chicago, Ill. Railway-car truck. 1,535,404; Apr. 28.

Escandon, Jesus N., Pedro Betancourt, Cuba. Tractor. 1,535,528; Apr. 28.

Eschholtz, Otto H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Arc welding. 1,535,586; Apr. 28.

Estate Stove Company, The. (See Kahn, Bertrand B., assignor.)

Eustis, Frederic A., Milton, Mass. Reducing indigo dyes and other solutions. 1,535,151; Apr. 28.

Eustis, Frederic A., Milton, Mass. Apparatus for reducing dye solutions. 1,535,152; Apr. 28.

Evans, Charles T., Titusville, Pa., assignor to Cyclops Steel Company, New York, N. Y. Alloy. 1,535,910; Apr. 28.

Evans, Robert D., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,535,587; Apr. 28.

Evans, Robert D., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,535,588; Apr. 28.

Evans, Robert D., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,535,589; Apr. 28.

Evans, Robert D., Pittsburgh, and R. T. Pierce, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company. Volt-ampere meter. 1,535,590; Apr. 28.

Evans, William W., Salt Lake City, Utah. Flue cleaner. 1,535,115; Apr. 28.

Everett, Edward A., New York, N. Y. Lamp support. 1,535,218; Apr. 28.

Eynon, George A., assignor to G. M. Holley, Detroit, Mich. Needle-valve retainer. 1,535,406; Apr. 28.

Fairbairn, John J., Roosevelt, N. Y. Gear case. 1,535,524; Apr. 28.

Fairfield Engineering Company. (See Walker, H. B., and Brown, assignor.)

Falck, Joseph, assignor to F. H. Hill Company, Chicago, Ill. Burial casket. Des. 67,141; Apr. 28.

Farber Brothers. (See Barrett, Colin D., assignor.)

Farnham, Eugene M. (See Darrell, John J., assignor.)

Farrell, Edward P., Malvern, Ohio. Crossing-protecting device. 1,535,911; Apr. 28.

Fay, Albert E., et al. (See Johnson, Alvin L., assignor.)

Ferrara, Francesco, Somerville, Mass. Window-shade roll and holder therefor. 1,535,591; Apr. 28.

Fifield, George H., Whiting, Ind. Distilling petroleum oils. 1,535,457; Apr. 28.

Firestone Tire and Rubber Company, The. (See Pade, Max E., assignor.)

Fisher, Charles, assignor to The Automatic Recording Safe Company, Chicago, Ill. Golf club. 1,535,719; Apr. 28.

Fisher, William H., Los Angeles, and P. Chambers, Redondo, Calif. Furnace. 1,539,992; Apr. 28.

Fisk Rubber Company, The. (See Ashton, William S., assignor.)

Fisk Rubber Company, The. (See Desautels, Charles H., assignor.)

Fisk Rubber Company, The. (See Little, Thomas P., assignor.)

Fisk Rubber Company, The. (See MacAleese, Frederic L., assignor.)

Fisk Rubber Company, The. (See Marquette, Melvon A., assignor.)

Fisk Rubber Company, The. (See Taylor, E. C., and Desautels, assignors.)

Fletcher, Charles F. (See Southwell, John A., assignor.)

Flower, John W., assignor, by mesne assignments, to Michigan Valve Foundry and Engineering Company, Detroit, Mich. Hydrant valve. 1,535,912; Apr. 28.

Fox, Ivar K., Copenhagen, Denmark. Fluid-pressure engine. 1,535,659; Apr. 28.

Forehand, Elizabeth M., Kokomo, Ind. Spring assembly. 1,535,116; Apr. 28.
Ford Motor Company. (See Avery, Clarence W., assignor.)
Forshee, Frank F., Flint, Mich., assignor to Westinghouse Electric Products Company. Sadiron. 1,535,592; Apr. 28.
Forster, John C., Pittsburgh, Pa. Pie crimper. 1,535,300; Apr. 28.
Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,535,594; Apr. 28.
Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Negative-phase-sequence balancer for polyphase furnaces. 1,535,595; Apr. 28.
Fortescue, Charles L., Pittsburgh, L. W. Chubb, Edgeworth, Pa., and J. Slepian, Boston, Mass., assignors to Westinghouse Electric & Manufacturing Company. Electrical measuring device. 1,535,593; Apr. 28.
Fort Wayne Engineering & Manufacturing Co. (See Astrom, John, assignor.)
Foster, John C., Merkel, Tex. Shutter-timing mechanism for motion-picture machines. 1,535,820; Apr. 28.
France, Thomas W., Providence, R. I., assignor to H. W. Butterworth & Sons Company. Calender for textile and other materials. 1,535,660; Apr. 28.
Francis, James H. E., Deptford, London, England. Vitreous enameled tile, brick, and the like. 1,535,301; Apr. 28.
Frankfort Novelty Company. (See Moore, Marcus D., assignor.)
Franklin Simon & Co. (See Davis, Taube, assignor.)
Franklin Simon & Co. (See Schmolze, Mildred C., assignor.)
Frary, Francis C., Oakmont, assignor to Aluminum Company of America, Pittsburgh, Pa. Method of and apparatus for electrolytic refining. 1,535,458; Apr. 28.
Fraser, Lovias F., Drumright, Okla. Drilling device. 1,535,302; Apr. 28.
Frazier, F. A., Company. (See Galligan, Carl F., assignor.)
Fredrickson, Erick A., Drayton, N. Dak. Attachment for revolvers. 1,535,459; Apr. 28.
Freitag, Richard H., Akron, Ohio. Filing machine. 1,535,407; Apr. 28.
French, Silas, Rochester, N. Y. Guard and guide for circular rabbeting saws. 1,535,596; Apr. 28.
Frericks, William, Steamboat Rock, Iowa. Filler device for egg cases or crates. 1,535,460; Apr. 28.
Frevert, Howard R., Portland, Oreg. Coasting toy. 1,535,461; Apr. 28.
Frey, Ivan C., York, Pa., assignor to Lancaster Iron Works, Inc. Floating strike for brickmaking machines. 1,535,303; Apr. 28.
Fricke, Charles F., Chicago, Ill. Display device. 1,535,408; Apr. 28.
Fried. Krupp Aktiengesellschaft Germaniawerft. (See Herkt, Ernst, assignor.)
Frost Manufacturing Company. (See Theleen, Oscar H., assignor.)
Fulcer, Fred L., and R. J. Ritger, Hortonville, Wis. Snowplow. 1,535,913; Apr. 28.
Fuller-Lehigh Company. (See Collins, Harry R., assignor.)
Fuller-Lehigh Company. (See Renkin, William O., assignor.)
Fulton, Isadore, and C. A. Boustead, Creamps, W. Va. Cable connecter. 1,535,117; Apr. 28.
Fulton, William H., Irvington, N. J., assignor, by mesne assignments, to Titeflex Metal Hose Co. Pipe coupling. 1,535,219; Apr. 28.
Fultz, David E., and O. L. Grigg, Madill, Okla. Spring wheel. 1,535,321; Apr. 28.
Furda, Jacob, Winnipeg, Manitoba, Canada. Condiment holder. 1,535,597; Apr. 28.
Galion Iron Works & Mfg. Co., The. (See Arndt, Franklin E., assignor.)
Gallagher, Alfred H., Chicago, Ill. Heat insulation. 1,535,220; Apr. 28.
Gallagher, Arthur D., assignor to Oliver Chilled Plow Works, South Bend, Ind. Wheeled cultivator. 1,535,914; Apr. 28.
Gallardo, Joseph J., San Tecla, Salvador. Infusion extractor. 1,535,769; Apr. 28.
Galligan, Carl F., Berkeley, assignor to F. A. Frazier Company, San Francisco, Calif. Spray mixture and making the same. 1,535,525; Apr. 28.
Gans, Philip, New York, N. Y. Dispensing machine. 1,535,915; Apr. 28.
Garagnani, Mario, Paris, France, assignor of one-half to H. A. De Mailly, New York, N. Y. Fuel tank for aeroplanes and the like. 1,535,462; Apr. 28.
Garbell, Max, Chicago, Ill. Typewriting machine. 1,535,153; Apr. 28.
Gardner, Omar N., Jamestown, N. Y. Operating and detaching mechanism for excavating buckets. 1,535,720; Apr. 28.
Garfinkel, Himan, Corona, N. Y. Umbrella. 1,535,993; Apr. 28.
Garrity, John J., and J. F. Bradley, Bridgeport, Conn. Saw guide and square. 1,535,661; Apr. 28.
Gates, Miles S., G. W. Balcom, and F. L. Roberson, Lewellen, Nebr. Oil can. 1,535,994; Apr. 28.
Gault, Don, East Lake, Tenn., assignor to The Guardian Savings and Trust Company, Cleveland, Ohio. Box-forming machine. 1,535,468; Apr. 28.
Gebrüder Bayer. (See Bayer, G., and Hochhers, assignors.)
General Electric Company. (See Blume, Louis F., assignor.)
General Electric Company. (See Emmet, William L. R., assignor.)
General Electric Company. (See Halvorson, Cromwell A. B., jr., assignor.)
General Electric Company. (See Hilliard, John D., assignor.)
General Electric Company. (See Janisch, Leopold, assignor.)
General Electric Company. (See Junggren, Oscar, assignor.)
General Electric Company. (See Leddick, George S., assignor.)
General Electric Company. (See Stevens, Harry M., assignor.)
General Electric Company. (See Thompson, Louis W., assignor.)
General Electric Company. (See Traver, Oliver C., assignor.)
General Electric Company. (See Winne, Harry A., assignor.)
General Electric Company. (See Young, George E., assignor.)
General Gas Light Company. (See Humphrey, Alfred H., assignor.)
General Railway Signal Company. (See Leake, Richard C., assignor.)
Genest, Homer A., Hartford, Conn., assignor to United States Hat Machinery Corporation, New York, N. Y. Machine for shrinking felt articles. 1,535,327; Apr. 28.
Gengler, Raymond J., Akron, Ohio. Stamp-affixing device. 1,535,598; Apr. 28.
Gerdin, Olof B., Seattle, Wash. Window-cleaning device. 1,535,804; Apr. 28.
Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches. (See Schaffer, Walter, assignor.)
George, William H., assignor to The Dexter Company, Fairfield, Iowa. Gearing. 1,535,409; Apr. 28.
Gettell, Travilla C., Philadelphia, Pa., assignor of one-half to F. Lambden, Baltimore, Md. Burglar-detective apparatus. 1,535,770; Apr. 28.
Getz, Alfred C., assignor to The Sidney Machine Tool Company, Sidney, Ohio. Band saw. 1,535,995; Apr. 28.
Giddings & Lewis Machine Tool Company. (See Conradson, Prentice, assignor.)
Gill, Harrison M., Taft, Calif. Gas, oil, and sand separator. 1,535,721; Apr. 28.
Gilman, George H., Claremont, N. H., assignor to Sullivan Machinery Company. Pneumatic hammer. 1,535,599; Apr. 28.
Gilmore, William L., Mineola, assignor to Curtiss Aeroplane & Motor Company, Inc., Garden City, N. Y. Aeroplane wing. 1,535,526; Apr. 28.
Globe Wernicke Co. (See Ringler, William A., assignor.)
Goddu, Ovila, Ponteix, Saskatchewan, Canada. Candy scoop. 1,535,600; Apr. 28.
Goldsmith, Wolf T., Newark, N. J. Foot measure. 1,535,996; Apr. 28.
Good, Robert, Washington, Pa., assignor of one-half to Hazel-Atlas Glass Company, Wheeling, W. Va. Recuperator. 1,535,722; Apr. 28.
Goodwin, Roy, Wilmette, Ill. Remedial appliance. 1,535,822; Apr. 28.
Goodwin, Roy, Wilmette, Ill. Luminous sign. 1,535,823; Apr. 28.
Gore, Henry C., Dunedin, New Zealand. Combined nail puller and case opener. 1,535,824; Apr. 28.
Gotshall, Charles R., and R. S. Snyder, Uhrichsville, Ohio. Nonset automatic phonograph stop. 1,535,825; Apr. 28.
Goulding, W., et al. (See Johnson, Alvin L., assignor.)
Government of the United States. (See Van Metre, Thomas E., assignor.)
Grace, John F., Kearny, N. J., assignor to Worthington Pump & Machinery Corporation. Surface condenser. 1,535,662; Apr. 28.
Graham Brothers. (See Milner, Nugent, assignor.)
Graham, Ellis F., Louisville, Ky. Fender-protecting brace. 1,535,826; Apr. 28.
Graham, James H., Torrington, Conn. Pedal for bicycles. 1,535,601; Apr. 28.
Grasselli Chemical Company, The. (See Tanner, Wellington L., assignor.)
Green Engineering Company. (See Strong, Arthur P., assignor.)
Greenfield Tap and Die Corporation. (See Morgan, Myles, assignor.)
Greenstein, Samuel. (See Tucker, Boris, assignor.)
Greenwald, Sam, Brooklyn, N. Y. Baker's dough box. 1,535,827; Apr. 28.
Greenway, Marriett, assignor of one-third to C. Ehrentraut and one-third to G. Hindle, Paterson, N. J. Attachment for swifts. 1,535,306; Apr. 28.
Griebel, Rudolph M., Seattle, Wash. Game. 1,535,118; Apr. 28.
Griffiths, Richard T. (See Steele, C. W., and Griffiths.)
Grigg, Otis L. (See Fultz, D. E., and Grigg.)

Guarantee Finding Co., The. (See Martin, Jack, assignor.)
Guardian Savings and Trust Company, The. (See Cooper, Simon, assignor.)
Guardian Savings and Trust Company, The. (See Gault, Don, assignor.)
Guardian Savings and Trust Company, The. (See Wilkie, David, assignor.)
Guilberteau, Henri E. (See Margier, P. L., and Guilberteau.)
Guischard, Charles H., Richmond Hill, N. Y. Kiddie boat. 1,535,828; Apr. 28.
Gulich, Ashley J., Clearfield, assignor to Harbison-Walker Refractories Company, Pittsburgh, Pa. Refractory-shape press and mold therefor. 1,535,410; Apr. 28.
Gurley, John A., Minneapolis, Minn. Candy. Des. 67,142; Apr. 28.
Gurley, John W., Indianapolis, Ind. Fluid pump or motor. 1,535,464; Apr. 28.
Gurney, Osborne P., et al. (See Macdonald, Mott W., assignor.)
Gustafson, Carl H., Hartford, Conn. Hand grasp for automobiles. 1,535,771; Apr. 28.
Hackman, William H., Chapman, Kans. Grain sprouter. 1,535,465; Apr. 28.
Hadfield, John, jr., Philadelphia, Pa. Stocking and making same. Re16,053; Apr. 28.
Haffey, Calvin W. (See Stannard, R. C., and Haffey.)
Halansky, Bernard, Ottawa, Ontario, Canada. Ticket holder. 1,535,997; Apr. 28.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Company, Philadelphia, Pa. Drag-scraper equipment. 1,535,663; Apr. 28.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Company, Philadelphia, Pa. Drag-scraper equipment. 1,535,664; Apr. 28.
Halvorson, Cromwell A. B., jr., Lynn, Mass., assignor to General Electric Company. Metal mirror. 1,535,916; Apr. 28.
Hamilton, Claude, Garnett, Kans. Electric incubator heater. 1,535,829; Apr. 28.
Hampden Glazed Paper & Card Company. (See Stone, Thomas L., assignor.)
Hannaford, Cleon M., Richmond, Va., assignor to Wine Railway Appliance Company, Toledo, Ohio. Car-door mechanism. 1,535,830; Apr. 28.
Hannaford, Cleon M., Richmond, Va., assignor to Wine Railway Appliance Company, Toledo, Ohio. Car-door mechanism. 1,535,831; Apr. 28.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Swivel mounting for hoists. 1,535,221; Apr. 28.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Pavement breaker. 1,535,411; Apr. 28.
Hansen-Ellehammer, Jacob C., Hellerup, Denmark. Coupling arrangement between a pump and an automobile. 1,535,832; Apr. 28.
Hanson, Clinton H., Chicago, Ill., assignor to Motor Player Corporation. Pneumatic control valve. 1,535,833; Apr. 28.
Hanson, Charles C., and John Twardowsky, assignors, by mesne assignments, to Universe Corporation, Chicago, Ill. Stuffing box. 1,535,998; Apr. 28.
Harbison-Walker Refractories Company. (See Gulich, Ashley J., assignor.)
Hardwicke-Etter Company. (See Streun, John A., assignor.)
Harms, Oscar J., assignor to The Crown Cork and Seal Company of Baltimore City, Baltimore, Md. Machine for producing disks from cork or cork composition. 1,535,466; Apr. 28.
Harrington, Arthur G., assignor of one-half to H. L. Brandon, London, England. Waterproofing of fabric articles. 1,535,999; Apr. 28.
Harris Automatic Press Company, The. (See Harroid, Charles W., assignor.)
Harrison, Henry C., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Vibratory system. 1,535,527; Apr. 28.
Harrison, Henry C. (See Maxfield, J. P., and Harrison.)
Harrison, Wade H., Petersburg, Va. Garment-hanger-supporting mechanism for wardrobe trunks. 1,535,222; Apr. 28.
Harrison, Wade H., Petersburg, Va. Garment-hanger support for wardrobe trunks. 1,535,223; Apr. 28.
Harroid, Charles W., assignor to The Harris Automatic Press Company, Cleveland, Ohio. Sheet grippers. 1,535,224; Apr. 28.
Harsin, Clarence W., Los Angeles, Calif. Paper-hanger's folding straightedge. 1,535,917; Apr. 28.
Hartfield, August J., Los Angeles, Calif. Gas heater. 1,535,412; Apr. 28.
Harvey, John E., Dorchester, Mass. Controlling means for electrical devices. 1,535,806; Apr. 28.
Hatton, Guerdon A., New Castle, Pa. Water-supply system. 1,535,154; Apr. 28.
Haufler, Gottlob, Stuttgart, Germany. Pepper caster. 1,535,772; Apr. 28.
Haug, Anton J., assignor to Improved Paper Machinery Company, Nashua, N. H. Method of and apparatus for working paper stock. 1,535,834; Apr. 28.
Hauser, Leo J. (See Koerperich, J. V., and Hauser.)
Hawk, Roscoe C., Pittsburgh, Pa. Electric melting pot. 1,535,307; Apr. 28.
Hawkins, Augusta B. (See Snodgrass, O. C., Hawkins, and Staggers.)
Hawkins, John H., Sayville, N. Y. Cesspool-wall construction. 1,536,000; Apr. 28.
Hawley, Eugene W., Philadelphia, Pa. Wardrobe trunk. 1,535,119; Apr. 28.
Hay, William T., Montreal, Quebec, Canada. Boat construction. 1,535,155; Apr. 28.
Hayden, Arthur C., Brockton, Mass. Radio tuning device. 1,535,602; Apr. 28.
Hayes, George H., Atlanta, Ga. Plant-treating truck. 1,536,001; Apr. 28.
Hayes-Fay Laboratories, Inc. (See Shaw, Frank R., assignor.)
Hays, Howard R., and W. Cornelissen, assignors to H. S. and L. F. Levy, Philadelphia, Pa. Camera. 1,535,225; Apr. 28.
Hazel-Atlas Glass Company. (See Good, Robert, assignor.)
Hedgcock, William C., assignor to American Steel Foundries, Chicago, Ill. Six-wheel truck. 1,535,413; Apr. 28.
Hedges, Edward E., New York, N. Y., assignor to The Hedges New Eduction Process Corporation, Newark, N. J. Extracting mercury from cinnabar. 1,535,467; Apr. 28.
Hedges, Edward E., New York, N. Y., assignor to The Hedges New Eduction Process Corporation, Newark, N. J. Extracting sulphur from its ores. 1,535,468; Apr. 28.
Hedges New Eduction Process Corporation. (See Hedges, Edward E., assignor.)
Hedin, Ernest. (See Lundgren, C., and Hedin.)
Heer, Thomas, Baltimore, Md., assignor to J. A. Baker, Reisterstown, Md. Oil feed device for diestocks. 1,535,773; Apr. 28.
Hele-Shaw, Henry S., and E. Tribe, deceased, C. Tribe, executor or administrator, assignors to The Kenward Collapsible (Steel) Barrel Company Limited, London, England. Containing vessel. 1,535,308; Apr. 28.
Heller, Herman S., San Francisco, assignor to Heller Products Company, Inc., Los Angeles, Calif. Portable ice machine. 1,535,603; Apr. 28.
Heller Products Company. (See Heller, Herman S., assignor.)
Henderson-Bland, Maud, London, England. Bust bodice. 1,535,528; Apr. 28.
Hendricks, William H., New Haven, Conn. Pan or the like. 1,535,004; Apr. 28.
Hennig, Albert, assignor to Anker-Werke Aktiengesellschaft, Bielefeld, Germany. Buttonhole-sewing machine. 1,536,002; Apr. 28.
Henry, Ferdinand G., New York, assignor, by mesne assignments, to Walden Knife Company, Walden, N. Y. Machine for sharpening blades. 1,535,665; Apr. 28.
Henry, Robert P. (See Neely, J. A., and Henry.)
Herbeman, Abraham M. (See Campbell, N. I., and Herbeman.)
Herkt, Ernst, Kiel-Hassee, assignor to Fried. Krupp Aktiengesellschaft Germaniawerft, Kiel-Gaarden, Germany. Fuel valve for internal-combustion engines. 1,536,003; Apr. 28.
Hettig, Albert F., et al. (See Macdonald, Mott W., assignor.)
Hibbard, Truman, assignor, by mesne assignments, to Electric Machinery Mfg. Company, Minneapolis, Minn. Self-starting synchronous motor. 1,535,774; Apr. 28.
Hill, F. H., Company. (See Falck, Joseph, assignor.)
Hillebrand, Henry, Saratoga Springs, N. Y. Hair-holding device. 1,535,309; Apr. 28.
Hilliard, John D., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,535,835; Apr. 28.
Hilmer, Edwin L., Hagersville, Pa. Traffic signal for automobiles. 1,535,836; Apr. 28.
Himes, Walter H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic welding machine. 1,535,605; Apr. 28.
Hindle, George, et al. (See Greenway, Mariett, assignor.)
Hines, Charles S. (See Ong, Murray L., assignor.)
Hines, Ernest, assignor of one-half to W. H. Diederich, Fort Wayne, Ind. Window-sash lock. 1,535,156; Apr. 28.
Hirsch, Louis. (See Leconte, H., and Hirsch.)
Hobe, William W., New York, N. Y. Button. Des. 67,143; Apr. 28.
Hobson, Stanley H., assignor to Geo. D. Roper Corporation, Rockford, Ill. Gear pump. 1,535,310; Apr. 28.
Hochhers, Carl. (See Bayer, G., and Hochhers.)
Hodgkins, Albert A., assignor to The American Fabrics Company, Bridgeport, Conn. Shoulder strap for wearing apparel. 1,535,666; Apr. 28.
Hoe, R., and Co. (See Roesen, Oscar C., assignor.)
Hoffman, Michael, Los Angeles, Calif. Log-removing device. 1,535,469; Apr. 28.
Hoffman, Rudolph, Kankakee, Ill. Baseball game device. 1,535,918; Apr. 28.
Hollander, Aladar, Berkeley, Calif. Deep-well pump head. 1,535,414; Apr. 28.
Hollander, Aladar, Berkeley, Calif. Screw pump. 1,535,415; Apr. 28.

Holley, Earl. (See Dostal, Joseph L., assignor.)
Holley, George M. (See Eynon, George A., assignor.)
Hollaway, William T., Alliance, Ohio, assignor of one-half to H. A. Simms, sr., Chicago, Ill., and W. A. McCullough, Alliance, Ohio. Loading and unloading truck. 1,535,775; Apr. 28.
Hollister, George S., Burkburnett, Tex., assignor to J. B. Pauley, trustee, Chicago, Ill. Oil-well heater. 1,535,776; Apr. 28.
Hollister, L. L. (See McLamore, Frederick M., assignor.)
Holloway, Arthur P., and S. Peacock, assignors to Wheeling Steel Corporation, Wheeling, W. Va. Producing substantially pure iron. 1,535,311; Apr. 28.
Holtzer-Cabot Electric Company, The. (See Baker, Randall B., assignor.)
Holtzer-Cabot Electric Company, The. (See Durbin, Vernon, assignor.)
Hopkins, Nevil M., New York, N. Y. Collapsible tube. 1,535,529; Apr. 28.
Hopkins, Thomas O., and S. H. Easterday, Kansas City, Mo.; said Easterday assignor to said Hopkins. Scissors sharpener. 1,535,470; Apr. 28.
Hopkinson, Joseph, assignor to International Scale Company, Dayton, Ohio. Weighing scale. 1,535,416; Apr. 28.
Horley, Louis. (See Brejska, Anthony C., assignor.)
Horne, Archibald B., Springfield, Mass. Golf-club shaft or handle. 1,535,667; Apr. 28.
Horst, Ludwig, Berlin-Wilmersdorf, Germany. Photographic device. 1,535,606; Apr. 28.
Hosking, Richard T., Wilmette, Ill. Waterproof covering for cameras. 1,535,312; Apr. 28.
Hostetler, Francis B., Kokomo, Ind. Governor mechanism for internal-combustion engines. 1,535,723; Apr. 28.
Hotchkin, Paul M., assignor to The National X-Ray Reflector Company, Chicago, Ill. Color lighting attachment for reflectors. 1,536,004; Apr. 28.
Housteau, Grant L., Youngstown, Ohio. Window screen. 1,536,005; Apr. 28.
Howard, William H. L., Washington, D. C. Glare eliminator for automobiles. 1,536,006; Apr. 28.
Howard, William R., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating hydrocarbons. 1,535,724; Apr. 28.
Howard, William R., assignor to Universal Oil Products Company, Chicago, Ill. Treating hydrocarbons. 1,535,725; Apr. 28.
Howell, Eshue K., Chicago, Ill. Hair clipper. 1,535,471; Apr. 28.
Hoxie, Vernon, and M. C. Epke, assignors to Peerless Wire & Fence Company, Adrian, Mich. Method and apparatus for manufacturing hard-steel fenceposts. 1,535,777; Apr. 28.
Huber, Frederick W., Riverside, Calif. Locating water-bearing strata in bore holes. 1,536,007; Apr. 28.
Huff, Leslie R., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Open impeller. 1,535,417; Apr. 28.
Hughes, Arthur L., and F. E. Poindexter, St. Louis, Mo. Mercury-vapor trap. 1,535,157; Apr. 28.
Hughes, James V., New Florence, Pa. Lamp globe. Des. 67,144; Apr. 28.
Hummel, Charles F., Ilion, N. Y. Die-casting machine. 1,535,313; Apr. 28.
Humphrey, Alfred H., New York, N. Y. Radiating element for gas heaters. 1,535,472; Apr. 28.
Humphrey, Alfred H., New York, N. Y., assignor to General Gas Light Company, Kalamazoo, Mich. Manufacturing radiating elements for gas heaters. 1,535,473; Apr. 28.
Hunt, Frederick W., Pasadena, Calif. Signal device. 1,536,008; Apr. 28.
Hupka, Gustav, Lausanne, Switzerland. Manufacture of wigs. 1,535,530; Apr. 28.
Hussmann, Harry L., Refrigerator & Supply Company. (See Jostedt, Theodore A., assignor.)
Hyde, Claude C., Otisville, N. Y. Knitted fabric. Des. 67,145; Apr. 28.
Hydro Vacuum Elevator Company. (See Colpitts, Fawcett H., assignor.)
Improved Paper Machinery Company. (See Haug, Anton J., assignor.)
Industrial Chemical Company. (See Wickenden, Leonard, assignor.)
Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Huff, Leslie R., assignor.)
Ingersoll-Rand Company. (See Stage, Harold L., assignor.)
Ingersoll-Rand Company. (See Wilhelm, Russell H., assignor.)
Ingham, Walter E., Newington, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Lathe. 1,535,158; Apr. 28.
International Harvester Company. (See Benjamin, Bert R., assignor.)
International Scale Company. (See Hopkinson, Joseph, assignor.)
Interstate Cotton Pickers. (See Schofield, Eugene H., assignor.)
Irwin, James W., and E. L. McDonald, San Francisco, Calif. Door-release mechanism. 1,535,919; Apr. 28.
Isaachsen, Isak, assignor, by mesne assignments, to A/S Krystal, Christiania, Norway. Heat-transmission tube. 1,535,531; Apr. 28.
Iseman, Richard B., assignor, by mesne assignments, to Auto Turn Company, Clarion, Pa. Automobile turntable. 1,535,607; Apr. 28.
Isliker-Brauen, Gottfried, Bruggen, St. Gallen, Switzerland. Bookbinding machine. 1,535,418; Apr. 28.
Jackson, Daniel D., Brooklyn, N. Y., J. D. Sears, Bloomfield, and F. Conlin, Westfield, N. J., assignors to J. T. Pratt, New York, D. D. Jackson, Brooklyn, N. Y., and J. D. Sears, Bloomfield, N. J., trustees. Desulphurising iron, steel, ferro alloys, and compositions of matter for use therein. 1,535,227; Apr. 28.
Jackson, Daniel D., et al., joint trustee. (See Conlin, Frederick, assignor.)
Jackson, Daniel D., et al., trustees. (See Jackson, D. D., Sears, and Conlin, assignors.)
Jackson, Thomas H., Philadelphia, Pa. Window-sash fastener. 1,535,226; Apr. 28.
Jacobsen, Oystein, Dayton, Ohio, assignor to The Duriron Company, Inc. Pump. 1,536,474; Apr. 28.
Jaeger, Gebhard, Columbus, Ohio. Concrete mixer. 1,535,159; Apr. 28.
Jaeger, Henry G., Rose Hill, assignor of one-fourth to E. E. Lambertson, one-fourth to G. P. Clements, Eagle Rock City, and one-fourth to J. Schneider, Los Angeles, Calif. Plastic composition and process. 1,535,726; Apr. 28.
Janisch, Leopold, Berlin, Germany, assignor to General Electric Company. Electropneumatic control system. 1,536,009; Apr. 28.
Járfás, Josef, jr., Busau, Hungary, assignor of one-half to E. Pápay, Winnipeg, Manitoba, Canada. Fastening means for seed-planter attachments for wheeled plows. 1,535,419; Apr. 28.
Jeansen, Carl F., and E. F. Stone, Washington, D. C. Airplane catapult. 1,535,475; Apr. 28.
Jette, Archie N., Anaconda, Mont. Rabble furnace. 1,535,160; Apr. 28.
Jeunehomme, Dieudonné. (See Collin, A., and Jeunehomme.)
Johansson, C. E., Inc. (See Aldeborgh, Erik H., assignor.)
Jonlan, Megordich M., Chelsea, Mass. Beehive attachment. 1,535,920; Apr. 28.
Johnson, Alvin L., Springfield, assignor of forty-eight per cent to W. Goulding, Holden, and four per cent to A. E. Fay, Worcester, Mass. Double-screw jack. 1,535,727; Apr. 28.
Johnson, George T. (See Whitridge, J. C., Johnson, and Wolfe.)
Johnson, John O., Nakina, Ontario, Canada. Lubricator. 1,536,010; Apr. 28.
Johnson, Joseph A., Niagara Falls, N. Y., and H. M. King, Niagara Falls, Ontario, Canada. Electrical switch. 1,535,778; Apr. 28.
Johnson, M. M., Company, The. (See Brown, Lucius A., assignor.)
Johnson, William W., jr., assignor to Eddystone Manufacturing Co., Inc., Eddystone, Pa. Heater for Schreiner rolls. 1,535,608; Apr. 28.
Johnston, Frank B., New York, N. Y., assignor to American Safety Device Company. Scaffold bench and anchor. 1,536,779; Apr. 28.
Jones, Ap Trevor, assignor to American Steel Foundries, Chicago, Ill. Stockless anchor. 1,535,420; Apr. 28.
Jones, George J., and E. J. Blanning, New Castle, Pa. Friction wrench. 1,536,011; Apr. 28.
Jones, Howard B., Evanston, Ill. Electrical connection device. 1,535,780; Apr. 28.
Jones, John E., West Frankfort, Ill., assignor to Mine Safety Appliances Company, Pittsburgh, Pa. Anemometer. 1,535,421; Apr. 28.
Jones, Percival W., Providence, R. I., assignor to Bay State Optical Company, Attleboro, Mass. Eyeglass construction. 1,535,781; Apr. 28.
Jones, W. A. Optical Company, The. (See Kintner, Alcuin E., assignor.)
Jordan, Harry I., Auburn, Me., assignor to Lamine Manufacturing Company. Fabricated wood shaft. Re16,058; Apr. 28.
Joslin, Omar T., Cincinnati, Ohio. Product produced from sulphonic acids and proteids and process of making. 1,536,012; Apr. 28.
Jostedt, Theodore A., assignor to Harry L. Hussmann Refrigerator & Supply Company, St. Louis, Mo. Hinge. 1,535,668; Apr. 28.
Julian, Warner J., Coffeyville, Kans. Burner. 1,536,013; Apr. 28.
Julin, Victor T., Djursholme-Danderyd, Sweden. Therapeutic-light apparatus. 1,535,314; Apr. 28.
Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Packing for elastic-fluid turbines and the like. 1,536,014; Apr. 28.
Kadel, Byers W., Baltimore, Md. Car-door mechanism. 1,536,015; Apr. 28.
Kadel, Byers W., Baltimore, Ind., assignor, by mesne assignments, to The Symington Company. Draft rigging. 1,535,315; Apr. 28.
Kadel, Byers W., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Draft rigging. 1,535,316; Apr. 28.

Kagan, Alexander, assignor, by mesne assignments, to Weiner Brothers, Inc., New York, N. Y. Printed cloth. Des. 67,146; Apr. 28.
Kahn, Bertrand B., Cincinnati, assignor to The Estate Stove Company, Hamilton, Ohio. Stove. 1,535,476; Apr. 28.
Kalmus, Comstock & Wescott, Inc. (See Troland, Leonard T., assignor.)
Kane, Thomas H., assignor to Truscon Steel Company.
Kane, Thomas H., assignor to Truscon Steel Company, Youngstown, Ohio. Welding-machine guide. 1,535,477; Apr. 28.
Kanowitz, Samuel B., Greensburg, Pa., and H. A. Webster, Columbia, Tenn.; said Kanowitz assignor of his right to Raymond Brothers Impact Pulveriser Company, Chicago, Ill. Separating high-content phosphate from low-content phosphate and clay or the like. 1,535,120; Apr. 28.
Kavanagh, Peter, New York, N. Y. Guard for gas stoves. 1,536,016; Apr. 28.
Keeler Brass Company. (See Keeler, Isaac S., assignor.)
Keeler, Isaac S., assignor to Keeler Brass Company, Grand Rapids, Mich. Latch. 1,535,478; Apr. 28.
Keeran, Charles R., assignor, by mesne assignments, to Autopoint Manufacturing Company, Chicago, Ill. Pencil. 1,536,017; Apr. 28.
Keith, Clifton N., Springfield, Ohio. Finger ring. Des. 67,147; Apr. 28.
Keller, Harvey L. (See Cleveland, J. G., and Keller.)
Kelley, Edward, Altoona, Pa. Adjustable bushing. 1,536,018; Apr. 28.
Kelley, John F., Chicago, Ill. Drain cock. 1,536,019; Apr. 28.
Kelly, Michael C., Minneapolis, Minn. Necktie. 1,535,669; Apr. 28.
Kelly, William J., assignor of one-third to H. I. Bernhard, Brooklyn, N. Y. Making shoes. 1,535,609; Apr. 28.
Kellogg, Herbert C., Detroit, Mich. Refrigerating apparatus for soda fountains. 1,535,479; Apr. 28.
Kelvinator Corporation. (See Mercer, William D., assignor.)
Kendall, William G., Newark, N. J., assignor to H. Bigaud, Paris, France. Vanity case or similar article of manufacture. Des. 67,148; Apr. 28.
Keaner, Nora L., Cordell, Okla. Dishwasher. 1,536,020; Apr. 28.
Keyes, Charles E., Albany, N. Y. Bridle for broom heads. 1,535,161; Apr. 28.
Kenward Collapsible (Steel) Barrel Company Limited, The. (See Hele-Shaw, H. S., and Tribe, assignors.)
Kidd, William, Minneapolis, Minn. Golf club. 1,535,670; Apr. 28.
Kime, Charles G., assignor to The Burch Plow Works Co., Crestline, Ohio. Culvert pipe. 1,535,162; Apr. 28.
King, Frank O., Glencoe, Ill. Scenic effect. 1,535,782; Apr. 28.
King, Harry M. (See Johnson, J. A., and King.)
King, Joseph M. S., East Mill Creek, Utah. Receiver. 1,536,480; Apr. 28.
Kintner, Alcuin E., Painesville, assignor to The W. A. Jones Optical Company, Cleveland, Ohio. Optical demonstrating device. 1,535,168; Apr. 28.
Kjelgaard, Gregers G. B., Hoosick Falls, N. Y. Swimming apparatus. 1,535,481; Apr. 28.
Klemm, Hanns, Sindelfingen, assignor to Daimler-Motoren-Gesellschaft, Stuttgart-Unterturkheim, Germany. Hinge for windows and doors of motor cars. 1,535,783; Apr. 28.
Kling, Fred E., Youngstown, Ohio. Ladle. 1,535,482; Apr. 28.
Klingel, Charles F., Irvington, N. J. Motor-vehicle signal. 1,535,164; Apr. 28.
Knutsen, Alfred W., assignor to A. V. Rowe, Galesburg, Ill. Attachment for tractors and motor vehicles. 1,535,483; Apr. 28.
Koehnline, Irvin J., Bridgeport, Ohio, and S. Peacock, Wheeling, W. Va. Annealing steel sheets. 1,535,317; Apr. 28.
Koehnline, Irvin J., Bridgeport, and W. E. Armstrong, Martins Ferry, Ohio. Apparatus for electroplating. 1,535,318; Apr. 28.
Koenig, Harry A., Philadelphia, Pa. Steam pressing iron. 1,535,537; Apr. 28.
Koenke, Reinhold, Milwaukee, Wis. Flask pin. 1,535,671; Apr. 28.
Koerner, Ewald, Dresden, Germany, assignor to United Cigarette Machine Company, Inc., Lynchburg, Va. Trestle or container for receiving manufactured cigarettes. 1,535,784; Apr. 28.
Koerperich, Joseph V., and L. J. Hauser, Epworth, Iowa. Feed box for stock. 1,535,165; Apr. 28.
Kohl, Elisabeth G., Burlingame, Calif. Game table. 1,535,484; Apr. 28.
Kolb, Petrus van S., Philadelphia, Pa., assignor to The Electric Tachometer Corporation. Step-by-step motor. 1,536,021; Apr. 28.
Kopper, Edward. (See McNair, H. H., and Kopper.)
Kops, Waldemar, assignor to Nemo Circlet Company, Inc., New York, N. Y. Brassière. 1,535,838; Apr. 28.
Kramer, Alexander E., Brooklyn, N. Y. Door-operating mechanism. 1,535,228; Apr. 28.
Kuhn, John W., Chillicothe, Ohio. Collapsible core or mandrel. 1,536,022; Apr. 28.
Kuhn, John W., Chillicothe, Ohio. Cushion tire. 1,536,023; Apr. 28.
Kullberg-Mayer, Olof. (See Dahl, Sten T., assignor.)
Kusterer, Aloysius J., assignor to Consolidated Paper and Box Manufacturing Company, Richmond, Va. Binder-blank feed mechanism. 1,535,819; Apr. 28.
Kvaal, Albert, Christiania, Norway. Connection piece for cable heads. 1,536,024; Apr. 28.
Lamb, Charles, and D. S. Radford, Los Angeles, Calif. Piston sleeve. 1,536,025; Apr. 28.
Lambden, Frederick. (See Gettell, Travilla C., assignor.)
Lambertson, Everett E., et al. (See Jaeger, Henry G., assignor.)
Lambertus, Peter, Indianapolis, Ind. Vehicle wheel. 1,535,121; Apr. 28.
Lamino Manufacturing Company. (See Jordan, Harry I., assignor.)
Lampre, Celestin, Elyria, Ohio. Shock absorber. 1,535,921; Apr. 28.
Lancaster Iron Works, Inc. (See Frey, Ivan C., assignor.)
Lane, Henry G., near Colquitt, Ga. Gate. 1,535,820; Apr. 28.
Langfelder, John P., Jamaica, assignor, by mesne assignments, to Curtiss Aeroplane and Motor Company, Inc., Garden City, N. Y. Aeroplane. 1,535,532; Apr. 28.
Langsdorf, S., & Co. (See Langsdorf, Walter M., assignor.)
Langsdorf, Walter M., assignor to S. Langsdorf & Co., Inc., New York, N. Y. Vanity case. Des. 67,149; Apr. 28.
Langston, Walter J., Three Rivers, Quebec, Canada. Centrifugal casting machine. 1,535,610; Apr. 28.
Lantieri, Gabriel, Jersey City, N. J. Permanent hair-waving machine. 1,535,122; Apr. 28.
Lantieri, Gabriel, Jersey City, N. J. Electric heater for permanent-waving machines. 1,535,123; Apr. 28.
Larsen, Oscar, Brooklyn, N. Y. Talking-machine light switch. 1,535,922; Apr. 28.
Larsen, Peter L., and J. O. Ellis, assignors of one-ninth to E. McDonald and two-ninths to L. G. Taylor, Paul, Idaho. Stone-gathering machine. 1,535,321; Apr. 28.
Larsen, William G., Stager, Ill. Skate. 1,535,422; Apr. 28.
Latshaw, Elmer, assignor to The J. G. Brill Company, Philadelphia, Pa. Car truck. 1,535,229; Apr. 28.
Latshaw, Elmer, assignor to The J. G. Brill Co., Philadelphia, Pa. Car truck. 1,535,230; Apr. 28.
Latta, Charles, St. Louis, Mo. Internal-combustion engine. 1,535,423; Apr. 28.
Latta, Emmit G., Syracuse, N. Y. Typewriting machine. 1,535,322; Apr. 28.
Laughlin, Robert, Buffalo, assignor to Commercial Electrolytic Corporation, New York, N. Y. Gun-cleaning compound and preparing same. 1,535,124; Apr. 28.
Lauderville, Joseph S., Oakland, Calif. Selective coin-operative device. 1,535,424; Apr. 28.
Leach, Robert F. (See Maddox, Gustavus A., assignor.)
Leake, Richard C., assignor to General Railway Signal Company, Rochester, N. Y. Mechanical time release. 1,535,923; Apr. 28.
Leconte, Henri, and L. Hirsch, Paris, France. Fluid-fuel burner. 1,535,166; Apr. 28.
Leddick, George S., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,535,924; Apr. 28.
Lee, Arthur, assignor of one-half to R. A. Shirek, New York, N. Y. Figure toy. 1,535,925; Apr. 28.
Lee, George E., assignor to The George E. Lee Company, Cleveland, Ohio. Auxiliary melting device. 1,535,231; Apr. 28.
Lee, George E., assignor to The George E. Lee Company, Cleveland, Ohio. Auxiliary melting device. 1,535,232; Apr. 28.
Lee, George E., Company, The. (See Lee, George E., assignor.)
Lee, Ottar S., assignor to The Nye Tool & Machine Works, Chicago, Ill. Thread-Cutting Die. 1,535,728; Apr. 28.
Leech, Jacob T., Beaver, assignor to Union Drawn Steel Company, Beaver Falls, Pa. Twister. 1,535,823; Apr. 28.
Lefrak, Harris, New York, N. Y. Infusion cartridge. 1,535,533; Apr. 28.
Lemon, Orlando A., York, Nebr. Automatic hog-oiling device. 1,535,839; Apr. 28.
Leonard, Frederick C., assignor to Leonard-Rooke Company, Providence, R. I. Thermostatic valve. 1,535,485; Apr. 28.
Leonard, Harry A., assignor to Draper Corporation, Hopedale, Mass. Builder mechanism for yarn winding and winning machines. 1,535,729; Apr. 28.
Leonard-Rooke Company. (See Leonard, Frederick C., assignor.)
Leone, Anthony, Greensburg, Pa. Pool-table pocket. 1,535,926; Apr. 28.
Le Roux, Alexander A., Lake Placid, N. Y. Razor sharpener. 1,535,611; Apr. 28.
Levy, Howard S., et al. (See Hays, H. E., and Cornelissen, assignors.)
Levy, Lionel F., et al. (See Hays, H. E., and Cornelissen, assignors.)

Link, Vincent, Detroit, Mich., assignor to Studebaker Corporation, Brake mechanism. 1,535,730; Apr. 28.
Lippe, Emery J., Fountain Hill, Pa. Apparatus for spinning. 1,535,840; Apr. 28.
Little, Thomas P., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Assembling device for tube-end clamps. 1,535,367; Apr. 28.
Little, Thomas P., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Stock rack. 1,535,425; Apr. 28.
Livingston, S. P. (See Stewart, Vincent J., assignor.)
Llewellyn, George A., New York, N. Y. Floral-bouquet holder. Des. 67,150; Apr. 28.
Lockwood, Henry S., assignor to The Lockwood Manufacturing Company, South Norwalk, Conn. Casement adjuster. 1,535,672; Apr. 28.
Lockwood Manufacturing Company, The. (See Lockwood, Henry S., assignor.)
Loewer, Henry F., Rochester, N. Y. Machine for turning irregular objects. 1,535,673; Apr. 28.
Look, Carrol A., Los Angeles, Calif. Beverage cooler. 1,535,927; Apr. 28.
Lorenz, William A., Hartford, Conn., assignor to United States Hat Machinery Corporation, New York, N. Y. Machine for shrinking felt articles. 1,535,324; Apr. 28.
Lorenz, William A., Hartford, Conn., assignor to United States Hat Machinery Corporation, New York, N. Y. Machine for shrinking felt articles. 1,535,325; Apr. 28.
Lorenz, William A., Hartford, Conn., assignor to United States Hat Machinery Corporation, New York, N. Y. Machine for shrinking felt articles. 1,535,326; Apr. 28.
Lorenz, William A., Hartford, Conn., assignor to United States Hat Machinery Corporation, New York, N. Y. Machine for shrinking felt articles. 1,535,328; Apr. 28.
Lösel, Franz, Brunn, Czechoslovakia. Blading of axial turbines. 1,535,612; Apr. 28.
Loudon, Dorr F., New York, N. Y. Drain table. 1,535,928; Apr. 28.
Lovell, Christopher H., St. Louis, Mo. Scooter. 1,535,167; Apr. 28.
Lowry, Julius C., Detroit, Mich. Electric-lighting fixture. Des. 67,151; Apr. 28.
Lubart, Morris. (See Posee, M., and Lubart.)
Luce, Grafton E., Chicago, Ill. Chain curve. 1,535,785; Apr. 28.
Ludlow, George M., Evanston, assignor to Sanitary Scale Company, Chicago, Ill. Thermostatic support for scale springs. 1,535,426; Apr. 28.
Ludwig, Homer W., Pittsburgh, Pa. Display stand. 1,535,929; Apr. 28.
Lundgren, Conrad, and E. Hedin, Jamestown, N. Y. Slide for extension tables. 1,535,427; Apr. 28.
Lundy, James W., San Francisco, Calif. Electric-lamp bulb. 1,535,486; Apr. 28.
Lupien, Louis A., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Fastener. 1,535,841; Apr. 28.
Luschenowsky, Alexander, Vienna, Austria. Wedge gear. 1,535,487; Apr. 28.
Lynn, Alger M. (See Richardson, B. E., and Lynn.)
Maag, Max, assignor of one-half to the Firm Maag-Zahnräder & Maschinen A.-G., Zurich, Switzerland. Precision feeler apparatus for grinding machines. 1,535,615; Apr. 28.
Maag-Zahnräder & Maschinen A.-G. (See Maag, Max, assignor.)
MacAleese, Frederic L., Milwaukee, Wis., assignor, by mesne assignments, to The Fisk Rubber Company, Chicopee Falls, Mass. Hose or tubing stripping apparatus. 1,535,368; Apr. 28.
Macdonald, Donald, Melbourne, Victoria, Australia. Thermic telltale. 1,535,536; Apr. 28.
MacDonald, John W. F., Brighton, Mass. Fluid-mixing device. 1,535,428; Apr. 28.
MacDonald, Malcolm M., Tacoma, Wash. Built-in piano. 1,535,842; Apr. 28.
Macdonald, Mott W., Bay View, Irondequoit, assignor of one-fourth to A. F. Hettig, one-fourth to O. F. Gurney, and one-fourth to C. G. Samuelson, Rochester, N. Y. Film-spool-locking device. 1,535,930; Apr. 28.
MacGahan, Paul, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Casing structure. 1,535,616; Apr. 28.
MacGregor-Morris, John T., and F. R. F. Ramsay, London, England. Obtaining the polar diagram of an alternating-current wave. 1,535,329; Apr. 28.
MacLeod, John. (See Wilson, Frank R., assignor.)
Macrini, Alfred F., New York, N. Y. Hack saw. 1,535,931; Apr. 28.
Maddox, Gustavus A., assignor of one-half to R. F. Leach, jr., Baltimore, Md. Container closure and cap remover. 1,535,488; Apr. 28.
Madison, James. (See Whitlock, E. L., and Madison.)
Magley, Merrill F., Columbia City, assignor of one-half to H. W. Soest, Churubusco, Ind. Pulley. 1,535,369; Apr. 28.
Maier, George E., Los Angeles, Calif. Boiler-flue construction. 1,535,235; Apr. 28.
Maise, Herman C., assignor to Briggs Manufacturing Company, Detroit, Mich. Top construction for vehicle bodies. 1,535,236; Apr. 28.
Majeski, Walter, New York, N. Y. Adjustable reed in wind instruments. 1,535,537; Apr. 28.
Malm, Johan F., assignor to J. H. Wald, Chicago, Ill. Bag tie. 1,535,782; Apr. 28.
Malouf, Abraham M., New York, N. Y. Garter. 1,535,617; Apr. 28.
Mancha, Raymond, assignor to Mancha Storage Battery Locomotive Company, St. Louis, Mo. Electric storage-battery locomotive. 1,535,175; Apr. 28.
Mancha Storage Battery Locomotive Company. (See Mancha, Raymond, assignor.)
Manning, Bowman & Company. (See Savage, G. B., and Wilkinson, assignors.)
Manning, Joseph G., Chicago, Ill. Index and cross feed mechanism. 1,535,932; Apr. 28.
Marinos, John, New York, N. Y., assignor of one-half to M. W. Emmett, Seattle, Wash. Soldering iron. 1,535,933; Apr. 28.
Marquette, Melvon A., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Making tire beads. 1,535,429; Apr. 28.
Martin, Jack, New York, N. Y., assignor to The Guarantee Finding Co., Inc., Newark, N. J. Finger ring. Des. 67,152; Apr. 28.
Marvel Equipment Company, The. (See Spaeth, Charles, assignor.)
Maserang, John B., Belleville, Ill. Mail-box signal. 1,535,677; Apr. 28.
Maskery, Arthur C. (See Ramsey, C. H., and Maskery.)
Mattatuck Manufacturing Company, The. (See Raeburn, William, assignor.)
Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Trolley-conductor insulator. 1,535,733; Apr. 28.
Maxfield, Joseph P., Maplewood, N. J., and H. C. Harrison, Port Washington, assignors to Western Electric Company, Incorporated, New York, N. Y. Vibratory system. 1,535,538; Apr. 28.
Mayer, Edward C., Butte, Mont. Flexible electromagnet. 1,535,618; Apr. 28.
Maynes Corporation. (See Maynes, Hyla F., assignor.)
Maynes, Hyla F., North Tonawanda, N. Y., assignor to Maynes Corporation, Dover, Del. Amusement apparatus. 1,535,237; Apr. 28.
Mays, Cecil A., East Akron, Ohio. Sander or surfacing machine. 1,535,489; Apr. 28.
McAnly, Louis C. (See Rockwood, G. O., McAnly, and Skelley.)
McCan, David G., Lancaster, assignor of one-half to C. D. Ehret, Philadelphia, Pa. Apparatus for producing oscillations. 1,535,674; Apr. 28.
McCauley, George V., assignor to Corning Glass Works, Corning, N. Y. Blow iron. 1,535,168; Apr. 28.
McColl, Francis P., Ridgewood, N. J., and W. W. Willison, Brooklyn, N. Y., assignors, by mesne assignments, to Thermokept Corporation. Self-sealing, soluble coffee tablet and making same. 1,535,233; Apr. 28.
McComas, Jesse, Los Angeles, Calif. Telephone index. 1,535,843; Apr. 28.
McCullough, Walter A., et al. (See Hollaway, William T., assignor.)
McDonald, Eddie, et al. (See Larsen, P. L., and Ellis, assignors.)
McDonald, Ervan L. (See Irwin, J. W., and McDonald.)
McDonald, Pearl, and E. O. Call, Marion, Ohio. Pipe wrench. 1,535,534; Apr. 28.
McDougall, John, Auckland, New Zealand. Tightening the strings of tennis rackets. 1,535,125; Apr. 28.
McFadden, James H., Farmer, S. Dak. Smoking pipe. 1,535,934; Apr. 28.
McFarlane, Jesse A., Milwaukee, Wis. Propeller for flying machines or the like. 1,535,613; Apr. 28.
McGowen, William R., Chicago, Ill., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Vehicle bumper. 1,535,169; Apr. 28.
McGowen, William R., Chicago, Ill., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Fender guard. 1,535,170; Apr. 28.
McGowen, William R., Chicago, Ill., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Adjustable bumper for vehicles. 1,535,171; Apr. 28.
McGowen, William R., Chicago, Ill., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Vehicle bumper. 1,535,172; Apr. 28.
McGowen, William R., McKees Rocks, assignor to United States Chain & Forging Company, Pittsburgh, Pa. Bumper bracket. 1,535,173; Apr. 28.
McGregor, Alexander G., Warren, Ariz. Feeding powdered coal to blast furnaces. 1,535,174; Apr. 28.
McKune, Frank B., Hamilton, Ontario, Canada. Slag skimmer. 1,535,781; Apr. 28.
McLean, Anthony E., and J. M. Sprague, Fullerton, Calif. Rotary jar. 1,535,935; Apr. 28.
McLemore, Frederick M., assignor, by mesne assignments, to L. L. Hollister, Los Angeles, Calif. Extended-load danger signal for vehicles. 1,535,844; Apr. 28.
McMurtie, William B., and J. W. Moore, Shidler, Okla. Casing-ripping device. 1,535,234; Apr. 28.
McNair, Henry H., and E. Kopper, St. Paul, Minn. Golf game. 1,535,126; Apr. 28.
McPherson, Andrew, Ward, S. Dak. Hog sprayer. 1,535,614; Apr. 28.
McQuillan, Harry J., Farrell's Flat, South Australia, Australia. Header and thrasher harvester. 1,535,535; Apr. 28.
McWane, James R., Birmingham, Ala. Pipe-foundry plant. 1,535,675; Apr. 28.

McWane, James R., Birmingham, Ala. Apparatus for casting pipe or the like horizontally. 1,535,676; Apr. 28.
Mechano Gear Shift Company. (See Richardson, B. E., and Lynn, assignors.)
Mee, Thomas, jr., Clinton, Ill. Electric lantern. 1,535,845; Apr. 28.
Meehan, Paul A., assignor to American Dresaler Tunnel Kilns, Inc., Cleveland, Ohio. Brick-stack lifter. 1,535,430; Apr. 28.
Meilicke, Carl A., Chicago, Ill. Signal-lamp casing. Des. 67,153; Apr. 28.
Meiselbach, August D., Chicago, Ill. Manufacturing metal articles. 1,535,370; Apr. 28.
Mendelson, Louis R., Cleveland, Ohio. Burner. 1,535,431; Apr. 28.
Mennen Company, The. (See O'Neill, Louis R., assignor.)
Mercer, William D., assignor, by mesne assignments, to Kelvinator Corporation, Detroit, Mich. Compressor unit. 1,535,936; Apr. 28.
Mercier, Alonzo J. (See Beans, J. F., and Mercier.)
Mergier, Paul L., and H. E. Guiberteau, Paris, France. Device for the graphic representation of functions. 1,536,040; Apr. 28.
Merrell, George P., Incorporated. (See Adams, Frank A., assignor.)
Merrill, Frank A., Malden, Mass. Radiator construction. 1,535,871; Apr. 28.
Methlin, Nicolas E., assignor to Schneider & Cie., Paris, France. Multibarrel gun. 1,535,619; Apr. 28.
Meyercord Company, The. (See Stevens, Norman L., assignor.)
Michigan Valve Foundry and Engineering Company. (See Flower, John W., assignor.)
Middledith, James F., Plainfield, N. J., assignor to The J. G. Wilson Corporation, New York, N. Y. Sliding door and structure containing the same. 1,535,127; Apr. 28.
Milbradt, Gustave A., McKnight Road, Mo. Ladder. 1,535,432; Apr. 28.
Miller Company, The. (See Wolter, Herman H., assignor.)
Miller, John E., Marseilles, Ill., assignor to Certain-teed Products Corporation, St. Louis, Mo. Stacking machine. 1,535,678; Apr. 28.
Miller, Royal R., Chicago, Ill., assignor to Miller Traction Tread Company. Leveling means. 1,535,846; Apr. 28.
Miller Rubber Company. (See Steele, C. W., and Griffiths, assignors.)
Miller, Stephen S., assignor to The Mohawk Rubber Company, Akron, Ohio. Tire tread. Des. 67,154; Apr. 28.
Miller, Thomas S., South Orange, N. J. Thrust mechanism. 1,535,238; Apr. 28.
Miller Traction Tread Company. (See Miller, Royal R., assignor.)
Miller Train Control Corporation, The. (See Murray, William B., assignor.)
Millholland, James H., assignor to John B. Clement Company, Inc., Philadelphia, Pa. Floor-waxing device. 1,535,937; Apr. 28.
Millican, Joe. (See Parks, Henry, assignor.)
Mills, Chester B., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Centrifugal casting. 1,535,830; Apr. 28.
Milne, Alexander. (See Bamberger, Henry, assignor.)
Milner, Nugent, assignor to Graham Brothers, Evansville, Ind. Stake retainer for vehicles. 1,535,128; Apr. 28.
Milwaukee Brass Manufacturing Company. (See Van Ewyck, William F., assignor.)
Mine Safety Appliances Company. (See Jones, John E., assignor.)
Mitton, William E., New London, Wis., assignor to The Borden Company, New York, N. Y. Machine for stamping cans. 1,535,539; Apr. 28.
Modlin, Thomas B., assignor of one-third to H. Black and one-third to L. C. Scheinimann, Hurdland, Mo. Rail tie. 1,535,239; Apr. 28.
Mohawk Rubber Company, The. (See Miller, Stephen S., assignor.)
Moller, Edvard M. (See Benedict, H. A., and Moller.)
Monacelli, Emidio, and A. Pagnanelli, New York, N. Y. Film-splicing apparatus. 1,535,129; Apr. 28.
Moody, Ilson, Pontiac, Mich. Carburetor attachment. 1,535,938; Apr. 28.
Moore, John W. (See McMurtie, W. B., and Moore.)
Moore, Marcus D., Waveland, assignor to Frankfort Novelty Company, Frankfort, Clinton County, Ind. Can opener. 1,536,026; Apr. 28.
Moore, Raymond H., Chicago, Ill., assignor to The American Foundry Equipment Company, New York, N. Y. Sand-blast-feeding machine. 1,535,939; Apr. 28.
Moore, William E., Beaver Falls, Pa., assignor to Pittsburgh Research Corporation. Electric furnace. Re16,054; Apr. 28.
Moore, William J., Philadelphia, Pa. Mop. 1,535,540; Apr. 28.
Moran, Myles F., East Lynn, Mass. Strip-winding mechanism and reel. 1,535,872; Apr. 28.
Morgan, Chester F., Mount Vernon, Ill. Antiskid device. 1,535,620; Apr. 28.
Morgan, Merton W., Baltimore, assignor to Poole Engineering and Machine Company, Woodberry, Md. Rotary-shaft coupling. 1,535,621; Apr. 28.
Morgan, Myles, Worcester, assignor, by mesne assignments, to Greenfield Tap and Die Corporation, Greenfield, Mass. Grinding machine. 1,535,331; Apr. 28.
Morgan, William A., Los Angeles, Calif. Battery indicator and cut-out. 1,535,622; Apr. 28.
Morrell, Walter A., assignor of one-half to A. J. Osborn, Chicago, Ill. Two-cycle gas engine. 1,535,433; Apr. 28.
Morris, Norman H., London, England. Furnace adapted for burning oil and other projectable fuels. 1,535,332; Apr. 28.
Morris, William L., Chicago, Ill., assignor to Electric Oil Syndicate. Controller for fuel igniters. 1,535,240; Apr. 28.
Morrison Machine Company. (See Ramsey, C. H., and Maskery, assignors.)
Morsch, Jesse J., Douglas, Wyo. Valve-actuating mechanism. 1,535,736; Apr. 28.
Morse, Albert W., Long Island City, N. Y. Valve. 1,535,333; Apr. 28.
Mortimer, Charles W., Brooklyn, N. Y. Making shingle strips. 1,536,027; Apr. 28.
Moses, Kirke L., Brookline, Mass. Paper product. 1,535,940; Apr. 28.
Moss, Charles M., Pittsburgh, and R. J. Wentley, Edgewood Park, Pa., assignors to Westinghouse Electric and Manufacturing Company. Automatic substation. 1,535,623; Apr. 28.
Moss, David H., Brooklyn, assignor to C. Brandes, Inc., New York, N. Y. Support for table talker and method of making the same. 1,535,734; Apr. 28.
Motor Player Corporation. (See Hauson, Clinton H., assignor.)
Murray, Samuel. (See Chisholm, A. E., and Murray.)
Murray, William B., Danville, Ill., assignor to The Miller Train Control Corporation, Staunton, Va. Train-control mechanism. 1,535,241; Apr. 28.
Myers, George S., Electra, Tex. Drill collar. 1,535,941; Apr. 28.
Myers, Walter, Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Embroidering machine. 1,536,041; Apr. 28.
Nachumsohn, Irving, Winnipeg, Manitoba, Canada. Remote-control typewriting mechanism. 1,535,176; Apr. 28.
Nardei, Antonio, Delmont, Pa. Chair seat. Des. 67,155; Apr. 28.
National Acme Company, The. (See Smith, Oscar A., assignor.)
National Carbon Company. (See Benner, Raymond C., assignor.)
National Malleable and Steel Castings Company. (See Schwartz, Harry A., assignor.)
National Malleable and Steel Castings Company. (See Spence, Hubert L., assignor.)
National Supply Company, The. (See Schwimmer, Frederick J., assignor.)
National X-Ray Reflector Company, The. (See Hotchkin, Paul M., assignor.)
Naugle, Harry M., and A. J. Townsend, Canton, Ohio. Making Strip Sheets. 1,536,028; Apr. 28.
Neely, James A., Waimate Township, Canterbury, and R. P. Henry, Glenavy, near Waimate, New Zealand. Pneumatic horse collar. 1,535,679; Apr. 28.
Neilson, Christie N., Jackson, Mich. Lubricator indicator. 1,535,434; Apr. 28.
Nemo Circlet Company. (See Kops, Waldemar, assignor.)
Ner-A-Car Corporation. (See Neracher, Carl A., assignor.)
Neracher, Carl A., Syracuse, N. Y., assignor, by mesne assignments, to Ner-A-Car Corporation. Mounting for vehicle wheels. 1,535,435; Apr. 28.
Neracher, Carl A., Syracuse, N. Y., assignor, by mesne assignments, to Ner-A-Car Corporation. Motor cycle. 1,535,680; Apr. 28.
New, Edward A., Great Barrington, Mass. Ice-cutting machine. 1,535,334; Apr. 28.
New Haven Clock Co. (See Porter, W. E., and Whitehead, assignors.)
Newark Watch Case Material Company. (See Bamberger, Henry, assignor.)
Newton, Richard T., New York, N. Y. Automobile bumper. 1,535,847; Apr. 28.
Nicholls, William H., Brooklyn, N. Y. Apparatus for making sand molds. 1,535,335; Apr. 28.
Nicholson, Arthur H., Worcester, England. Air-refrigerating apparatus. 1,535,848; Apr. 28.
Nielsen, Christian, jr., Chicago, Ill. Shutter apparatus for radiators. 1,536,029; Apr. 28.
Niles-Bement-Pond Company. (See Sears, Willard T., assignor.)
Nixon, Jeddy D., Houston, Tex. Rod protector. 1,535,336; Apr. 28.
Noble, Robert W., Tauhei, Morrinsville, New Zealand. Apparatus for measuring the quantity of milk given by each cow milked by milking machines. 1,535,541; Apr. 28.
Noda, Matsusaburo, New York, N. Y. Clinical-thermometer tubing. 1,535,849; Apr. 28.
Nordstrom, Edward O., Minneapolis, Minn. Berry box. 1,535,436; Apr. 28.
Norris, Mark A. (See Abraham, C. J., and Norris.)
North American Lace Company. (See Teague, Edwin D., assignor.)

Northridge, John H. (See Snyder, L., and Smith, assignors.)
Northwestern Expanded Metal Company. (See Prange, Henry W. A., assignor.)
Nowocielski, Edward B., Bloomfield, assignor to Splitdorf Electrical Company, Newark, N. J. Control handle for regulating apparatus. Des. 67,156; Apr. 28.
Nye Tool & Machine Works, The. (See Lee, Ottar S., assignor.)
Nyman, Alexander, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical system. 1,535,624; Apr. 28.
O'Bannon, Walter, Tulsa, Okla. Sucker-rod elevator. 1,535,625; Apr. 28.
O'Hara, Eliot, Waltham, Mass. Apparatus for enameling articles. 1,535,850; Apr. 28.
Ohio Brass Company, The. (See Chandler, Homer P., assignor.)
Ohio Brass Company, The. (See Matthes, Samuel S., assignor.)
Ohio Brass Company, The. (See Stolp, Samuel S., assignor.)
Oldham, George, & Son Company. (See Santos, John R. L., assignor.)
Oldroyd, Fred, Cincinnati, Ohio. Loading machine. 1,535,337; Apr. 28.
Oliver Chilled Plow Works. (See Altgelt Rudolph J. and H. E., assignors.)
Oliver Chilled Plow Works. (See Altgelt, R. J., H. E., and Cunningham, assignors.)
Oliver Chilled Plow Works. (See Gallagher, Arthur D., assignor.)
Olmstead, Otto B., Springfield, Mass. Device for supplying moisture. 1,535,681; Apr. 28.
Onderdonk, Lansing, New York, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Looper-thread controller for sewing machines. 1,535,942; Apr. 28.
O'Neill, Louis R., assignor to The Mennen Company, Newark, N. J. Closure device. 1,535,851; Apr. 28.
Ong, Murray L., assignor of forty-five per cent to C. S. Hines, Seattle, Wash. Guide chart for automatic telephone instruments. 1,535,490; Apr. 28.
Oppenheimer, M. H., & Co. (See Bloch, Samson F., assignor.)
Orabo, Christian, Toronto, Ontario, Canada. Biscuit-making apparatus. 1,535,852; Apr. 28.
Osborn, Alfred J. (See Morrell, Walter A., assignor.)
Oswald, Arthur A., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. High-power radiotelephony. 1,535,130; Apr. 28.
Overton, Fitahugh L., Shreveport, La. Revolable sign. 1,535,437; Apr. 28.
Pade, Max H., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Conveyer for tire factories. 1,535,338; Apr. 28.
Pagnanelli, America. (See Monacelli, E., and Pagnanelli.)
Palmer-Bee Company. (See Simpson, William E., assignor.)
Pápay, Rosina. (See Járfás, Josef, jr., assignor.)
Parker, Frederick G., sr., Oakland, Calif. Suspender button. 1,535,735; Apr. 28.
Parker, William T., Mobile, Ala. Rail construction. 1,535,628; Apr. 28.
Parkinson, Eleaser, Yorktown, Saskatchewan, Canada. Farm gate. 1,535,177; Apr. 28.
Parks, Henry, Haberfield, near Sydney, assignor to J. Millican, Edgecliffe, near Sydney, New South Wales, Australia. Lantern-type advertisement and picture-displaying apparatus. 1,535,131; Apr. 28.
Parmenter, Sherman L., New Rochelle, N. Y. Tracing and printing device. 1,535,242; Apr. 28.
Partlow, Howard W. Utica, N. Y. Gas burner. 1,535,491; Apr. 28.
Passalacqua, Augusto, Paris, France. Facing sheets or objects of aluminum and the like with sheets of heavy metal. 1,535,492; Apr. 28.
Patten, Ernest L., assignor to L. Candee & Company, New Haven, Conn. Shoe-trimming machine. 1,535,373; Apr. 28.
Paul, J. L. (See Wren, Harvey A., assignor.)
Pauley, James B., trustee. (See Hollister, George S., assignor.)
Payne, Charlie A., Dalton, Ga., assignor to Draper Corporation, Hopedale, Mass. Builder mechanism for winding machines. 1,535,943; Apr. 28.
Peacock, Samuel, Wheeling, W. Va. Electrolytically depositing elemental chromium upon metals. 1,535,339; Apr. 28.
Peacock, Samuel, assignor to Wheeling Steel Corporation, Wheeling, W. Va. Rust-resisting mild steel and producing the same. 1,535,340; Apr. 28.
Peacock, Samuel. (See Holloway, A. P., and Peacock.)
Peacock, Samuel. (See Koehnline, I. J., and Peacock.)
Peerless Wire & Fence Company. (See Hoxie, V., and Epke, assignors.)
Pehde, Daniel, Wichita, Kans. Piano-hammer felt-softening tool. 1,535,853; Apr. 28.
Penticoff, Weldon E., Fergus Falls, Minn. Advertising call sheet. 1,535,243; Apr. 28.
Percival, Harry S., Bloomfield, N. J., assignor to American Telephone and Telegraph Company. Telegraphy. 1,535,244; Apr. 28.
Perfecto Gear Differential Co. (See Starr, Charles E., assignor.)
Perkins, Samuel W., Jacksonville, Fla., assignor to The Western Union Telegraph Company, New York, N. Y. Telegraph system. 1,535,627; Apr. 28.
Perry, John E., Sharon, assignor to Valley Mould & Iron Corporation, Sharpsville, Pa. Making ingots, and the ingot. 1,535,245; Apr. 28.
Perry, John E., Sharon, assignor to Valley Mould & Iron Corporation, Sharpsville, Pa. Ingot mold, and method of casting. 1,535,246; Apr. 28.
Perry, John E., Sharon, assignor to Valley Mould & Iron Corporation, Sharpsville, Pa. Ingot mold, and method of casting. 1,535,247; Apr. 28.
Perry, John E., Sharon, assignor to Valley Mould & Iron Corporation, Sharpsville, Pa. Casting ingots. 1,535,248; Apr. 28.
Perry, John E., Sharon, assignor to Valley Mould and Iron Corporation, Sharpsville, Pa. Horizontal ingot mold. 1,535,249; Apr. 28.
Perry, William E., assignor to The Augur-Perry Company, New Haven, Conn. Shoe heel. 1,535,736; Apr. 28.
Peterson, John J., Steubenville, Ohio. Brush. 1,535,628; Apr. 28.
Pfister, Gerold, Dresden-Altstadt, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Preserving sap-containing vegetable matter such as green fodder for cattle. 1,535,374; Apr. 28.
Pierce, George W. (See Duke, H. E., and Pierce.)
Pierce, Raymond T. (See Evans, R. D., and Pierce.)
Pilling, Norman E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Treating alloys. 1,535,629; Apr. 28.
Pitman, Earle C., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Cellulose ester of reduced viscosity and making same. 1,535,438; Apr. 28.
Pittsburgh Research Corporation. (See Moore, William B., assignor.)
Pittsburgh Transformer Company. (See Bingay, Robert W., assignor.)
Platt, Rutherford H., jr., Garden City, N. Y. Folding table. 1,535,682; Apr. 28.
Poindexter, Franklin E. (See Hughes, A. L., and Poindexter.)
Pollock, Robert T., Boston, Mass., assignor to Universal Oil Products Company, Chicago, Ill. Apparatus for converting hydrocarbon oils. 1,535,178; Apr. 28.
Pomeroy, Irving L., assignor to Autopoint Manufacturing Company, Chicago, Ill. Pencil. 1,536,030; Apr. 28.
Pomeroy, James W. (See Todd, W. C., and Pomeroy.)
Poole Engineering and Machine Company. (See Morgan, Merton W., assignor.)
Poons, Edward M., New York, N. Y. Braid for hats. 1,535,682; Apr. 28.
Porter, Wilson E., and R. H. Whitehead, assignors to New Haven Clock Co., New Haven, Conn. Automobile clock. 1,535,684; Apr. 28.
Poses, Morris, Brooklyn, and M. Lubart, New York, N. Y. Counter display case. 1,535,179; Apr. 28.
Potter, Albert T., assignor to Ainsworth Manufacturing Company, Detroit, Mich. Windshield. 1,535,250; Apr. 28.
Powell, William H., Albuquerque, N. Mex. Dry concentrator. 1,535,630; Apr. 28.
Prange, Henry W. A., assignor to Northwestern Expanded Metal Company, Chicago, Ill. Metal basket. 1,535,944; Apr. 28.
Pratt & Whitney Company. (See Buckingham, Earle, assignor.)
Pratt & Whitney Company. (See Ingham, Walter E., assignor.)
Pratt & Whitney Company. (See Thacher, John J., assignor.)
Pratt, Glenn, Springfield, Mo. Dimmer for automobile headlights. 1,535,854; Apr. 28.
Pratt, John T., et al., joint trustees. (See Conlin, Frederick, assignor.)
Pratt, John T., et al., trustees. (See Jackson, D. D., Sears, and Conlin, assignors.)
Prestholdt, Henry L., Minneapolis, Minn. Casein glue. 1,535,375; Apr. 28.
Preston, Percy, Ardmore, Okla. Pneumatic action for reed organs. 1,535,493; Apr. 28.
Price, Joseph M. (See Dolan, Frank J., assignor.)
Price, Mitchell D., Miami, Fla. Counting device. 1,535,737; Apr. 28.
Price, William B., assignor to Scovill Manufacturing Company, Waterbury, Conn. Nonferrous alloy. 1,535,542; Apr. 28.
Prout, Arthur H., and A. R. Reynolds, Long Beach, Calif. Steam and water separator. 1,535,945; Apr. 28.
Puschel, Eric J., Allegan, Mich. Convertible vehicle body. 1,535,494; Apr. 28.
Race, Fred O., Hillside, N. J. Water heater. 1,535,376; Apr. 28.
Race, Fred O., Hillside, N. J. Extension-bit holder. 1,535,543; Apr. 28.
Radford, Douglas E. (See Lamb, C., and Radford.)
Radn, Walter W., Evanston, assignor to Sanitary Scale Company, Chicago, Ill. Illuminated indicator for scales. 1,535,377; Apr. 28.

Raeburn, William, assignor to The Mattatuck Manufacturing Company, Waterbury, Conn. Pulley. 1,535,791; Apr. 28.
Ragany, John, Canton, Ohio. Muffler. 1,535,787; Apr. 28.
Rail Joint Company, The. (See Thomsen, McLeod, assignor.)
Rail Welding and Bonding Company. (See Dean, Gilbert E., assignor.)
Ramsay, Frank R. F. (See MacGregor-Morris, J. T., and Ramsay.)
Ramsey, Clifford H., Glen Rock, and A. C. Maskery, Paterson, N. J., assignors to Morrison Machine Company, Paterson, N. J. Apparatus for treating fabrics with liquids. 1,535,251; Apr. 28.
Randell, Leon O., and R. H. Raply, Glenmore, Auckland, New Zealand. Claw-hammer head. 1,535,685; Apr. 28.
Raply, Reginald H. (See Randell, L. O., and Raply.)
Ranchfuss, Herman, Englewood, Colo. Liquid-weighing machine. 1,535,788; Apr. 28.
Rayner, Oystein, assignor to Det Norske Aktieselskab for Elektrokemisk Industri, Christiania, Norway. Condensing zinc vapors. 1,535,252; Apr. 28.
Rawalt, Warren, Hot Springs, Ark. Mop head. 1,535,946; Apr. 28.
Rawson, Grant L., assignor, by mesne assignments, to Diamond Power Specialty Corporation, Detroit, Mich. Boiler cleaning. 1,535,495; Apr. 28.
Rayder, Joseph A., Philadelphia, Pa. Amplifier. 1,535,789; Apr. 28.
Raymond Bros. Engineering Co. (See Bergman, Lars H., assignor.)
Raymond Brothers Impact Pulverizer Company. (See Kanowitz, S. B., and Webster, assignors.)
Raysor, Paul M., Bryan, Tex. Shoe-polishing machine. 1,535,738; Apr. 28.
Redpath, Riley L., Buffalo, and S. C. Bliss, Genesee, assignors to American Radiator Company, New York, N. Y. Mold-ramming machine. 1,536,031; Apr. 28.
Reece Button Hole Company, The. (See Connors, John W., assignor.)
Reese, Louis C., Saginaw, Mich., assignor to Baker-Perkins Company, Incorporated, White Plains, N. Y. Collecting device. 1,535,544; Apr. 28.
Reese, Louis C., Saginaw, Mich., assignor to Baker-Perkins Company, Incorporated, White Plains, N. Y. Collecting device. 1,535,545; Apr. 28.
Regar, Harold D., Reading, Pa. Lace-tipping machine. 1,535,546; Apr. 28.
Reid, Thomas A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric resistor furnace. 1,535,547; Apr. 28.
Renkin, William O., Oradell, N. J., assignor to Fuller-Lehigh Company. Pulverized-fuel-burning apparatus. 1,535,132; Apr. 28.
Reo Motor Car Company. (See Thomas, Horace T., assignor.)
Reuter, Charley, and O. Schilling, Warsaw, Ill. Reproducer. 1,535,496; Apr. 28.
Reynolds, Adrian R. (See Prout, A. L., and Reynolds.)
Rhoades, Alonso E., assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. 1,535,947; Apr. 28.
Rhodes, Hampton P. (See Dupree, T. B., and Rhodes.)
Rich, Elmer A., jr., Chicago, Ill., assignor to The American Foundry Equipment Company, New York, N. Y. Sand cutter or mixer. 1,535,948; Apr. 28.
Richards, Daniel D., Storrs, Utah. Telescopic curtain rod. 1,535,133; Apr. 28.
Richardson, Bayard E., and A. M. Lynn, assignors to Mechano Gear Shift Company, Grand Rapids, Mich. Transmission-gearing clutch. 1,535,790; Apr. 28.
Richter, George A., and W. B. Van Arsdel, assignors to Brown Company, Berlin, N. H. Manufacture of chloroform. 1,535,378; Apr. 28.
Riddle, Edward N., Company, The. (See Crowell, Frank E., assignor.)
Rigaud, Henri. (See Kendall, William G., assignor.)
Riley, Robert S., assignor to Sanford Riley Stoker Co., Ltd., Worcester, Mass. Packing construction for stoker plungers. 1,535,341; Apr. 28.
Ringler, William A., Philadelphia, Pa., assignor to Globe Wernicke Co., Cincinnati, Ohio. Vertical filing system. 1,535,855; Apr. 28.
Ritger, Raymond J. (See Fulcer, F. L., and Ritger.)
Rix, Edward A., San Francisco, Calif. Combination air compressor and vacuum pump. 1,535,856; Apr. 28.
Roberson, Fred L. (See Gates, M. S., Balcom, and Roberson.)
Roberts, Henry P., assignor, by mesne assignments, to Dictaphone Corporation, New York, N. Y. Attachment device. 1,535,253; Apr. 28.
Roberts, John, Memphis, Tenn. Tire-rack brace. 1,535,857; Apr. 28.
Roche, Clifton, Chicago, Ill. Vehicle wheel. 1,535,497; Apr. 28.
Rockwood, George O., L. C. McAnly, and J. W. Skelley, assignors to The Rockwood Manufacturing Company, Indianapolis, Ind. Uniting metallic and fibrous bodies. 1,535,134; Apr. 28.
Rockwood Manufacturing Company, The. (See Rockwood G. O., McAnly, and Skelley, assignors.)
Rödel, Friedrich G. B., Leipzig, Germany. Screw gearing. 1,535,135; Apr. 28.
Rodman Chemical Company. (See Rodman, H., and Boren, assignors.)
Rodman, Hugh, Oakmont, and H. B. Boren, Penn Township, Allegheny County, assignors to Rodman Chemical Company, Verona, Pa. Quenching oil. 1,535,379; Apr. 28.
Roe, William, Pittsburgh, Pa. Soldering iron. 1,535,496; Apr. 28.
Roesen, Oscar C., Brooklyn, assignor to R. Hoe and Co., New York, N. Y. Folding mechanism. 1,535,686; Apr. 28.
Rohn, Wilhelm, Hanau, Germany. Metal and metal alloy for thermoelectric purposes, in particular for making thermocouples. 1,535,858; Apr. 28.
Rolls Royce, Limited. (See Royce, Frederick H., assignor.)
Ronning, Adolph. (See Ronning, Andreas G. and A.)
Ronning, Andreas G. and A., Minneapolis, Minn. Tractor cultivator. 1,535,439; Apr. 28.
Roothaan, Jan, Hayes, England. Coil for electrical transformers. 1,535,859; Apr. 28.
Roper, Geo. D., Corporation. (See Hobson, Stanley H., assignor.)
Rose, William H., Jersey City, N. J. Liquid-dispensing device. 1,535,180; Apr. 28.
Rosenblatt, Isidor, New York, N. Y. Chandelier or article of similar nature. Des. 67,157; Apr. 28.
Ross, Ernest H., Iowa City, Iowa. Girdle. Des. 67,158; Apr. 28.
Ross, George W., Healdton, Okla. Combined clamps and connection. 1,535,242; Apr. 28.
Rothacker, Edward P., Cleveland, Ohio. Slip jacket and making it. 1,535,243; Apr. 28.
Row & Davis Engineers, Inc. (See Davis, Howard C., assignor.)
Rowe, Alvin G. (See Knutson, Alfred W., assignor.)
Royce, Frederick H., assignor to Rolls Royce Limited, Derby, England. Carburetor. 1,535,244; Apr. 28.
Royce, Frederick H., assignor to Rolls Royce Limited, Derby, England. Carburetor for internal-combustion engines. 1,535,860; Apr. 28.
Ruff, Otto, Breslau, Germany. Refining zirconium-containing ores and other products containing dioxide of zirconium. 1,535,687; Apr. 28.
Ruggles, Charles H., West Palm Beach, Fla. Sea wall. 1,535,792; Apr. 28.
Russell, George H., Florence Ala. Dispensing stand. 1,535,254; Apr. 28.
Ryan, Charles, Ardmore, Okla. Auxiliary driving attachment for automobiles. 1,535,255; Apr. 28.
Salomen, Irving, Chicago, Ill. Metal chair. Des. 67,159; Apr. 28.
Sammet, Charles F., assignor to Crane & Company, Dalton, Mass. Safety paper and making the same. 1,535,861; Apr. 28.
Sammet, Charles F., assignor to Crane & Company, Dalton, Mass. Safety paper and making the same. 1,535,862; Apr. 28.
Sammet, Charles F., assignor to Crane & Company, Dalton, Mass. Safety paper and forming the same. 1,535,863; Apr. 28.
Samuelson, Carl G., et al. (See Macdonald, Mott W., assignor.)
Sanford Riley Stoker Co. (See Riley, Robert S., assignor.)
Sanitary Scale Company. (See Ludlow, George M., assignor.)
Sanitary Scale Company. (See Radn, Walter W., assignor.)
Santos, John R. L., assignor to George Oldham & Son Company, Baltimore, Md. Handle lock for pneumatic tools. 1,535,739; Apr. 28.
Sauer, Johan N. A., Amsterdam, Netherlands. Apparatus for drying, burning, and recovering finely-divided materials. 1,535,949; Apr. 28.
Sauer, Joseph F., Chico, Calif. Engine-pressure register. 1,535,688; Apr. 28.
Saunier, Marcian E., Bay City, Mich. Hook. 1,535,256; Apr. 28.
Savage, Basil H., San Francisco, assignor, by mesne assignments, to M. J. Savage, Los Angeles, Calif. Water-charging apparatus. 1,535,793; Apr. 28.
Savage, George E., and L. H. Wilkinson, assignors to Manning, Bowman & Company, Meriden, Conn. Bottle holder for vacuum jars or similar articles. 1,535,864; Apr. 28.
Savage, Michael J. (See Savage, Basil H., assignor.)
Savoye, Charles U., Hackensack, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Feed-water system. 1,535,440; Apr. 28.
Sawyer, Burnside E., Fitchburg, Mass. Golf-ball tee or support. 1,535,181; Apr. 28.
Sawyer, Frank M., Los Angeles, Calif. Concrete building construction. 1,535,345; Apr. 28.
Schaffer, Walter, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany. Arrangement for amplifying high-frequency currents. 1,535,182; Apr. 28.
Schell, Carl A., Cleveland, Ohio, assignor to Thermoid Rubber Company, Hamilton Township, N. J. Flexible coupling. 1,535,865; Apr. 28.
Schellenbach, William L., Wyoming, Ohio. Latus. 1,535,346; Apr. 28.

Schenimann, Lem C., et al. (See Modlin, Thomas B., assignor.)
Schiftner, Joseph, La Gloria, Cuba. Railway-grade-crossing gate. 1,535,548; Apr. 28.
Schilling, Oscar. (See Reuter, C., and Schilling.)
Schmidt, Oscar C., assignor to The Cincinnati Butcher's Supply Company, Cincinnati, Ohio. Unloading means for meat-cutting machines. 1,535,794; Apr. 28.
Schmitz, Peter J., Rock Island, Ill. Molder's chaplet. 1,535,347; Apr. 28.
Schmolze, Mildred C., assignor to Franklin Simon & Co., New York, N. Y. Child's dress. Des. 67,180; Apr. 28.
Schneider & Cie. (See Methlin, Nicolas E., assignor.)
Schneider, Julius, et al. (See Jaeger, Henry G., assignor.)
Schofield, Eugene H., deceased, by trustees of the Interstate Cotton Pickers, Toledo, Ohio, assignees. Cotton-picking machine. Re16,055; Apr. 28.
Schramke, Edward J., Saginaw, Mich. Vehicle. 1,535,950; Apr. 28.
Schwartz, Harry A., assignor, by mesne assignments, to National Malleable and Steel Castings Company, Cleveland, Ohio. Rust-resistant iron. 1,535,549; Apr. 28.
Schwartz, Louis, Brooklyn, N. Y. Loud speaker. 1,535,951; Jan. 28.
Schwarskopf, Jakob, Elmshorn, Germany. Polishing composition. 1,539,952; Apr. 28.
Schwimmer, Frederick J., assignor to The National Supply Company, Toledo, Ohio. Drill-pipe slip. 1,535,680; Apr. 28.
Scott, Burton, New York, N. Y. Electrically-actuated sound producer. 1,535,550; Apr. 28.
Scott, John P. (See Spencer, Clarence G., assignor.)
Scott, Walter M. (See Barnhardt, Joseph R., assignor.)
Scott, William M. (See Wyatt, James H. assignor.)
Scovill Manufacturing Company. (See Price, William B., assignor.)
Sears, Joseph D. (See Jackson, D. D., Sears, and Conlin.)
Sears, Joseph D., et al., joint trustees. (See Conlin, Frederick, assignor.)
Sears, Joseph D., et al., trustees. (See Jackson, D. D., Sears, and Conlin, assignors.)
Sears, Mabel H., executrix. (See Sears, Willard T.)
Sears, Willard T., Montclair, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Drilling machine. 1,535,257; Apr. 28.
Sears, Willard T., Montclair, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Drilling machine. 1,535,258; Apr. 28.
Sears, Willard T., deceased, Montclair, N. J.; M. H. Sears, executrix. Controlling mechanism for motor vehicles. 1,535,866; Apr. 28.
Sears, Willard T., deceased, Montclair, N. J.; M. H. Sears, executrix. Controlling mechanism for motor vehicles. 1,535,867; Apr. 28.
Sebeuste, Fred A. (See Stahley, Edward L., assignor.)
Segelhorst, August L., Whittier, Calif. Cutting-off tool. 1,535,348; Apr. 28.
Selmer, Fredrik, Christiania, Norway. Casting hollow concrete masonry. 1,535,690; Apr. 28.
Selph, Harlen M., Goose Creek, Tex. Foot accelerator. 1,535,259; Apr. 28.
Seufert, Hermann, Brooklyn, N. Y. Film-adjusting mechanism for cinematographs or the like. 1,535,795; Apr. 28.
Shaw, Frank R., East Bridgewater, assignor, by mesne assignments, to Hayes-Fay Laboratories, Inc., Boston, Mass. Tagging machine. 1,535,691; Apr. 28.
Shekter, Abraham J., Huntington, N. Y. Tonsillotome. 1,535,868; Apr. 28.
Shelton, Oscar, Yorktown, Tex. Rail-joint fastener. 1,535,369; Apr. 28.
Sherbahn, John F., McCook, Nebr. Brickkiln. 1,535,260; Apr. 28.
Shipman, Ira J., Midwest, Wyo. Carbon remover. 1,535,963; Apr. 28.
Shirek, Rudolph A. (See Lee, Arthur, assignor.)
Sidney Machine Tool Company, The. (See Getz, Alfred C., assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Pfister, Gerold, assignor.)
Sievern, Fredrick, McKeesport, Pa. Antiskid device. 1,535,551; Apr. 28.
Sievers, William O., Newell, Iowa. Elevator for silos. 1,535,499; Apr. 28.
Signaphore Company, The. (See Bechtold, Reuben E., assignor.)
Singer Manufacturing Company, The. (See Myers, Walter, assignor.)
Simmons Company. (See Stuart, Charles A., assignor.)
Simmons, John W., Cleveland, Ohio. Combined transformer and electron-tube socket. 1,535,261; Apr. 28.
Simms, Harold A., et al. (See Holloway, William T., assignor.)
Simpson, William E., assignor to Palmer-Bee Company, Detroit, Mich. Automatic stop mechanism for power hoists. 1,535,092; Apr. 28.
Skarphol, Oscar, Dalton, Minn. Corn husker. 1,535,500; Apr. 28.
Skelley, John W. (See Rockwood, G. O., McAnly, and Skelley.)
Skeppstedt, Olof, Moline, Ill. Core box. 1,535,380; Apr. 28.
Slade, George W., Baltimore, Md. Railway tie. 1,535,262; Apr. 28.
Slater, Mabel H., New York, N. Y. Doll. 1,535,796; Apr. 28.
Slepian, Joseph. (See Fortescue, C. L., Chubb, and Slepian.)
Small, Frank E., assignor to N. M. Small, Jamaica, N. Y. Piston packing ring. 1,535,552; Apr. 28.
Small, Nancy M. (See Small, Frank E., assignor.)
Smart, Frank C., Hartford, Conn. Lathe chuck. 1,535,183; Apr. 28.
Smeltera General Briquette Corporation, The. (See Stillman, Albert L., assignor.)
Smetzer, Edward A., Lakewood, Ohio. Combination rear signal and pilot light. 1,535,263; Apr. 28.
Smith, Clarence. (See Snyder, L., and Smith.)
Smith, Edward P., Pittston, Pa. Lunch box. 1,535,954; Apr. 28.
Smith, Eugene G., Chicago, Ill. Axle transmission. 1,535,501; Apr. 28.
Smith, Oscar A., East Cleveland, assignor to The National Acme Company, Cleveland, Ohio. Binding post. 1,535,693; Apr. 28.
Smith, Oscar A., East Cleveland, assignor to The National Acme Company, Cleveland, Ohio. Binding post. 1,535,694; Apr. 28.
Smith, Robert H., Columbus, Ga. Automatic cylinder cock. 1,535,631; Apr. 28.
Smith, Roy H., Kent, Ohio. Process and apparatus for threading nuts. 1,535,184; Apr. 28.
Snelling, Walter O., Allentown, Pa. Sulphurized chemical product. 1,535,740; Apr. 28.
Snodgrass, Oscar C., A. B. Hawkins, and W. F. Staggers, Mannington, W. Va. Fastener to clamp boards on scaffold brackets. 1,535,741; Apr. 28.
Snyder, Lee, and C. Smith, assignors to J. H. Northridge, Freeport, Ill. Brush and the like. 1,535,955; Apr. 28.
Snyder, Ralph S. (See Gotshall, C. R., and Snyder.)
Soest, Henry W. (See Magley, Merrill F., assignor.)
Sonora Phonograph Company. (See Wolff, Joseph, assignor.)
Sorenson, Harry N., Toledo, Ohio. Doorlock. 1,535,742; Apr. 28.
Soukup, Anthony M., Chicago, Ill. Process molding press to make molds in wax and other substances for the use of electrotypers and others. 1,535,870; Apr. 28.
Southwell, John A., assignor of one-half to C. F. Fletcher, Scranton, Pa. Mechanical spinning top. 1,535,502; Apr. 28.
Spaeder, Leo J., Erie, Pa. Paper board. 1,535,503; Apr. 28.
Spaeth, Charles, assignor to The Marvel Equipment Company, Cleveland, Ohio. Oil-dispensing device. 1,535,349; Apr. 28.
Spence, Hubert L., assignor, by mesne assignments, to National Malleable and Steel Castings Company, Cleveland, Ohio. Grate bar for sintering machines and the like. 1,535,695; Apr. 28.
Spencer, Clarence G., New York, N. Y., assignor, by mesne assignments, to J. P. Scott, Toronto, Canada. Electrolytic apparatus. 1,535,185; Apr. 28.
Sperlich, Josef, Orland, Calif. Ice-scraping device. 1,535,632; Apr. 28.
Sperry, Elmer A., Brooklyn, N. Y. Submarine contact mine. 1,535,633; Apr. 28.
Sperry Gyroscope Company, The. (See Mills, Chester B., assignor.)
Splitdorf Electrical Company. (See Nowosielski, Edward B., assignor.)
Sprague, John M. (See McLean, A. E., and Sprague.)
Sprecher, Peter W., Milwaukee, Wis., Ceiling-collar-attaching means. 1,535,696; Apr. 28.
Springer, Franklin W., Minneapolis, Minn. Electric lighting and starting system for motor vehicles. 1,535,956; Apr. 28.
Stacy, Eugene C., Tiffin, Ohio. Making swivel links. 1,535,350; Apr. 28.
Stage, Harold I., San Francisco, Calif., assignor to Ingersoll-Rand Company, Jersey City, N. J. Shoveling machine. 1,535,381; Apr. 28.
Staggers, William F. (See Snodgrass, O. C., Hawkins, and Staggers.)
Stahley, Edward L., assignor of one-half to F. A. Sebenste, Hammond, Ind. Measuring and filling device. 1,535,871; Apr. 28.
Stairs, James A., assignor to The Calorizing Company, Pittsburgh, Pa. Heat exchanger. 1,535,351; Apr. 28.
Stairs, James A., assignor to The Calorizing Company, Pittsburgh, Pa. Furnace. 1,535,352; Apr. 28.
Stalder, Merle D., Lincoln, Nebr. Attachment for faucets. 1,535,353; Apr. 28.
Stambach, Arthur, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Threading a blank. 1,535,553; Apr. 28.
Stanage, John T., Three Oaks, Mich. Beet harvester. 1,535,872; Apr. 28.
Stanley, Charles J. (See Stanley, William, and C. J.)
Stanley, William and C. J., Chicago, Ill. Artificial bait. 1,535,957; Apr. 28.

Stannard, Burt C., Berkeley, and C. W. Haffey, Selby, Calif., assignors to American Smelting and Refining Company, New York, N. Y. Separating antimony and lead. 1,535,743; Apr. 28.
Star Contrapropeller Ltd. A./S. (See Wagner, Rudolf, assignor.)
Starr, Charles E., Bellingham, assignor to Perfecto Gear Differential Co., Seattle, Wash. Differential driving mechanism. 1,535,634; Apr. 28.
Stathas, John P., Penn, N. Dak. Railway switch frog. 1,535,264; Apr. 28.
Steele, Charles W., and R. T. Griffiths, assignors to The Miller Rubber Company, Akron, Ohio. Making hollow rubber articles. 1,535,354; Apr. 28.
Steele, Roscoe, Rockaway, N. J., assignor to Wirebounds Patents Company, Box and making the same. 1,535,958; Apr. 28.
Stephens, Joseph J., Lamont, Mich. Metal building and structural unit therefor. 1,535,504; Apr. 28.
Stertsbach, Harry W., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Car-coupling device. 1,535,959; Apr. 28.
Stevens, Frank C. (See Upham, B. F., and Stevens.)
Stevens, Harry M., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,535,873; Apr. 28.
Stevens, Normal L., Bloomfield, N. J., assignor to The Meyercord Company. Display stand for hosiery. 1,535,874; Apr. 28.
Stewart, Vincent J., assignor of one-fifth to S. P. Livingston, Jacksonville, Fla. Signaling device for railways. 1,535,960; Apr. 28.
Stillman, Albert L., Plainfield, N. J., assignor to The Smelters' General Briquette Corporation, New York, N. Y. Forming loose materials into coherent bodies. 1,536,032; Apr. 28.
Stillman, Albert L., Plainfield, N. J., assignor to The Smelters' General Briquette Corporation, New York, N. Y. Agglomerating loose materials. 1,536,033; Apr. 28.
Stimpson, Edwin B., Company. (See Lupieu, Louis A., assignor.)
Stoddard, Byrd E., Minneapolis, Minn. Vehicle spring. 1,535,744; Apr. 28.
Stoetzel, Sidney A., Omaha, Nebr. Automobile signal. 1,535,265; Apr. 28.
Stolp, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Trolley-conductor insulator. 1,535,745; Apr. 28.
Stone, Elmer F. (See Jeansen, C. F., and Stone.)
Stone, Thomas L., Newark, N. J., assignor to Hampden Glazed Paper & Card Company, Holyoke, Mass. Paper. Des. 67,160; Apr. 28.
Stoney, John T., Lakewood, Ohio. Core for casting molds. 1,535,186; Apr. 28.
Stowers, John L., Habana, Cuba. Closure operator. 1,535,505; Apr. 28.
Strange, Richard T., jr., Onarga, Ill. Steering attachment for tractors. 1,535,266; Apr. 28.
Stratinsky, Joseph, Chicago, Ill. Bumper. 1,535,746; Apr. 28.
Streun, John A., assignor to Hardwicke-Etter Company, Sherman, Tex. Adjustable agitator for cotton cleaners. 1,535,186; Apr. 28.
Strong, Arthur P., Chicago, Ill., assignor to Green Engineering Company, East Chicago, Ind. Furnace stoker. 1,535,961; Apr. 28.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 67,161; Apr. 28.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 67,162; Apr. 28.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 67,163; Apr. 28.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 67,164; Apr. 28.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 67,165; Apr. 28.
Stuckert, John F., Philadelphia, Pa. Adjustable roof structure. 1,535,747; Apr. 28.
Studebaker Corporation. (See Link, Vincent, assignor.)
Sucnek, Robert, assignor to C. H. Wheeler Manufacturing Company, Melnik, Czechoslovakia. Fluid-compressing apparatus. 1,535,137; Apr. 28.
Sucnek, Robert, assignor to C. H. Wheeler Manufacturing Company, Philadelphia, Pa. Auxiliary apparatus for condensers. 1,535,897; Apr. 28.
Sucnek, Robert, assignor to C. H. Wheeler Manufacturing Company, Philadelphia, Pa. Auxiliary apparatus for condensers. 1,535,748; Apr. 28.
Sullivan Machinery Company. (See Gilman, George H., assignor.)
Summerell, Edward V., Norfolk, Va. Saw set. 1,535,962; Apr. 28.
Superior Hat Co. (See Witteoff, Edward, assignor.)
Sutton-Abramsen Engineering Company. (See Sutton, John B., assignor.)
Sutton, John B., assignor to Sutton-Abramsen Engineering Company, Pittsburgh, Pa. Special planer. 1,535,875; Apr. 28.
Swan, John W., Cleveland, Ohio. Method and means to facilitate the distribution of fuel in internal-combustion engines. 1,536,044; Apr. 28.
Swanson, Frank E., Maple Plain, Minn. Barrel-handling device. 1,535,698; Apr. 28.
Swart, George R., & Company. (See Ehlig, Harry, assignor.)
Sweatt, Blaine. (See Walsh, G. W., and Sweatt.)
Swick, Charles P., assignor to American Ring Company, Waterbury, Conn. Shade holder. 1,535,554; Apr. 28.
Symington Company, The. (See Kadel, Byers W., assignor.)
Symington Company, The. (See Wright, Ira O., assignor.)
Taft-Peirce Manufacturing Company, The. (See Bryant, Elmer J., assignor.)
Taggart, David R., Topeka, Kans. Automobile folding bed. 1,535,506; Apr. 28.
Talbot, Charles L., Chicago, Ill. Loading appliance. 1,535,690; Apr. 28.
Talbott, Frank R., assignor to The Talbott Rubber Company, Cleveland, Ohio. Pneumatic-tire tread. Des. 67,166; Apr. 28.
Talbott Rubber Company, The. (See Talbott, Frank R., assignor.)
Tanaka, Sotoso, Seattle, Wash. Hairpin. 1,535,355; Apr. 28.
Tanner, Wellington L., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Accelerator for rubber vulcanization. 1,535,963; Apr. 28.
Tatler, Edgar E., Trenton, N. J. Plate or similar article. Des. 67,167; Apr. 28.
Taylor, Edgar C. (See Baker, Harry T., assignor.)
Taylor, Edward C., Longmeadow, and C. H. Desautels, Springfield, assignors to The Fisk Rubber Company, Chicopee Falls, Mass. Air-bag puller. 1,535,382; Apr. 28.
Taylor, Lester G., et al. (See Larsen, P. L., and Ellis, assignors.)
Taylor, Marshall, Pittsburgh, Pa. Tally. 1,535,383; Apr. 28.
Teague, Edwin D., Brooklyn, N. Y., assignor to North American Lace Company, Philadelphia, Pa. Lace. Des. 67,168; Apr. 28.
Teague, Edwin D., Brooklyn, N. Y., assignor to North American Lace Company, Philadelphia, Pa. Lace. Des. 67,169; Apr. 28.
Ternstedt Manufacturing Company. (See Edgar, F. M., and Archer, assignors.)
Terrell, Edgar A., assignor to The Terrell Machine Company, Charlotte, N. C. Bobbin cleaner. Re16,058; Apr. 28.
Terrell Machine Company, The. (See Terrell, Edgar A., assignor.)
Terry, Walter J., Seattle, Wash. Dental handpiece. 1,535,187; Apr. 28.
Thacher, John J., Wethersfield, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Spindle-stop mechanism. 1,535,267; Apr. 28.
Theleen, Oscar H., assignor to Frost Manufacturing Company, Kenosha, Wis. Flushing mechanism. 1,535,268; Apr. 28.
Thermoid Rubber Company. (See Schell, Carl A., assignor.)
Thermokept Corporation. (See Bach, Nells P., assignor.)
Thermokept Corporation. (See McColl, F. P., and Willson, assignors.)
Thomas, Alonso O., Datil, N. Mex. Sewing-machine attachment. 1,535,856; Apr. 28.
Thomas, Edward G., assignor to Toledo Scale Company, Toledo, Ohio. Registering device. 1,535,749; Apr. 28.
Thomas, H. N., et al. (See Thomas, Martin E., assignor.)
Thomas, Horace T., assignor to Reo Motor Car Company, Lansing, Mich. Door-latch construction. 1,535,138; Apr. 28.
Thomas, Hubert S., Llandaff, near Cardiff, and W. E. Davies, Whitchurch, near Cardiff, Wales. Apparatus for use in the manufacture of tin plates or sheets. 1,535,876; Apr. 28.
Thomas, Jessee M., Tampa, Fla. Traveling kit. 1,535,357; Apr. 28.
Thomas, Martin E., assignor of three-fourths to G. G. Acree and one-fourth to H. N. Thomas, Plano, Tex. Drill bit. 1,536,034; Apr. 28.
Thompson, Louis W., Schenectady, N. Y., assignor to General Electric Company. Regulating system. 1,535,877; Apr. 28.
Thompson, Milton E., Ridgway, Pa. Educational record. 1,535,188; Apr. 28.
Thompson, Roy E., New York, N. Y., assignor, by mesne assignments, to Wireless Improvement Company, Jersey City, N. J. Radio communication apparatus. 1,535,189; Apr. 28.
Thomson, McLeod, Philadelphia, Pa., assignor to The Rail Joint Company, New York, N. Y. Head-free-type rail joint. 1,535,636; Apr. 28.
Thornton, Alice A. (See Thornton, Edgar R., assignor.)
Thornton, Edgar R., assignor of one-half to A. A. Thornton, Long Beach, Calif. Building tile. 1,535,358; Apr. 28.
Thornton, Frank, jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Industrial air heater. 1,535,555; Apr. 28.

Thornton, Frank, jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Toaster base. 1,535,556; Apr. 28.

Tidlund, Edwin. (See Bethel, C. and Tidlund.)

Tilsey, William O. (See Watson, P. B., and Tilsey.)

Tinker, Frank, Erdington, Birmingham, England. Production of petrol. 1,535,507; Apr. 28.

Titchener, Paul F., Binghamton, N. Y. Bathroom appliance. Des. 67,170; Apr. 28.

Titeflex Metal Hose Co. (See Fulton, William H., assignor.)

Tilley, Arthur J., Brooklyn, assignor to Edwd. F. Caldwell & Co., Inc., New York, N. Y. Fountain. 1,535,964; Apr. 28.

Tobias, Edvard, Prescott, Wis. Hayrack. 1,535,965; Apr. 28.

Todd, William C., and J. W. Pomeroy, Victoria, British Columbia, Canada. Rotatable water sprinkler. 1,535,508; Apr. 28.

Toledo Automotive Products Company, The. (See Claa, Angelo R., assignor.)

Toledo Scale Company. (See Thomas, Edward G., assignor.)

Toney, Frederick A., Detroit, Mich. Tractor. 1,535,384; Apr. 28.

Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Selective signaling apparatus and circuits. 1,535,269; Apr. 28.

Tousey, Sinclair, New York, N. Y. X-ray filter or screen. 1,535,359; Apr. 28.

Townsend, Arthur J. (See Naugle, H. M., and Townsend.)

Townsend, John S., assignor to Whiting Corporation, Harvey, Ill. Grab bucket. 1,535,878; Apr. 28.

Tracy, Warren C., Los Angeles, Calif. Filter. 1,535,750; Apr. 28.

Traver, Oliver C., Schenectady, N. Y., assignor to General Electric Company. Electrical system of control. 1,535,879; Apr. 28.

Tribe, Charles, executor or administrator. (See Hele-Shaw, H. S., and Tribe.)

Tribe, Ernest. (See Hele-Shaw, H. S., and Tribe.)

Troland, Leonard T., Malden, assignor to Kalmus, Comstock & Wescott, Inc., Boston, Mass. Selective photographic hardening. 1,535,700; Apr. 28.

Trundle, George T., jr., Cleveland, and B. G. Carlson, Cleveland Heights, Ohio. Adjusting mechanism for bag-tube cutters. 1,535,899; Apr. 28.

Truscon Steel Company. (See Kane, Thomas H., assignor.)

Tucker, Boris, assignor of one-half to S. Greenstein, Brooklyn, N. Y. Feeding device for producing spiral stitches. 1,535,966; Apr. 28.

Tunstall, Harry, Fair Haven, assignor to Alsatian Machine Works, Limited, Boston, Mass. Combing machine. 1,535,701; Apr. 28.

Turenne, Wilfred J., Danvers, Mass. Thermostatically-controlled iron. 1,535,751; Apr. 28.

Turner, Jessee W., Brownsville, Pa. Rubber heel for footwear. 1,535,967; Apr. 28.

Twardowsky, John, Chicago, Ill. Diaphragm-actuated mechanism. 1,536,035; Apr. 28.

Twardowsky, John. (See Hanson, C. C., and Twardowsky.)

Tyler, Ralph G., Bradford, Pa. Golf club. 1,535,270; Apr. 28.

Ullrich, Emil H. W., New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Safety inclosed switch. 1,535,636; Apr. 28.

Undertakers' Supply Company. (See Drennan, Homer H., assignor.)

Union Drawn Steel Company. (See Leech, Jacob T., assignor.)

Union Special Machine Company. (See Onderdonk, Lansing, assignor.)

United Alloy Steel Corporation. (See Charls, George H., assignor.)

United Cigarette Machine Company, Inc. (See Koerner, Ewald, assignor.)

United Printing Machinery Company. (See Upham, B. F., and Stevens, assignors.)

United States Chain & Forging Company. (See Bond, Frank A., assignor.)

United States Chain & Forging Company. (See McGowen, William R., assignor.)

United States Hat Machinery Corporation. (See Genest, Homer A., assignor.)

United States Hat Machinery Corporation. (See Lorens, William A., assignor.)

Universe Corporation. (See Hanson, C. C., and Twardowsky, assignors.)

Universal Oil Products Company. (See Dubbs, Carbon P., assignor.)

Universal Oil Products Company. (See Egloff, Gustav, assignor.)

Universal Oil Products Company. (See Egloff, G., and Benner, assignors.)

Universal Oil Products Company. (See Howard, William E., assignor.)

Universal Oil Products Company. (See Pollock, Robert T., assignor.)

Upham, Burt F., Brookline, and F. C. Stevens, Cohasset, assignors to United Printing Machinery Company, Boston, Mass. Bronzing machine. 1,535,752; Apr. 28.

Ursino, Pasquale, Seattle, Wash. Excavating apparatus. 1,535,509; Apr. 28.

Valley Mould and Iron Corporation. (See Coates, Ray G., assignor.)

Valley Mould & Iron Corporation. (See Perry, John E., assignor.)

Valley Mould and Iron Corporation. (See Williams, Edward H., assignor.)

Van Ardel, Wallace B. (See Richter, G. A., and Van Ardel.)

Vanderlip, Louis C., Elkhart, Ind. Motor-vehicle lock. 1,535,271; Apr. 28.

Van Eweyk, William F., assignor to Milwaukee Brass Manufacturing Company, Milwaukee, Wis. Laundry faucet. 1,535,139; Apr. 28.

Van Iderstine, Raymond, Glen Ridge, N. J. Display carton. 1,535,968; Apr. 28.

Van Metre, Thomas E., Newport, R. I., assignor to Government of the United States. Torpedo. 1,535,190; Apr. 28.

Venetz, Andrew A., Great Falls, Mont. Attachment for stoves. 1,535,637; Apr. 28.

Vetter, Henry J., New York, N. Y. Box attachments. 1,535,969; Apr. 28.

Vickery, Henry F., Wellington, New Zealand. Electric house or lighting circuit. 1,535,360; Apr. 28.

Vivaudou, Victor, New York, N. Y. Container. 1,535,140; Apr. 28.

Von Edelkrantz, William L., San Francisco, Calif. Composition of matter for tire fillers. 1,535,861; Apr. 28.

Vortex Mfg. Co., The. (See Barbieri, Cesare, assignor.)

Vroom, Guysbert B., Philadelphia, Pa. Altitude-difference instrument. 1,535,272; Apr. 28.

Wade, James D., Gonzales, Tex. Apparatus for Pumping wells. 1,535,141; Apr. 28.

Wade, James D., Gonzales, Tex. Packer for pumps. 1,535,385; Apr. 28.

Wadsworth, Charles F., Chicago, Ill. Oil burner. 1,535,510; Apr. 28.

Wadsworth Watch Case Company, The. (See Conant, Arthur P., assignor.)

Waggonner, Isaac N., San Diego, Calif. Trap nest. 1,535,512; Apr. 28.

Wagner, Rudolf, Hamburg, Germany, assignor to Star Contrapropeller Ltd. A/S., Christiania, Norway. Double propeller for water and air craft. 1,535,511; Apr. 28.

Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft-detecting mechanism. 1,535,362; Apr. 28.

Wald, Julius H. (See Malm, Johan F., assignor.)

Walden Knife Company. (See Henry, Ferdinand G., assignor.)

Walker, Henry B., and C. O. Brown, Lancaster, assignors to Fairfield Engineering Company, Marion, Ohio. Conveyer. 1,535,336; Apr. 28.

Wallace, Halbert C., Kansas City, Mo. Fan blower. 1,535,363; Apr. 28.

Wallmann, Johann G., Oakland, Calif. Electric heating unit. 1,535,638; Apr. 28.

Walsh, George W., Boston, and B. Sweatt, Everett, Mass.; said Sweatt assignor, by mesne assignments, to said Walsh. Liquid-fuel burner. 1,535,702; Apr. 28.

Warnocke, Bernard, Breese, Ill. Poultry roost. 1,535,518; Apr. 28.

Warner, Paul D., Chicago, Ill. Wall construction. 1,535,514; Apr. 28.

Waterman, Royal A., Grand Rapids, Mich. Rod holder. 1,535,703; Apr. 28.

Waters, Ray E. (See Waters, T. E. and R. E.)

Waters, Thomas E. and R. E., Hastings, Mich. Display device for caps. 1,535,515; Apr. 28.

Watson, Percy E., and W. O. Tilsley, Te Aroha, New Zealand. Photographic-printing masks. 1,535,142; Apr. 28.

Weaver Manufacturing Company. (See Buffington, Harry C., assignor.)

Weber, Clifford A. M., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Means for overcoming load inertia. 1,535,639; Apr. 28.

Webster, Hyleman A. (See Kanowitz, S. B., and Webster.)

Wegstein, Joseph C., Washburn, Ill. Window structure. 1,535,273; Apr. 28.

Weiner Brothers, Inc. (See Kagan, Alexander, assignor.)

Weiser, Grant G., Hellertown, Pa. Automatic safety gate. 1,535,763; Apr. 28.

Welch, Dell, Lorcau, Mont. Tree-sawing apparatus. 1,535,970; Apr. 28.

Welch, James E., Roanoke, Va. Molding and apparatus therefor. 1,535,274; Apr. 28.

Wells, Jack E. (See Chrisman, A. M., and Wells.)

Wemp, Ernest E., Detroit, Mich. Constructing clutch disks. 1,535,191; Apr. 28.

Wensley, Roy J. (See Moss, C. M., and Wensley.)

Western Brick Company. (See Doughty, Ivan N., assignor.)

Western Electric Company. (See Harrison, Henry C., assignor.)

Western Electric Company. (See Maxfield, J. P., and Harrison, assignors.)

Western Electric Company. (See Oswald, Arthur A., assignor.)

Western Union Telegraph Company, The. (See Perkins, Samuel W., assignor.)

Westin, Oliver P., Florence, Wis. Rotary pump. 1,535,275; Apr. 28.

Westinghouse Electric & Manufacturing Company. (See Baxter, Harold G., assignor.)

Westinghouse Electric & Manufacturing Company. (See Bethel, C., and Tidlund, assignors.)

Westinghouse Electric & Manufacturing Company. (See Colby, Ora A., assignor.)

Westinghouse Electric & Manufacturing Company. (See Dorfman, Lee, assignor.)

Westinghouse Electric & Manufacturing Company. (See Eschholz, Otto H., assignor.)

Westinghouse Electric & Manufacturing Company. (See Evans, Robert D., assignor.)

Westinghouse Electric & Manufacturing Company. (See Evans, R. D., and Pierce, assignors.)

Westinghouse Electric & Manufacturing Company. (See Fortescue, Charles L., assignor.)

Westinghouse Electric & Manufacturing Company. (See Fortescue, C. L., Chubb, and Stephan, assignors.)

Westinghouse Electric & Manufacturing Company. (See Himes, Walter H., assignor.)

Westinghouse Electric & Manufacturing Company. (See MacGahan, Paul, assignor.)

Westinghouse Electric & Manufacturing Company. (See Moss, C. M., and Wensley, assignors.)

Westinghouse Electric & Manufacturing Company. (See Nyman, Alexander, assignor.)

Westinghouse Electric & Manufacturing Company. (See Pilling, Norman B., assignor.)

Westinghouse Electric & Manufacturing Company. (See Reid, Thomas A., assignor.)

Westinghouse Electric & Manufacturing Company. (See Stambach, Arthur, assignor.)

Westinghouse Electric & Manufacturing Company. (See Thornton, Frank, jr., assignor.)

Westinghouse Electric & Manufacturing Company. (See Uelrich, Emil H. W., assignor.)

Westinghouse Electric & Manufacturing Company. (See Weber, Clifford A. M., assignor.)

Westinghouse Electric Products Company. (See Forshee, Frank F., assignor.)

Westmoreland, Eames L., Ogden, Utah. Chassis extension for automobiles. 1,535,880; Apr. 28.

Wheeler, C. H., Manufacturing Company. (See Sucsek, Robert, assignor.)

Wheeler-Schebler Carburetor, The. (See Bessom, Earl A., assignor.)

Wheeling Steel Corporation. (See Holloway, A. P., and Peacock, assignors.)

Wheeling Steel Corporation. (See Peacock, Samuel, assignor.)

Whitaker, Frank L., Olney, Ill. Telephonic electrode and constructing same. 1,535,276; Apr. 28.

White, Burley. (See White, G. and B., and Counts.)

White, Glen, B. White, and C. E. Counts, Henlawson, W. Va. Railway switch. 1,535,881; Apr. 28.

Whitehead, Hugh H., Palmetto, Fla. Crate-making machine. 1,535,882; Apr. 28.

Whitehead, Richard H. (See Porter W. E., and Whitehead.)

Whiting Corporation. (See Townsend, John S., assignor.)

Whitlock, Edwin L., and J. Madison, New York, N. Y. Doll. Des. 67,171; Apr. 28.

Whitlock, Edwin L., and J. Madison, New York, N. Y. Doll. Des. 67,172; Apr. 28.

Whitridge, John C., G. T. Johnson, and H. H. Wolfe, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Car-coupling device. 1,535,971; Apr. 28.

Whitridge, John C., G. T. Johnson, and H. H. Wolfe, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Car-coupling device. 1,535,972; Apr. 28.

Whitridge, John C., G. T. Johnson, and H. H. Wolfe, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Car-coupling device. 1,535,973; Apr. 28.

Whitridge, John C., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Car-coupling device. 1,535,974; Apr. 28.

Whitstruck, Carl G., Elgin, Ill. Brooch pin or the like. 1,535,975; Apr. 28.

Wickenden, Leonard, Flushing, assignor to Industrial Chemical Company, New York, N. Y. Decolorizing carbon and producing the same. 1,535,797; Apr. 28.

Wickenden, Leonard, Flushing, assignor to Industrial Chemical Company, New York, N. Y. Decolorizing carbon and producing the same. 1,535,798; Apr. 28.

Wiener, Paul L., New York, N. Y. Skin. 1,535,887; Apr. 28.

Wilbur, Stephen B., Akron, Ohio. Tire spreader. 1,535,192; Apr. 28.

Wilcox, Corbie, Mart, Tex. Trap. 1,535,388; Apr. 28.

Wild, Alfred, Milwaukee, Wis. Automatic water-heater controller. 1,535,193; Apr. 28.

Wilhelm, Russell H., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Mounting for rock drills. 1,535,143; Apr. 28.

Wilhelm, Russell H., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Spike-holding device. 1,535,704; Apr. 28.

Wilke, Carl D., Beatrice, Nebr. Proofer. 1,535,705; Apr. 28.

Wilkie, David, Chattanooga, Tenn., assignor to The Guardian Savings and Trust Company, Cleveland, Ohio. Box-forming machine. 1,535,441; Apr. 28.

Wilkinson, Louis H. (See Savage, G. E., and Wilkinson.)

Williams, Arthur S., Ithaca, N. Y. Method of and apparatus for separating gases and liquids. 1,535,754; Apr. 28.

Williams, D. T., Valve Company, The. (See Ernst, Harry J., assignor.)

Williams, Edward H., Sharon, assignor to Valley Mould and Iron Corporation, Sharpsville, Pa. Casting and mold. 1,535,194; Apr. 28.

Willison, Walter W. (See McColl, F. P., and Willison.)

Wilson, Frank R., Ardley, assignor of one-half to J. MacLeod, Vancouver, British Columbia, Canada. Mowing-machine cutter bar. 1,535,640; Apr. 28.

Wilson, Frederick D., assignor to Deere and Company, Moline, Ill. Bundle carrier. 1,535,442; Apr. 28.

Wilson, Frederick D., assignor to Deere and Company, Moline, Ill. Elevator for corn harvesters. 1,535,443; Apr. 28.

Wilson, George C., Lincoln, Nebr. Valve-spring compressor. 1,535,976; Apr. 28.

Wilson, J. G., Corporation, The. (See Middleditch, James F., assignor.)

Wine Railway Appliance Company. (See Hannaford, Cleon M., assignor.)

Winne, Harry A., Schenectady, N. Y., assignor to General Electric Company. Electric-furnace control. 1,535,883; Apr. 28.

Wirebounds Patents Company. (See Steele, Roscoe, assignor.)

Wireless Improvement Company. (See Thompson, Ray E., assignor.)

Wirt Company. (See Ermold, Elmer A., assignor.)

Wittcoff, Edward, assignor to Superior Hat Co., St. Louis, Mo. Hat. 1,535,889; Apr. 28.

Wolcott, Henry, Providence, R. I. Ornamental chain. 1,535,884; Apr. 28.

Wolfe, Harry H. (See Whitridge, J. C., Johnson, and Wolfe.)

Wolff, Joseph, Brooklyn, N. Y., assignor to Sonora Phonograph Company, Inc. Phonograph cabinet. Des. 67,173; Apr. 28.

Wolstead, Olof P., Minneapolis, Minn. Adjustable supporting device. 1,535,516; Apr. 28.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Lighting-fixture. Des. 67,174; Apr. 28.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Lighting-fixture. Des. 67,175; Apr. 28.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Lighting-fixture canopy. Des. 67,176; Apr. 28.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Lighting-fixture canopy. Des. 67,177; Apr. 28.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Lighting fixture spindle. Des. 67,178; Apr. 28.

Wood, Thomas L., Dallas, Tex. Toy train. 1,535,561; Apr. 28.

Woodard, William E., Forest Hills, N. Y. Locomotive. 1,536,036; Apr. 28.

Wooster, James B., Buffalo, N. Y. Educational device. 1,535,706; Apr. 28.

Woroalla, Joseph, Fort Hancock, N. J. Window structure. 1,535,977; Apr. 28.

Worthington Pump & Machinery Corporation. (See Grace, John F., assignor.)

Wren, Harvey A., Navy Yard, assignor of forty one-hundredths to J. L. Paul, Johns Island, S. C. Rail joint. 1,535,885; Apr. 28.

Wright, Carl J., Toledo, Ohio, assignor to Doherty Research Company, New York, N. Y. Furnace. 1,535,277; Apr. 28.

Wright, Ira O., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Draft rigging. Re16,057; Apr. 28.

Wyatt, James H., Kirklyn, assignor to W. M. Scott, Tredyffrin Township, Pa. Switching apparatus. 1,535,390; Apr. 28.

Yoder, Allen E., Mount Carmel, Pa. Hook. 1,535,279; Apr. 28.

Yarbrough, John, High Shoals, N. C. Floor jack. 1,535,278; Apr. 28.

Young, George E., Schenectady, N. Y., assignor to General Electric Company. Searchlight. 1,536,045; Apr. 28.

Zarker, John J., Wiconisco, Pa. Game apparatus. 1,535,280; Apr. 28.

Zeff, Samuel. (See Colella, L. A., and Zeff.)

Zilliox, Frank. (See Zilliox, John, assignor.)

Zilliox, John, Orchard Park, assignor of one-half to F. Zilliox, Buffalo, N. Y. Wrench. 1,535,281; Apr. 28.

Zschunke, Otto E., Lodi, Calif. Vehicle headlight. 1,535,282; Apr. 28.

Zulver, Cornelis, London, England. Liquid-fuel burner or atomizer. 1,535,886; Apr. 28.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 28TH DAY OF APRIL, 1925.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Accelerator, Foot. H. M. Selph. 1,535,259; Apr. 28.
Acid solutions, Producing chromic. A. W. Burwell. 1,535,100; Apr. 28.
Acids and proteids and process of making. Product produced from sulphonic. O. T. Joslin. 1,536,012; Apr. 28.
Advertising device. L. E. Curvelier. 1,535,521; Apr. 28.
Aeroplane. J. P. Langfelder. 1,535,532; Apr. 28.
Aeroplane wing. W. L. Gilmore. 1,535,526; Apr. 28.
Aeroplanes, Fuel tank for. M. Garagnani. 1,535,462; Apr. 28.
Agglomerating loose materials. A. L. Stillman. 1,536,033; Apr. 28.
Air and fuel heater. W. J. Bliffert. 1,535,095; Apr. 28.
Air and water injector. C. H. Desautels. 1,535,401; Apr. 28.
Air-bag puller. E. C. Taylor and C. H. Desautels. 1,535,382; Apr. 28.
Air-brake equipment. J. M. Dapron. 1,535,455; Apr. 28.
Air cleaner. M. E. Anderson. 1,535,800; Apr. 28.
Air compressor and vacuum pump, Combination. E. A. Rix. 1,535,856; Apr. 28.
Air heater, Industrial. F. Thornton, jr. 1,535,555; Apr. 28.
Airplane catapult. C. F. Jeansen and E. F. Stone. 1,535,475; Apr. 28.
Air refrigerating apparatus. A. H. Nicholson. 1,535,848; Apr. 28.
Alloy. C. T. Evans. 1,535,910; Apr. 28.
Alloy, Nonferrous. W. B. Price. 1,535,542; Apr. 28.
Alloy of iron, Resistant-surface. G. H. Charls. 1,535,763–4; Apr. 28.
Alloys, Treating. N. B. Pilling. 1,535,620; Apr. 28.
Altitude-difference instrument. G. B. Vroom. 1,535,272; Apr. 28.
Aluminum and the like with sheets of heavy metal, Facing sheets or objects of. A. Passalacqua. 1,535,492; Apr. 28.
Amplifier. J. A. Hayder. 1,535,789; Apr. 28.
Amplifying high-frequency currents, Arrangement for. W. Schaffer. 1,535,182; Apr. 28.
Amusement apparatus. H. F. Maynes. 1,535,237; Apr. 28.
Anchor, Stockless. Ap T. Jones. 1,535,420; Apr. 28.
Anemometer. J. E. Jones. 1,535,421; Apr. 28.
Annealing steel sheets. I. J. Koehnline and S. Peacock. 1,535,317; Apr. 28.
Antimony and lead, Separating. B. C. Stannard and C. W. Haffey. 1,535,743; Apr. 28.
Antiskid device. C. F. Morgan. 1,535,620; Apr. 28.
Antiskid device. F. Sievern. 1,535,551; Apr. 28.
Attachment device. H. P. Roberts. 1,535,253; Apr. 28.
Automatic safety gate. G. G. Weiser. 1,535,753; Apr. 28.
Automatic substation. C. M. Moss and R. J. Wensley. 1,535,623; Apr. 28.
Automobile bumper. R. T. Newton. 1,535,847; Apr. 28.
Automobile flag holder. C. Buehler. 1,535,396; Apr. 28.
Automobile glare eliminator. W. H. L. Howard. 1,536,006; Apr. 28.
Automobile hand grasp. C. H. Gustafson. 1,535,771; Apr. 28.
Automobile signal. S. A. Stoetzel. 1,535,265; Apr. 28.
Automobile traffic signal. E. L. Hilmer. 1,535,836; Apr. 28.
Automobiles, Auxiliary driving attachment for. C. H. Ryan. 1,535,255; Apr. 28.
Automobiles, Chassis extension for. E. L. Westmoreland. 1,535,880; Apr. 28.
Automobiles, Emergency supply tank for. J. Bitman. 1,535,565; Apr. 28.
Automobiles, Removable side window for. J. F. Brommer. 1,535,648; Apr. 28.
Axle transmission. E. G. Smith. 1,535,501; Apr. 28.
Bag tie. J. Malm. 1,535,732; Apr. 28.
Bar-tube cutters, Adjusting mechanism for. G. T. Trundle, jr., and B. G. Carlson. 1,535,899; Apr. 28.
Bait, Artificial. W. and C. J. Stanley. 1,535,967; Apr. 28.
Balance escapement. J. B. Bates. 1,535,286; Apr. 28.
Balancer for polyphase furnaces, Negative-phase-sequence. C. L. G. Fortescue. 1,535,595; Apr. 28.
Bar: *See*—
Mowing-machine cutter bar.

Barrel-handling device. F. E. Swanson. 1,535,698; Apr. 28.
Barrels and casks or parts thereof, Jointing shells of. E. A. Bolinder. 1,535,518; Apr. 28.
Baseball game device. R. Hoffman. 1,535,918; Apr. 28.
Basket, Metal. H. W. A. Prange. 1,535,944; Apr. 28.
Bathroom appliance. P. F. Titchener. Des. 67,170; Apr. 28.
Battery holddown. H. J. Davoll. 1,535,906; Apr. 28.
Battery indicator and cut-out. W. A. Morgan. 1,535,622; Apr. 28.
Bearing housing. C. Bethel and E. Tidlund. 1,535,560; Apr. 28.
Bed, Automobile folding. D. R. Taggart. 1,535,506; Apr. 28.
Bedstead end frame. C. A. Stuart. Des. 67,161–5; Apr. 28.
Beehive attachment. M. M. Jonian. 1,535,920; Apr. 28.
Berry box. E. O. Nordstrom. 1,535,436; Apr. 28.
Beverage cooler. C. A. Look. 1,535,927; Apr. 28.
Bicycle gearing. L. F. Burke. 1,535,714; Apr. 28.
Bicycles, Pedal for. J. H. Graham. 1,535,601; Apr. 28.
Binder-blank feed mechanism. A. J. Kusterer. 1,535,319; Apr. 28.
Binding post. O. A. Smith. 1,535693–4; Apr. 28.
Biscuit-making apparatus. C. Ornbo. 1,535,853; Apr. 28.
Bit: *See*—
Drill bit.
Bit holder, Extension-. F. O. Race. 1,535,543; Apr. 28.
Block: *See*—
Clamp block.
Blow iron. G. V. McCauley. 1,535,168; Apr. 28.
Board: *See*—
Paper board.
Boat construction. W. I. Hay. 1,535,155; Apr. 28.
Boat, Kiddie. C. H. Guischard. 1,535,828; Apr. 28.
Bobbin and making the same, Protected. E. C. Benner. 1,535,093; Apr. 28.
Bobbin cleaner. E. A. Terrell. Re16,056; Apr. 28.
Bodice. M. Henderson-Bland. 1,535,528; Apr. 28.
Body lifter. H. H. Drennan. 1,535,208; Apr. 28.
Boiler cleaning. G. I. Rawson. 1,535,495; Apr. 28.
Boiler-flue construction. G. E. Maier. 1,535,235; Apr. 28.
Bookbinding machine. G. Isliker-Brauen. 1,535,415; Apr. 28.
Bottle cover, Nursing-. J. G. Dupont. Des. 67,140; Apr. 28.
Bottle, Water. W. Bood. 1,535,448; Apr. 28.
Bouquet holder, Floral. G. A. Llewellyn. Des. 67,150; Apr. 28.
Box: *See*—
Berry box.
Core box.
Dough box.
Lunch box.
Necktie box.
Stuffing box.
Toy box.
Tubular box.
Box and making the same. R. Steele. 1,535,958; Apr. 28.
Box attachment. H. J. Vetter. 1,535,969; Apr. 28.
Box-forming machine. S. Cooper. 1,535,453; Apr. 28.
Box-forming machine. D. Gault. 1,535,468; Apr. 28.
Box-forming machine. D. Wilkie. 1,535,441; Apr. 28.
Brace: *See*—
Fender-protecting brace.
Folding brace.
Tire-rack brace.
Bracket: *See*—
Bumper bracket.
Braid for hats. E. M. Poons. 1,535,683; Apr. 28.
Brake. R. B. Bell. 1,535,092; Apr. 28.
Brake mechanism. V. Link. 1,535,780; Apr. 28.
Brassière. W. Kops. 1,535,838; Apr. 28.
Bread, Apparatus for mixing. W. A. Darrah. 1,535,204; Apr. 28.
Brick-sanding machine, Fuco-. I. N. Doughty. 1,535,402; Apr. 28.
Brick-stack lifter. P. A. Meehan. 1,535,430; Apr. 28.
Brickkiln. J. F. Sherbahn. 1,535,260; Apr. 28.
Brickmaking machines, Floating strike for. I. C. Frey. 1,535,308; Apr. 28.
Bronzing machine. B. F. Upham and F. C. Stevens. 1,535,752; Apr. 28.
Brooch pin or the like. C. G. Whitstruck. 1,535,975; Apr. 28.

Broom heads, Bridle for. C. E. Keyes. 1,535,161; Apr. 28.
Brush. J. J. Peterson. 1,535,628; Apr. 28.
Brush and the like. L. Snyder and C. Smith. 1,535,955; Apr. 28.
Bucket, Grab. J. S. Townsend. 1,535,878; Apr. 28.
Building and structural units therefor, Metal. J. J. Stephens. 1,535,504; Apr. 28.
Bulb, Electric-lamp. J. W. Lundy. 1,535,486; Apr. 28.
Bumper. J. Stratinsky. 1,535,746; Apr. 28.
Bumper and support, Spring-bar. E. G. Dann. 1,535,581; Apr. 28.
Bumper bracket. W. R. McGowen. 1,535,173; Apr. 28.
Bumper brackets, Machine for beading. J. F. Beans and A. J. Mercier. 1,535,759; Apr. 28.
Bundle carrier. F. D. Wilson. 1,535,442; Apr. 28.

Seat spring. Vehicle spring.
Spring assembly. E. M. Forehand. 1,535,116; Apr. 28.
Spring wheel. D. E. Fults and O. L. Grigg. 1,535,821; Apr. 28.
Springs, Apparatus for forming and cooling leaf. A. P. Crell. 1,535,454; Apr. 28.
Sprinkler: *See*—
Water sprinkler.
Sprocket wheel, Flanged. L. E. Edmunds. 1,535,114; Apr. 28.
Stacking machine. J. E. Miller. 1,535,678; Apr. 28.
Stamp-affixing device. R. J. Gengler. 1,535,596; Apr. 28.
Stand: *See*—
Dispensing stand. Music stand.
Display stand.
Steam and water separator. A. L. Prout and A. R. Reynolds. 1,535,945; Apr. 28.
Step-by-step motor. P. van S. Kalff. 1,536,021; Apr. 28.
Stereotype mold. E. E. Beard. 1,535,091; Apr. 28.
Stock rack. T. P. Little. 1,535,425; Apr. 28.
Stocking and making same. J. Hadfield, jr. Re16,053; Apr. 28.
Stone-gathering machine. P. L. Larsen and J. O. Ellis. 1,535,521; Apr. 28.
Stove. B. R. Kahn. 1,535,476; Apr. 28.
Stove, Camp. C. S. Deffenbough. 1,535,652; Apr. 28.
Stoves, Attachment for. A. A. Venets. 1,535,637; Apr. 28.
Stoves, Guard for gas. P. Kavanagh. 1,536,016; Apr. 28.
Straightedge, Paper hanger's folding. C. W. Hardin. 1,535,917; Apr. 28.
Strainer, Oil. B. Asher. 1,535,801; Apr. 28.
Strainer, Sink. R. R. Boyles. 1,535,761; Apr. 28.
Strap for wearing apparel, Shoulder. A. A. Hodgkins. 1,535,666; Apr. 28.
Strata in bore holes, Locating water-bearing. F. W. Huber. 1,536,007; Apr. 28.
Strip sheets, Making. H. M. Naugle and A. J. Townsend. 1,536,028; Apr. 28.
Strip-winding mechanism and reel. M. F. Moran. 1,535,372; Apr. 28.
Stuffing box. C. C. Hansen and J. Twardowsky. 1,535,998; Apr. 28.
Stump puller. A. Adams. 1,535,557; Apr. 28.
Sucker-rod elevator. W. O'Bannon. 1,535,525; Apr. 28.
Sulphur from its ores, Extracting. E. H. Hedges. 1,535,468; Apr. 28.
Sulphurized chemical product. W. O. Snelling. 1,535,740; Apr. 28.
Supporting device, Adjustable. O. P. Wolstead. 1,535,510; Apr. 28.
Swifts, Attachment for. M. Greenway. 1,535,906; Apr. 28.
Swimming apparatus. G. G. B. Kjelgaard. 1,535,481; Apr. 28.
Swimming glove. J. Bocick. 1,535,896; Apr. 28.
Swing hanger, Pivoted. W. W. Degler. 1,535,718; Apr. 28.

Switch: *See*—
Electric switch. Push-button switch.
Electric time switch. Railway switch.
Electrical switch. Safety inclosed switch.
Motor switch. Talking-machine light switch.
Switch. L. F. Blume. 1,535,997; Apr. 28.
Switching apparatus. J. H. Wyatt. 1,535,390; Apr. 28.
Swivel links, Making. E. C. Sisey. 1,535,950; Apr. 28.
Synchronization, Method of and apparatus for. E. Belin. 1,535,979; Apr. 28.
Table: *See*—
Drain table. Game table.
Folding table.
Table cover, Card-. D. J. Blackmore. 1,535,895; Apr. 28.
Table talkers and making the same, Support for. D. H. Moss. 1,535,784; Apr. 28.
Tables, Slide for extension. C. Lundgren and H. Hedin. 1,535,427; Apr. 28.
Tagging machine. F. R. Shaw. 1,535,601; Apr. 28.
Talking-machine light switch. O. Larsen. 1,535,922; Apr. 28.
Tally. M. Taylor. 1,535,383; Apr. 28.
Tank: *See*—
Fuel-reserve tank.
Tank bails, Producing. A. H. Canfield. 1,535,715; Apr. 28.
Telegraph system. S. W. Perkins. 1,535,627; Apr. 28.
Telegraphy. H. S. Percival. 1,535,244; Apr. 28.
Telephone headset. R. B. Baker. 1,535,284; Apr. 28.
Telephone index. J. McComas. 1,535,843; Apr. 28.
Telephone instruments, Guide chart for automatic. M. L. Ong. 1,535,490; Apr. 28.
Telephone sets, Headband for. V. Durbin. 1,535,290; Apr. 28.
Telephonic electrode and constructing same. F. L. Whitaker. 1,535,276; Apr. 28.
Tennis rackets, Tightening the strings of. J. McDougall. 1,535,125; Apr. 28.
Theft-indicating device. J. J. Darrell. 1,535,582; Apr. 28.
Thermic telltale. D. Macdonald. 1,535,536; Apr. 28.
Thermometer tubing, Clinical-. M. Noda. 1,536,849; Apr. 28.
Thermostatically-controlled iron. W. J. Turenne. 1,535,751; Apr. 28.
Thread-cutting die. O. S. Lee. 1,535,726; Apr. 28.
Thread gauge. E. Buckingham. 1,535,095; Apr. 28.
Threading a blank. A. Stambach. 1,535,553; Apr. 28.
Thrust mechanism. T. S. Miller. 1,535,238; Apr. 28.
Ticket holder. B. Halansky. 1,535,997; Apr. 28.
Tie: *See*—
Bag tie. Railway tie.
Ball tie.
Tile, brick, and the like, Vitreous enameled. J. H. E. Francis. 1,535,801; Apr. 28.
Tile, Building. E. E. Thornton. 1,535,358; Apr. 28.
Time release, Mechanical. E. C. Leake. 1,535,923; Apr. 28.
Tin plates or sheets, Apparatus for use in the manufacture of. H. S. Thomas and W. R. Davies. 1,535,876; Apr. 28.
Tire beads, Making. M. A. Marquette. 1,535,420; Apr. 28.
Tire, Cushion. J. W. Kuhn. 1,536,023; Apr. 28.
Tire factories, Conveyer for. M. H. Pade. 1,535,238; Apr. 28.
Tire fillers, Composition of matter for. W. L. von Edelkrantz. 1,535,361; Apr. 28.
Tire-rack brace. J. Q. Roberts. 1,535,857; Apr. 28.
Tire spreader. S. B. Wilbur. 1,535,192; Apr. 28.
Tire stock and making same, Cord-. J. S. Brennan. 1,535,647; Apr. 28.
Tire tread. S. S. Miller. Des. 67,154; Apr. 28.
Tire tread, Pneumatic-. F. R. Talbott. Des. 67,166; Apr. 28.
Toaster. O. A. Colby. 1,535,580; Apr. 28.
Toaster base. F. Thornton, jr. 1,535,556; Apr. 28.
Tonsillotome. A. J. Shekter. 1,535,868; Apr. 28.
Top, Mechanical spinning. J. A. Southwell. 1,535,502; Apr. 28.
Torpedo. T. E. Van Metre. 1,535,190; Apr. 28.
Toy box. E. Cardini. 1,535,519; Apr. 28.
Toy-Coasting. H. E. Frevert. 1,535,461; Apr. 28.
Toy, Hoople. L. Aptowicz. 1,535,144; Apr. 28.
Toy, Motion. T. A. Billmeyer. 1,535,564; Apr. 28.
Toy train. T. L. Wood. 1,536,061; Apr. 28.
Tracing and printing device. S. L. Parmenter. 1,535,242; Apr. 28.
Tractor. J. N. Escandon. 1,535,523; Apr. 28.
Tractor. F. A. Toney. 1,535,384; Apr. 28.
Tractor cultivator. A. G. and A. Ronning. 1,535,439; Apr. 28.
Tractors and motor vehicles, Attachment for. A. W. Knutson. 1,536,483; Apr. 28.
Tractors, Steering attachment for. R. T. Strange, jr. 1,535,266; Apr. 28.
Traffic signal. D. E. Cota. 1,535,105; Apr. 28.
Train-control mechanism. W. B. Murray. 1,535,241; Apr. 28.
Transformer. R. V. Bingay. 1,535,094; Apr. 28.
Transformer and electron-tube socket, Combined. J. W. Simmons. 1,535,261; Apr. 28.
Trap: *See*—
Mercury-vapor trap.

Trap. C. Wilcox. 1,535,389; Apr. 28.
Traveling kit. J. M. Thomas. 1,535,351; Apr. 28.
Tree-sawing apparatus. D. Welch. 1,535,370; Apr. 28.
Tree surgery. C. M. Blume. 1,535,806; Apr. 28.
Truck. L. J. Becker. 1,535,712; Apr. 28.
Truck, Car. E. Latabaw. 1,536,230-36; Apr. 28.
Truck, Loading and unloading. W. T. Hellaway. 1,535,775; Apr. 28.
Truck, Plant-treating. G. H. Hayes. 1,536,001; Apr. 28.
Truck, Railway-car. F. E. Brust. 1,535,404; Apr. 28.
Truck, Six-wheel. W. C. Hedgcock. 1,535,413; Apr. 28.
Trunk, Wardrobe. E. W. Hawley. 1,535,119; Apr. 28.
Trunks, Garment-hanger support for wardrobe. W. H. Harrison. 1,535,223; Apr. 28.
Trunks, Garment-hanger-supporting mechanism for wardrobe. W. H. Harrison. 1,535,222; Apr. 28.
Tube: *See*—
Collapsible tube. Heat-transmission tube.
Tube-end clamps, Assembling device for. T. P. Little. 1,535,267; Apr. 28.
Tubing electrolytically, Method and apparatus for forming. E. Crowell. 1,535,400; Apr. 28.
Tubular box. F. J. Dolan. 1,535,522; Apr. 28.
Turbines, Blading of axial. F. Lloyd. 1,535,612; Apr. 28.
Turning irregular objects, Machine for. H. F. Loewer. 1,535,678; Apr. 28.
Turntable, Automobile. E. B. Iseman. 1,535,607; Apr. 28.
Twister. J. T. Leech. 1,535,523; Apr. 28.
Typewriting machine. M. Garbell. 1,535,152; Apr. 28.
Typewriting machine. E. G. Latta. 1,535,222; Apr. 28.
Typewriting mechanism, Remote-control. I. Nachumsohn. 1,535,176; Apr. 28.
Umbrella. H. Garfinkel. 1,535,998; Apr. 28.
Vacuum jars or similar articles, Bottle holder for. G. E. Savage and L. H. Wilkinson. 1,535,864; Apr. 28.
Valve. H. J. Ernst. 1,535,405; Apr. 28.
Valve. A. W. Morse. 1,535,353; Apr. 28.
Valve-actuating mechanism. J. J. Morsch. 1,535,786; Apr. 28.
Valve, Hydrant. J. W. Flower. 1,535,912; Apr. 28.
Valve, Pneumatic control. C. H. Hanson. 1,535,533; Apr. 28.
Valve, Pump. J. Astrom. 1,535,644; Apr. 28.
Valve, Pump. M. Belcher. 1,535,898; Apr. 28.
Valve retainer, Needle-. G. A. Eynon. 1,535,406; Apr. 28.
Valve, Spray. C. W. Clements. 1,535,902; Apr. 28.
Valve-spring compressor. G. C. Wilson. 1,535,976; Apr. 28.
Valve-stem silencer. G. B. Dobson. 1,535,583; Apr. 28.
Valve-testing device. S. J. Burns. 1,535,099; Apr. 28.
Valve, Thermostatic. F. C. Leonard. 1,535,485; Apr. 28.
Vanity case. W. M. Langsdorf. Des. 67,149; Apr. 28.
Vanity case or similar article. W. G. Kendall. Des. 67,148; Apr. 28.
Variometer. R. W. Canfield and E. G. Danielson. 1,535,264; Apr. 28.
Vehicle. E. J. Schramke. 1,535,950; Apr. 28.
Vehicle bodies, Top construction for. H. C. Maise. 1,535,236; Apr. 28.
Vehicle-body, Convertible. E. J. Punchel. 1,535,494; Apr. 28.
Vehicle bumper. F. A. Bond. 1,535,145; Apr. 28.
Vehicle bumper. W. R. McGowen. 1,535,169; Apr. 28.
Vehicle bumper. W. R. McGowen. 1,535,172; Apr. 28.
Vehicle curtains, Light for. W. E. Bishop. 1,536,037; Apr. 28.
Vehicle doorcheck. F. K. Eastman. 1,535,113; Apr. 28.
Vehicle lock, Motor-. L. C. Vanderlip. 1,535,371; Apr. 28.
Vehicle signal, Motor-. C. F. Klingel. 1,535,164; Apr. 28.
Vehicle spring. B. E. Stoddard. 1,535,744; Apr. 28.
Vehicle traffic-signal housing. E. E. Bechtold. Des. 67,117; Apr. 28.
Vehicle wheel. P. Lambertus. 1,535,121; Apr. 28.
Vehicle wheel. C. Roche. 1,535,497; Apr. 28.
Vehicle wheel mounting. C. A. Neracher. 1,535,435; Apr. 28.
Vehicles, Adjustable bumper for. W. R. McGowen. 1,535,171; Apr. 28.
Vehicles, Controlling mechanism for motor. W. T. Sears. 1,535,866-7; Apr. 28.
Vehicles, Extended-load danger signal for. F. M. McLemore. 1,535,844; Apr. 28.
Vehicles, Side illuminating device for. R. T. Biddle. 1,535,894; Apr. 28.
Vehicles, Splash-preventing attachment for motor. C. Anderson. 1,535,444; Apr. 28.
Vehicles, Stake retainer for. N. Milner. 1,535,128; Apr. 28.
Vessel, Containing. H. S. Hele-Shaw and E. Tribe. 1,535,308; Apr. 28.
Vibratory system. H. C. Harrison. 1,535,527; Apr. 28.
Vibratory system. J. P. Maxfield and H. C. Harrison. 1,535,538; Apr. 28.
Volt-ampere meter. R. D. Evans and R. T. Pierce. 1,535,590; Apr. 28.
Wall construction. P. D. Warner. 1,535,514; Apr. 28.
Wall construction, Mold for. F. C. Croll. 1,535,296; Apr. 28.

Wall, Sea. C. H. Ruggles. 1,535,792; Apr. 28.
Washing machine. M. Brandt. 1,535,800; Apr. 28.
Watchcase appendage. A. F. Conant. Des. 67,121; Apr. 28.
Watch holder. H. Bamberger. 1,535,685; Apr. 28.
Water-charging apparatus. B. H. Savage. 1,535,793; Apr. 28.
Water heater. W. R. Bellman. 1,535,288; Apr. 28.
Water heater. F. O. Race. 1,535,376; Apr. 28.
Water-heater controller, Automatic. A. Wild. 1,535,103; Apr. 28.
Water, grain, or the like, Apparatus for lifting. F. H. Colpitts. 1,535,147; Apr. 28.
Waterproofing of fabric articles. A. G. Harrington. 1,535,990; Apr. 28.
Water sprinkler, Rotatable. W. C. Todd and J. W. Pomeroy. 1,535,506; Apr. 28.
Water-supply system. G. A. Hatton. 1,535,154; Apr. 28.
Waving machines, Electric heater for permanent. G. Lantieri. 1,535,123; Apr. 28.
Weft-detecting mechanism. W. H. Wakefield. 1,535,362; Apr. 28.
Welding, Arc. O. H. Buchholz. 1,535,586; Apr. 28.
Welding machine, Automatic. W. H. Himes. 1,535,605; Apr. 28.
Welding-machine guide. T. H. Kane. 1,535,477; Jan. 28.
Well drill, Rotary. N. S. Burton. 1,535,672; Apr. 28.
Well heater, Oil. G. S. Hollister. 1,535,770; Apr. 28.
Wheel: *See*—
Gravity wheel. Sprocket wheel.
Spring wheel. Vehicle wheel.
Wheel gauge. V. Campas. 1,535,574; Apr. 28.
Wheel-removing device. A. C. Brejska. 1,535,762; Apr. 28.
Wheel rim. C. S. Ash. 1,535,196; Apr. 28.
Wigs, Manufacture of. G. Hupka. 1,535,580; Apr. 28.
Wind instruments, Adjustable reed in. W. Majeski. 1,535,537; Apr. 28.
Windmill. C. Andreini. 1,535,517; Apr. 28.
Windmill head. C. J. L. Dyer. 1,535,535; Apr. 28.
Windshield. A. T. Potter. 1,535,250; Apr. 28.
Winding machines, Builder mechanism for. C. A. Payne 1,535,948; Apr. 28.
Window-cleaning device. O. R. Gerdin. 1,535,504; Apr. 28.
Window closer. E. H. Hilson. 1,535,406; Apr. 28.
Window-control means. A. R. Clas. 1,535,989; Apr. 28.
Window-control mechanism. A. R. Clas. 1,535,988-8; Apr. 28.
Window-sash lock. E. Hines. 1,535,156; Apr. 28.
Window screen. G. L. Houstoun. 1,536,005; Apr. 28.
Window-screen lock, Sectional. H. R. Ellis. 1,535,518; Apr. 28.
Window-shade roll and holder therefor. P. Ferrara. 1,535,591; Apr. 28.
Window structure. J. C. Wegstein. 1,535,278; Apr. 28.
Window structure. J. Worcelle. 1,535,977; Apr. 28.
Wrench: *See*—
Friction wrench. Pipe wrench.
Wrench. J. Zilliox. 1,535,281; Apr. 28.
Yarn winding and spinning machines, Builder mechanism for. H. A. Leonard. 1,535,729; Apr. 28.
Yarn-winding machine. J. J. Cannon. 1,535,573; Apr. 28.
X-ray filter or screen. S. Tousey. 1,535,350; Apr. 28.
X-ray tubes, Protector for. R. L. Edwards. 1,535,366; Apr. 28.
Zinc vapors, Condensing. O. Ravner. 1,535,252; Apr. 28.
Zirconium-containing ores and other products containing dioxide of zirconium, Reducing. O. Ruff. 1,535,687; Apr. 28.

CLASSIFICATION OF PATENTS

APRIL 28, 1925.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 1: 1,535,913
47: 1,535,704
2— 36: 1,535,650
42: 1,535,795
140: 1,535,668
175: 1,535,599
4— 1: 1,535,517
57: 1,535,592
153: 1,535,130
6— 119: 1,535,606
264: 1,535,116
6— 1: 1,535,920
7— 17: 1,535,524
8— 6: 1,535,153
18: 1,535,152
19: 1,535,253
9— 21: 1,535,461
10— 130: 1,535,726
136: 1,535,773
139: 1,535,104
11— 1: 1,535,415
12— 51: 1,535,373
142: 1,535,609
15— 33: 1,535,788
104.16: 1,535,115
126: 1,535,304
128: 1,535,955
147: 1,535,540
150: 1,535,767
174: 1,535,161
193: 1,535,629
220: 1,535,040
16— 6: 1,535,921
1,535,922
1,535,923
23: 1,535,113
36: 1,535,446

	Notice of cancellation	1

TABLE OF CASES REPORTED.

	Page.
[d] American Cone & Wafer Co. et al. v. Denare	8
Putnam. Ex parte	789
[*] Stevens v. Ciulee	529
[d] Supreme Mfg. Corporation v. Security Mfg. Co.	529
[*] Tupelo Cotton Mills v. American Bleached Goods Co., Inc.	791
Ulmann. Ex parte	8
[**] Warner & Company, William R., v. Eli Lilly & Company	287
[*] Waters v. Holsing	283

[Decisions of the United States Circuit Court of Appeals are indicated by the letter (d); of the Court of Appeals of the District of Columbia by one star (*); and of the Supreme Court of the United States by two stars (**).]

ERRATA.

1,537,028, page 275, heading, line 2, after the residence of patentee, insert *assignor to Davis Brake Beam Company, Johnstown, Pa., a Corporation of Pennsylvania.*

1,537,956, page 304, in heading, assignment, name of assignee, for "George S. Meyers" read *George S. Myers.*

Vol. 334.

Patents Nos. 1,536,046 to 1,537,053.

THE OFFICIAL GAZETTE OF THE United States Patent Office.

Vol. 334—No. 1. TUESDAY, MAY 5, 1925. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $5.00 per annum; single numbers, 10 cents each.
PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.
CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Notice of Cancellation.

U. S. Patent Office, *Washington, Apr. 6, 1925.*

F. De Martino, his asrigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of Frank J. Conjurske, 12 Cedar Street, Sturgeon Bay, Wis., to effect the cancellation of the trade-mark registration of F. De Martino, of 1027 Bridge Street, Altoona, Pa., No. 106,649, dated October 26, 1915, and the notice of such proceeding sent by registered mail to the said F. De Martino at the said address having been returned by the post-office authorities as undeliverable, notice is hereby given that unless said F. De Martino, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

KARL FENNING, *Acting Commissioner.*

Disclaimer.

1,131,361.—*Frederick Laren Gallop*, Media, Pa. Process of Making Granular Nitrate of Ammonia. Patent dated March 9, 1915. Disclaimer filed March 26, 1925, by the assignee, *E. I. du Pont de Nemours & Company.*

Hereby enters its disclaimer to such parts of the thing patented as it does not choose to claim or to hold by virtue of the above-mentioned patent or assignments as follows:

To the process specified in claim 1, except as applied to the concentration of ammonium nitrate liquors to crystallising temperatures at which an appreciable amount of water is still contained in the liquor when cooling is begun.

To the process specified in claim 2, except when the step of crystallization is so carried out as to cool the ammonium nitrate liquor relatively slowly and to a degree of concentration at which an appreciable amount of water is still contained in the liquor when cooling is begun.

To the process specified in claim 4, except when the ammonium-nitrate liquor is cooled relatively slowly.

ADJUDICATED PATENTS.

(C. C. A. Pa.) The Rousso patent, No. 1,157,046, for towel cabinet, claims 1, 2, 3, and 5 *Held* invalid. *Rousso* v. *Barber*, 3 F. (2d) 740.

(C. C. A. Ill.) The Alexander patent, No. 1,384,035, for cooking utensil, claims 1, 2, and 3 *Held* invalid. *Alexander* v. *Belson*, 3 F. (2d) 801.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,299,595, M. H. Loughridge, Cab signal and train-control system, decided March 25, 1925, claim 78.

Pat. 1,405,204, J. B. Graham, Machine for making hollow glassware, decided April 4, 1925, claims 4 and 5.

Rule 72.

Rule 72. After the completion of the application the Office will not return the specification for any purpose whatever. If applicants have not preserved copies of the papers which they wish to amend, the Office will furnish them on the usual terms.

The drawing may be withdrawn only for such corrections as cannot be made by the Office; but a drawing cannot be withdrawn unless a photographic copy has been filed and accepted by the Examiner as a part of the application. Permissible changes in the construction shown in any drawing may be made only by the Office and after an approved photographic copy has been filed. Sketches filed to show proposed changes in construction must be in permanent ink. (See Rule 30.) Substitute drawings will not be admitted in any case unless required by the Office.

DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decisions.

EX PARTE ULMANN.

Decided July 18, 1924.

1. FOREIGN PATENT—PUBLICATION OF.

The so-called publications or notices in the Swedish newspapers concerning Swedish patents and the laying open of such applications for public inspection do not constitute either publications of or patents for the inventions involved.

2. SAME—SAME.

The real date of publication (offenliggjort) is at the end of the specification of a Swedish patent.

3. SAME—AS A BAR UNDER SECTION 4887, REVISED STATUTES.

If a foreign patent is not a bar as a publication to an application filed in this country by the same inventor more than one year after the filing of the foreign application and disclosing the same invention, it is not a bar as a patent under section 4887, Revised Statutes, unless the claims of the application cover the same invention as that covered by the foreign patent.

ON PETITION.

Messrs. Langner, Parry, Card & Langner for applicant.

ROBERTSON, *Commissioner:*

Petitioner requests the Commissioner to instruct the Examiner to withdraw Swedish Patent No. 49,991 as a reference and allow the application.

The application is not rejected on the reference as a patent, but as a publication, and the Examiner holds that it has been a publication practically since the date of the application on which it was granted. In this contention he is believed to be in error.

[1, 2] The so-called publications made in the British Official Journal and the German Imperial Gazette concerning applications for patents, and the laying open of such applications for public inspection, do not constitute either publications of or patents for the inventions involved. *Parkin and Wright v. Jenness*, 63 O. G. 759; 1893 C. D., 64. The same is true of the notices in the newspapers concerning Swedish applications and the laying open of such applications for public inspection. The real date of publication, "offenliggjort," is at the end of the specification of a Swedish patent. In the present case the applicant states that this date is September 7, 1921, and it is not disputed by the Examiner. This date is long subsequent to the applicant's original filing date in this country.

[3] It is not stated whether the present application claims the invention covered by the claims of the Swedish patent or not. The oath in this application, which is a division of an older application which acknowledges the Swedish application, does not mention the Swedish patent or the application on which it is based. If the present application covers the same invention as the Swedish patent, the oath should acknowledge such Swedish application and the corresponding patent, but applicant would not be entitled to the benefit of the Nolan Act even after filing an amended oath because Russia has not extended to citizens of the United States reciprocal privileges within the meaning of that act. If this application does not claim the same invention as that covered by the Swedish patent, the latter is not a bar to the grant of a patent. *Western Electric Co.* v. *Telephone Co.*, 106 Fed. 215; *Accumulator Co.* v. *Electric Co.*, 64 O. G. 559; 1893 C. D. 437; *Westinghouse Electric & Mfg. Co.* v. *Stanley Instrument Co.*, 138 Fed. 823; *United Shoe Machinery Co.* v. *Duplessis Machinery Co.*, 148 Fed. 31.

The petition is granted to the extent indicated and the case is remanded to the Examiner for further action.

U. S. Circuit Court of Appeals—First Circuit.

AMERICAN CONE & WAFER CO. ET AL. *v.* DENARO.

Decided April 17, 1924.

[297 Fed. Rep. 913.]

1. CLAIMS—AMENDMENT OF—FEATURE HAVING IMPORTANT INHERENT FUNCTION NOT PREVIOUSLY MENTIONED.

Claims inserted by amendment about two years after the filing of the original application, limited to cover a feature by means of which an important function is performed, which is obvious and inherent within the mechanism claimed in the original application, were correctly allowed, although the function had not been previously mentioned.

2. ANTICIPATION—NEW AND IMPORTANT FUNCTION—NON-ANALOGOUS ART.

A patent for molding and baking ice-cream cones, which covers a conical core that serves the additional function of stripping the baked cone from either section of a divided outer mold to which it may stick, is not anticipated by a patent for a machine in which glass insulators are molded where if the glass in cooling should adhere to the side of the mold it could be broken off only by the use of a cold chisel.

3. INVENTION—NEW AND BENEFICIAL RESULT.

Where a patentee made use of well-known elements, yet by a new combination and sequence of operations he produced a new and beneficial result never obtained before and largely cheapened the cost of production of ice-cream cones, there is evidence of invention.

APPEAL from the District Court of the United States for the District of Massachusetts; George W. Anderson, judge.

Suit in equity by the American Cone & Wafer Company and others against James Denaro. From a decree (283 Fed. 1011) dismissing the bill, plaintiffs appeal. Reversed and remanded.

Certiorari denied by U. S. Supreme Court October 20, 1924.

Mr. Albert E. Dieterich and *Mr. Frederick A. Tennant* (*Mr. Nathan Heard* on the brief) for the appellants.

Mr. Jesse A. Holton for the appellee.

Before BINGHAM and JOHNSON, Circuit Judges, and MORRIS, District Judge.

JOHNSON, *Cir. J.*:

This is a suit for infringement of Letters Patent No. 1,071,027, issued August 26, 1913, to Frederick A. Bruckman for an automatic pastry-making machine, especially adapted to the manufacture of ice-cream cones without the intervention of any hand manipulation.

Previous to Bruckman, ice-cream cones had been made by baking them in mold cavities, from which it was necessary to remove them by hand. This work was not only hot and difficult, but was carried out under conditions which were more or less unsanitary, and, when sugar was used to sweeten them, the adherence to the mold surfaces was so great that their removal was accomplished with difficulty. This has been overcome in the Bruckman patent by a very simple, but none the less ingenius device. Bruckman has made use of well-known instrumentalities in the form of a rotatable wheel on which molds, made in two sections, are mounted, and to which the batter is transferred automatically, the molds are locked, and heat is applied to them. After the cones have been baked a predetermined time, the core, which has been locked into the molds, is first slightly raised in the baked cone to extract it from the cone; then, while the core is projected into the cone, the molds are unlocked, its sides are separated, and the core serves as a finger to strip the cone from either side of the molds to which it is likely to adhere, as these sides are corrugated to cause the molded product to cling to them and permit the core to be raised.

It is this slight raising of the core within the cone, and its use while projected into the cone to strip the cone from either side of the mold, that Bruckman claims to be the most important contribution which he made to the art of baking ice-cream cones.

Of the 70 claims of the patent, 15 are alleged to be infringed by the defendant. Two of these claims, 7 and 69, contain all the elements employed by Bruckman, except that of trimming the cones, and are as follows:

7. In a machine of the class described, an automatically actuated step by step rotatable wheel, molding devices carried by said wheel, a stationarily held tank for the substance to be molded, means for transferring the moldable substance from said tank to said molding devices as said molding devices pass said tank to load said molding devices, means for discharging the molded product from said molding devices at a predetermined place, and means for applying heat to said molding devices during their movement between the position at which they are loaded and the position at which they are unloaded.

69. In a machine of the character stated, a rotatable structure including a set of molding devices, said set of molding devices comprising a sectional mold, and a core therefor, an arm pivoted on an axis in a plane at right angles to that containing the axis of rotation of the rotatable structure, means securing said core to said arm, means for opening and closing said sectional mold, means for moving said arm on its pivot to remove and restore the core from and to the sectional mold, means for supplying batter to said molding devices when said core is out of said mold, means for turning said rotatable structure, means for baking the batter in the mold, and means for discharging the contents of said mold.

The other claims relate to subcombinations, which set forth in wearisome and unnecessary repetition the instrumentalities employed in the patent in suit.

The extraction of the baked cone from the molds, which is claimed to be the principal contribution of Bruckman, is described in claims 66 and 67. Claim 67 is as follows:

67. In a machine of the class described, a rotatable wheel, molding devices carried by said wheel, said molding devices each including a sectional mold and a core therefor, means for supporting said mold sections, means for opening and closing said mold sections at times, means for supporting said core, and means for lifting said core in said mold sections before said mold sections are opened, to thereby strip the molded product from said core, and means for holding said core, after it has been lifted, to project into the molded product until said mold sections have been opened to discharge the molded product.

Claim 66 differs from claim 67 only in that it is stated that the core is "slightly" lifted while it remains in the mold sections before said mold sections are opened.

Unless the extraction method, which is strongly contended is the central and important principle of Bruckman's invention, can be found in these claims, the finding and ruling of the district court that the patent in suit is not a pioneer in its field, and therefore entitled to only a narrow and technical construction, must be affirmed; but if it can be found in them, in the light cast by the drawings and specifications, Bruckman made a valuable contribution to the art, and produced a result never before accomplished, and not only these claims, but the other claims in the suit, should be given a liberal construction.

Claims 66 and 67 were inserted by amendment about two years after the filing of the original application, and when they were submitted the attorney for the applicant, in a letter to the Examiner, stated:

Regarding claim 66, it will be noticed that, in applicant's case, the core is first slightly lifted, while projecting into the mold to strip the molded product from the core, after which, the molds open while the core still projects into the molded product so that the core acts as a finger to strip the molded product from the female molds in turn. Now claim 66 has been amended to clearly set forth that the lifting of the core takes place while it remains in the mold and the lifting is but slight.

Claim 67 is not met by the references, for the reason that it includes means for holding the core (after the core has been lifted) to project into the molded product; that is, for the purpose of acting as a finger to strip the molded product from the female molds.

These amended claims were filed under the supplemental oath of the applicant, and even if they added new matter were correctly allowed. We think, however, that the principle of operation described in them was contained in the original application, construed in the light of the specifications and drawings.

Claims 34, 35, 36, and 37 of the original application all describe the lifting of the core in the mold "to disengage the molded product," and claim "means" for separating the mold sections, "when unlocked, to discharge the contents thereof."

In his specifications the applicant states:

When the mold reaches the position A the roller 14ª on the end of the carrier will ride up on the track 47 to slightly raise the cores 15 out of the mold 8, the swivel ball connection between cores 15 and the head 14ᵇ being such that this movement may take place without disturbing the centering of the cores 15 in the cone.
